TOBACCO

A WEEKLY TRADE REVIEW

ESTABLISHED 1886

Vol. LXXVI. No. 1 NEW YORK, MAY 3, 1923 Per Annum, $3.00 Per Copy, 10 Cents

Wisconsin Tobacco Pool Still Holds Spot Light

Continues to Give Out Interesting Arguments—Its Activities Command Attention In and Out of the Trade—Members Keep Up Running Fire of Complaints to the Press.

EDGERTON, Wis., April 29.—The pool's activities are still the center of things. It continues to give out "interesting arguments" anent controversies, as regularly as ever. It commands universal interest within the trade and out. The Chicago *Tribune,* and the Middle Western press in general is devoting an astonishing amount of attention and space to learned speculation and discussion of the general co-operative movement. The high schools and universities in this section of the Nation have found out that the pool furnishes a copious supply of material for their debating teams. Perhaps no economic idea of recent times has so intrigued the public attention since the wave upon which Bryan so spectacularly rode into the public's ken with his silver tongue and "Cross of Gold."

He "Do Move," When Once Started

The supposedly stoic farmer of the Mississippi valley has often in the past surprised the nation by the radical schools of economic thought his ponderings and meditation have brought forth. He is slow in action, tardy in his conclusions, but deeply sincere and capable of sustained effort, when he does swing into action. The cities have always had their "soap-box orators." Usually the action actually brought about has been less vigorous and effective than the noise and agitation prevalent in the early stages would cause a bystander to predict. Once the farmer is under way, however, the whole horizon is violently agitated. The vigor and scope of his endeavors produce enormous changes overnight. He will determinedly assault any institution, regardless of its past prestige, once he makes up his mind to do so.

Somwhat Perplexing

The suddenness and vigor of the co-operative movement has been typical of all this. But, after sweeping all opposition before it, it is now seriously threatened and top heavy. The growers' hopes are now falling short of their goal on account of their "child" being unable to sell their binders for them. Like a full back who charges at the line like a bull and falls under his own impetus when no opposition is met, the pooled grower is disheartened by the mere unexpectedness of it all. They fully expected tough opposition from "the interests." The lack of it, or the apparent lack of it, leaves them no one to fight but each other.

Like a "Wet Blanket"

The pool's packing message, and the announcement of a closing date for the sale of tobacco in the bundle, strikes a chill to their enthusiasm. They all know what the packing of tobacco entails. It has a familiar, but unwelcome ring to most of them. This is because of the old local pools, or "equities," who packed tobacco similiarly for the farmers in 1918-19-20; tobacco which is still unsold.

Turn Attentive Ear to Old Friends

Heretofore, the farmers, and their oracles, have always laid the blame to the fact that they were not organized. Now many of them are coming to their old friends, the buyers, and are really listening to them as sincere beliefs. It used to go in one ear and out the other with them, labeled as propaganda in order for the farmer to be put in the proper frame of mind to be fleeced the following year. Now the 'weight hog" grower will really listen to advice upon seed. The "acre hog" nods his head seriously now in talking rotation of crops, and the essential demands of the proper fertilizing of his fields. The pool officials are also doing some able propaganda work concerning the raising of tobacco. The pool paper reaches all the growers, and the peerless Professor Johnson is taking up much space therein with excellent advice to the grower upon everything incident to the raising of tobacco.

Lurid Lamentations

Letters continue to pour into the press concerning the pool. The *Wisconsin Tobacco Reporter* selected another one to print the past week. It is only the conservative one that see the print. Here is the one printed last week:

"We have read from time to time the different views of the Pool. I am about sixty years old, and I have been a farmer and a tobacco raiser all my life, and the fact is, I joined the pool.

"My reasons were, we had been led to believe by speakers, well paid by the state, that to join the pool was the only thing to do. We listened to their eloquence, and they told us we were being robbed by the middlemen, as they called them. They also told us we should not dump our crops direct on the market, but should hold them, and sell direct through the pool organization to the manufacturers at such times as they should need the tobacco.

"In order to do this, we must join the pool and appoint men to sell our tobacco for us. Some of us argued that we had tried that with our 1918 tobacco and that a quantity of that tobacco is still unsold. But we were willing to give it one more trial after being convinced by those speakers that we would have a perfect organization and reliable men to do our business. It would cost us the small sum of $5.00 to join, and as soon as our tobacco was ready for delivery we would receive a cash payment of half its value, and we were led to believe that this would be a great deal more than we received for our entire crop in former years.

But to our great disappointment things have changed. We are compelled to accept stemming prices for our whole crop after obeying the orders of our manager and stripping our crop in three grades and sometimes four grades, and we have no choice in the matter.

"In former years we had the liberty of doing as we pleased. Now many of us had no choice. We are ordered to bring in our stemming and in a few days are ordered to bring in our good tobacco (best grade) for which we receive stemming prices and a payment so small it makes us feel like driving home by way of some back road for fear of meeting someone we owe a few dollars and had promised to pay when we had sold our tobacco.

"But as stated before, it was pointed out to us by the speakers what a great saving it would be for us to cut out the expense of the middleman and have our crops sold directly to the consumer.

"Have they done this? No. The only difference is, that instead of the so called middleman giving us our check, he gives it to the pool, and in turn the pool representative makes us out one for a small portion of the total.

"The pool has made it more pleasant for the middleman. Now at our expense we employ a large number of men in each tobacco section whose business it is to travel from farm to farm all over the state and gather samples from each crop. These samples are shipped to some central point where it is convenient for the buyers to look for them, and I have heard several of the middlemen speak how much more pleasant it is for them to sit along side a radiator and look over the samples than the old way of riding over the rough roads and looking at bundles in a shed in zero weather.

"And the worst part of this is that we have to stand for all this expense and then be forced to deliver our crops, both good as well as stemming, at several cents a pound less than our neighbors who outside of the pool are getting for the same grades."—(Signed) J. O. VENAAS, a Pool Member.

Seeking More Members

The pool for the past week has been having a series of meetings at different points throughout the state. This series ends with a monster rally at Edgerton on May 5. The purpose is new membership. Each member is supposed to put in a half day each week in an endeavor to get one new signer.

The country districts are being thoroughly scoured for old tobacco in cases, with almost none to be found.—BADGER.

Tobacco Salesmen's Board Meeting

The Board of Governors of the National Board of Tobacco Salesmen's Associations held their regular semi-annual meeting at their office, 123 Liberty street, New York City, Monday April 30. The following were present: President Jonas J. Ollendorff of New York City, First Vice-President E. M. Freeman of Newark, N. J., Third Vice-President Max Berliner of New York City, Secretary A. Brown of Newark, N. J., Assistant Secretary C. I. Miller, Sid J. Freeman of New York City, Albert Freeman of New York City, John Frischberg of Boston, Mass., Harry L. Whipple of Boston, Mass. and Joseph Ogush of Jersey City, N. J.

The National Board of Tobacco Salesmen's Associations went on record as endorsing the Tobacco Exposition to be held during the week of January 28 to February 2, 1924 at the 71st Regiment Armory; that the Convention of the National Board of Tobacco Salesmen's Associations and their affiliated branches have been instrumental in keeping the cigar and tobacco salesmen within due bounds.

The Tobacco Salesmen's Association stands for clean and wholesome competition. They are opposed to price cutting that is detrimental to the best interests of the jobbing interests of the country. They stand for truthfulness, honesty and conscientiousness.

The President, Jonas J. Ollendorff reported that the National Council of Traveling Salesmen have gone on record to back the National Board of Tobacco Salesmen's Associations at any time in their fight against anti-tobacco propaganda. The National Council of Traveling Men have a membership of 150,000 salesmen throughout the United States.

If the cigar manufacturers and jobbers desire to have good, honest, dependable men. they should see that the men are members of the National Board of Tobacco Salesmen's Associations.—E. M. FREEMAN, Publicity Director.

Prices Maintained at Rotterdam

AMSTERDAM, Holland, April 28—Prices ruled high at the inscriptions in Rotterdam yesterday. The principal American buyers were:

H. Duys & Co., securing 700 bales, including these marks, Pvd A/H; Pvd K/Deli; D. C. M. Deli; D. C. M. Deli/M.

Hinsdale, Smith & Co., 330 bales.

Manus, Muller & Co., 200 bales.

Prominent Men to Speak at T. M. A. Convention

Charles Dushkind, Managing Director of the Tobacco Merchants' Association, has just announced that two members of President Harding's Cabinet will speak at the coming convention of the T. M. A.

According to Mr. Dushkind's announcement, the Hon. Herbert Clark Hoover, Secretary of Commerce, will address the convention proper, while the Hon. Henry Cantwell Wallace, Secretary of Agriculture, will speak at the banquet.

Among the other notables who will speak are General Herbert Mayhew Lord, Director of the Budget, and Herbert Kaufman, the famous writer, philosopher and poet. Other speakers will be announced later.

A meeting of the Executive Committee of the T. M. A. was held at the offices of the association on Tuesday, May 1, for the purpose of passing upon the final arrangements for the convention and banquet.

T. M. A. To Be Represented At Commerce Meeting

The Chamber of Commerce of the United States will hold its eleventh annual meeting in New York City on May 7 to 11, inclusive.

The meeting will be centered around the subjects, "Transportation in All Its Phases in the United States" and "Europe and Europe's Affairs." The different questions to be considered will be approached in their relation to the general subjects and considered from that point of view.

The problems affecting railroads, ocean

The pages which are missing were removed because they were advertisements

transportation, highways, electric railways, aerial transportation, electrical communications, and postal facilities are so complex and so interrelated that they require concerted study and action to insure a proper and balanced adjustment of a transportation system which will serve all efficiently and economically.

The adjustment of Europe's affairs upon a sound foundation, both from a financial and economic point of view, is essential to the re-establishment of the commerce and industry of the world upon a stabilized basis and the continuance and growth of the industrial, agricultural, financial and commercial activities of the United States.

The railroad rate structure, the public interest and the right to strike, co-operation between waterways and railroads, co-ordination between motor truck and railroad transportation, co-ordination of railroads, waterways and highways, the farmer's interest in transportation, financial support, establishment of credit, the Government and the railroads, foreign trade, foreign affairs, reparations, intergovernmental debts, foreign credits, and depreciated currencies are among the subjects which will be dealt with specifically and which are of vital interest to every business man in America, whether he be a retailer, a wholesaler, a banker or a manufacturer.

The tobacco industry will be splendidly represented by the following delegates appointed by the T. M. A. to represent it at the meeting:

H. H. Shelton, National Councillor.

Jonathan Peterson, president, United States Tobacco Co.

Fred Hirschhorn, president of General Cigar Co.

James M. Dixon, president of Tobacco Products Corp.

F. L. Fuller, counsel for Liggett & Myers Tobacco Co.

W. B. Bell, of counsel for P. Lorillard Co.

Aaron J. Bach, of Elias Bach & Son.

Louis Cahn, vice-president of Consolidated Cigar Corp.

Leaf Board Committees Appointed

Jerome Waller, recently elected to the office of president of the Leaf Tobacco Board of Trade of New York, has sent an eloquent appeal to the members of the board asking for their co-operation and support, and pointing out the many ways in which the organization can assist the industry. In his communication, Mr. Waller says:

"After nine years of faithful and diligent service, your President, Mr. Joseph Mendelsohn, has stepped down and I was honored by being elected as his successor. During his incumbency in office, your Board has thrived and flourished, through his indefatigable efforts, and to worthily succeed him is a big task. He leaves behind him large shoes for small feet to fill. Whether I can successfully do so rests with you.

"I shall endeavor to fill the office to the best of my ability but the success of the organization depends upon you more than it devolves upon me.

"The monthly meetings of the Board of Trustees do not spell the success of the organization nor does the annual meeting of the members, no matter how well it may be attended, mean success. These are only means to an end.

"Bear in mind that the organization is yours and to solve your problems they must be brought to us. When you are confronted with a trade problem, go to one of your Trustees or come to me and tell us your troubles so that we may thrash them out at our monthly meetings,—that your experience may be the means of formulating and promulgating regulations which will enure to the benefit of the trade at large as well as to yourself.

"If you will co-operate and help us to codify our trade regulations, our customs and our credits, we can entrench and fortify ouselves against the demands which modern merchandising is now making of every merchant. Let us inculate the spirit of brotherhood by applying the axiom 'One for all and all for one.'"

The committees for 1923-1924 have been appointed as follows:

Finance:—P. R. Lowe, Chairman, 155 Water Street, Morris Neuberger and Edwin S. Brill.

Arbitration:—Joseph F. Cullman, Chairman, 161 Front Street, P. R. Lowe, G. W. Spitzner, Menko Rose and A. Selgas.

Legislative:—John H. Duys, Chairman, 142 Water Street, Joseph Mendelsohn, Joseph F. Cullman, Jr., Benno Rosenwald and Henry Oppenheimer.

Statistics:—Fred Frese, Jr., Chairman, 172 Front Street, Ira Strouse and Henry Rothenberg.

Conference:—I. J. Jacoby, Chairman, 169 Water Street, Edgar Pretzfeld and Fred Bloch.

By-laws:—Henry Oppenheimer, Chairman, 182 Water Street, A. C. Weil and William Singer.

Regulations:—A. C. Weil, Chairman, 170 Water Street, S. Ruppin and N. Bijur.

Transportation:—Milton Samuels, Chairman, 165 Front Street, I. J. Jacoby, Ernest Ellinger, Henry Fisher and Jerome Kohlberg.

Membership:—Chas. R. Goldsmith, Chairman, 193 Front Street, Howard Friend and Morris Neuberger.

Insurance:—Benno Rosenwald, Chairman, 143 Water Street, J. D. Palmer and Jack Marqusee.

House:—Howard Friend, Chairman, 170 Water Street, Fred Frese, Jr. and Milton Greenhall.

Entertainment:—John H. Duys, Chairman, 142 Water Street, Harry S. Rothchild and Chas. W. Duignan.

March Internal Revenue Collections

WASHINGTON, D. C., May 1.—The Internal Revenue Bureau has just issued a statement showing the collection of taxes on large cigars during the month of March to be $3,849,624.48 as compared with $3,470,519.03 in March, 1922, which was an increase of $379,105.48. The taxes collected on small cigars for March this year were $74,932.05 as compared with $89,303.34 in March last year, or a decrease of $14,371.29. On large cigarettes the taxes collected in March this year were $10,258.94 as compared with $10,310.52, or a decrease of $71.58. On small cigarettes the taxes collected were $15,130,827.84 in March this year as compared with $10,908,135.46 in March last year, or an increase of $4,222,692.38. The taxes collected on snuff of all descriptions in March this year amounted to $752,758.77 as compared with $670,428.79 in March last year, an increase of $82,329.98. In March, 1923, the taxes collected on chewing and smoking tobacco amounted to $5,808,497.39 as compared with $6,191,274.47 in March, 1922, or a decrease of $382,777.08. On cigarette papers and tubes the taxes collected in March this year were $37,296.20 as compared with $82,615.62, a decrease of $45,319.42. Special taxes on the manufactures of cigars, cigarettes and tobacco amounted to $1,078.76 in March this year as compared with $3,562.16 last year, and miscellaneous collections under repealed laws relating to tobacco were $2,317.40 this year in March as compared with $1,684.54 in March last year.—LAMM.

Fear New Tobacco War

MUNFORDVILLE, Ky., May 1.—Governor Morrow was asked today by Hart County officials and nearly fifty tobacco growers for protection against increasing outrages by night raiders.

A renewal of the tobacco war seems imminent. Bands of raiders have swept over a considerable part of the county and torn the canvas covering from several thousand acres of tobacco plants, thereby ruining them and striking a blow at production. Reports today showed that in the last raids 1,500 yards of plant beds were stripped. The situation is so serious that a bloody outbreak is feared. Victims of the marauders are all growers who have failed to become members of any tobacco growers' organizations.

Similar depredations have occurred in Harrison and Bourbon Counties, and $2,000 reward was offered today for capture of the raiders.

Leaf Tobacco Held by Manufacturers and Dealers

April, 1923 and 1922, January 1, 1923 and October 1, 1922

WASHINGTON, D. C., April 30, 2 P. M.—These statistics represent for dealers in and manufacturers of tobacco other than the original grower: (1) The quantity of leaf tobacco reported as held by manufacturers who, according to the returns of the Commissioner of Internal Revenue, manufactured during the preceding calendar year more than 50,000 pounds of tobacco, 250,000 cigars, or 1,000,000 cigarettes, and by dealers in or manufacturers of leaf tobacco who, on an average, had more than 50,000 pounds of leaf tobacco in stock at the end of the four quarters of the preceding calendar year; (2) all imported leaf tobacco in United States bonded warehouses and bonded manufacturing warehouses.

*Leaf tobacco on hand April 1, 1923, includes 1,401,994,826 pounds, for which the "Marked weight" was reported (i.e., weight at time it was packed or baled), and 444,560,219 pounds for which the "Actual weight" was reported. The corresponding amounts included for 1922, were 1,382,952,926 and 401,597,836 pounds, respectively; for Jan. 1, 1923, 1,119,322,365 and 371,978,623 pounds, respectively, and for Oct. 1, 1922, 1,115,657,317 and 341,781,997 pounds, respectively. Allowance should be made for shrinkage on the amounts for which "Marked weight" was reported, in order to ascertain the actual weight. The total for April 1, 1923, includes 1,690,583,451 pounds of unstemmed and 155,971,594 pounds of stemmed leaf tobacco.

Guarantee Agency in New Location

The headquarters of the Government of Porto Rico Tobacco Guarantee Agency will henceforth be located at 136 Water street, New York City, instead of 126 Maiden Lane, as in the past.

Agent Dannahower and staff are now comfortably located in a suite at the new address which makes for more privacy for the chief, as he will have a room all to himself.

The new offices are right in the heart of the leaf tobacco section, and doubtless many in the trade will therefore avail themselves of the accommodations extended.

Factory Plans Complete

MARTIN, Tenn., April 28.—The Martin Chamber of Commerce has completed plans for the erection of the building to be occupied by the American Cigar Company. The subscribers to the fund have incorporated under the name of the Martin Improvement Company, which company will let the contract. R. A. Heavener, the architect, reports that just as soon as the plans are approved, he will have them ready to submit for the letting of the contract.

To Handle Hav-a-Tampa

Grosvenor Nicholas & Co., Inc., cigar importers and jobbers, 60 Broad street, have concluded arrangements with the Havatampa Cigar Co., of Tampa, Fla., for the distribution of Hav-a-Tampa cigars in New York, New Jersey, Connecticut and contiguous territory. Hav-a-Tampa cigars have been on the market for only a little more than two years, yet they have become one of the largest sellers in the South, making it necessary to enlarge the factory, which is now one of the largest in the Southern states. This factory is employing some 2,000 cigar makers, and is turning out cigars at the rate of a million every one and a half days. Grosvenor Nicholas & Co. have already received shipments, and the cigars are pleasing smokers.

Greeks Change Tax System

WASHINGTON, D. C., May 2.—The Department of Commerce has a cablegram from Athens stating that the Greek authorities have been persuaded to issue a decree which practically abolishes the control of foreign exchange in connection with the importation of tobacco. The Greek authorities are imposing in its place the export tax payable in sterling exchange. The export tax, the cablegram states, appears to be reasonable.

The Wisconsin Pool to Stop Showing Samples

EDGERTON, Wis., April 28.—The *Reporter* says:

"At a meeting of the executive committee of the Northern Wisconsin Tobacco Pool held at Madison Saturday, April 21, it was voted to stop showing samples of Pool tobacco on Saturday, May 12. Plans are now under way for packing the unsold portion of the southern tobacco at the different packing points. The tobacco is now being weighed up on the farms and payments made, and will be delivered at the different warehouses as fast as it can be taken care of. Some of this tobacco will be put up in the Pool warehouse in Edgerton, although Manager Devine is not able to give date at this time when work will start."

One Year of Co-operative Marketing

By CLARENCE POE

Editor of the Progressive Farmer

Although of our 1921 crops Texas, Mississippi and Oklahoma sold considerable cotton through co-operative marketing associations, Virginia and North Carolina considerable peanuts, and Kentucky much burley tobacco, nevertheless the 1922 crop was the first one produced by Southern farms of which any large per cent was handled co-operatively. As a South-wide matter, therefore, we are now winding up the first selling season of the co-operative marketing associations. Consequently it is fitting to inquire what lessons may be learned from our co-operative marketing experience thus far.

The writer has made a very diligent effort to keep in touch with all these co-operative marketing associations from Texas to Virginia, inclusive. He was scheduled for speaking tours in six of these twelve states during the organizing period, and helped in the organization of cotton, tobacco, and peanut associations —without money and without price in each case. We had no interest then except to get our farmers to "make themselves masters of their own industry" and we have no interest now except to help our farmers make the most effective use of the powerful weapon they have at last taken into their own hands.

I.—Co-operative Marketing Has Vindicated Itself

Co-operative marketing has vindicated itself. That much may be safely said as a result of the first year's South-wide test. As Josh Billings said, "It's no use to argy ag'in a success," and with 25 to 30-cent cotton and tobacco—well, hardly anybody any longer doubts that prices of both cotton and tobacco have been greatly bettered as a result of the gradual and orderly marketing growing out of co-operative organizations, although as yet but partially organized. With a great majority of the growers in, results will be all the more gratifying.

The farmers, too, have gratified their friends and confounded their enemies by the safe, capable, businesslike men generally elected as directors in all parts of the South. Growers have realized that they were setting up a great business and financial organization, and they have tried to find men who were not mere agitators or orators, but men of level head, sound heart, and strong backbone —and directors do need to be right in backbone as well as head and heart.

The men selected as managers of co-operative marketing associations, too, have generally been men of ability and fitness. Of course it was not always possible to get managers who were both intelligently sympathetic with co-operative marketing and highly capable business experts. Nevertheless, notably few serious mistakes have been made.

II.—Handling the Crop Mortgage Problem

The crop mortgage and credit system has proved perhaps the most serious external obstacles to co-operative marketing. The object of co-operative marketing is to make the farmer master of his own industry, but the crop mortgage too often deprives the farmer of the opportunity of even striving for his freedom. In the language of the Scriptures, "the destruction of the poor is their poverty."

Fortunately, however, as a result of the first year's test of co-operative marketing, thousands of business men have grown more sympathetic toward it. Bankers and merchants are more and more indicating their willingness to let any worthy farmer-customer give a crop mortgage and let the crop be sold through the co-operative.

This policy, if generally adopted, will mean a new day in the South. It will put the Southern farmer on a cash basis. It will enable the poorest farmer to get more horsepower, better implements and machinery, and thereby increase his earning power—and by that token become a better customer of our merchants. As the writer said fifteen years ago:

"The Southern merchant has sold Western meat and scooters and tobacco, when with prosperous patrons he might have quadrupled his profits by selling sulky plows and harvesters and carriages and pianos."

III.—Farmers Can Correct Mistakes

Of course some mistakes have been made. That was to have been expected. It is equally foolish either to give up co-operative marketing because mistakes have been made or to refuse to correct mistakes because it is natural for some to be made.

We found a director in one co-operative the other day who declared that he saw nothing but ruin for the farmer if the co-operative movement failed, and yet was threatening to give up the fight because of some mistakes he thought had been made in naming officials and fixing salaries. We reminded him of the wise saying that when a sensible man has stomach ache, he tries to get rid of the ache and not the stomach. So it is with every man who thinks he sees a mistaken policy in his co-operative—he should fight boldly, manfully, against what he thinks the wrong policy but not give up the stomach because of the ache!

As we told this friend, any co-operative marketing association with all of its initial mistakes is even then a better system of selling crops than the old system, and there is this further important difference, that with co-operative marketing, farmers (if they have the information—and they have a right to require that) can correct any mistakes, whereas they are absolutely powerless to correct any hurtful faults in the old system of selling. Furthermore, we may add that later investigation showed that our friend's criticisms were largely based on misinformation.

IV.—We Must Have Local Organizations

After talking with representatives of co-operative marketing organizations all the way from California and Arizona on the west to Virginia and Maryland on the east, we are convinced of two things:

1. The greatest need of co-operative marketing is strong local organizations.

2. The greatest danger of co-operative marketing organizations is the acceptance of salaried positions in the organizations by men chosen as directors, and this should be promptly safeguarded to prevent future abuses.

We have often discussed the need for local organizations. As Charles W. Pugsley, Assistant Secretary of Agriculture, said recently:

"The most important factor in the success of any farmers' organization is the active interest of individual members. The cause of the death of practically every organization that has ceased to function can be traced directly or indirectly to the lack of the individual member's interest. Officers of the right sort may be able to maintain the influence of a farmers' organization for a time, but it is impossible for them to maintain it indefinitely. When members are not individually a vital part of an organization the officers soon become of no more force as officers than they would be as individuals. Strong *local units* are necessary to maintain members' interest in any large organization."

Very often enemies of co-operative marketing come along with falsehoods about the co-operative. With a strong local unit, such falsehoods can be exploded. Almost as often, there are some real defects in a co-operative that need correction. If the members come together in a local organization, they can consider such defects and petition for remedy. In almost every neighborhood, too, there are outsiders who ought to join the co-operative. If there is a strong local organization, ten times as

How we feel about JOHN RUSKIN

Best and Biggest

The dealers' success—and ours—depends upon permanent trade. We'd both go out of business if we depended upon the fellow who shops around from store to store, from cigar to cigar.

Our first consideration, therefore, has been to make the John Ruskin Cigar so good that it will make permanent customers for ourselves and our dealers.

The record for "repeats" that this cigar has made proves that we have moved in the right direction. It holds the trade of every smoker who is seeking the "Best and Biggest" cigar on the market, at its price.

American Can

CONTAINERS OF TIN PLATE · BLACK IRON · GALVANIZED IRON · FIBRE

TRADE CANCO MARK

Would a better container sell more of your product?

AN old soap appears in new dress — a handy, individual, lithographed metal box. Shelled nuts are packed in cans, to retain their full flavor and freshness. A cooking compound is announced in a new sealed tin can — easy to open.

A better container in each case, adopted to help sales. It may be better keeping quality for the consumer, it may be added convenience, it may be improved appearance—more effective advertising values—it may be one or a combination.

Often an improved container lifts a product entirely out of its old price class.

Would a better container sell more of *your* product? Would it pay you? Ask us about it. We can give you advice based on experience; we can furnish the "better container."

American Can Company

When Wholesalers Talk About Retailers

By FRANK H. WILLIAMS

In many wholesale houses which handle tobacco the traveling salesmen of the concern gather around the salesmanager's desk on Saturdays and talk over conditions in the various territories where the house does business.

At these sessions the financial standings of the various retailers are discussed and other things affecting the success or failure of the retailers are brought to light. Shall a certain store be extended more credit? How can a certain firm be pepped up so that it will go out and get more business and keep out of the bankruptcy courts? Why is some other firm slipping?

These are some of the questions discussed by the salesmanager, the other executives of the wholesale house and the salesmen on Saturday mornings. Many of the things said at these informal conferences would give retailers an illuminating insight into the way the wholesalers consider them. And, undoubtedly, from these conferences the retailers themselves would be able to gain many pointers and ideas of immense value and benefit to them in their enterprises.

It is, then, with the thought in mind that if the average retailer could be present at one of the Saturday morning conferences in the wholesale house from which he buys goods, that he would get a lot of worthwhile pointers. And, as mighty few retail tobacco merchants ever get the chance of being present at such a frank and unrestrained meeting, a report of a typical meeting of this sort is presented in this article.

Imagine, then, the neat, cheerful, progressive office of the salesmanager of a wholesale tobacco house. Imagine seven or eight alert salesmen standing or sitting about the office. Imagine the salesmanager tilted back in his chair with his hands behind his head, the credit man of the house nearby and some of the other executives of the firm in the room.

And now, having the scene before your mind's eye, listen to some of the things said by the men in the room:

The Salesmanager—"Tom"—(addressing one of the salesmen)—"we've been wondering whether or not we better give any more credit to that man Smith in your territory. He's into us pretty deep right now and some of his bills are past due ninety days. And yet here you've sent us in another big order from him. Why isn't he paying up? Do you really think he ought to be given more credit?"

Tom Jennings—"Smith is all right. He's been hard up lately because he went in rather deeply on remodeling his store. But he'll come out all right. There isn't a harder working merchant in my territory than he is. He is on the job himself about fourteen hours a day and he makes a lot of friends and he puts on stunts that keep drawing more trade all the time. He's got the public coming and if we just give him a little time right now, he'll come through all right and pay up and we'll have a mighty good account. You see, some of the other houses are pressing him and if we're lenient with him now he'll feel mighty kindly toward us and that will make him give us the bulk of his business in the future."

The Salesmanager—"He has got a good location and good help and all that sort of thing?"

Tom Jennings—"He's got a peach of a location and since his store has been remodelled, he's got one of the very best stores in the territory. I don't know of any tobacco store in my entire territory that's got a better chance of making a lot of money."

Salesmanager—"He's got a strong friend in you, I'll tell the world."

Tom Jennings—"He sure has. He's always treated me right and I'll fight for him any day in the week."

The Salesmanager—"Well, this order goes through O. K. then. You know what you're talking about, of course."

The Credit Man—"Mr. Brown, here's this man Simonson in Clearwater in your territory who's letting all his bills run overdue all the time. He used to pay up promptly but recently he's been getting terribly slow. What's the matter with him? Is his business slumping?"

Salesman Brown—"Frankly, I'm worried about Simonson. He used to have a fine trade at his store. He's in a good section of the city and he used to have all the trade in his neighborhood sewed up tighter than a drum. But recently a new store opened up about three or four blocks away from him and is getting a quite considerable amount of the patronage that formerly came to his store. This has given him an awful grouch and he's been howling about the way his old friends are going back on him, which has made folks think he's yellow and which has driven them away from his store. If he wouldn't show he was hurt, and would spruce up his store and would start wearing a smile again, it seems to me that he'd get along all right. I've tried to tell him all this, but he simply won't listen to me."

The Salesmanager—"I've been noticing that Simonson was slipping. He used to be one of the very best accounts we had in that territory. I think I'll run up there this week and see if I can't straighten him out."

Salesman Brown—"I sure wish you would. He's a fine fellow when he isn't so grouchy."

The Credit Man—"There are a couple of accounts in your territory, Mr. Lee, that aren't doing as well as might be expected. That man Montgomery in Pleasantville is one of them and John Casper, in Monroeville, is another. What's the matter with them?"

Salesman Lee—"The big trouble with both of those men is that they aren't paying attention to business. Montgomery is trying to work some sort of a sideline—a mail order business, I believe. He's been at it for almost a year now and he hasn't made a cent out of it and I doubt if he ever does make anything out of it. He isn't in his store a quarter of the time and leaves the place to the clerks and, naturally, they aren't running it right. The store is getting dirty and shabby and is losing trade right along. If Montgomery only knew it he could make as much money out of his store as he'd ever get out of his mail order business if he'd simply get down to business and quit fooling around with outside things. John Casper is a young man who had all the pep and enthusiasm in the world when I first got on the job in my territory. At that time he was going big and had all the best trade in the town sewed up. Recently, however, he seems to have gotten tired of working and is spending most of his time in a pool room. Of course, no tobacco store owner can spend a great lot of time playing pool and also make his store go in the way it should. Which is the main reason why Casper's business is slumping the way it is."

The President of the Company—"This gives me the opportunity for asking a question which I am sure that you salesmen can answer. Why is it that a number of the tobacco stores in this territory aren't doing any more business now than they were one or five or ten years ago?"

The Concern's Star Salesman—"I think the main reason is that they haven't vision enough to see the big possibilities ahead of them if they operated their stores on a strictly modern, up-to-the-minute plan. Every now and then I find a tobacco man who is doing just about as much business as he was some years ago and who is, seemingly, entirely content with the business and who doesn't care much whether his business grows or not. Such merchants can't see that by investing money in equipment, fresh paint, modern show windows and so on, that they would be doing something which would mean more money to them in the future. It is the merchants who have a vision of the big things ahead for the tobacco stores whose business is growing fastest now. Such merchants are the ones who merchandise tobaccos on a strictly up-to-the-minute basis and it's no wonder, to

ROCHESTER, N. Y.

San Francisco Trade Conditions Continue Fair

No Threatening Clouds to Mar the Peaceful Progress—Distributors and Jobbers Show Optimism Over Situation—Small Manufacturers Are Less Cheerful.

SAN FRANCISCO, Cal., April 24.—Trade conditions still continue fair. Like April skies, there are a few clouds here and there, but not enough to be at all threatening. The retailers report that trade keeps coming a little better. The leaf houses are doing considerable business, though some of the small factories are complaining of having an up-hill pull. The distributors and jobbers, covering the ground in the most general way, are very optimistic over the situation.

A. C. Rhoades, 1193 Valencia street, reports that he is quite pleased with the run of business so far this year. Mr. Rhoades has his distributing office far out from the business center of the city, but he calls attention to the fact that the Mission District, as it is called, is the center geographically, and the center of population, with good street car connections with every part of the city. And he says that San Francisco is like New York. It started at one end and kept pushing up Manhattan island; so San Francisco started at the Ferry, and the retail center keeps pushing back toward the Mission District. But wherever it is, the cigar and tobacco distributing cars of the Valencia street tobacco house are in evidence in all parts of the city.

Handles Easy Sellers

Frank Tuchler, for Jos. Rinaldo Cigar Co., is making the territory south of Market street, has been piling in orders like a steam shovel in a sand bank. And it takes several trucks to fill the orders that he digs up. It is needless to say that he is more than pleased with the new brands he is jobbing. Charles the Great, San Felice, Palo, Detroit Hand Made, he finds them all easy sellers.

Dave Rinaldo, who has just been making the South Coast, finds that the rains have given a decided boost to trade through the rural sections.

Holding Spot Light

M. Peters, sales manager for S. Bachman & Co., reports that the San Joaquin Valley is hanging in suspense on the result of the refinancing of the Raisin Growers Association. All other business is holding its breath. The $40,000,000 a year crop of the raisin growers is certainly a big asset to the whole State. Business will boom there as soon as the new stock subscription goes over successfully.

From the Buckeye State

Among the visitors, Mr. Wemmer, of Diesel-Wemmer Co., is in the city talking San Felice and El Verso. He reports an excellent business clear across the country. Nick King, the Western manager, and Frank Fergus, the Pacific Coast representative, have joined him at San Francisco.

Chas. Knubel, representing the Salvador Rodriguez and Charles the Great, has been taking in the city as a part of his Western trip.

A Gotham Visitor

Louis Cahn, of the Consolidated Cigar Corporation, has been spending several weeks in the city, looking after the interests of the company.

Harold Horn, of the Golden State Leaf House, has been making the Salinas Valley, and reports that the rain made a wonderful difference in the orders to be taken. Mr. Montgomery is sending in some good orders from the Sacramento. The Golden State Leaf House is rejoicing in the receipt of some fine Southern leaf of excellent burning quality. They are shooting it out as fast as they can, to fill in orders that have been waiting.

Dave Horn states that some of the small factory fellows are having a hard time floating their personal brands, though this is partly due, of course, to the aggressive and gigantic advertising of nationwide brands.

Two New Factories and a Move

A new factory is that of Frank Schaaf, recently opened at 497 Guerrero street. Wm. H. Masters has also located a new factory in Hollywood, a suburb of Los Angeles. The Richmond Cigar Co. has moved to Oakland.

Sam Herzog, who was formerly in the business across the bay, has purchased the cigar stand at the corner of Mission and New Montgomery streets. He has added periodicals and various confections, and brightened up the place so that it looks like new. He seems to understand what it takes to draw trade.

Albert H. Coppuck has sold his stand in the lobby of the Wiltshire Hotel to Flora Kearfott.

M. K. Jones has sold his stand at 716 Kearney street to Emile J. Colson.

Joe Rinaldo reports that Max Cahn, who has a fine stand at 19 Kearney street, is putting in another splendid stand in the Palais Royal on O'Farrell street, and is featuring heavily the fine Charles the Great cigar.

Tony Becker, of San José, has sold his cigar stand to Nillie Danck.

Miss Margaret Watson has taken over the Montgomery Hotel cigar stand at San José, which she has enlarged and improved very materially.

Buys Gilt Edge

ALMOND, Wis., April 28.—C. W. Bowen has bought the Gilt Edge Cigar and Pool Hall from John Derubach.

From Motordom

Ike Blumenstein, of Detroit, Mich., blew into New York this week, and was welcomed by his friends in the leaf trade.

Barking Dog Cigarettes

In an article on Barking Dog Cigarettes, manufactured by the Barkmahn Co., Inc., of 1169 Broadway, New York, which appeared in last week's issue of TOBACCO, the prices were inadvertently quoted as twenty for thirty-five cents. While the cigarettes are undoubtedly worth that price, the package of twenty cigarettes really retails for twenty-five cents, as the article should have conveyed.

The Bachman Co. are endeavoring to locate an interesting story concerning an escapade of their advertising dog which appeared in a recent issue of the *New York World*, and will be grateful to any of the readers who can assist them in their search.

Manila Cigar Man Sails for Europe

Hi. Marx, head of the Marx Bros. Cigar Co. left New York, for Europe, on Wednesday. He goes first to Paris and then to Spain. His European tour will be all the more pleasant because it was unplanned. Mr. Marx came to New York from San Francisco, about two weeks ago, to make arrangements for putting La Insular brand to the front on the Eastern market. In San Francisco, the Marx Bros. Cigar Co. owns and operates very successfully a chain of Manila cigar stores. Incidentally, the company is a really important importer of Manilas. For years, in their stores which have a habit of increasing, Marx Bros. featured La Insular brands. The demand expanded into wholesale proportions. La Insulars obtained wide and enduring favor on the Pacific Coast. At times, La Insular factory was unable to supply all the cigars that Marx Bros. could handle. When the factory amplified its facilities to insure largely increased production, the Marx Bros. Cigar Co. promptly took advantage of the opportunity to obtain a bigger supply, constantly. It was decided to introduce the better La Insular sizes in the East. Accordingly Mr. Marx came to New York. With him came Jose de Acuna the general agent in the United States for La Insular factory. While here they negotiated one deal, the first shipment of which called for a million La Insular cigars. On being informed of what Marx and de Acuna had done, Major Carrion, the president of La Insular Cigar and Cigarette Factory, Inc., called an urgent invitation to them to come and visit him in Spain. Major Carrion, who is an aide-de-camp to King Alfonso promised the boys a most enjoyable time in old Madrid and elsewhere. Mr. Marx, at first was undecided but soon he made up his mind to go. Mr. de Acuna, who was married in New York on Saturday, will make the European trip his wedding tour. Sightseeing will be done in Paris, San Sebastian, Madrid, Granada, Barcelona, Malaga and Seville. Mr. Marx will return to New York on his way home to San Francisco.

Manila News

Louis Laks, of the Laks Cigar Co., at 99 John street, New York, is homeward bound from the Philippines. He went to Manila to make arrangements regarding territory and to obtain bigger shipments from the Germinal factory. Agreement being made, he left Manila April 27, and will be back in New York about June 1.

E. M. Elam, United States representative of La Minerva factory in Manila, is en route East from the Pacific Coast and expects to be in New York about May 7.

* * *

Joseph Schwartz, the erstwhile stogie King of Cleveland, was in New York, this week. He is handling a line of Manilas from the Oriente factory and says, of the better sizes, the chief difficulty is to get goods enough to meet the demands of customers.

* * *

H. Mueller, representing C. G. Wilson, Inc., Manila importers, at 24 Stone street, New York, is making a successful trip through the Middle West obtaining new business and repeat orders. C. G. Wilson, Inc., imports and distributes the output of La Conchita, La Prueba and Trinidad factories.

* * *

Sidney J. Freeman & Sons, importers and distributors of quality Manilas from the Flor de Intal factory are steadily developing business on the better sizes. The trade that they build up is there to stay.

* * *

J. M. Sharp, formerly with the Manila Commercial Co., is now on the salesforce of the Manila cigar department of Bowring & Co., New York.

* * *

E. Viegelmann & Co., owners of the Manila cigar factory represented in the United States by Determann & Co., at 132 Front street, New York, have incorporated their business and increased the capitalization.

* * *

D. Ochsman, proprietor of the Manila cigar store in Washington, D. C., reports that trade is growing steadily. In his store Ochsman features some of the more expensive sizes of Manilas.

* * *

One of the biggest shipments of cigars ever made anywhere was forwarded recently from Manila to Spain by Compania General de Tabacos de Filipinas.

Installed in New Offices

M. A. André, representative of the old-established firm of Aixala & Co., of Havana, Cuba, has moved into new offices at 196 Front street, New York. In conjunction with the offices is a warehouse on the street floor, large enough to store five hundred barrels or bales of tobacco. Aixala & Co. have recently entered the Porto Rican business, and have made some excellent connections.

Visits Leaf Market

Samuel Gates, of the Webster Cigar Co., Detroit, Mich., was a recent visitor to the New York leaf market.

From Pearl to Water

Kahn & Lowenthal, recently of 253 Pearl street are now located in commodious new quarters at 171 Water street.

In New Quarters

M. Rosenberg & Co., late of 147 Water street, are now installed in their new offices at 162 Front street.

How to Plant and Grow Burley Tobacco

By S. M. DURHAM

The tobacco plant, unlike most all other plants, will pollenize itself. Were it not for this fact it would be almost impossible to maintain any pure strain of tobacco. While it pollenizes itself, yet it is one of the most susceptible to mixing with other vegetation. Thus nature enables us to hood the head and protect it from impure fertilization. The deterioration of tobacco in color, texture and spread of leaf is not so much the result of depleted soil, unfavorable climate and plan of cultivation as in deterioration in the seed. Many of the other crops are stabilized in various communities, but many varieties of tobacco are grown in the same neighborhood and by the farmers' plan of seed growing, though pure seed may be introduced into the neighborhood, it is only a short time till the crop becomes deficient in color and many other qualities, owing to mixture with the surrounding tobaccos.

Selection of the Bed

It is an old saying that where the snow melts first, brings earliest plants. It is equally true that more insects are likely to be found, as the larva deposit is more abundant in such places. Select loose, porous soil, protected from the east and north winds. The ground should be moist, yet well drained.

Clear everything, including stumps, shrubs, roots, large rocks, from the bed. A stump or a large root may be the wintering place of large numbers of insects to turn in on the early plants. Work the ground to a depth of three inches; pulverizing on top well before burning. Rake all loose matter well away from the ground to be burned.

Burning the Bed

Having laid out the width desired to burn, if logs are used, cut them two feet longer than the width of the bed to insure proper burning of the edges. Burn thoroughly and repulverize all the ground. A good fire should be kept from 40 to 45 minutes on any particular spot to destroy all seed in the soil.

In using the burner much depends upon every particle of soil receiving proper heat and proper distribution of the heated soil back on the bed. Much less heat will be required to prepare the bed in the fall than in the spring. If burning is done in the fall a convering of straw or fodder may be used which may be burned off at sowing time.

Work the ground 4 or 5 inches deep, thoroughly pulverizing it and when you feel it is ready, go back and work it three times more. Ditch it well around to keep out washes. Lay your canvas supports either of logs or planks. The larger the logs or wider the plank the better.

Take one heaping tablespoon of seeds and mix thoroughly with fertilizer, ashes or meal, and sow 100 square yards of the bed. Mix the seed in sufficient quantity of material to go over the bed three or four times to insure regularity.

After sowing rake the seed in lightly. If you sow in February do not tramp your beds, but March or April sowing should be tramped or patted.

Canvas the Beds

Select good canvas and put it on now. Don't wait a day. Our beds are usually 12 feet wide, four widths of canvas. Run a line of square topped stakes lengthwise through the middle of your bed, drive them 6 feet apart and drive them down until they stand 8 inches above level of bed poles. Stretch a wire on these stakes and lay your canvas on. This leaves the canvas higher in the middle than on the sides. This gives more space under the canvas to hold the heat, besides the slanting canvas will relieve it of trash likely to accumulate on it.

Here is where many fall down. Some sow beds and never see them again till transplanting time. Go to the bed once a week until the plants begin to come up, then two or three times a week. Well rotted manure or fertilizer in fair quantities should be worked well into the soil in sowing. When plants are in the square, dress again with well pulverized manure and continue at intervals of from two to three weeks until ready to set.

How to Fight Bugs

The main point is to see the first sign of insects. See that all holes in the canvas are closed. The agricultural station recommends many mixtures to use. We have used common fly powder, louse killers used for poultry, when these failed to rout them, we used 1 part of Paris green to 4 parts of lime which has usually done the work. These mixtures may all be dusted on the dry canvas and allowed to fall through.

Good land, plenty barn manure, small quantity fertilizer, a good strong plant set out early in well conditioned soil, all are required for a fine crop of White Burley. One acre of good White Burley is worth more than five acres of inferior. Plant no doubtful land in tobacco. Break your tobacco land as early as possible, break deep and close, then use shallow tools to work the surface. Disk or harrow in manure, mixing it well with the surface. A light dress of manure well worked in is much better than large quantities left on the surface to bleach. It is possible that land may work up too loose, in such cases a drag or roller should be used before laying off the rows.

How to Plant Tobacco

The number of hills per acre depend much on the land. Some sections of the state will bear 6,000 to 7,000 hills per acre. In some sections they should be limited to 5,000 to 6,000 hills to the acre. In case your land is laid off both ways you should lay off one way from 3 to 3¼ feet and narrowed to the other way.

If possible from the shape and lay of the land the wide rows should run as nearly north and south as possible as less ground and tobacco will be exposed to the sun. The best bed for the plant is in the prepared hill, though few take the time to prepare in that way. If fertilizer is used in the hill it should be scattered over considerable surface around the plant root.

Great care should be taken in the selection and handling of plants, either with the planter, stick or peg. In planting with the stick, the men often drop the plants and the boys use the stick and the result is a spotted tobacco field. Too much stress cannot be placed on getting a White Burley crop out early. Burn early, sow early, prepare the ground early. Keep the plants growing and get the crop out early. This gives you color, size and texture which always commands high prices.

The Young Plant

Run a little harrow through within four or five days after set to get ahead of filth.

If insects begin to eat little plants prepare a dust can filled with 1 part Paris green and 3 parts lime and dust the 4 outside rows all around, then every third row through the crop. Spotted inferior crops are often caused by these insects sucking and poisoning the little plants. You must keep your little tobacco clean and the top of the ground loose. If the hoe is necessary when the plant is small never pile the dirt to the plant, but draw as much as is safe from it. This plan will drive the roots downward to seek moisture and better prepare itself for drouth and heat later on.

No good crop of Burley tobacco can be grown without a solid stand. The ground must be covered and the most valuable leaves must be shaded. Missing hills let the sun in around the standing plants and make the fibers coarser and darken the color.

Strong, thrifty plants should be left on the bed for replanting. In case of a real bad stand we have replanted the hills with other quick growing crops to shade the ground. Backward plants can often be brought up by working manure or fertilizer around the roots.

Later Cultivation

When tobacco is laid off both ways we generally use narrow shovels the wide way, and run the harrow the narrow way. The long plows must run farther from the plants, each plowing to avoid the extending roots. The roots of a well developed plant extends to the point where the tips of the leaf point to the ground. So it is safe to run your deep plowing by the leaves. Tobacco can be plowed too much but the harrow is safe at all times. Keep harrowing as long as the leaves will bear without breaking.

Bud worms poison the plants and all the affected parts should be broken out at once and a sucker will soon develop into a large thrifty plant. Leaves stung by the chinch bug should be broken off. Plants bruised or broken down should be treated the same as bud wormed plants. Plants inclined to rust or french should be pulled up. Tobacco dying from root soak should have a deep furrow run through middle row. Pack the dirt close and hard around backward yellow plants instead of loosening soil.

"Topping" and "Suckering"

Tobacco should be topped as soon as the blossoms show well above the plant. Each plant should be topped according to its form and general development. Many growers top too high, shortening and contracting the leaf, lessening the weight and damaging the quality. Exceedingly rich land will bear higher topping than thin land.

The suckers should be kept off. Much of the growth of the tobacco will go to the sucker if left to grow. If suckers are carried to the barn on tobacco, they greatly retard the cureing, damage the color and many times induce houseburn.

The crop should be gone over at least once a week and oftener if possible.

Many years ago the worms were hand picked. Much of that work is relieved by the use of spraying mixtures. Here again we refer to the Agricultural Experiment Station bulletins describing the various mixtures and uses. Never spray just before a rain. Young tobacco will stand more spraying than that which is well spread and beginning to ripen. Better spray often and lightly than seldom and heavy. Worms carried to the barn on tobacco will eat many days and destroy much valuable tobacco.

Cutting and Housing

Here the crop is often made or lost. Don't cut when the humidity is high. Don't cut until it is well ripened. Don't cut when an east or north wind is strong, if forced to do so, windrow on ground till wind lays. If weather will permit and time and material can be had, scaffold your tobacco till thoroughly yellow.

Handle your tobacco carefully. Don't cut when wet from dew or rain. Don't carry tobacco exceedingly hot to the barn. Prepare to haul without bruising. Don't crowd your tobacco on a stick; put from four to five plants to the stick. The barn should be well closed on the north and east side and open on south and west. It should be built on high ground to avoid dampness and fog. The first cutting may be housed six inches apart on all the bottom tiers, after a few days raise this to the third tier and refill the bottom. Scaffold the next cutting and when this is ready to come in house up the first and second ties and fill in with the scaffold tobacco.

In housing each stick should have from eight to ten inches space and every plant should be left to hang clear. Housing each alternate room is a good plan if practical. This leaves free passage of air through the barn. Close barn in foggy weather. Hang sunburned or green tobacco in the sun.

Stripping the Crop

Much depends upon classing tobacco. Do not strip till well cured. Wait till the stalk is thoroughly black and the oil flows out to finish the back of the leaf.

Usually five grades should be made. First pull the ragged leaves at the bottom of the stalk for trash. Second, the next few leaves of thin texture for lugs. Third, the long bright leaf. Fourth, the heavier darker leaves for the red. Lastly, the tips or top leaves on the stalk.

Hands should be of good size to look well. The manufacturer does not like a very small hand as time is lost in handling and more loss is sustained in tie leaves. Hang each grade on separate sticks from ten to twelve hands on the stick and hang straight and close on tiers till bulking time. It is always best to bulk stripped tobacco on the stick. The same is true in hauling to market, if tobacco is not prized at home.

Marketing

We have been successful in securing good prices for our tobacco under the old plan. We feel we have a far superior plan through the association. Our advice is—get your tobacco in the very best order, handle it the very best, load it and carry it to the association warehouse, have it weighed and graded, and take your warehouse receipt home with you.

We offer our congratulations to all the members of the Burley Association and recognize each member a brother with whom we are working to better the condition of our country for our children.

Foreign Regie Question

WASHINGTON, D. C., May 1.—While definite plans have not yet been completed, officials of the Department of Commerce are going ahead with their preparations to make an investigation of foreign tobacco monopolies. The fact that such an investigation would be made just became public at the conference which Secretary of Commerce Hoover had with representatives of the tobacco trade last week.

The preparations have not yet gone far enough to know exactly what will be done, but it is known that considerable field work will be undertaken in the United States, and it is altogether probable that a couple of tobacco experts will be sent abroad to look into the situation from that end. Just how many additional men will be taken on for this work has not yet been determined. The department intends, it is understood, to make use of all of the material which is on hand and to utilize in so far as possible the present facilities of the Bureau of Foreign and Domestic Commerce, including consular officers and commercial attachés, who will be called upon to make special reports on specific monopolies.—LAMM.

Charged With Misbranding

WASHINGTON, D. C., May 2.—In a citation issued by the Federal Trade Commission, G. F. Hemler, of McSherrystown, Pa., is charged with misbranding cigars.

The Commission's preliminary investigation indicates that the respondent manufactures cigars and sells them under the brand name of "Tampa, Florida," and with the words, "All Havana Hand Made," on the box containing such cigars.

The Commission alleges that cigars so branded are not manufactured at Tampa, Fla., and are not made of Havana tobacco, and therefore respondent's acts deceive the public and are unfair to competitors who truthfully brand their cigars.

Thirty days will be allowed the respondent to make answer to the charges before a day is set for further hearing of the case.—LAMM.

From the Dynamic Center

John T. Woodhouse, of Woodhouse & Co., Detroit, Mich., was in New York last week end, studying conditions in the local tobacco market.

NEW YORK, THURSDAY, MAY 3, 1923.

COMING EVENTS

T. M. A. Convention at the New Willard Hotel, Washington, D. C., May 16-17.

* * *

Convention of the Leaf Tobacco Board of Trade of the City of New York, in the assembly room of the Merchants' Association of New York, in the Woolworth Building, Monday and Tuesday, June 4 and 5.

SKETCHING THE STATISTICS

As published last week, internal revenue statistics supply proof of increased activity in the tobacco industry. The latest available reports, showing the production of cigars, cigarettes, tobacco and snuff in the United States, pertain to the month of March, 1923. Contrasted with what was done during the same month in the preceding year, the achievements of March, 1923, are worthy of study. Reduced to percentages, comparative statistics, on occasion, can be insignificant or deceptive. But, from the instances cited, anyone may see improvement in the cigar and cigarette business.

Showing a gain of 15.62 per cent., an actual increase of 30,064,788 cigars, Class C was the big winner, numerically. In Class C, the March, 1923 output was 222,253,613 cigars, compared with 192,458,825 cigars produced in March, 1922. As Class C comprises the "three for a quarter," the ten cent, the "two for a quarter" and the fifteen cent cigars, the real significance of augmented production immediately becomes apparent. In buying cigars, the average man does not go beyond Class C, ordinarily. Enlarged output of Class C cigars came in direct response to the demands of smokers.

Increased purchasing of Class C cigars, partly at least, is due to prosperity. In the cities and towns, practically everyone who cares to work can obtain employment. Labor is above par. Employers are hunting for more help. Mechanics command big pay. In many trades, earnings are larger. If a wage earner desires a good cigar, his inclination to buy is not so much restrained by inability to spend. Having money to spend, the workingman can indulge himself, if he feels like it, occasionally. In fact, the horny handed toilers are better fixed financially than the clerks and professionals who wear white collars as badges of servitude.

Of Class A cigars, the cigars that retail for a nickel each or less, the output of March, 1923, amounted to 215,550,898 exceeding by 16,460,153 the 199,090,745 Class A cigars produced in March, 1922, a recorded gain of 8.26 per cent. The increase in Class A confirms the story told more emphatically by Class C.

In Class B, a decrease of approximately three quarters of one per cent. was reported. Here the figures fail to tell all that actually occurred. Class B includes the cigars that retail for more than five cents and not more than eight cents each.

Though 125,900,180 Class B cigars were made in March, 1922, and a smaller number, 124,983,172, represented the output for March, 1923, the value of the 1923 production was greater, by far.

Because, formerly, in Class B production, many six cent cigars were comprised. Most of the six cent cigars were of brands not well advertised. Another handicap to their popularity was the consumer's dislike for the odd price. Produced by small factories, failing to receive extensive publicity, struggling against odds to gain recognition, the six cent cigars did not dominate Class B. They took a place of minor importance. In Class B, however, are a number of long established, strongly favored, widely known, constantly advertised brands of cigars made to retail at the rate of "two for fifteen cents." These cigars did not retrograde. On the contrary, they have gone ahead steadily. Their quality and distinction caused sales to be accelerated and production to be largely increased. Such brands today constitute the great bulk of Class B production. Consequently, the Class B output in March, 1923, was worth much more than the Class B production of March, 1922.

Backing up the supposition that bigger cigar sales are associated with the greater prosperity of workingmen, one may proceed to extremes. The package goods, the so-called little cigars are for smokers inclined to be economical of time and money. The March, 1923, output of little cigars was 49,954,700 just 9,580,860 less than the production obtained in March, 1922. At the other extreme, the cigars in Class E, representing the de luxe packings, the extra choice selections, the exquisite shapes, the finer sizes, the magnificent cigars prepared for epicures and others who will pay unhesitatingly the appropriate price for such enjoyment, also showed a decrease.

Class E cigars, tax paid in March, 1923, numbered 2,431,955, against 3,306,424, recorded in March, 1922, a decrease of 874,469 or 26.44 per cent. For this, who can give the precise reason?

Other facts, seemingly at variance with stated theories, are presented with statistics pertaining to Porto Rican cigar production.

Porto Rican cigars, in Class A, jumped from 3,569,350 in March, 1922, to 8,716,650 in March, 1923, a gain of 144.20 per cent. But Classes B, C and D, of Porto Ricans respectively exhibited decreases of 62.17, 53.56 and 62.8 per cent. For these variations, presumably, manufacturing conditions, more or less temporary, are accountable. The big and good tobacco crop now being harvested in Porto Rico is a factor that must be taken into consideration.

Of Manila cigars, American imports in Classes D and E are inconsequential. But, in Classes A, B and C, Manila imports are of great and growing importance. How much, the figures show. Strictly hand-made, all long filler Manilas in Class A took a leap from 8,659,840, in March, 1922, to 21,684,795 in March, 1923, an increase of 13,024,955 or 150.40 per cent. Class B Manila importations gained 18.31 per cent. and Class C developed a phenomenal augmentation of 498.27 per cent. Unusual values are given to Manilas because the Cagayan Valley is the most economical place in the world for the growing of good tobacco for cigar purposes. While many of the Manilas in Class A are of the variety denominated, sometimes, as "big sticks," various importers are more appreciative of the advantages of brand building. In Class A, shaped Manilas of dependable quality, superior cigars that go to the retailer for about $35 or perhaps more per thousand, are being favored. Job lotting is less encouraged. Class C Manilas, exemplifying fine workmanship and fabricated of notably mild tobacco, obtaining a demand that will endure. The knowing importers are specializing in quality merchandise. As a result, Manila business is expanding and becoming stabilized.

The increase of cigar production, the larger sales of cigars, this Spring, the fact that business has developed so, seems rather remarkable, despite the prosperity of the country. Things have not been easy for cigar manufacturers. Supplies of tobacco were lacking. Desirable tobacco of every kind has been high priced and hard to obtain. The Havana market has been bare for months. What good Porto Rican leaf there was, anywhere, was firmly held and practically unpurchasable by the manufacturer who needed tobacco. Even yet, nearly everyone is waiting to see what the new crops in Cuba and Porto Rico will be.

Compelled to pay extra prices for what tobacco they bought, unable to reduce other expenses of production, and obligated to keep up quality, cigar manufacturers have confronted conditions the reverse of satisfactory. Actually, as outputs prove, they have increased production while operating on a dangerously narrow margin of profit.

Inevitably, too, some of the sorrow has been passed along to jobber and retailer. Dealers' profits have been reduced. To most, the returns have not been entirely proportionate to the amount of business done.

Throughout the country, although larger cigar sales are acknowledged, the development of additional business has not deprived manufacturers and dealers of excuses for kicking.

The consumer has been the chief beneficiary and he is not fully appreciative of what has been done for him.

However, neither manufacturers nor dealers are greatly lamenting. Rather, are they looking forward, being assured of some betterment of conditions in the not too distant future.

Adequate supplies of desirable tobacco are promised to cigar manufacturers. Coming on the market soon, the new crops in Cuba and Porto Rico will affect the situation. Just what the prices will be, no one can say, surely, as yet. The probabilities are that, at most, prices will not be higher than they are now. Consequently, a little comfort is obtainable in that direction. And there are other things that cause cigar manufacturers and dealers to be hopeful.

What has been done, despite handicaps and obstacles, is assurance of success that may be even greater.

If, in their campaigns for bigger business, the numerous cigar manufacturers of the United States will be as wise, liberal and persistent in advertising as American cigarette manufacturers are, it is easily possible for ten billions of cigars to be made and sold in this country next year.

'TIS STRANGE, 'TIS PASSING STRANGE

Down in New York City, Guy Fitch Phelps, field secretary of what is known as the National Board of Temperateness, goes on record as saying that the Big Four of the fight against Prohibition is the Brewers' Association, the Distillers' Association and the motion picture and tobacco trusts. He adds that the Big Four boasts of a two-billion-dollar campaign fund. Apparently the wickedest trust in the bunch is the tobacco trust, which, as the good Mr. Phelps assures us, is "giving away mock cigarettes to school children to develop the cigarette habit."

The last indictment must be considered first, on account of its devilish gravity. If the tobacco trust is teaching school children to smoke by disseminating "mock cigarettes" among little darlings, the atrocity of that enterprise is equaled by its needlessness. We must confess our ignorance of this new satanic device. In our restricted wanderings, we have never happened to come across a mock cigarette. But the real point is here: Why should the tobacco trust squander ill-gotten gains on the gratuitous distribution of mock cigarettes when about nine

mile Americans out of every ten learn to smoke without any expensive encouragement of that kind?

According to the *World Almanac,* more than 50,000,00,000 real cigarettes are manufactured in the United States each year, or about 500 to every man, woman and child in the country. If figures do not lie, the present generation has been developing the evil habit without the aid of mock cigarettes. One would imagine from the returns that the cigarette people were sufficiently busy in catering to the regular trade without falling back on that mock cigarette expedient. But it must be so because Mr. Phelps, not being a smoker, never tells a whopper.

It is even more interesting to learn that the movie managers and the tobacco monopolists have chipped in on that two-billion anti-Prohibition fund. Our own observation, confirmed by statistics, is that the consumption of tobacco has increased since the Eighteenth amendment went into effect. The wayward man, when his toddy is cut off or hard to get, naturally smokes more. Here, too, one would suppose that the tobacco miscreants would be satisfied to let well enough alone. We can only explain their financial contributions to the anti-Prohibition cause on the theory that because it is wicked they insist upon helping it.

In movie circles the case is still more incomprehensible. The other day an ardent Syracuse Prohibitionist informed *The Herald* that he knows of many instances where men who formerly spent their money in saloons are now going to the motion picture theatres and taking their families. Aside from this personal testimony, which many will corroborate, it is an indisputable fact that the flush period of movie prosperity has been coincident with the operation of the Volstead act. But if Secretary Phelps is to be believed, the movie managers are so anxious to hurt their business by restoring the liquor trade that they are willing to pay handsomely for the attainment of that object.

All of which is decidedly mystifying. It is hard to tell which recent development is the most bewildering as a revelation of inscrutable human motives—that distribution of mock cigarettes, the contributions of movie men and tobacco trusts to the anti-Prohibition fund, or the attempt of John D. Rockefeller, Jr., through his agent, Mr. Fosdick, to circumvent William H. Anderson.—*Syracuse (N. Y.) Herald.*

CIGAR PRICES MAY ADVANCE

Higher prices for cigars are looked for by manufacturers who see mounting production costs eating into the margin of profit, though there is a rapidly increasing demand for their product.

Pooling of domestic crops by co-operative tobacco growers' associations in several states, higher prices for Havana and Porto Rican tobacco and for Sumatra leaf at the Amsterdam inscriptions, with increased wages, are the causes of increased costs.

There is a scarcity of good cigar leaf, binders and fillers. Sumatra tobacco, used for wrappers in the finer grades of cigars manufactured in this country, brings $1.50 more a pound than last year, says the *Wall Street Journal.* This is due to keen competitive bidding at inscriptions in Amsterdam and to limited supply of Sumatra leaf suitable for the American market. Binders are 25 per cent higher than in 1922, owing to a crop shortage in Connecticut and Wisconsin. Scarcity of good Havana leaf has boosted the price 33 per cent over last year.

FIFTEEN BILLION CIGARETTES

In the first quarter of the year 1923 fifteen billion cigarettes were produced, against ten billion in the same period of 1922, practically a 50 per cent increase. The heavy increase resulted no doubt from a combination of many reasons.

National consumption of cigarettes has increased at a faster rate than population since the cigarette first came into general use in this country, but the increases in consumption in the years since the war have been phenomenal. Part of the recent increase is due to the spread of the use of cigarettes among women. It is generally agreed that the woman who smokes cigarettes goes on acquiring more sisters month by month. Part of the increase may be due to the converts from the pipe and cigar, but these forms of smoke do not seem to have lost much ground; not enough to explain the major part of the cigarette gain.

Such a general tendency as is shown by the figures of recent years has its cause partly in the fact that the cigarette is thought the most convenient smoke for the greatest number of people. It is the urban form of tobacco, and is smoked largely by the constantly increasing urban population of the nation.—*New York Sun.*

KNEW WHERE TO FIND IT

Tobacco has never had a more staunch friend than the great English poet, Tennyson.

One time he was making a tour through Italy when, much to his chagrin, he discovered that his tobacco had given out. Can you guess what he did? Chances are you can't. For he packed up and went right home where the supply was limitless.

Some of Delights Derived from Cigarettes Poetically Portrayed

Smoking of a Favorite "Fag" Pleasantly and Rapidly Restores Tranquility—Men of All Classes Enjoy Its Very Soothing Influences — Renowned Clergymen and Famous Writers Numbered Among Staunch Supporters of the Little White Roll.

By DR. ARTHUR SELWYN BROWN

THERE is nothing that cheers a man so rapidly and pleasantly as the quiet smoking of a favorite cigarette. There is more soul ease and mental rest secured in that way than can be otherwise suggested. This is universally recognized and is the cause of the immense demands for good cigarettes the world over. Men of all classes have felt the agreeable influences of cigarette smoking. Generals, priests, poets, sailors and workmen, all pay homage to the cigarette. Locke, the philosopher, asserted that a cigarette was as essential as bread. Sir Isaac Newton could not read the stars clearly until he had smoked an after-dinner cigarette. Old Parr, the greatest smoker of his time, smoked cigarettes when he laid his pipe aside. Cigarette smoking appeared to furnish zest for his next pipe. Old Hobbes of Malmesbury, an early English philosopher, noted for his capacity for clear, logical thinking and exposition, was a devotee to cigarettes and the clearness of his mind is attributed to cigarette smoking. Bishop Burnet, another mighty smoker, more renowned today because of his worship of the pipe, than on account of his famous sermons and oratorical gifts, was often cheered by a dainty cigarette after a heavy pipe smoke. He found the lighter pleasures of the cigarette threw golden halos around his heavy pipe smoke clouds, and stimulated his thoughts to more beautiful imagery and developed his lyrical and poetical gifts.

Noble Army of Cigarette Smokers

Coleridge, Lamb, Byron, Campbell, Tennyson, Kipling, Hall Caine, Blackmore, Wells and a great array of other British authors belonged to the noble army of cigarette smokers. Coleridge was ever fond of relating stories about Charles Lamb's pranks and jokes during the glorious evenings they spent together smoking in the London inn where they were wont to meet and which is connected with the name of St. Charles forever. Lamb was an expert pipe smoker, but he was also fond of a cigarette and his friends said that his wit and spirits were livelier when smoking a cigarette than when he smoked a pipe. Pipe smoking made him contemplative but the cigarette promoted activity and made him most jovial and vivacious. How Charles would have laughed at the pun had Coleridge read him the following poem:

Mark Antony to Cleopatra

"I am dying, Egypt, dying,"
Softly fell upon her ear;
And she sighed and sighed and sighing—
Gemmed her cheek, a crystal tear.

"I am dying, Egypt, dying"—
Now she listened, grief-opprest,
While his flaxen curls were lying
Pillowed on her panting breast.

"I am dying, Egypt, dying"—
From her dream of grief she woke;
Then Mark whispered he was dying—
For a cigarette to smoke!

No figure in literature looms so sweetly as Charles Lamb's. He was a very lovable fellow who possessed rare wisdom, a sharp critical faculty, a delightful literary style and a tender, bright humor which moves us to smiles mixed with tears. A ripple of laughter ran through everything he said, wrote or did. Even oaths fell from his lips with a smiling gentleness and sweetness which made them pleasant to hear. He was extremely good company and was a true worshipper at the shrine of Lady Nicotine.

Here's a note by Lamb to Coleridge, written in 1803:

"What do you think of smoking? I want your sober, average, noon opinion of it. I generally am eating my dinner about the time I should determine it.

"Morning is a girl, and can't smoke. She's no evidence one way or the other; and Night is so evidently bought over, that he can't be a very upright judge. Maybe the truth is, that one pipe is wholesome, two pipes toothsome, three pipes noisome, five pipes quarrelsome and that's the sum out. But that is deciding rather upon rhyme than reason. . . . After all, our instincts may teach us best.

"When shall we two smoke again?

"Last night I had been in a quandary of spirits, in what they call the evening; but a pipe, some cigarettes, a little Port and King Lear (being alone) had the effects of solacers. I went to bed pot-valiant.

"Smokingly and Smilingly yours,
"Charles."

On Losing a Cigarette Holder

The reader will not be surprised that this master smoker was called upon by his friends for advice and consolation. Here, for ex-

ample is the way a poet addressed him after losing his cigarette holder:

Inconsolable

Why, tell me why that dauntless breast
  Is heaving to and fro?
St. Charles, St. Charles, I cannot rest
  Until you let me know!
It's worse than useless to conceal
  The anguish of my mind;
You little know how sad I feel—
  You couldn't be unkind!

Nay, ask me not! I dare not tell
  The secret of my grief;
And yet, perhaps, 'twould be as well
  To furnish some relief.
Then listen, friend, while thou art told—
  And foolish tears wander,
I've lost my old meerschaum and gold
  Cigarette holder!

Some day an enterprising cigarette manufacturer will immortalize Charles Lamb by giving his name to choice brands of the golden weed he so dearly loved.

Patron of Cigarette and Pipe

George Borrow, "Prince of the Open Road," like most noblemen, was a patron of the cigarette and pipe. His works do not tell us much about smoking, but he was too fond of the cheerful weed to restrain himself from referring to it occasionally. In Lavengro, for instance, he describes a radical who smoked heavily and was fond of arguing.

The custom of smoking proves valuable in solving and making friendships. If we could estimate the good done in this world by smoking and the presents of cigarettes and other smoking materials could be determined in money values, how stupendous the total would amount to!

The cheerful Borrow was like Charles Lamb in attracting the friendships and smoking companionship of distinguished intellectual men. Edward Fitz Gerald, translator of Omar Khayyam, was one of his old friends. Many a time they smoked together in the smoking rooms of the hotels Borrow visited for his lunch.

Notable Cigarette Smokers.

Lamb, Coleridge, Borrow, Swinburne and other celebrated smokers are generally believed to have lived before the cigarette era. That is believed to have begun in England in the early sixties. In 1870, Ouida, the novelist, wrote in *Puck* that: "In the most fashionable lounge, Bill Jacobs could lean against a rail, with a clay-pipe in his mouth, and a terrier under his arm, close beside the Earl of Guilliadesie, with his cigarette and monocle."

Ouida contrasts the old and the new; the clay-pipe with the cigarette, which only the elite then smoked. But she was referring to the great public. Smoking experts like Lamb and his companions had long before discovered the charms obtainable from cigarettes and were accustomed to making their own cigarettes. It was the factory made, paper-wrapped cigarette which took Europe by storm in the early "sixties." Andrew Lang, writing on the enchanted cigarette,—but when the writing begins and we tackle our projects, the enchanted disappears—then we find we have to till the soil, sow the weeds, gather the leaves, cure and dry them and then roll the sweet charmer. Dr. Mandell Creighton, Bishop of London, was at this time one of the mightiest cigarette smokers in Europe, who is said to have spent a fortune on rare cigarettes. His friends report that cigarette smoking made him very friendly, hospitable, chatty and devoid, apparently, of a care in the world. He liked to hear the:

Song of the Smoke Wreaths

Not like clouds that cap the mountains,
  Not like mists that mask the sea,
Not like vapors round the fountains—
  Soft and clear and warm are we.

Hear the tempest, how its minious
  Tear the clouds and heap the snows;
No storm rage is in our pinious,
  Who knows us, 'tis peace he knows.

Soaring from the burning censers,
  Stealing forth through all the air,
Hovering as the mild dispensers
  Over you of blisses rare.

Softly float we, softly bend we,
  Tinted from the deep blue sky,
Scented from the myrrh-lands, bend we
  Downward to you, ere we die.

Cigarette smoke brings sweet fancies,
  Sober thoughts with visions gay;
Peace profound, with daring glances
  Through the clouds to endless day.

Not like clouds that cap the mountains,
  Not like mists that mask the sea,
Not like vapors round the fountains—
  Soft and clear and warm are we.

Champions Cause of Smokers

Berton Braley is one of the greatest smoking champions America has produced. An inveterate smoker and fluent writer, his pen has often been wielded valliantly in the defense of tobacco smoking. Of course, he was provoked by the savage attacks of misguided and unbalanced individuals, to defend cigarette smoking. On one occasion he wrote as follows, speaking in the third person as the Oracle:

"'As a man of the world,' said the Oracle, rolling his tenth after-supper cigarette, I am aware there lies in certain quarters a prejudice against these dainty tubes; but as a scientist and a cigarette smoker, I believe it is my duty to defend the savagely attacked 'coffin nails.'

"'And in doing this, I shall disregard all the puerile accusations so often burbled forth in anti-smoking literature and anti-cigarette crusades, and expatiate only on the virtues of the "dude stick" as cracked-brain adversaries vapidly term it.

"'There come times in every man's life when a short smoke is a thing most avidly to be desired and secured, yet where a pipe might give offence and a cigar might be mistaken for a riotous extravagance. Why, then? Shall the hankering mortal continue to hank or shall he take the "makings," and roll a tube, or open a new package and inhale a few heaven-savoring whiffs? Surely the latter, for thus shall he save himself from the nervous grouchiness of self-denial, or the folly of a valuable cigar four-fifths wasted.

"'Then, for the man who rolls his own smokes, there is a certain pride of workmanship in creating them, self-laudation while he is "fussing" and filling in the weed, and the satisfaction secured when a nicely rounded cigarette is finally made.

"'When "She" with dainty, but unskilled, hands strives to roll a real cigarette for you, what smiles of absorbed anticipation and condescension are expressed on your face, and how ambrosial to the taste and aromatic to the nostrils is the limp and flattened amateurish product of Her endeavor? They force you to roll another with consciously unconscious ease and how mightily you swell up when She says: "Oh! how cleverly you do things! why, it looks just awfully easy, but I can't seem to make them at all!"

"'You proceed to tell her, of course, "It's just a matter of practice. I smoke so much that I have to keep an eye on my savings account and indulge in cigar store cigarettes only occasionally. In fact I believe I smoke too much, using this figure of speech as an excuse to exhibit the yellow smoke stains on your fingers.'"

A Great Burst of Eloquence

After a complete discussion of the pleasures of making your own cigarettes, Braley refers to cigarette smoking by women and waxes so eloquent that he finally rises into a great lyric outburst:

"The final canonization of the cigarette," he says, "and the most absolute demonstration of its esthetic value, is exhibited when it glows between the pearly teeth of a pretty woman.

"No Puritan I. Let the women be piquant, pert and pretty, let her be gowned in taking wise, and let her smoke the best Egyptians or Turkish with her monogram stamped on each in blazing gold, and I will fall down and worship. She will win my heart, my regards, my muse. It it please Her majesty to blow fragant beryllian rings and aureolize her beauty in an atmosphere of lovely smoke, I will respect her greatly, and if she waft graceful exhalations from temptingly pursed up lips and with a languorous deftness, I will proclaim her the apotheosis of the smoker."

"As the muse says, a little too rakishly, perhaps, in:

The Cigarette Girl

She hates conventionality,
  She's different from the rest;
She scorns a mere formality,
  She likes a piquant jest.

She knows a thing or two or more,
  You needn't say it twice;
Perhaps you've met her kind before,
  She's naughty, but she's nice!

Her feelings are devotional
  Toward Egypt's Turkish cigarettes;
Impulsive and emotional,
  She smiles and loves and smokes and bets.

She's played most every sort of game,
  And she doesn't take advice;
So everyone says—"But just the same,
  Though naughty, she's so awfully nice!"

There is'nt much satiety
  When you're around with her;
She's burning with variety,
  She's different, as it were!

Ah! let's toast her, patron saint
  Of cigarettes, so sweet and nice;
She's not demure, nor shy nor quaint,
  She's naughty—but, really, she's so nice!

"When this fine poem was recited the Oracle turned to his ash-tray and looked at the big heap of 'butts' piled on it, and turning to his friend remarked judicially:—

"'A cigarette is a perfect type of a perfect pleasure, it is exquisite and it leaves you unsatisfied. I'll roll another!'"

There can be little doubt that Braley felt sorry for those who waste so much time in crusading against cigarette smoking. Such people seemed to him to be trying to stop the earth from making its diurnal revolutions. While they cry out in shrill tones against the evils of cigarette smoking mankind, in ever increasing numbers, patronizes the seductive "smoke."

Solace in Solitude

Tennyson, you know, wrote one of his famous poems, "In Memoriam," at Showell Rectory.

Smoking his pipe incessantly, he eventually learned that the odor of tobacco greatly distressed the good rector. Tennyson might have done any one of many things—but with the peculiar patience of the true-blue pipe smoker, he took all his paper and his ink and his pens to the work house in the garden.

And there in the shed, where he could smoke in peace and write in glory, he finished this wonderful piece of work.

An Explanation

Cigar manufacturers don't name their brands after famous men and women as they used to, a wise retailer says. "You see, so many men don't live up to their reputations. Spanish names are in the ascendant again."—*Owensboro (Ky.) Messenger.*

Chicago Trade Showing Considerable Activity

The Tobacco Business Doing Its Share to Help the Windy City Maintain Its Reputation As a Progressive Trade Center—Changes and Improvements Noted.

CHICAGO, April 28.—Chicago is noted far and wide for its business life and action, and the tobacco trade is maintaining its share of activity. There are a few "specks" on the horizon, but they are not of sufficient importance to cause general concern. Business as a whole is really good and getting better.

Sky-Gazing

Capt. Cyril Turner, British air ace, woke up our natives this week with his "Hello Chi" and "Lucky Strike" cigarettes in smoke letters a mile high in the sky. He is here under contract with the American Tobacco Co., and after "sky-writing" here for a limited engagement, he will leave for other Middle West cities. People "sure" craned their necks to see this marvelous stunt.

Making Changes

The Cowan Grocer Co., 30 West Washington street, is closing up its fancy grocery department and will use this space by an addition to the restaurant, besides installing a large soda fountain. The cigar department, which is a big one, will remain where it now is, with C. Keffer in charge.

"Ye Pot and Kettle" cafe at 64 West Randolph street has been closed and is now in bankruptcy.

The General Cigar Co. has joined the moving crowd and closed up the store at Randolph and Dearborn street, which it operated for several years past.

Elias Condax, of E. A. Condax & Co., came in to say that their Chicago office moves from its location on Franklin street to Market and Lake streets. He also stated that on orders from New York headquarters, all his sales force has been let out and he will work the trade alone for the time being.

Blackstone cigar windows are now seen around the city. This leader of Waitt & Bond comes in 10, 2 for 25 and 15 cent sizes.

Gus Le Bolt, wholesaler, of Springfield, Ohio, closed this week with the William J. Seidenberg Corp., to distribute the Frat cigar in his territory.

Going around the Loop, one sees several Robert Bacon and Joan of Arc window displays. Al Spellman must be in town as it looks like his work. Grommes & Elson distribute both brands for the San Telmo Cigar Mf'g. Co. of Detroit.

Hillman's Department store has discontinued the cigar department. In former years it operated one of the largest tobacco departments on State street. Of late years, little attention was given to the tobacco and cigar end.

Blue Boar cigarettes have arrived. The American Tobacco Co. has just introduced this "English Blend." They retail at 20 for 25 cents. A neat display carton of 200 is seen on many show cases.

Sam Mosow of the Sioux Tobacco Co., large jobbers of Sioux City, Iowa, was a visitor at the Wm. J. Seidenberg Corp., Chicago office. They are the distributors of Virginia Lee for Northern Iowa and Southern Minnesota. While here, Sam also closed to represent the Pancho-Arango made in bond cigar, which they will carry in ten sizes.

Big Condax Window

The Rialto Cigar store on Clark St., near Randolph, shows one of the largest Condax cigarette displays that was ever placed in a window here.

B. Lyon, who has operated a cigar store at 126 North Wells street, has turned over his business to the Chicago Association of Credit Men, who are trying to sell for the benefit of creditors. Lyons owes around $7,500.

Zolla's Bankruptcy a Surprise

The announcement that D. M. Zolla, jobber at 370 East 26th street, had been placed in bankruptcy, came as a big surprise to the trade. Liabilities are said to be around $85,000 and assets $60,000. David M. Zolla is widely known here and for a number of years had a big business. Unsettled conditions and the heavy cost of operating with small profits are said to be responsible for the trouble. The trade hopes that David Zolla will be able to continue, as he has many friends here.

Jacob Rosenberg of Eduardo Gonzales & Co., Tampa, announced this week that Walter Woolfson is no longer connected with his firm and that the owners now are Eduardo Gonzales and Jacob M. Rosenberg. They manufacture brands that are very popular here and in the Middle and North West. Walter Woolfson will now devote all his time to the management of the Ryan & Raphael Cigar Co.

Wm. Bunting resigned this week as inside manager for E. P. Oakes. He has not as yet announced any new connection, but will remain in the cigar game.

Keeping Everlastingly at It

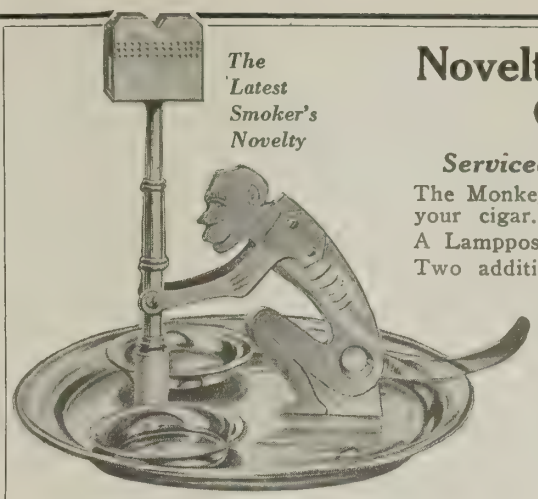
The Mozart newspaper advertising campaign keeps right up and the billboards all over the city are loaded with Mozart signs. The popular selling sizes are Perfecto Fino and Majic at 10 cents; Favorita, 2 for 25 cents; Universals and Invincibles, in foil, at 15 cents, and Vanderbilts, 3 for 50 cents.

Albert Worsch of the Worsch Cigar Co., St. Paul, was a recent visitor to Chicago. His Justrite 5 cent cigar has a big sale here, and is placed with the trade by Steele-Wedeles Co.

The Oppenheimer Cigar Co. of Saginaw, Mich., has closed with the Wm. J. Seidenberg Corp. to feature in all their stores Pancho Arango made in bond cigars.

Having Notable Success

Mort Hammer, representing Marcelino Perez & Co., spent several days in Cincinnati this week. Before he left here, he told of opening with C. A. Mitts, of Grand Rapids, with an order for 2,500 Tuval cigars, and of getting a repeat order within three weeks, for 48,000. Mort certainly is taking good orders this Spring.



The Harmon Cigar Co. in the Adams Express Bldg. feature the Tampa Custom House cigar in a large window display.

Herman Bach, the Elks' Building cigarist, uses as his featured brands, La Palina, Pancho Arango, Perfecto Garcia and Jonathan cigars.

In the Public Eye

At the corner of 55th street and Cottage Grove avenue, on the entire side of the building has been placed one of the new El Verso cigar signs. This ought to please Walter Fleckles, the Deisel-Wemmer Co. representative, for it is one of the best transfer corners on the South side.

(*Continued on page* 40)

Novelty Smoker's Outfits

Serviceable and Artistic

The Monkey's tail clips the end of your cigar.
A Lamppost holds the match box.
Two additional ash trays on the large tray.
Entire outfit made of solid spun brass, nickel plated or polished. Highest grade workmanship thruout. Also the same in mounted tray stands.

A Capital Decrease

Chicago, April 28.—The Vernon Cigar Co. has decreased its capital stock from $35,000 to $5,000.

R. J. Reynolds Tobacco Co.

Continued strength and activity in R. J. Reynolds Tobacco "B" common, which recently sold to a new high record of 66⅜, reflects steady increase in business and earnings, and improved prospects for an increased return to shareholders.

At its recent high this issue had more than made up the 33⅓% stock dividend which came off last December. Following payment of this dividend the shares, which had been selling around 63, sold at 43⅞, making appreciation since then nearly 23 points, or more than 50%.

Reynolds has outstanding 400,000 shares of common and 2,800,000 shares of Class B common, both $25 par. Common held by officers and employees is entitled to share in special distributions and therefore commands a substantial premium over Class B shares. On the basis of 66⅜, the outstanding common capitalization of both classes has a market value of $212,400,000.

At its current level, R. J. Reynolds B, which pays 75 cents quarterly, is selling to yield around 4½% and is apparently discounting the possibility of the management being more generous with shareholders.

It is estimated earnings in 1923 are running considerably above 1922 when net after taxes was $20,479,000. This was not only the company's biggest year, but the largest total reported by any domestic tobacco company in the history of the industry. It was equivalent to $5.96 a share on the 3,200,000 shares of both classes of common. There is every indication that Reynolds will outstrip last year's record.—*Wall Street Journal.*

Applies for Charter

Nashville, Tenn., April 28.—The Caney Fork Tobacco Works, with a capital stock of $50,000, recently filed application for a charter of incorporation with County Register West H. Morton. The incorporators are H. E. Morrow, John B. Glenn, Douglas Henry, E. R. Harrison and T. G. Garrett.

To Issue New Stock

Philadelphia, April 30.—Public offering of additional 7 per cent preferred stock of Bayuk Bros., Inc., will be made shortly by a group of New York, Boston, Philadelphia and Chicago bankers. A substantial amount has been acquired by the company's present stockholders. The company is one of the largest American manufactturers of cigars.

Blake Bros. & Co., John Nickerson & Co., S. B. Lewis & Co., of Philadelphia, and Howe, Quisenberry & Co., Inc., of Chicago, are offering at $100 per share and accrued dividend the new issue of $2,000,000 Bayuk Bros., Incorporated, first preferred stock. The shares will be entitled to cumulative dividends of 7 per cent per annum and an additional 1 per cent in each year in which the common stock shall receive more than $4 per share.

The entire proceeds of this issue are to be used to retire all outstanding old 8 per cent first preferred for the reduction of current liabilities and to provide additional working capital. Application will be made to list the present issue on the New York Stock Exchange.

Imperial Tobacco Co. Bonus

London, April 24.—The Board of Directors of the Imperial Tobacco Company of Great Britain and Ireland has decided to give its shareholders a bonus. Imperial directors propose to distribute one new £1 share for every three shares held by shareholders. As the issued ordinary share capital is £22,472,658, this means the bonus will be equal to £7,490,886. To make this distribution part of the reserves will be capitalized.

The company's last balance sheet, which was made up to Oct. 31, 1922, and issued in January, showed the total of share premium and general reserves was £12,000,000, so that the company will still hold a large reserve after the bonus is distributed. The net trading profit for last year was £7,194,556, and the dividend was 22½ per cent, tax free.

May Buy Canadian Company

A news item from Toronto, Ont., to the *Wall Street Journal*, says: "Howard S. Ambrose, president, Tuckett Tobacco Co., Ltd., admits that negotiations are on for the purchase by his company of Tobacco Products Corp. of Canada, Ltd., but says that details are incomplete."

American Snuff Co.

At the annual meeting of American Snuff Co. the directors were re-elected. At a subsequent organization meeting officers were also re-elected.

United Cigar Man in a Big Coney Island Lease

A lease involving 75,000 square feet along the new Coney Island boardwalk, to the Coast Holding Company at an aggregate rental of $3,000,000 for twenty-one years, was announced Monday, and later George J. Wise, vice-president of the United Cigar Stores Co., who is also treasurer of the Coast Holding Co., disclosed that the negotiations had been handled by the law firm which includes Borough President Edward Riegelmann and Harry J. Rosenson. Mr. Rosenson is secretary of the company and George J. Wise, a real estate dealer, of 522 Fifth avenue, president. Borough President Riegelmann is credited largely with the building of the new boardwalk.

"The United Cigar Stores Co. has nothing whatsoever to do with the Coast Holding Co.," said Mr. Wise, who explained that he was the only tobacco official connected with the Coney Island enterprise.

Blue Boar Cigarette Sales Plan

The American Tobacco Co. is inaugurating a new sales plan on Blue Boar Cigarettes, in connection with which it is sending to the trade the following announcement:

To Give $150,000 to the Trade

"If you are a Retailer, here is your chance for the easiest, quickest, cleanest dollar you ever made. All you need is a showcase and the new display carton of Blue Boar English Blend, the American Tobacco Co.'s latest brand of cigarette.

"Of course, you have the showcase. And of course you are going to jump at the chance to have this new brand right up in front because, as the company points out, you sell Blue Boars for 25 cents a package and make more profit than on cheaper brands.

"How do you get the dollars? Here's the way. The minute you get your shipment of Blue Boar Cigarettes from your Jobber, open up the attractive display carton (ten packages) and set it out on your showcase. A Division Manager of the American Tobacco Co. walks into your store, sees the carton displayed, and hands you a crisp one dollar bill.

"There's the whole thing, and no strings to it. You perform a service that costs you nothing, and which in itself is a profit-maker, and get a nice extra slice of profit.

"Every day all over the United States, Division Managers of the American Tobacco Co. are calling on the Retailers in their respective territories. One of them may be in your store today, or within the week, or perhaps later, there is no way of knowing. If he comes in and doesn't see the carton on your showcase, he is going to be sorry (and so are you). But all he can do is to say so, to urge you to use your opportunities, and come back some time, if he can.

"But not very many live dealers are going to take any chance on missing such an easily earned dollar. They're going to be ready for the first visit.

"Blue Boar Cigarettes have started with a rush, on account of their own exceptional merits, and on account of this strikingly liberal feature that rush will become a riot. When you figure what each Division Manager will give away a week to merchants who are on the job, you can see where the whole $150,000 will go out pretty fast.

"We are informed that this introduction plan has a six months' limit, but if we know the trade, we don't believe the money will be allowed to last that long. So if you are a Retailer, get ready for your share of these one hundred and fifty thousand clean, crisp one dollar bills. There's nothing to stop you."

New Cigar Factory

CLARKSBURG, W. Va., April 28.—M. F. Suarez, of Grasselli, announces the opening of a cigar factory. Cigars are to be hand-made in several sizes, Havana and Porto Rican tobacco being used.

Wisconsin Crop Outlook

The cold, unseasonable weather still continues, holding back all farm work that should be well under way at this date. Added to an extremely late spring in many cases is the shortage of farm labor. While state statistics give the condition of farm labor as 83 per cent of normal, as a whole, in many sections it is considerably more, while in others less. In some instances portions of farms will be seeded down this season for this reason. However, with the present bright prospects for a good market, it is not likely that any tobacco fields will be abandoned this year. Indeed, all indications point to a full normal acreage as practically certain with an increase quite probable.—*Edgerton Reporter.*

To Stock Men's Furnishings

INDIANAPOLIS, Ind., April 28.—T. R. Lewis is the new owner of the cigar store at 37 East Ohio street. He is to put in a stock of men's furnishings.

Foreign Exchange Rates

In the subjoined table the quotation on sterling represents dollars and decimals of a dollar; all others represent cents and decimals of a cent. Quotations preceded by the decimal mark indicate a price measured in fractions of a cent.

Parity of exchange is given as reported by the United States Mint, except in countries with a silver standard, where parity fluctuates with the price of silver.

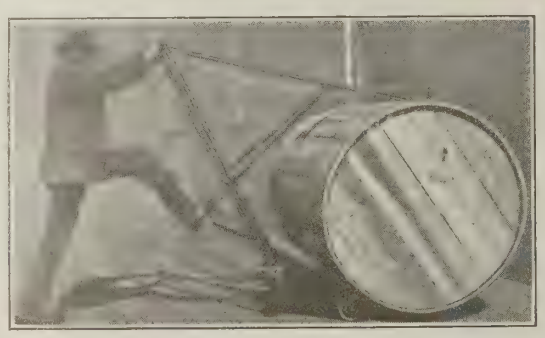
Importers of SUMATRA and JAVA TOBACCO



Says One Of Our Users:—

"Anybody who knows anything at all about curing tobacco can handle this furnace successfully." Quite right!

And we also agree with him that the JOHNSON PATENT TOBACCO CURING FURNACE "saves more than one half the wood and is the finest thing for curing tobacco." If you're a tobacco grower we want you to have one of our catalogues—it's sent for the asking.

Cleveland Business Conditions Continue Good

No Complaints Are Heard—Shipments Coming Through on Time—Collections, Which Have Been Good, Are Now Even Better—Cigarette Situation Only Discordant Note.

CLEVELAND, Ohio, April 28.—Business conditions in this section continue to be of the best. No dealer has been heard to complain of the way things are going with him or his neighbor. Shipments have been coming through on time and dealers can now, with some degree of certainty, expect their orders to be filled and on time. No dealer can sell goods and expect to repeat on his orders if he hasn't the goods on hand to fill them with, and it is all for the best that manufacturers of most of the better selling brands can hold up their end and send through their products on time. Collections are also coming along, even better than they have been some time, although a steady improvement has been noticeable in this essential of a paying business. The only phase of the situation that offers any room for improvement is the cigarette situation. This is not of the best and continued price cutting does not improve matters any. Dealers have not been paying as much attention to this end of the game as they should and probably will let things just about slide along on the matter of this poorer paying proposition.

Baseball Teams Swing Into Action

With the joyous cry of the "ump" of "Play Ball," the local baseball team swung into action the other day against its foe from Chicago. The baseball season, with fine weather and sporting atmosphere, is well liked by cigar men. It means not only an increased business, in most cases but an outside interest that makes life just that much more worth living. Incidentally, many cigarists were absent from their customary places behind the counter and might, perhaps, have been spotted in the grand stand out at Dunn Park on opening day.

Van Gets Back

Van B. Winters got back just the other day after a very enjoyable and successful business trip through the state of Indiana. Van has La Palinas humming all through his wide territory.

Bucyrus Enjoys (?) Blue Sunday

Residents of Bucyrus near here, had a very "delightful" time last Sunday at their first "Blue Sunday" celebration. Everything was shut down as tight as a clam, not even the bootblacks being allowed to ply their trade. Cigar stores also came under the edict and not a cigar or a cigarette could be seen. Moving pictures having recently received the benefit of a common pleas court ruling restraining the mayor and the police force from interfering with their operation, remained open as usual, a somewhat joyous contrast to the rest of the proceedings.

For Anndoras

We had with us the past week M. M. Wilson, pushing Anndora cigars. The P. G. Vincent Co. distributes this brand in this territory and sees to it that every desirable location in town has them in all sizes.

Lease Union Club Stand

It has been announced that Faber, Coe & Gregg have completed arrangements whereby they are to operate the cigar stand in the Union Club. This stand does a remarkable volume of business and all quality clear Havana lines go over in fine shape here.

On All Six

Dan J. Lawrie was here last week in the interests of Yellow Cab the fast travelling two for fifteen cent seller of the McKee-Marks Cigar Co. The A. D. Goodman Co. distributes the Yellow Cab in this territory and has this brand hitting on all six and travelling far over the speed limit.

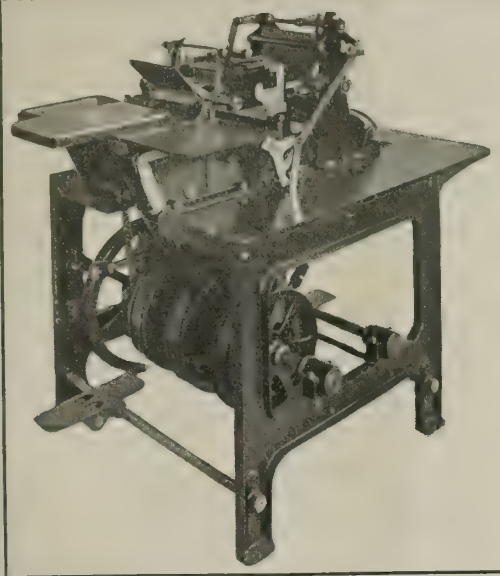
Campaigning Detroit Hand Made

Tom McDonald, local booster for the Mazer Cigar Co., is inaugurating a big advertising campaign on Detroit Hand Made cigars, and assisted by Harry Wise, of the Baer-Wolf Co., distributors for this section, has put this brand over in fine shape through here. Akron has been the scene of action where these two hustlers have been demonstrating the effect of their activities for the past weeks, and the big increase in sales, according to reports from the Rubber City, bears witness to their fine work.

United Gets New Locations

The United Cigar Stores Co. has secured the rights to two very fine locations here. These are at Fourth street and Prospect avenue, and at Ninth street and Prospect. Both of these locations are in the heart of the downtown business section, and should add to the United standard through this way.—HERB.

Returns from Amsterdam



Rodney Smith, of Hinsdale, Smith & Co., who has been attending the inscriptions at Amsterdam and Rotterdam, returned to New York last week on the Cunard liner *Aquitania*. His father, E. H. Smith, is staying in Holland to represent his firm at the remaining inscriptions.

Crossing the Road

Herzog & Sarluy, importers of Sumatra and Java leaf, are removing from 146 to 147 Water street, in the near future.

To Open Factory

LADYSMITH, Wis., April 28.—Grover C. Gossage is to open a cigar factory here.

Why not make your bunches with this

AUTOMATIC LONG FILLER

BUNCH MACHINE

Two inexperienced girls can soon learn to operate this machine. One feeds the filler, the other the binders and the machine does the rest.

Gives you uniform work with unskilled labor.
Greater production and attractive savings in cost.
Easily adjusted to make light or full bunches.
Substantial construction gives long life.
Easy and inexpensive to operate.

Detroit Maintaining a Very High Scale of Wages

Cigar Industry Feels Effect Big Pay Envelopes—The Dynamic City Fairly Hums With Business Life and Activity—Cut-Raters Moving from Downtown—Trade News and Notes.

DETROIT, Mich., April 28.—As concrete evidence that Detroit is enjoying a period of real prosperity, read the following:

With but a single exception, Detroit is paying a higher wage for common labor than is paid in fifty of the largest manufacturing cities in the country, and, with the exception of three cities, the highest wage for all around mechanics in manufacturing industry, according to the Detroit Employers' Association, whose report was made public yesterday.

This affects the cigar industry. The report shows that common labor in Detroit is paid from 45 to 50 cents an hour; while in only one other city of the fifty embraced in the report is the average wage more than 40 cents. The exception is Rochester, N. Y., where the average is 55 cents an hour.

The weekly labor barometer issued by the Employers' Association shows that a total of 226,828 persons were employed by the 79 firms holding membership in the association, which means, according to the barometer, that there are between 300,000 and 325,000 persons employed in Detroit industries, as there are approximately 100,000 persons on the payrolls of the firms that are not affiliated with the association.

Today, there is no doubt in the minds of serious students of business conditions, that industries here have regained past records of business activity, and that 1923 is to be the banner year for the dynamic city.

Trade Topics

Jim Williams, representing A. Amo & Co., spent the past week in Detroit introducing La Amo cigars to smokers in the motor city. Jim is working through Berdan Co. of Toledo and is having a very fine success, judging from the "flock" of orders he carried away with him.

Tilford cigars are being featured by leading dealers throughout the city this week, with attractive window displays.

Harry Segal, one of Detroit's foremost cut-rate cigar merchants, has purchased the Porter Drug Co.'s store on Gratist avenue, and will move his entire stock from his present location on Monroe avenue to the new stand. His lease has expired, and the building has been sold.

Billy Whalen, another cut-rater, is also forced to move. This action eliminates two of Detroit's biggest cut-raters from the immediate downtown section, and we trust will eventually eliminate them from the game entirely—that is to say we hope that there will not be any more cutting of prices.

Dan Manheimer, representing the Imperial Cigar Co., of Lancaster, Pa., was a visitor this week. W. B. McBurney, of the Juan Ovarez Cigar Co., of New York, was also a visitor.

Matt Behrman, for the past five years with the sales force of the San Telmo Cigar Co., severs his connections with the above-named concern next week, and will, in future, cover the state of Michigan, outside of Detroit, for the Mayer Cigar Manufacturing Co.

Howard Piel, in charge of advertising for Bayuk Bros., returned to Detroit recently from a week's trip to Saginaw and Bay City, Mich., where he directed a campaign on Mapacuba cigars. Howard reports that Bayuk Bros.' products are showing the proper speed throughout the state.

Sam T. Gilbert, president of the Webster Cigar Co., reports that the factory is still considerably behind on orders for Webster cigars, despite the fact that the new addition to the main plant on Grandy avenue has been in operation for over a week.—JIM.

Acquires More Cigar Stands

Faber, Coe & Gregg have recently added fifteen new stands to the chain of cigar shops owned or operated by that organization. One of the most recent locations acquired was the stand in the Union Club of Cleveland, Ohio, considered one of the most desirable propositions in the Mid-West.

Makes Heavy Purchases

Sam Jaskulek, of Dayton, Ohio, was a recent buyer in the local leaf tobacco market, where he is reported to have made some heavy purchases.

From Lone Star State

R. J. Allen, of Fort Worth, Texas, has been greeting his friends in this district, who were delighted to welcome him to Little Old New York.

A Good Move

Manuel B. Pendas, leaf tobacco merchant, has removed from 4 White street to 97 Water street, one of the main arteries of the local leaf market.

Key West Key Notes

KEY WEST, Fla., April 28.—The reports from all the factories are that the forces continue to keep up with the orders received, and that May is expected to bring more orders for cigars than any month this year.

Stamp deputy collector of Internal Revenue, Jos. F. Uhrback, gives out the report that 4,689,643 cigars were manufactured here during the month of March. Of these, class C led, as is usually the case. The report shows that 2,872,479 of this grade of cigars were made. Class A was the second in number, having been 1,225,225, according to the report. Class D numbered 341,739, while class B is reported at 235,675, and class E as 14,525, making a total of 4,689,689 cigars made here during March. The revenue collected on the sale of stamps for these cigars amounted to $39,402.26.

The Repeater is the name of a new brand offered by Watkins & Kemp. This firm is advertising their goods in an extensive manner, and are receiving considerable out-of-town orders.

Deputy Collector of Internal Revenue H. B. Sandifer is in Miami. During the absence of Mr. Sandifer from Key West, the duties of the office are being cared for by L. Vann. Mr. Vann is also auditing the factories.

Mrs. C. C. Hawk, formerly Miss Sophia Quintans, is in the city visiting her father, D. Quintans, manager of the Havana American factory.

Real Service Now Possible in the Tampa Field

CINCINNATI, Ohio, April 28.—The increasing number of Durex Quality Production Power Bunch Machines, and other cigar making machinery manufactured by the Miller, DuBrul & Peters Mfg. Co., in the Tampa, Fla., district, has caused that firm to establish a Service Station at 708 Hugh street, Tampa.

This step will directly benefit the various cigar factories within a radius of 100 miles of Tampa, and it is another example of the often demonstrated fact that the M. D. & P. people are an organization primarily of service to the cigar manufacturing industry.

C. J. DuBrul, president, in speaking of the establishment of this Service Station, stated, "We have contemplated a service of this kind for some time, and with the expansion of our business which was made possible when we moved into our new factory, we were able to put our ideas into actual practice. We believe that by offering this kind of service to the Tampa manufacturers, we will be helping them solve one of their heretofore serious production problems."

The officers of the company gave considerable thought to the requirements of such a Service Station, and when the plans were well under way, sent Earl Kincaid, Erecting Engineer, to Tampa to take care of the initial work of making it an actuality. It will be found complete in every detail, with the necessary lathes, drills, and other machinery equipment to make repairs, replacements and even build new parts with a minimum production loss to the operators.

In order to assure the Tampa factories of the very best mechanical assistance, Harry D. Smidley has been appointed Resident Manager of the Service Station. Mr. Smidley is probably as well versed in cigar machinery as anyone in the country. He has been connected with the Miller, DuBrul & Peters Mfg. Co. for a number of years, having been the head of their large machine shop, and also sharing an important part in the research work and development in connection with the various types of power machines which his firm produces.

Mr. DuBrul stated that the activities of the Service Station will not be confined to repair work entirely, as it is the purpose of the company to put into effect immediately, an inspection system. This plan involves the making of regular inspections of the different types of machines manufactured by the Miller, DuBrul & Peters Mfg. Co. which are in use in the Tampa field, so as to anticipate wherever possible, any break-downs or trouble of any kind. Such an inspection service will undoubtedly reduce to a minimum those delays that are always necessary when a power machine is forced out of commission, and the operators are compelled to send to the factory for new parts or mechanical assistance.

The trade will be glad to know that the Miller, DuBrul & Peters Mfg. Co. are in Tampa, with this Service Station, to stay.

New Wholesale House

MOBERLY, Mo., April 28.—The Miller Tobacco Co., wholesalers of tobaccos and candies, which recently opened for business, announced that it carries a complete stock of cigars, including the Niles & Moser Hand Mades, Chancellors, La Siestas, Mercantiles, Rice's Hand Mades and 305's; El Crusidors, Melbas and John Ruskins. Cigarettes and smoking tobaccos, plug, twist and scrap tobacco; pipes, cigar and cigarette holders; bar candies and box chocolates. Office, 207 Reed street.

Removes to Water Street

Adolph Goldberg, leaf dealer, has removed from 126 Maiden Lane to 128 Water street.

A Welcome Visitor

D. Horn, of the Tampa Cigar Co., was a business visitor to Gotham this week.

Tampa Tidings

Importance of Identification Stamps Shown

TAMPA, Fla., April 28.—The Cigar Manufacturers Association of Tampa has entered into the second year of its fixed program, to support and advance the interests of the cigar industry of Tampa. That the Identification Stamp on Tampa cigars *means something* to the smoker is proved by the enormous gain in demand for Tampa smokes during the past twelve months.

"Pancho" Pushing Ahead

Don Sebastian, made in Bond by Arango y Arango under the personal supervision of "Pancho" is daily making new friends for its makers, and adding to the reputation of Tampa cigars. This company, in a few days, will celebrate its first anniversary of its existence, being chartered in May, 1922. Already it is a little giant, and still growing. Its commodious quarters, recently occupied, will soon need expansion.

The Hava-Tampa Cigar Co., has placed its line with Grosvenor Nicholas & Co., in New York.

Personal and Pertinent Paragraphs

Harry Slavinski of the G. & M. Cigar Co., Tampa and Chicago, is in Chicago, and soon due back in Tampa.

A. T. Rollins, the affable secretary of San Martin & Leon Co., is in Kansas City on business. Business in this factory beats Coué at his own game.

A. L. Cuesta, Sr., will represent Tampa at the Tobacco Manufacturers Convention to be held in Washington, May 16-17.

J. J. French, general manager of Sanches & Haya, recently returned from Havana.

Other pilgrims recently returned from Havana are Ned Berriman of Berriman Bros.; Manuel Corrall of Corrall-Wodiska y Co.; and Manuel Alvarez.

Morris Scadron, cigar and leaf dealer of Brooklyn, N. Y., is making his annual visit to Tampa.

Hoyt Woodbury has gone to Hartford, Conn.

Friends of Ben Cosio are glad to see him out after his recent rather serious illness.

Reports from Mort Hammer of Marcelino Perez & Co., indicate prosperity in the Middle West.

Sues On Insurance Policies

Growing out of a fire several days prior to last Christmas which partially destroyed contents in a cigar factory belonging to Alfonso Fernandez, located at the corner of Tenth avenue and Twentieth street, suits aggregating $36,000, have been filed in the circuit court by Fernandez, through his attorney, William J. Skinner.

Three companies with which Fernandez carried insurance on the property prior to the fire have paid about $16,500.

The face value of the policies on which the complainant is suing totals approximately $22,000, and the suits are brought in larger amount for the purpose of recovering interest and attorneys fees.

Proofs of loss were filed with the companies about three months ago, according to Attorney Skinner, and failing to make settlement within the sixty day period under the law, it was determined to bring suit.

Florida Crop Benefiting From Ideal Weather

QUINCY, Fla., April 28.—Ideal growing conditions are being experienced at present for the young tobacco plants, which are making rapid strides, and looking exceptionally fine. There was another good downfall of rain last Saturday afternoon, and since that time the weather has been warm, both night and day, thus assisting the growth of the plants materially. Some of the farmers have announced that they will start tying up this week and by the close of the following week, everyone will probably be busily engaged in this operation. While a few reports have been received regarding root-rot and black-shank, diseases seem to be less prevalent than ever before and the future outlook is promising, from every point of view.

Purchases Sumatra

Bernard Schwartz, cigar manufacturer, of Detroit, Mich., visited New York early this week to investigate the leaf market. It is reported that he made some heavy purchases of fancy Sumatra.

Connecticut Tobacco Men Busy With New Crop

Seedlings Showing Up Well in the Beds—Fertilizers Being Hauled to Tobacco Farms—The 1922 Havana Seed Leaf in Cases and Practically All Sold—Trade News.

HARTFORD, April 30.—Things are now taking on more of a spring-like appearance. Better weather has started general activities, and everywhere preparation for another crop has gotten under way. Seed beds are in and plants are up and look fine; fertilizers are being hauled now in quantities to the tobacco farms, and plowing has been begun. The tobacco growers are now in the teeth of another busy season.

Some of the growers had still tobacco hanging of their 1922 crop, and the recent rains gave them the opportunity, long looked for, to take it down and get it into the bundle. Nevertheless, the work of assorting and packing will have to be continued for some time longer before the entire crop of 1922 is in cases.

The Havana seed is now nearly finished and in cases, and is practically all sold. Much of it has already been shipped.

There is still considerable broadleaf to be assorted, and the work will not be finished for some considerable time. Much of the broadleaf has been through the sweat rooms and has been sampled, and it is coming out better than was expected.

Many of the farmers who had assorted their crops decided that their fillers and broken should be sold while green. These crops have been marketed and most of the tobacco has already been shipped, mainly to Morgan & Dickenson, of Windsor, Conn., representatives for the P. Lorillard Co., Inc.

Some broadleaf broken has also been sold, and a large block of No. 2 seconds was sold early to Keiser & Boasberg, of Buffalo, N. Y.

Outside of these sales, it was decided to hold up until the goods were sweated and in condition to sample. Different sections of the 1922 crop that was haildcut were sold in the bundle.

To handle the 1922 crop was a stupenduous proposition, but, thanks to the organization worked out by President Alsop and General Manager Griffin, of the Connecticut Valley Growers' Association, the work went along without any serious "hitches." They are to be congratulated upon their work, as they were seriously handicapped, for they could not get to work on the tobacco as early as they wanted to; the farmers were held back, due to their not being able to get their tobacco down in the bundle in December, as is usually done. Thus, packing was badly delayed, and when the tobacco was finally ready, warehouses were turned loose and full forces were engaged in packing. About 500 acres of broadleaf was packed every day, and most of it was shipped to the central warehouses in Hartford, where arrangements had been made for its storage and sweating.

A Most Unusual Occurrence

Neil Wind, a grower of broadleaf in the Burnside District of East Hartford, lost about three-quarters of an acre of tobacco land in a very unusual way several days ago. His land borders the Hockanum River, and a week ago last Friday, he dumpeed a load of ashes on the edge of his lot where there were trees, some fully thirty feet tall. Next day all that could be seen of the trees were their tops. The land on the edge of the river bank had sunk from fifteen to twenty feet and the width of the river had narrowed from about thirty feet to about ten feet, while many of the trees that were on the south side of the river were now in the middle of the stream. C. H. Olmsted, a civil engineer, advances the theory that the Spring freshets had worn away the toe of the slope, and believes that there is a clay formation at the bottom, which caused the springs in the hillside to cut into the soft earth and was responsible for the sudden disappearance of the land. The land overnight dropped from fifteen to twenty feet from its original level.

Sustains Fire Loss

Tony Taravella, of Windsor Locks, Conn., lost a five-acre tobacco shed last Wednesday through fire, and believes that the conflagation was the work of an incendiary. Since last Fall this is the fifth fire that has occurred at his plant, each one of which has started at night at about the same hour. Four of the buildings were tobacco sheds, at a distance from other buildings and all the fires were well started before being discovered, so that nothing could be done to save the sheds. One of the fires also destroyed a house, so that all together five buildings have been destroyed.

Several tobacco farms will have new men in charge this year, as many growers have given up raising tobacco and have rented their farms. A number of the packers have made contracts with some of the farmers who did not go into the association, to raise tobacco for them the coming season

It is very evident that there is a strong demand for Connecticut tobaccos, and that the manufacturer who makes a first-class cigar finds, that to keep his cigar up to standard, it is necessary for him to use Connecticut. The packers are arranging, as far as possible, to keep a stock of leaf on hand for these manufacturers.

Keiser & Boasberg, of Buffalo, will raise broadleaf this season, growing about 150 acres on various farms in the vicinity of Suffield. E. Wever, of West Suffield, who has been with the firm for many years, will have charge of the farms growing broadleaf.

Many growers have attended the various district meetings, where they have heard about "Wild-fire" and are starting out more cautiously than heretofore, with the intention of stamping it out.

President Alsop Talks to Growers

GLASTONBURY, Conn., April 25.—There was a large attendance Monday evening at the meeting of the Second District of the Connecticut Valley Tobacco Association, at Odd Fellows' Hall. President Joseph W. Alsop, of the association, gave a talk on the progress of the packing and sweating of the broadleaf crop and on the financial arrangements made for the loan value payments. There was a good demand for the broadleaf, to be delivered in the fall after sweating, and many orders were being booked. The scale of prices, according to pools, will be announced later, he said.

Mr. Alsop spoke at considerable length on the use of dust in the tobacco beds to prevent wildfire, and said the best place to check it was in the beds. He cautioned growers against putting last year's stalks on the ground and plowing them under.

Richmond Season Near End

RICHMOND, Va., April 28.—With a promise of a good season in next few days, enabling farmers to get the balance of their tobacco to market, the sales of sun-cured tobaccos on this market will soon wind up the crop of 1922. We do not think there is more than fifty thousand pounds to be sold on the loose floors; but some very good tobacco still remains unsold. The Warehouses have only two sales days a week now, and sales are small. Only 14,135 pounds were sold this week, mostly inferior grades, at $13.49 average. There are no old crop sun-cured tobaccos available, and the carry-over of this crop is what the Pool has on hand.—R. C. MORTON & Co.

To Buy Co-operatively

DANVILLE, Va., May 1.—A new development of co-operative marketing is reported from Stuart, Patrick county, where it is reported that the tobacco growers affiliated with the marketing association have formed a county organization looking to the co-operative purchase of seeds and fertilizer. This organization has retained a purchasing agent, George Biggs, who is buying in large lots, seeds for the farmers and fertilizer to be delivered anywhere along the Danville and Western Railway. It is said that through these wholesale purchases at the point of manufacture, the farmers are being saved many thousands of dollars, fertilizer being obtainable at from eight to twelve dollars a ton lower than the catalogue prices.—TETLEY.

Second Payment to Co-ops

DANVILLE, Va., May 1.—More than $300,000 is being paid out here this week to tobacco growers who are members of the Tobacco Growers Co-operative Association. The checks being paid to the growers not only in Danville but throughout the bright belt constitute the second distribution on tobacco delivered to the Association since Christmas. The third payment to the growers remains to be paid, its date being uncertain at the present time.—TETLEY.

Wants Another Warehouse

PETERSBURG, Va., April 28.—The *Progress*, a local newspaper, says:

"Petersburg business men should consider the erection of a large and up-to-date tobacco warehouse here. Such enterprise undoubtedly would be protable the first year. In addition, another auction warehouse would undoubtedly have the effect of increasing tobacco sales in Petersburg, since the representatives of the new concern would bring about the shipment of much more tobacco to this market.

"We have heard no complaint whatever from growers regarding the service given them by the proprietors of the warehouse now in operation in Petersburg. Indeed, we have heard a great deal by way of compliment along this line. Our warehousemen are experienced and always disposed to courtesy and absolute fairness in the treatment of customers.

"But Petersburg needs more warehouse capacity. Addition to this capacity would mean more tobacco sold on this market to the benefit of the whole city. As a movement for another warehouse has not been inaugurated, we suggest that the Chamber of Commerce take up the subject and throw the weight of its influence behind such enterprise."

Plant Scarcity Reported

DANVILLE, Va., May 1.—Reports are being heard in this section of a scarcity of tobacco plants and the stunting of the growth of plants as result of the continued cool weather. It is already apparent to the trade that the next crop will be a late one in view of the unfavorable weather.—TETLEY.

J. B. Cobb's Will Probated

DANVILLE, Va., May 1.—The will of the late James Blackwell Cobb, formerly vice-president of the American Tobacco Co., who died suddenly on a train a few weeks ago, has been filed for probate in the court at Stamford, Conn. The size of the estate, which is estimated at $50,000,000, is a surprise to many of his old friends here who had watched his rise in the tobacco world since he left here thirty years or more ago. His Stamford home is left to his two daughters, Mrs. Lucy Cobb Hill and Mrs. Mary Howard Gilmour, who also come into possession of Mr. Cobb's 3,800 acre estate and handsome hunting lodge, "Sedgewick" in Guilford county, N. C. An annuity of $25,000 is provided for his widow. The New York home is left to his daughter and to his son-in-law, William Pegram Gilmour, he leaves $25,000.

The bequest of $140,000 to the University of Virginia reported recently, is confirmed in the context of the will.—TETLEY

Co-ops Seek New Members

PETERSBURG, Va., April 29.—Several hundred persons from Dinwiddie County attended the barbecue at Midway High School yesterday and, in spite of the heavy rain, the crowds remained and heard several speeches by prominent men.

The rally was given under the auspices of the Namozine unit of the Virginia-Carolina Tobacco Growers' Co-Operative Association, of which there are several hundred signers in the county. It was for the purpose of enlisting not less than 300 signers, and it is believed the names of many new members were enrolled.

T. W. Wilson is the president of the local; J. B. Thomas is county chairman;

A. J. Sutherland, secretary. The entertainment yesterday was in charge of Mr. Sutherland.

The meeting was presided over by Chairman Thomas, while the speakers included E. T. Bondurant, of Prince Edward County; Farrar Shelton, of Burkeville, director of the field service department of the Virginia-Carolina Association; F. S. Farrar, district agent of the association; C. C. Cawthorne, of Nebraska, and Eversett Chambers, in charge of the dark tobacco co-operative warehouses in Virginia.

Plain Words from Stone

The Burley Tobacco Growers' Co-operative Association will not tolerate lawlessness. It will not be a party to night riding in any form. It will aid in prosecuting any member guilty of violence against any non-member.

It is with this definite statement of policy that James Stone, president of the association, answers the insinuations that the co-operatives had a hand in the scraping of a few isolated tobacco beds. And it is not merely with words that he answers these charges. Already he has personally investigated cases in Hart and Barren Counties, where the beds that were scraped included one of an association member, and he has traced the distorted reports to sources that would like to see the farmers and the co-operative suffer.

Mr. Stone justly declared that the Burley Association is founded on right and justice, proceeding under the protection of state laws for the mutual benefit of the farmers, and that if any of its members have been guilty of lawlessness the association will not tolerate such "suicidal conduct."

There is no doubt of the distortion of the reports concerning the scraping of tobacco beds or that they originated in quarters that would benefit from any failure of the association. The charges and the insinuations that were spread abroad had behind them the purpose to do injury to the association and its work.

Mr. Stone has met these insinuations fearlessly and bluntly, with the challenge that the association will follow no other course than that under the law and will not be a party to any unlawful act.—*Louisville Courier-Journal.*

Good Stemmers in Great Demand

Owensboro, Ky., April 28.—There is a labor shortage in Owensboro at the present time. Especially is this true of tobacco stemmers. Rehandling plants are clamoring for stemmers. In past years there were hundreds of men and women stemmers in Owensboro. Their number is decreasing each year, says the *Messenger*. One cause given for this is the stringent child labor law, which prevents a child under sixteen years of age from working in a factory. All of the good kids, "milking" for their parents. That is, they picked up the tobacco leaves and scraps from about the benches, and little by little learned the art of stemming.

Paid by Amounting of Work

Stemmers are paid according to the amount of tobacco they stem. It requires months and years of practice to become a real stemmer. When a young man or girl reach sixteen years of age they do not have the patience to learn stemming. They are also able to earn more at the start from some other task than stemming.

A fair stemmer can earn $4 a day and many of the experts earn from $5 to $6.

It is estimated that from 400 to 500 stemmers could be used in Owensboro at the present time. One factory that could use 300 stemmers has only fifty at the present time.

"Leaf, Lugs and Trash"

There are stemmers of all kinds this year. Some of them are aged men and women, who are able to earn small wages by the light work. There are those with little experience earning $2 or $3 a day, and others just beginning getting less than $1 a day. But in the old days there used to be from 100 to 200 stemmers at the factories, all working with a skill and rapidity that only comes with years of training. The wages they received were considered "top" among laborers. Near "quitting time" in the afternoon one ne-

gro stemmer would start a song, which would immediately be taken up by scores of other stemmers, and old-time melodies would ring through the factory until the closing whistle would blow.

Has a Price-Fixing Bill Any Chance of Passing the Next Congress?

A great many students of the situation seem to think that the chance of Congress passing a price-fixing act at the next session is brighter than ever before. In fact, there are many confident and positive prophecies from people who ought to know, that such a bill will be passed by the next Congress. As this measure will revolutionize trade in all lines that sell trade-marked, or I should say ear-marked specialties, perhaps I had better prepare the readers of these articles a little for this possible change. Personally I don't believe Congress will ever pass a law allowing manufacturers to fix and enforce the resale price of their products, thus completely blocking competition between credit merchants and those who cut down their overhead—and their selling prices—by cutting out credit, delivery, etc.

The bill to give a manufacturer this power has been pending in Congress for several years, sometimes in one form and sometimes in another. No matter what the form, the purpose has always been the same, viz.: to prevent the cutting of ear-marked products, by which I mean trade-marked or individualized products as distinguished from bulk goods, by the dealer. Manufacturers have complained bitterly for years that the cutter got hold of their brands and destroyed their business. The U. S. Supreme Court has ruled that manufacturers could not dictate the price at which their products should be resold, which left them with the rather ineffective remedy of merely refusing to sell the cutter, which of course they could always do.

The purpose of the price-fixing bills, therefore, has been to give the manufacturer, selling his products through the wholesale or retail dealer, or both, the power which the Supreme Court has denied him, viz.: the power to fix the price at which the jobber, if he sells through the jobber, shall resell to the retailer, and the price at which the retailer shall resell to the consumer, and also the power to enforce both.

None of these resale bills ever got anywhere in Congress, being invariably left on base when Congress adjourned. Two were left on base by the last Congress, the Kelly-Stephens Bill and the Merritt Bill. The Kelly-Stephens Bill is the only one that amounts to anything—the Merritt Bill, which is supposed to have the backing of Secretary Hoover, merely authorizes manufacturers to fix the resale price and refuse to sell anybody who cut it. As the manufacturer has that right already, it would seem as if the Meritt Bill was practically wasting time. The Kelly-Stephens Bill, however, is radical. It permits any manufacturer of an ear-marked article, that is, a standard, identified article, to fix resale prices and file them with the Federal Trade Commission. If anybody believes the resale prices are too high, he can complain and the Federal Trade Commission can investigate. If the resale prices are upheld or not objected to, any dealer selling those goods must not sell below them. The bill recognizes the fact that occasionally a dealer will want to clear out some stock and it gets around that by compelling him to offer the goods to the manufacturer at the price he (the dealer) paid, before he attempted to cut the price. I can see this provision breeding prolific frauds and abuses on the manufacturer.

There is no doubt that the passage of such a bill as this would work a trade revolution. It might be a good thing for the manufacturer, but on the contrary might be a very bad thing for him, if his competitor did not fix the resale price, but left the situation to the devices of the dealer as it is now. It would also be a good thing, perhaps, for the small and conservative dealer who needs protection against chain store competition. For the dealers who reduce their overhead by cutting out non-essential services and reducing their selling prices accordingly, such a bill would be a serious blow—*if* all manufacturers observed it. For the consumer I think the bill would be the means of raising hundreds of selling prices.

As to the Kelly-Stephens Bill's chance of passing, its backers claimed they had a majority of the House pledged to vote for it last winter, but the chairman of the committee was against it and it therefore died. It is understood, however, that the chairman of the House Interstate and Foreign Commerce Committee has promised to give the bill a chance this time, and it is quite probable that that will be done. But the Senate is a different proposition. I should not be surprised if the House passed the bill, but I should be exceedingly surprised if the Senate passed it—*Copyright, April, 1923, by Elton J. Buckley.*

Fighting Folly

The Burley Tobacco Growers' Co-operative Marketing Association does well to take a firm stand against any tendency on the part of any members to use coercion to increase the number of signers. The organization is a great success. Its strength is increasing. It has the confidence of the people and the respect of the manufacturers. Lawlessness cannot be countenanced, and James C. Stone, president and general manager, is exactly right in speaking out.

While it is true that the reports of

T. S. WILLIAMSON & CO., *Leaf Tobacco Dealers*

scraping of tobacco beds and the posting of threatening notes have been exaggerated by opponents of the organization, it is equally true that the exaggeration might encourage foolish persons to resort to acts of intimidation. The co-operative movement does not need the support of persons entering unwillingly. Its real power and influence must rest upon a membership loyal and appreciative.

This is a free country. The co-operative is an organization which farmers have the lawful right to join or not to join. The organization was formed to protect the price of tobacco for the growers. Those who do not wish to aid in their own protection have the lawful right to play the part of the cuckoo. They have the right to be "independent" and to take a free ride. Their position is illogical, but it is legal.

The co-operative went to the lawmakers for authorization under the law. It operates through the channels of law and order. It works with the substantial law-abiding elements in the governmental and commercial fields. Its financing is accomplished through lawful channels. The banks and the merchants look upon the co-operative organization as a lawful body, operating in good faith and in good order.

Anything savoring of disrespect for law on the part of members is bound to injure the interests of the membership. Disorder would do a great deal more harm to the association than the "independents," the pin-hookers and the speculators could hope to do.—*Louisville (Ky.) Times.*

Receipts at Hopkinsville Show Decline

HOPKINSVILLE, Ky., April 30.—Receipts of tobacco at both the independent houses and the receiving stations of the Dark Tobacco Growers' Co-operative Association, showed a decrease the past week, indicative of the waning crop movement throughout the entire dark district. On the loose floors, sales for the week were 251,880 pounds, while the association received 758,000 pounds. Only a comparatively small portion of the crop now remains in the farmers' hands, and with the press of farm work and the warm weather which will dry out tobacco quickly, the deliveries from now on will probably come in spurts as there are rains to put the tobacco in handling condition. But the desire to get it off their hands will doubtless cause the farmers to move it as promptly as possible.

Sales on the loose floors last week showed much stronger tone than the preceding week.

One of the best records of the week was a crop of 3,200 pounds that brought an average of $23.67 on the Hopkinsville Loose Floor. The top price was $32.50. Another crop of 8,415 pounds brought $1,399.40.

According to grade, prices for the week ranged: Trash, $3 to $5. Lugs, common, $5 to $7; medium, $7 to $9; good, $9 to $12; fine $12 to $16. Leaf—Low, $10 to $12; common, $12 to $20; medium, $20 to $30; good, $30 to $32.50. No fine leaf offered.

Farmers have been working every minute of daylight for the past week preparing their ground for tobacco and other crops. Plants are reported to be coming on splendidly and will be plentiful.—M. E. BACON.

Patterson Brands

Arrangements have been made by the Patterson Bros. Tobacco Corporation with the United Cigar Stores, Schulte Stores and other organized chain stores for the introduction and sale of certain brands of cigarettes and smoking tobacco, according to F. A. de Pillis, chairman of the board of directors of Patterson Bros. Distributions will be made through the Metropolitan Tobacco Co.

Dark Tobacco Production Is Less Than Predicted

HOPKINSVILLE, Ky., April 30.—A total of 135,000,000 pounds of tobacco of the 1922 crop has been received and handled by the Dark Tobacco Growers' Co-operative Association up to this time. For weeks the deliveries have been coming heavy, but probably not more than another 15,000,000 pounds is to be delivered before the crop will all be in. This will move as quickly as possible now. The average cost of handling this to date, it is said, has run approximately 38c per hundred pounds.

The crop for the district as a whole will not run out as large as had been expected, this being due to the tobacco in the dark fired district failing to weigh out as heavy as had been at first estimated.

The estimate for the entire dark district was placed at 750 pounds to the acre. In the One Sucker and the Stemming districts this will be just about fulfilled, each of these districts delivering to the association approximately 18,000,000 pounds. In the Green River district the crop ran ahead of the estimates, making about 800 pounds to the acre, and giving this district about 25,000,000 pounds. But in dark fired district, the average will not be above 600 to 650 pounds, with some counties going as low as 450 pounds, and the district will probably not show more than 100,000,000 pounds, whereas the estimate had been around 130,000,000 pounds.

This shortage in the dark fired district is not due to any crop failure or reduced acreage but solely to the fact that the tobacco is not proving to be as heavy as had been expected.—M. E. BACON.

An Easy Slip to Make

Through a law suit which arose—and has only recently been decided—over the buying of a truck, I shall be able to show how a little slip in looking after one's self in the course of a business deal can have annoying and expensive consequences. The slip which figured in this case might have happened to anybody, and it would have taken somebody pretty much on guard to think of it in advance.

The defendant in this case wanted to buy a truck, but hesitated to do so at the time because of a rumor that the price was likely to decline. The defendant and the motor company's salesman haggled over this point for a long time, and finally the salesman told the prospective buyer that if he bought a truck then—this was in April—and the price declined before July 1 following, the company "would allow and remit to him the amount of the reduction in price." Upon the strength of this promise the buyer signed an order. The buyer was at the moment of signing in the same hurry that has prevented so many business men from reading papers before signing them, and also the salesman said what so many salesmen have so often said before in such situation, viz.: that the agreement merely contained what had been agreed to. So the order was signed without reading.

The fact was that the agreement contained no mention of the guarantee against price decline.

Some time later the truck came along and the company presented it at the buyer's place of business for delivery, at the same time producing the contract. This time the buyer read it through, and noticing the absence of the guarantee against decline, refused to accept delivery. The salesman then, in order to satisfy him, wrote in the contract in pencil: "This 21-45 truck protected against any decline in price until July 1." The buyer then made the cash payment he had agreed to make and signed the note which represented the balance of the purchase price.

Small Sales at Owensboro

OWENSBORO, Ky., April 12.—The sales here this week were very small, only 1,465 pounds of Green River being sold at an average of $11.04 per hundred. Total sales of Green River to date foot up 19,629,665 pounds at a season average of $16.16 per 100 pounds.

Total sales of burley to date 245,535 pounds, at a season average of $22.34 per 100 pounds.

Commenting on the market, the Kentucky & Virginia Leaf Tobacco Co., says:

"Sales over loose floor this week were of negligible quantity at unchanged prices. Quantity of unsold tobacco is so small that regular sales will be discontinued after this week, one house remaining open a few days longer for an occasional sale.

"Our week-end market report will now be discontinued until next season. We will be sending our customers and the trade generally news letters through the coming summer and fall months."

J. S. Phelon, leaf tobacco broker, notes:

"The offerings this week consisted of just a few thousand pounds of generally medium tobacco, prices being about in keeping with last week.

"Recent weather has been rather too dry for handling and there probably remains for delivery to the association and independent floors something around 200,000 pounds.

"The late, cool spring has somewhat retarded the growth of tobacco plants; yet in a general way the condition is fair."

Paducah Prospects

PADUCAH, Ky., April 28.—The offerings on the loose floors and wagon markets were very light during the past week, which indicate that independent stocks are practically exhausted. The offerings were generally of low and common grades that are dragging, the market being lower on these nondescript and common tobaccos.

The association receipts have dropped off very considerably. Still the managers have been receiving every day and are making deliveries to buyers on grades that they have sold, and getting rid of some of the congestion in their warehouses. At some points they have begun

packing in hogsheads and storing, which will be a great relief on stocks that they have not sold. The week has been rather a quiet one and no doubt the movement would have been greater, but weather conditions have been favorable for doing farm work which farmers are taking advantage of, and no doubt this has much to do with the lighter deliveries all around.

We have heard of a few sales of old lugs in hogsheads at prices ranging from 4½ to 6 cents, and there seems to be more inquiry for this stock, which has been greatly reduced.

The past week has been the most favorable for doing farm work that we have had in the last two months. Farmers are busy with preparing their land for this year's crop and are getting in good shape for planting. We hear some complaint of a scarcity of plants, but we always hear this at this season of the year and we attach no importance to this report, but believe there will be plenty of plants to plant a full crop. The late frosts no doubt have injured them and they are not growing as rapidly as we would like, and I am afraid the crop will not be planted as early as we had hoped for, but with favorable weather for the next few weeks, they will be ready for transplanting and we think there will be a full average crop planted. We think, too, that farmers will make a greater effort to grow good tobacco because of the great difference in values between the good and common.—W. B. KENNEDY.

Hopkinsville Average, $14.97

HOPKINSVILLE, Ky., April 28.—Total sales for the week, 251,880 pounds; average price per 100 pounds, $14.97; sold to date of 1922 crop, 13,416,100 pounds; average price per 100 pounds, $14.59; sold to same time last year, 19,151,330 pounds; average price per 100 pounds, 14.73.—J. W. HANCOCK, President, Hopkinsville Tobacco Board of Trade.

Clarksville Average, $12.61

CLARKSVILLE, Tenn., April 28.—The sales on the Clarksville Loose Leaf Tobacco Market this week were 160,570 pounds. Sales for the season, 8,262,545 pounds. Sales to same date last season, 1,240,560 pounds. Average for this week, $12.61. Average for this season, 14.62. Average for last season, $16.21. —J. F. SMITH, Supervisor of Sales.

Deprecates Bed Scraping

LEXINGTON, Ky., April 30.—Director D. Craddock of Munfordville, in an address to the tobacco growers of Hardin County at Elizabethtown discussed the reported scraping of tobacco beds in Hart and Barren counties. Mr. Craddock declared that he had an investigation of these reports and that they were greatly exaggerated but that there was no evidence that any member of the Burley Tobacco Growers' Co-operative Association had had any part in the bed scraping. Mr. Craddock said that the exaggerated reports had been traced to the same source and that source was a speculator and pinhooker on the Horse Cave market and another speculator and pinhooker on the Glasgow market.

"I learned," said Mr. Craddock, "that the tobacco beds of one member of the Burley Association and of two growers who were not members of the Association had been scraped by somebody, but judging from the newspaper reports inspired by these speculators one would be led to believe that outlawry was rampant in Hart and Barren counties while nothing could be farther from the truth.

"I do not believe that any of our members are foolish enough and reckless enough to do anything that would be as harmful to our Association as a recurrence of the violence of the old pool. It is my honest belief that men whose purpose is to injure the Burley Association are not only behind these reports but behind the bed scraping which has actually taken place.

"I do not deny that we have some hot-headed members in Hart and Barren counties and I do not deny that some of them resent the fact that the outsiders have been riding them to good prices ever since the Burley Association was started. But we have advised all our members to refrain from any overt act, to refrain even from angry argument or threats, or anything that would tend to cause trouble between those who are members of the Association and those who are not members. Some of the outside growers thoroughly understand this situation and know that the fellows behind these reports are men who would like to see the Association broken up. They know that the surest way to break it up is to have the Association get the blame for violence and outlawry."

Burley Association Notes

LEXINGTON, Ky., April 28.—At three different points in the Burley district today county locals of the Burley Tobacco Growers' Co-operative Association were started. At Carrollton Director of Warehouses Ralph M. Barker, Chief of the Field Service William Collins and other association leaders were in charge of the work. At Cynthiana Virgil Chapman of Lexington and Paris was the speaker, Rev. J. R. Jones, director for that district presided, and at Warsaw, J. Sherman Porter, editor of the *Burley Tobacco Grower*, spoke. R. B. Brown county chairman for Gallatin, presided.

Miss Verna Elsinger, director of social service of the Burley Association and head of the new welfare department of the association, also spoke at Cynthiana and laid the foundation for the organization of a new women's auxiliary at Harrison County along the same line as the women's auxiliary already organized in Carroll County. Miss Elsinger will visit all parts of the Burley district in this work and will have a women's auxiliary in every one of the seventy-four organized counties.

Report from the Carroll County auxiliary the past week show that the women there have already signed up a number of new contracts and that they have been actively at work among the wives of growers not yet in the association.

Pennsylvania Crop Outlook Mixed With Doubts

Bad Weather During Early April Days Did Considerable Damage to Seed Beds—Extent of Injury Not Yet Known—Packers Note Steady Outward Movement of 1922 Crop.

LANCASTER, Pa., April 30.—The lack of old tobacco was no secret among the growers this spring, and preparations carried on pointed to one of the largest acreages ever grown in Lancaster county. While a prospective labor shortage acted as a damper to the enthusiasm of a few of the growers, by far the greater proportion planned a larger crop than was planted in 1922. Along with the movement for more tobacco came a rush to get the seed into the ground early in the season. A freak snow storm and cold spell which broke over this section on April 1 was thought, at the time, to have left the seed beds practically unharmed, and growers gave little thought to the seeds being frozen. Following the cold snap was a protracted damp spell which was also more or less discounted by the average farmer.

A Scarcity of Plants Is Feared

The time has come and gone when the young plants should be appearing above the ground, and it now develops that greater damage was wrought by the inclemency of the weather than was suspected.

Many of the beds, naked of young plants, indicate that the seed were frozen during the cold weather or rotted during the subsequent damp period. Just how general this condition is, it is impossible to determine at the present time. Should a large percentage of growers suffer the loss of their entire planting, the 1923 crop of Lancaster seedleaf faces one of the leanest years, in point of quantity, that has ever visited the section.

A Dubious Outlook

There is scarcely any alternative left the grower who has had his seed frozen except to give up the idea of raising tobacco for this season. While there seems to be a surplus of tobacco plants for sale in all sections of the county, the supply would count for little should the loss be general. Reseeding the beds at this time of the year approaches folly. The plants, though pushed to the limit, would never attain sufficient growth to warrant transplanting, and any attempt, such as this, would be doomed to failure. Hope for nomalcy in the Lancaster tobacco growing industry this year depends, just at the present time, entirely upon how well the seed beds weathered the harsh weather of a month ago.

Selling and Re-selling

A fair proportion of independent packers in this section sell a considerable percentage of their holdings to jobbers, located in all parts of the country, who in turn sell small quantities of Pennsylvania seedleaf to cigar manufacturers. From California to New York and from Canada on down through the Southern states, the Lancaster grown tobacco finds a market in jobbing circles for resale to the cigarmakers.

Brisk Business Anticipated

It is in the movement of these sales this spring that packers see an omen of brisk buying at good prices later in the season. The tobacco is sold to the jobbers in lots ranging from twenty-five to several hundred cases. Unlimited storage privileges are granted these buyers and a lot purchased is never delivered in one shipment. As the jobber finds a customer for five, ten or twenty cases, he notifies the packer who ships the required amounts to him as he needs them. Tobacco sold in this way often remains in the packers' warehouses for a considerable length of time and is moved in small lots at long intervals.

A Constant Outflow

This year the packers report a steady outward flow of all goods held for jobbers in transactions of this kind. There is no let-up in the shipments which go to jobbers in every corner of the United States. By an application of deductive reasoning, the packer fits this fact to the following surmise of the general conditions existing in the small manufacturing field: "A consistent market for cigar leaf means brisk business in the cigar industry all over the country. This condition will certainly be reflected among the big concerns and indicates that the market is going to break right for us a little later on."

Added to this knowledge is the confident belief that a near shortage exists in cigar leaf and that if the business is only "half decent' all of the tobacco on hand will find a ready buyer.

Interviews among packers this morning disclosed nothing new in the way of market activities. Continued optimism is heard from all sides and the opinion is reiterated that even though no sales are recorded, no bearish tendency is apparent and that when the big manufacturers get moving there will be plenty of action.

Changes in Cigar Industry Seem Likely

The low-priced cigar industry continues in a slump. The York county district, where the great bulk of cigars originating in this section are manufactured, is very slow at the present time. The popularity of a cigar seems to be directly proportional to its price. Five cent cigars are "taboo;" seven and eight cent goods are received with a little more favor, and the ten cent and two-for-a quarter grade have the center of the stage. A radical change impends among the manufacturers of cheap cigars and indications point to operations ceasing in these lines as soon as the tobacco on hand is worked up.—KEYSTONE.

Bright Western Outlook

Abe Landfield, of Randall & Landfield, Benton Harbor, Mich., was a recent arrival on the local leaf market. Like other visitors from the West, he is optimistic regarding the future of the industry in that section of the country.

BAIR, PA.

York County Activities

YORK, Pa., April 30.—There are indications of a revival of the cigar industry, which in some parts of York County was reported to be suffering in recent weeks from depression. The factory of H. J. Roth at Bair Station is again running with a full force of employees, after having been operated with a curtailed number for a month or more. Thirty-five cigar makers and other employees are at present on the payroll, and the firm is advertising for more help. A rush of orders is expected at this plant. Employment for about 15 more men can be furnished.

Work was resumed today at the Havana Cigar Co. factory, Dover, which had been closed for a time because of a lack of orders. Purd Smith is the general manager of the plant.

Improvement in the cigar business is reported from Stewartstown. The W. H. Raab Co. recently shipped a carload of cigars to a firm in New York State.

To Open New Factory

Timothy Roth, who has been the manager of the office of the factory at Bair operated by his father, H. J. Roth, will open a factory in McSherrystown, Adams County, within the next few days. The factory will give employment to several score cigar makers. Young Roth had been employed at the Bair factory a year or more.

Curry McGuigan, who has been operating a cigar factory in Fawn Grove, York County, for several years, has closed the plant and moved his family and household goods to Red Lion, his former home.

J. C. Winter, of the firm of J. C. Winter & Co., cigar manufacturers, Red Lion, is on a business trip through eastern Pennsylvania.

W. M. Gemmill and Charles F. Roseman, tobacco packers, of Red Lion, are on a trip through the Northwestern States.

Charles H. Horn, of Mate & Horn, Red Lion tobacco brokers, is on a business trip to Boston, Mass.

C. M. Ehehalt, of the firm of Kaltreider & Co., Red Lion, is away on a six weeks' business trip.

Ray Paris, sales manager of the Manchester Cigar Co., whose 5-cent Havana Cadet is meeting with a phenomenal demand, has returned from a trip through eight different States of the Middle West, where he personally sold half a million cigars. The Manchester Cigar Co. has two factories in York and one in Dallastown. Its energies are confined to one brand, the Havana Cadet, which as a 5-cent smoke is establishing a record. Carload shipments are being made almost daily from the factory.

The Progress Cigar Co., 356-370 North George street, this city, of which C. N. Foreman, of Red Lion, is superintendent, has shut down. The suspension of operation is for an indefinite period.

The condition of the cigar trade seems to have been disastrous to a number of the smaller factories of the county, which apparently cannot hold the field against their larger competitors. Fifteen factories in Long Level and vicinity are reported to have gone out of business, and the factories of the Bull Run region have also been closing. Neither of these factories ever employed over 30 operatives when working full capacity. Most of those affected by the dullness were working on a cheap grade of goods. It is estimated that several hundred men are out of employment at their trade, but these have little difficulty in obtaining work on farms or in cigar factories in York, Red Lion, or elsewhere, which are advertising for help.

Stoner Files Petition in Bankruptcy

YORK, Pa., May 1.—On a voluntary petition executed in Los Angeles and filed April 25 in this city, Edward B. Stoner, cigar manufacturer, bank director and business man of Hallam, who disappeared on December 18, last, was on the same day adjudicated a bankrupt. The liabilities are set forth in the schedule as $111,639 and his assets as $84,000.

The petition is dated at Los Angeles as of March 28 and was presented by Stoner's attorneys before Referee in Bankruptcy William H. Kurtz. The liabilities in large part are notes held by individuals and banks in the county which have gone to protest, because they have not been met. Of the assets, a total of $56,900 is represented by fertile farms in Hellam and Lower Windsor townships, York County; $11,820 by stocks and negotiable bonds; $7,611.35 by proceeds of receivership; $5,000 by property in reversion and the remainder by small items of personal property. There are nine tracts of land listed in the schedule of assets.

The receipt of the petition in bankruptcy from Los Angeles confirms the report published some time ago that Stoner is in California. He left his home in Hallam by automobile on December 16, and was gone for more than a week before there was general alarm over his absence. About that time a number of judgments were entered against him, and no one seemed to know of his whereabouts.

Ten days after his disappearance the Court of Common Pleas appointed Joseph Strickler and Charles M. Strickler as receivers of Stoner's estate on petition

Why do they use Porto Rican?

Most successful manufacturers of the so-called "Mild Havana" cigars are those who have succeeded in making a cigar that has satisfied the largest percentage of smokers.

Realizing that the clear Havana was primarily a rich heavy cigar the leading concerns have vied with each other in trying to produce a blend that would suit the taste of the average smoker.

Practically all of the popular brands of mild cigars contain Porto Rican Tobacco either as the filler or expertly blended with Havana. That this makes the most satisfying "all-day smoke" is now universally conceded.

All barrels and bales of Pure Porto Rican Tobacco display a White Guarantee Stamp.

An Amateur Economist

Perry Wilson, of the Y. M. C. A., may be correct in his estimate of the evils of cigarette smoking, but he is certainly an amateur economist when it comes to interpreting the effect of tobacco raising on cereal production, as any farmer knows.

Said Mr. Wilson, "The finest soil in America is devoted to the growing of tobacco. Last year the production of cereal grains decreased, while the production of tobacco increased over 200 per cent."

Cereal production decreased, not because tobacco is crowding it out, but because our busted European cousins are no longer buying so heavily since we quit paying their bills by advancing them liberal credits. Europe would have gone on eating at our expense indefinitely had not the American taxpayers and general public become disgusted with the whole pauperizing experience.

Since it does not pay the American farmer to produce an unsalable surplus of anything, he is very wisely cutting down the production of the chief offender, wheat. Wayne county farmers know that wheat is never a very profitable crop. Ordinarily it is productive of no profit and is tolerated because it fits in our accustomed rotation and provides ready cash and straw for bedding. Neighboring farmers already are dropping wheat and rotating corn with clover, using shredded fodder for bedding.

Wheat is a new land crop. It is produced most profitably in territories where land values and taxes are lowest. Where land values are high, dairying and stock feeding become the most profitable forms of agricultural production.

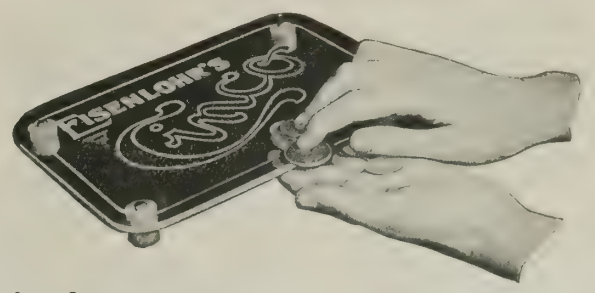
Tobacco has no monopoly of our finest soil. Like corn tobacco is raised on fine land, medium land and no account land. Being chiefly a southern crop, tobacco never has and never will be a serious contender for land most suitable for cereal production.—*Richmond (Ind.) Palladium.*

Rejoins Bowring & Co.

J. M. Sharp has severed his connections with the Manila Commercial Co., and has rejoined Louis Hirsch, of the tobacco department of Bowring & Co., 17 Battery Place, New York. In addition to dealing in high-grade leaf tobacco, Bowring & Co., are developing the Manila cigar factory El Oriente, and the Apex cigarette holder, which ejects the cigarette.

Off to Porto Rico

Robert Gans, of Max Gans' Sons, 197 Water street, sailed last Saturday on the steamer *Porto Rico*, for Porto Rico, where he will join his brother, Charles Gans, and will assist him in furthering the interests of the firm on the island.



Back from Holland

James Willing, of the American Malaya Trading Co., has returned to New York, after a pleasant voyage on the steamer *Veendam*, from Amsterdam, where he attended the inscriptions.

MARSHALL FIELD

NO OTHER CIGAR IN AMERICA LIKE IT
IT IS DIFFERENT
THERE ARE REASONS FOR IT

The manufacturer has devoted his life in the science of tobacco curing, and the art of blending. The objectionable properties which tobacco contains are eliminated, such as Rosin Gum which makes tobacco strong, and the natural Ammonia which makes tobacco sharp and bitey. It is then ripened, mellowed, and blended.

All Marshall Field Cigars are

Very, Very Mild Regardless of Color

Distinctive Quality

Liked by all who smoke them

Philadelphia Business Shows Consistent Gain

Manufacturing, Jobbing and Retailing on Wholesome Basis—Indications Point to Permanency—Counter Trade Making Greatest Increase—Timely Trade Topics.

PHILADELPHIA, April 30.—Among cigar manufacturers, jobbers and retailers, business, while not booming, is moving forward with consistent gains and is on a wholesome basis indicative of permanency. The retailers have noted some increase in box business, but the biggest gain has been in counter sales, the fine weather of the last week being a contributing cause.

Showing Signs of Good Behavior

The "reformed" price-cutters are still showing some evidences of acting in good faith. The benefits of the movement which these retailers launched several weeks ago, as told exclusively in the columns of TOBACCO, are appreciated by the jobbing trade which was more affected by profitless prices than was even the retail trade. It is a fact that many of the jobbers have been handling goods, particularly cigarettes, on as low as a two per cent margin, this being at an actual loss. Some years ago, as will be recalled by the readers of these columns, the jobbers made an effort to get together, but internal troubles developed and their organization after a brief period of successful history, went onto the rocks. While the reformed price slashers have no organization of any kind, there is among them an almost perfect unity of purpose, and they are of opinion that it is just as necessary for the retailers who now are determined to do business legitimately and with a legitimate profit, to have the jobbers and sub-jobbers also get on a sound business basis, as it was for themselves. The manufacturers are giving moral support and encouragement to the movement, because, by the elimination of cut prices, the entire industry, which was moving toward complete demoralization, has been placed on a much firmer foundation, with consequent benefits to maker, distributor and consumer. In fact all in any way related to the business of producing and of selling standard goods, look on the new movement an account of which appeared only in these columns, as nothing less than epoch making in the industry in Philadelphia.

Credit Information

The movement among the manufacturers to develop closer co-operation in the matter of credit information, and to more intimate relationship with the Philadelphia Association of Credit Men, also related in recent issues of TOBACCO, has moved forward. The outward development of interest was the election on the Board of Directors of the Philadelphia Association of Credit Men, of William G. Kimber, Jr., credit man of Bayuk Bros.

The Post Cigar Co., through its metropolitan factory, is placing on the market a new brand, La Situation, and reports encouraging sales immediately on introduction.

Possession of the new factory of The B. G. Davis Co., which recently acquired from Sig C. Mayer & Co., the five-story building at 306 Cherry street has now completely taken over the property. The plant is in full operation. Although operation is in full swing, remodelling and modernizing of the building into a more sanitary and up-to-the-minute cigar factory is proceeding uninterruptedly. General Manager L. Thorner, came over from the New York office to start the new plant on its way and has arranged for the making of LaBelle Fair at a rate of from 60,000 to 75,000 per day, with a force of over 300 hands, working under the supervision of Louis Stein. The full output is to be for the Schulte Chain Stores.

Joseph Carlisle, special representative of Bayuk Brothers, and long confined to the hospital at Easton, Pa., as result of a fall, is still recuperating in Atlantic City, but is hopeful of being able to return to headquarters in the next two weeks. The Bayuk combined stripping plant and garage for its fleet of auto trucks at Tenth and Bainbridge streets, is nearing completion. The garage is already in use, and the stripping work probably can begin by the middle of May.

Monroe Jarett Sons, Randolph and Jefferson streets, established for eight years in the cigar box manufacturing business, have made arrangements for the expansion of production in order to take care of the great amount of business coming into the plant. Another floor in the ell-shaped building which they occupy has been acquired and production is now distributed over five floors. The second floor in wing being the latest acquisition. Three floors in the main building on Jefferson street and the first floor in the wing were formerly devoted to manufacturing purposes. The firm's expansion necessitating the taking over of the second floor in the wing. New equipment, consisting of three Ellis Grannes & Son machines, made in Allentown, Pa., have been installed for the manufacturing of boxes; two saws, also made by the Grannes Co., will enable the firm to greatly increase production. When the expansion programme is completed double capacity will be provided. The working force also has been increased to double. An automatic fire sprinkling system is one of the innovations.

Morris G. Braun, who recently took over the store at 718 Market street is adding to its stock.

Condax An Art Feature

In the spirit of "Art Week" which induced all the merchants on Chestnut street to make exhibition of paintings and sculpture by rising painters and artists, Yahn & McDonnell have given over a window of their Arcade store, Juniper and Chestnut streets to an artistic display of the Condax Cigarette line and the raw material from which they are made.

Allen R. Cressman's Sons have appointed the Royal Tobacco & Candy Co., Newark, N. J., as distributor for that territory and a sales promotion campaign is now being conducted by its force of seventeen salesmen. F. D. Saunders of Cressman's, after a very extensive tour through the West and the New England district has returned to Philadelphia headquarters.

Samuel and William F. Paley of the Congress Cigar Co., spent part of last week in the Connecticut leaf district making headquarters in Hartford. The firm reports a very heavy demand for La Palina in the new size, Invincible, three for 50 cents.

Recent Leaf Trade Visitors

Visitors to the leaf trade during the week were William S. Uhler of the American Malaya Trading Co.; Ray S. Clark of D. Dreux, Inc., New York; S. Newburgh of Louis Newburgh Co., Hamilton, Ohio; M. R. Hoffman of the Hoffman Leaf Tobacco Co., Marietta, Pa.; T. Levy of Morris Witner & Co., New York, and John Brockman of Manus, Muller & Co., New York.

Herman G. Vetterlein, leaf dealer, 6th and Arch streets, is in the Connecticut territory looking over prospects.

To Seek Corporate Charter

Application is to be made to the Governor of Pennsylvania on May 8, for a charter of incorporation of E. A. Calves & Co., 3rd street, importers of Havana.

Sole Sales Representative
EUGENE POPPER
2490 Davidson Ave., N. Y.

The incorporators consisting of Evaristo A. Calves, Jenny B. Calves and Charles Martinez. Mr. Martinez has been connected with the firm for many years as salesman. The new corporation is to deal in leaf tobacco, pack and import these products and also to manufacture and deal in cigars, stogies, cigarettes, cheroots, pipes and other products of allied nature.

John Smith, retired wholesale cigar dealer and prominent horseman, died last Monday at the age of eighty-two, at his home 4043 Girard avenue. He was the oldest driver on the Fairmount Park speedway. He was for many years a member of the Point Breeze and Road Drivers' Association. A daughter, Miss Fanny Smith, survives, his wife having died a year ago.

G. G. Goode, Ltd.

MELBOURNE, Australia, March 1.—G. G. Goode, Ltd., successors to Sniders & Abrahams, Ltd., are favoring the trade with the following announcement:

"To signalize the transfer of control of our business from America to Australia, the name of the company has been changed, and in future we shall trade under the name of G. G. Goode, Limited.

"In addition to the change of name, other alterations have been made of a most important nature which cannot fail to have the most favorable and far-reaching effect upon the quality of the firm's products. The latest types of cigarette machines have already been installed and all other necessary equipment of the most modern and efficient type for the treatment of tobacco is being purchased. Continuous supplies of high grade leaf of uniform quality are assured by special arrangements recently consummated abroad and, as a result, our blends can be relied upon for mildness, uniformity of character and richness of color and aroma. We can guarantee our products to be absolutely pure and absolutely dependable.

"We are specializing in four main lines (two plain and two tipped), and our cheaper lines will be packed in twelves. When present stocks of Essanay, King's Own and Peter Pan cigarettes are exhausted these brands will be discontinued. In addition we shall, of course, continue to manufacture our Turkish Caireen and our gold-tipped Virginian Midas, but with much improved blends and packings.

"Our cigar sales for December last constituted a record in the history of the business both in volume and value, and the constantly growing public appreciation of Club House cigars has led us to adopt the popular straight shaped cigar, Club House Commodore, which we confidently commend to your favor. It is our intention to specialize in Club House cigars while still maintaining our regular lines.

"A vigorous campaign of attractive advertising for our goods is about to be launched which, we believe, will prove to be of benefit to us both.

"It is the desire and policy of this company to extend to its customers the maximum of service and every courtesy within its power. We take this opportunity of thanking you for your loyal support in the past, and assuring you of ours in the future."

The company's cigarette brands are: Club House, Clarion, Caireen, Midas, Milo, Royal Oak, Selecta, Standard, The Eaton and Windsor. Their cigar brands are: Aristo, Club House, Dona Sol, Ecuador, El Campeon, Erica, Escasa, Escudo, Grand Master, Pandora and Pomona. The head office is located at 270 Lonsdale street, Melbourne.

Baltimore Market

BALTIMORE, Md., April 26.—Gieske & Niemann, leaf tobacco merchants, make report as follows:

MARYLAND.—Receipts increased to 300 hogsheads, while sales totaled 223 hogsheads for the past week. The good demand continued for practically all grades.

OHIO.—No receipts; sales, 8 hogsheads.

No. 1,451,882 MATCH BOX. David B. McDonald, Davenport, Iowa. Filed Dec. 4, 1920, Serial No. 428,262. Renewed May 24, 1922. Serial No. 563,388. 5 Claims.

1,451,882

In combination with a match box having a match-box case, the match-box case having a hole in one of its sides; the hole having a downwardly pointed off-set; a match-box case having a match breaking device outwardly secured by suitable means to one of its sides; said match breaking device having a hole provided with a downwardly pointed off-set in its surface stationed adjacent one of its sides conformable to the hole in the box case, multiple corrugate means in the side and end of said match breaking device, clamp lug means for securing said match breaking device to the box case; perforations suitably conformable to the clamp lugs of said match breaking device, provided in the side of said box case, all for the purpose specified.

One Year of Co-operative

(*Continued from page 5*)

effective work and pressure can be used in bringing such men into line as would be the case without local organization.

V.—Co-operation the Inevitable System

Unquestionably co-operation is the farmer's hope. Acting as individuals, farmers are weak. Through organization they are strong. Acting as individuals, farmers must dump their crops. Through organizations, they can market gradually. As individuals, they cannot finance themselves properly. Through organization they can.

Co-operative marketing, therefore, is *the inevitable system of selling farm crops.* Fifty years from now we will wonder why we ever went on year after year selling our crops, each farmer in competition with his brothers, helpless, uninformed, and unorganized, simply accepting the starvation-average prices named by the thoroughly informed and highly organized buying world.

Nevertheless, co-operative marketing can succeed only by learning from its own experiences and mistakes, keeping growers frankly informed about all important policies, profiting by mistakes, changing policies accordingly, and then courageously going forward.

An Easy Slip to Make

(*Continued from page 31*)

On June 1 the price of the truck declined $280. When the truck company attempted to collect on the note, the maker refused payment until he should be given a credit of $280. The truck company refused this, on the ground that the salesman had no right to guarantee the price against decline, since all orders gotten and all arrangements made by salesmen had to be approved by an official of the company. As a matter of fact, the very form that this buyer signed contained a clause that "this contract is valid only when signed by an official of the ———— Co."

A law suit resulted, the truck company suing to collect the note. The case went through the lower court, where the buyer of the truck won, then up to the Appeal Court, where the truck company won, on the ground that the salesman had no right to bind the company with such a guarantee. Read from the decision:

Defendant admitted that when plaintiff's agent produced the car on April 23 and handed him the agreement, he read it and refused to sign the note until the agent had inserted in the agreement a provision intended to protect him against a reduction in the price of cars. The agreement had already been executed by an official of the company. It contained at the bottom the following: "This contract is valid only when signed by an official of the ———— Co." In the face of this provision, defendant procured the agent to make a material alteration in the contract. In the absence of proof of authority in the agent to make the variation or plaintiff's ratification of the alteration, defendant cannot stand upon the contract as altered. When the agent presented to him a contract at variance with the contract as he understood it, it was his duty to refuse to accept the car and not to sign the note until and unless the alteration in the contract presented to her was made or ratified by an official of the company.

Now there you see how easy it is to slip up. I suppose not one layman out of a hundred would have remembered to insist upon the confirmation of the guarantee by some company official, or would have known that the clause requiring official confirmation of the written contract also required it for anything added to it in pencil afterward. And yet this little slip cost the buyer of the truck $280 in addition to litigation expenses, which certainly amounted to as much more.

It would have been easy to refuse the guarantee until approved by the company, and with the truck waiting there for delivery I have no doubt the company would have approved it rather than lose the sale.

It is another phase of the advice I have so often tried to give through these articles, viz.: never to act in any important way upon a salesman's say-so unless you are absolutely certain that he has authority to do what he is about to do. How can you be absolutely certain? You can't be unless you get the company's O. K. to the salesman's act, *before* you have gone into it at all, or unless the salesman has done the same thing often before and the company has recognized and affirmed it.—*Copyright, 1923, by Elton J. Buckley.*

Wholesalers and Retailers

(*Continued from page 9*)

my mind, that they are getting so much business and growing so fast."

Aren't there some constructive pointers in all this which will help various merchants in going after more business and in getting it?

If this proves to be the case, then the writing of this report of this sales conference will have been well worth while.

Chicago

(*Continued from page 17*)

The Hotel Sherman cigar department is kept very busy by the many orders that are turned in through the efforts of Mrs. Charles Altschul, and Jay Isett. They are two of the best box trade artists in the city. Their office is Parlor N, and it is a busy place these days.

Herbert Mesick is here again taking orders for Cuesta Rey. Ruhstrat-Christian Co., his Chicago jobbers, are placing thousands of this brand.

Prosperity Signs

Clarence Hirschhorn Co. is again in the lime-light. Besides having Mozart and Harvester cigars on the bill-boards and in the newspapers, this live jobbing house now has the Detroit Hand Made, 2 for 15 cents cigar on the billboards all over the city. The signs are very attractive, the back-ground being a bright red, which shows up like a "house afire." With such brands as El Producto, Optimo,, Harvester, Mozart and Detroit Hand Made, the house of Hirschhorn Co., under the able management of Clarence Hirschhorn, is showing wonderful strides upward this year.

Setting Swift Pace

At J. & B. Moos, the sale of Antonio and Cleopatra and Chancellor cigars are reported as being far ahead of last year's sales. At present a large number of Chancellor windows are shown by the dealers all over the city.

Electric Humidifier

Herbert Hoover has a very fine demonstration of his National Electric Humidifier on display in the large window of the Commonwealth Electric Co.'s electric shop, in the Marquette Building. Thousands see this new and unproved humidifier, in all styles, at work each day.

The Ogden-Plaza Hotel is to be our next on the North side. It will go up at Clark and Center streets, and is to cost $3,000,000. Herman Mack, who owns the Lexington Hotel on the South side, is one of the owners, and being a good cigar man, he will operate his own department.

To Handle Gato Brands

E. P. Oakes announced this week that he had closed with the Parker-Gordon Co. of Kansas City, to represent the E. H. Gato Cigar Co.'s brands. All the branch houses of Parker-Gordon, located in Missouri, Iowa, Indiana, and Illinois, will now feature Bouquet de Gato, Cressida and Gato Key Westers.

The South Shore View, a $2,000,000 hotel, is to be erected at 71st street and the South Shore Drive.

The Congress Cigar Co. of Philadelphia has contracted with a Chicago daily newspaper for another campaign on the La Palina cigars. The ads are to appear shortly.

Showing Increase

E. P. Oakes, the Gato star is again working the city. Oakes states that his territory is showing a fine increase on the Gato brands.

The stock of Park & Tilford's Kansas City branch, which was damaged by a recent fire, was disposed of here this week by the auctioneers.

Charles L. Audrade has entered the window trimming service as the Audrade Display Service, with headquarters at 116 N. La Salle street. He will have a crew of experienced window dressers and will devote his efforts to cigar windows.

Ries & Co. Take Over Eder & Co. Pipe Line

Francis Eder & Co., one of our oldest pipe houses, are retiring from business. A large part of their stock has been taken over by Iwan Ries & Co., who have also added to their sales force, four of the Francis Eder & Co.'s country pipe salesmen. With this addition to their sales force, Iwan Ries & Co. now become one of the leading in the distribution of pipes in the Middle West.—H. L. H.

Burley Association Notes

(*Continued from page 33*)

Director of Warehouses Ralph M. Barker, Miss Elsinger and Mr. Porter will be the speakers at a big meeting of Ohio tobacco growers at Ripley, Brown County, next Thursday. There will be both afternoon and night meetings and the business men of Ripley and other Brown County towns will attend this meeting.

President and General Manager James C. Stone will speak at another meeting of Ohio tobacco growers at Gallipolis Saturday afternoon, May 26. Since the enactment of the new Ohio and West Virginia co-operative marketing laws there has been a considerable increase in the number of new contracts received from that territory.

Stoner Files Petition

(*Continued from page 35*)

of the Farmers State Bank of Hallam, to which he was then said to have been a heavy debtor.

Stoner left his home supposedly for New York on a business trip. He went as far as Wrightsville by automobile, where he is said to have left the machine for repairs. He is said to have boarded a train at Wrightsville, and nothing more was heard of him until word came that he was in California.

Stoner is widely known. He was a cigar manufacturer, a director of the Hallam Furniture Co., and of the Farmers State Bank of Hallam, a school director and justice of the peace, and was a leader in all business projects in and about Hallam. He is a well known trapshooter and had a wide circle of friends interested in that sport.

CLASSIFIED ADVERTISING

WANTED—To buy one second-hand Phila. Textile Drying and Ordering Machine, top fans preferred, six or nine foot apron. State condition, dimensions and price. Address: Manufacturer, c/o Tobacco Trade Journal, New York.

FOR SALE—One large factory building, with attic. Situated in a town in Eastern North Carolina with about seven thousand five hundred population. Located near a river; railroad siding. Building 435' long, 85' wide, in two sections. Each with electric elevator; high water tank; site consisting of five acres of land. Would sell at a reasonable price. Apply T. J. Hackney, Wilson, N. C.

TOBACCO

A WEEKLY TRADE REVIEW

ESTABLISHED 1886

Vol. LXXVI. No. 2 NEW YORK, MAY 10, 1923 Per Annum, $3.00 Per Copy, 10 Cents

Wisconsin Tobacco Pool Holds Rally Meetings

Big Guns of the Organization Do the Spell-Binding Stunts—Sarcastic Shots at "Generous" Buyers of the 1921 Crops—Poolers Admit Justice of One Complaint.

EDGERTON, Wis., May 6.—The pool officials have been busy the past two weeks holding their rally meetings throughout the state. Jens Davidson, president; John Holtan, sales manager; Selmar Neprud, field manager; Emerson Ela, well-known legal counsel for the pool, and Lars Lien, one of the two or three big powers of the co-op, did the speaking.

At Janesville, Mr. Ela bore the brunt of the attack upon the co-op's publicity campaign. "Unless you want the pool contracts enforced to the letter, tell us to wind up the affairs of the pool and close doors," he told about 150 growers at the Sommerville warehouse Thursday night.

"There has been established a big machine for your selling interests in tobacco, which, in a short time, has accomplished much; and if you stay with the pool, then a man who signed a contract must be made to live up to it.

"We do not want to prosecute the hard-pressed grower tempted by a buyer, but we do want to put the penalty upon the buyer naming unfair bids on pooled crops solely for the purpose of breaking up the pool, and forcing the growers back to the old system of taking only their price."

"Generosity" Praised

There was not the customary amount of animosity prevalent in the Janesville meeting, except a few sarcastic remarks about the "generous" buyers who lifted the 1921 crop at from 5 to 7 cents. It was claimed that the pool held the credit for this year's increase in price. Just who raised the price on cotton, meat, corn, wheat, wages, etc., was not identified at this particular meeting.

The only really violent outbreak was a discussion of the notorious Ole Harried letter, the first of a series of growls against the pool by grower-members, published in local publications. Selmar Neprud produced a sworn-to statement by Harried, saying that it was dictated by C. E. Sweeney, a local packer.

Acknowledge Justice of One Grievance

Pleas were made to raise quality tobacco instead of increasing acreages, and to perfect a grading system that will pay the grower well for the extra effort to produce a quality crop. The only complaint the officials acknowledged was true, was the fact that many growers received less than stemming prices when the bulk of the growers followed the stripping letter of instructions, and got only the eleven-cent grade for their good ends after laboriously stripping out the crop in three and four grades.

The Big Noise

In the big final meeting at Edgerton, the big noise was the reading of an anonymous letter to John Holtan, sales manager of the pool, accusing him of taking bribes in connection with the conduct of the co-ops' sales. This was denied by the officials, and a threat to start suit was made if the man's name could be obtained. Between 250 and 300 growers attended, with a large sprinkling of tobacco men. No names were called, nor were there any questions asked. Fireworks predicted during the week failed to materialize.

Mr. Ela, in his forceful talk, emphasized the assertion that one New York man "had the best vision of any buyer operating in Wisconsin." That no buyer had any different contract except one. He did not state what havoc that contract might work if the binder end of the northern crop should be very small this summer.

A new series of meetings will be held this spring.

Help Is Serious Problem

The pool is having a terrific time to get any help for assorting; all the regular warehouses are running short of help, and how they are going to get any help is a very grave problem. The warehouse at Edgerton is due to open Monday, May 7. Just where it will get the necessary number of assorters, it is difficult to state. All the other warehouses are running with incomplete crews and are looking for more help. It is expected that the co-op will raise assorting prices. If they do, the other warehouses will promptly meet it, and this will effectively hold the crews they already have.

Growers Working Overtime

The growers are working long hours in getting started on the new crop. It will be some time before they will be abreast of the season on account of the late spring. The new crop will be the crucial test for the co-op. A large percentage of the pooled growers are cash-renting their tobacco land out to sons, wives, and sharemen, who are not signed up with the big co-op. The independent end of the acreage will be much larger than last year, as they are all practically putting in from 25 to 100 per cent more land than they did last year, when they were fearful of another seven-cent year.

The agricultural department is meeting the wildfire situation with vigorous measures.

There is still a considerable quantity of independent tobacco unsold; but it is being steadily picked at by several firms. Al Jones, of Janesville, lifted a couple of hundred acres around Stoughton and Cooktown at 14 to 21 cents per pound for binders, and five cents for fillers. C. E. Sweeney & Sons bought Hardwick Bros.' big crop for 16 cents. The cases on the farm are practically gone. There are not over two hundred cases on the farms today unsold in the southern section.

One local packer cleaned out on binders this week, and all B's are now practically out of the Edgerton market. The prices have been quite stiff, one lot of southern natural sweated B's went at 21 cents, scale weight. It was a big lot as B's go, and the sizes were equally divided into 14, 15, 16 and 17 inches.—BADGER.

I. Danziger Passes Away

K. Nesslinger, general manager in New York for the Manila Commercial Co., received a telegram from San Francisco, Monday, announcing the death of I. Danziger.

Mr. Danziger was a cigar salesman well and favorably known to almost every dealer on the Pacific Coast. He represented the Manila Commercial Co. for many years and had carte blanche in handling the company's business in the Far West.

He died rather suddenly. In a letter to Mr. Nesslinger, received about a week ago, Mr. Danziger made no mention of illness.

By all who knew him, Mr. Danziger was held in very high regard and his death is a cause for general regret.

Career of F. A. de Pilis of Patterson Bros.

The life story of F. A. de Pilis of Patterson Bros. Tobacco Corporation, and the originator of the Matoaka and other brands, is filled with numerous interesting incidents which cannot be crowded into small space. But a brief outline may be set forth as follows:

Previous to his successful career as a tobacco grower and executive of nationally known tobacco companies, F. A. de Pilis was chiefly interested in matters of political economy and farming. He is considered an expert in agricultural matters and has devoted the greater part of

F. A. de Pilis, Vice-President of Patterson Bros. Tobacco Corporation

his life to questions connected with the protection of interests in agricultural matters in connection with the preparation of international treaties.

During the last ten years, however, Mr. de Pilis has devoted all his time to tobacco matters, and by watching the trade papers and other publications it will be seen that he is only remembered as a tobacco man.

In previous years, however, Mr. de Pilis travelled extensively and not only

(*Continued on page 5*)

Amsterdam Prices Again Ran Wild

AMSTERDAM, Holland, May 5.—At yesterday's Sumatra inscription American grades brought extreme prices, but in spite of this upwards of 4,650 bales were bought for the U. S. market. The principal American buyers were:

H. Duys & Co., 1,300 bales, including 127 bales Deli My/PG; 180 bales Deli My/E; 173 bales Mr K Langkat; 234 bales Senembah My/PM; 125 bales Deli My/HD, and the balance in various other fancy marks.

Cullman Bros., 1,100 bales, embracing Deli My/L; Deli My/K; Deli Ba My/TL.

General Cigar Co., 925 bales of Deli Ba My/Svengi Gerpa.

E. Rosenwald & Bro., 670 bales, including Senambah My/Schlecht; Deli Ba My/SB; Deli Ba My/Pakaran; Senambah My/PM.

D. Dreux, Inc., 215 bales: OK/Deli/PB; Deli My/—; Deli My/L; Deli Ba My/A; Deli Ba My/Pakaran.

Manus, Muller & Co., 141 bales of Deli Ba My/TL.

Herzog & Sarluy, 110 bales.

Bayuk Bros., Philadelphia, 100 bales.

Yocum Bros., Reading, Pa., 96 bales.

Thirteen Tobacco Firms Not a Trust

MADISON, Wis., May 5.—Holding the Wisconsin anti-trust law constitutional, the state supreme court, in a decision this week, knocked out the first case to be brought under it to the high court.

The case, started by former Attorney General W. J. Morgan against the P. Lorillard Co. and a number of other tobacco manufacturers and dealers, charging conspiracy in restraint of trade to suppress competition and control prices, was dismissed on the grounds that no cause for action was shown, because all practices charged by the attorney general were in the past and not in the present or future.

Circuit Court Reversed

The order of the circuit court overruling the demurrer of the tobacco men against the suit was reversed, but the case was left open in the decision of the court, written by Assistant Justice Burr W. Jones, that it was "open to amendment," and the present attorney general can amend the complaint to charges that violations of the law alleged are being carried on now.

"The law is valid and constitutional," Jones said. "But no cause for action has been stated."

Justices Eschweiler and Rosenberry filed dissenting opinions, holding that there was cause for action.

Besides the P. Lorillard Co. and the American Tobacco Co., the following Milwaukee concerns and individuals were mentioned in the complaint:

Schneider Tobacco Co., Badger Tobacco Co., A. S. Goodrich Co., Lewis-Leidersdorf Co., Peckarsky Bros. Co., David Kurman, Moses L. Annenberg, George Panagis, Peter Panagis, under the trade name of Cavalla Tobacco Co., Schmitt Bros., M. H. Sweet, Nathan, Benjamin and William Stein under the trade name of Stein Bros. Tobacco Co., and Sher & Vinegrad.

Sumatra Tobacco

The latest additions to our stock of New Sumatra Tobacco consist of the following desirable marks:

Deli My/-
Deli My/L
Deli Ba My/TH
Deli Ba My/Pakaran
Deli Ba My/A
Senembah My/P

Career of F. A. de Pilis

(*Continued from page 3*)

visited but lived in different countries of Europe. As an expert in agricultural and economical conditions he visited the western part of Asia, the French colonies in Africa, North Africa, Senegambia, West, East and South Africa. At the invitation of the Argentine government, he inspected the territories of the provinces of Rio Negro, New Quaine Rosario, Tre Rios and the Chaco Austral (Argentine). He also visited Brazil and other South American states and speaks seven languages.

Originally a tobacco planter, Mr. de Pilis discovered that sales of tobacco are more profitable than planting itself, and experience in that branch of the industry has made him devoted to the interests of the tobacco planter and a stern believer in the Co-operation Association movement of the tobacco planters, which has now materialized in Virginia and the Carolinas under the leadership of Oliver J. Sands.

From trading in leaf tobacco, he started to bring out brands of his own, which he has successfully introduced first in export and now on the domestic market. Mr. de Pilis frankly admits that his greatest extravagance is smoking and he has spent more money on this indulgence than on any other hobby, and this passion, his interest in tobacco products and blends and his artistic and trained taste have enabled him to turn out a line of excellent brands.

In 1915 Mr. de Pilis intended to buy a place in South Carolina, but on his way back to New York stopped off in Virginia and found the Red Lodge, formerly belonging to the Archer family, which is located on the Appomattox River, near Powhatan County, in Virginia. While it is known that Matoaka Pocahontas was born in Virginia, Mr. de Pilis became particularly interested in her story, due to the fact that the old Archer place was originally the property of the Rolfes, descendents of John Rolfe, the husband of Matoaka Pocahontas.

In 1917 he started his export business to Europe, which developed to be second only to that of the largest companies in the United States.

The brand of Matoaka cigarettes and tobaccos were originated by Mr. de Pilis and this tobacco is noted for the excellence of its blend. Among his other well known brands are included Varena, Polar Star, Virginia Indian, Gentry Club and Regina Maria, all of which have been successful. With the exception of the Matoaka brand, all were registered under the name of the American Tobacco Co., but have now been transferred back to the originator, and so to Patterson Bros. Tobacco Corporation.

He developed the business in the first six months second only to the largest companies and acted as sole customer for some of the largest companies, including the American Tobacco Co. and the Porto Rican-American Tobacco Co., etc.

Mr. de Pilis has arranged with the Patterson Brothers Tobacco Corporation to bring out and market the Matoaka brand of cigarettes and smoking tobaccos, and to establish a factory in New York to handle the export and to develop a tremendous amount of business.

This Attractive Design, Suggested by Mr. de Pilis, is a Happy Blend of Art and Historical Romance

Special Train Service T. M. A. Convention

I am pleased indeed to advise that, following the plan which met with such universal approval at our last Convention, we have perfected arrangements with the Pennsylvania Railroad Co. to attach a number of special cars, for our exclusive use, to the Congressional Limited, leaving New York (33rd Street Depot) on May 15, at 4:25 P. M., New York time, or 3:25 P. M. Standard time, and stopping at Manhattan Transfer at 3:41 P. M. Standard Time, and West Philadelphia at 5:27 P. M. Standard Time.

Inasmuch as it will be impossible for this train to stop at Newark, Newark delegates desiring to travel in company with the other delegates will have to board the same at Manhattan Transfer.

The cost of tickets for this train, including the Pullman Seat is $11.02 for the New York and Newark delegates, and $6.78 for delegates boarding the train at West Philadelphia.

Congressional Limited

This being the Congressional Limited, there is an extra charge of $1 and 75 cents respectively, which is already included in the amount hereinabove stated.

Needless to say, the train includes a dining car.

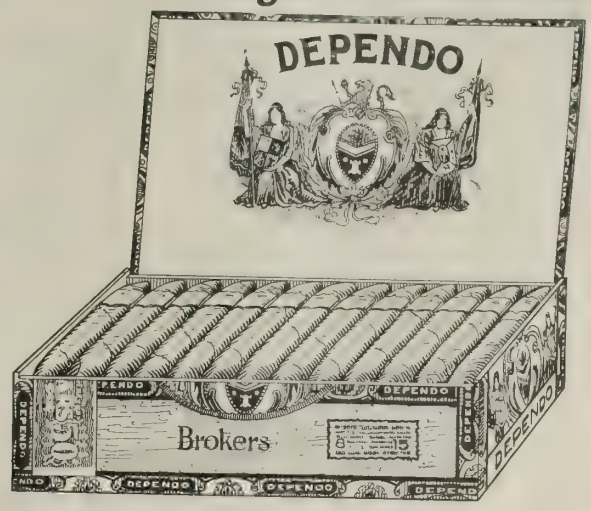
If this arrangement meets with your approval, and you desire to travel on this train, I would ask you to kindly send me a check for the amount indicated, and we shall be glad to send the necessary ticket.

As the time is short, I would indeed appreciate a prompt response.—CHARLES DUSHKIND, Managing Director.

To Meet and Greet Friends at T. M. A. Convention

Harry A. Cochrane, president of the National Exposition Co., has arranged for headquarters at the New Willard Hotel during the T. M. A. convention, and both he and E. D. Selden will be on hand to greet the many friends they both made at the 1923 Tobacco Industries Exposition.

According to Mr. Cochrane, a great deal of space has already been contracted for the 1924 show to be held at the 71st Regiment Armory, Park avenue and 34th street, New York, January 28 to February 2, and indications are that the 1924 Tobacco Show will be larger and more complete in every way than the previous show.



Mr. Cochrane extends a cordial invitation to all members of the T. M. A. and all other visitors at the convention to call at the National Exposition Co.'s headquarters for any information they may desire as to what space has already been contracted for and prices, location, etc., of space still available.

Mrs. Otto E. Schaefer

CHICAGO, May 5.—It is with much regret that I announce the death of Mrs. Otto E. Schaefer, wife of Otto E. Schaefer, general manager of E. Hoffman Co., the Chicago distributing branch of the Congress Cigar Co. Mrs. Schaefer passed away at her home in Oak Park, Ill., this week. Burial takes place on Monday. The business of E. Hoffman Co. is closed today and will remain closed until Tuesday morning. Mrs. Schaefer leaves two sons, Otto E., Jr., and Richard P.—H. L. H.

Frishmuth Plant Sold at Auction

COVINGTON, Ky., May 5.—To satisfy a judgment rendered in the United States District Court several months ago the Frishmuth Brothers' Tobacco Co., 229 Scott street, was sold at auction to John A. Downard and Benjamin F. Davidson, tobacco dealers, for $250,000.

The sale was made by George M. Booker, federal receiver for the company, W. N. Hind being auctioneer.

The plant originally was owned by the Lovell-Buffington Tobacco Co. It was established in 1865 and was considered one of the most successful manufacturers of smoking tobaccos in the country.

The Frishmuth Brothers' Co. purchased the plant from the Lovell-Buffington Co. last August 17 for $600,000, which involved an exchange of stock in the payment for the business.

At that time the Frishmuth Brothers' Co. operated a plant in Philadelphia, and it was understood that the Philadelphia plant was to be combined with the Covington plant.

Finally suit was brought by Thomas H. Gray, formerly President of the Lovell-Buffington Co., in the Federal Court against the Frishmuth Brothers' Co. Gray said in his petition that for his holdings in the old company he received 513 shares of stock of $100 each in the new company.

Kenneth Hauer, Cincinnati, filed an intervening petition in the Federal Court against the Frishmuth Brothers' Co. asking a judgment for $125,000, which he said was due him on three notes and secured by a mortgage on the Covington plant. He seems to be the only preferred creditor. The money was borrowed on the day the Covington plant was purchased.

Downard & Davidson, the new owners, said that they would continue the business of manufacturing smoking tobacco.

Court Holds Smoker to Test Tobacco

The unusual sight of lawyers and witnesses voraciously smoking cigars in open court was revealed Friday afternoon in the Commercial Frauds Court when Magistrate George W. Simpson held a hearing on a charge that the Phoenix Cigar Corporation of 535 East Seventy-fifth street, had misrepresented a brand of cigars.

The hearing followed an investigation by the American Fair Trade League of 71 West Twenty-third street into complaints that the corporation was misrepresenting cigars containing Porto Rican and domestic tobacco as "Havana" tobacco from Cuba. Alexander H. Kaminsky, counsel for the league, appeared as complainant.

It developed during evidence presented by Assistant District Attorney Max Salomon that boxes of cigars manufactured by the corporation had been purchased by the prosecutor and their seals kept intact until Friday's hearing. These boxes were marked "Havana," but witnesses who smoked some of them and broke others apart to examine them, declared that they contained only 25 per cent of Havana in some instances and no Havana in others. They swore that the remainder of each cigar contained tobacco raised in Connecticut and other states.

Some of this domestic tobacco, one witness explained, was raised from seed brought to this country from Cuba. Other witnesses said that the best way to tell the pure Havana cigar from the substitute was to smoke one. Whereupon the magistrate granted the lawyers for both sides, several of the witnesses and others in the court who professed to an intimacy with pure Havana cigars to light up. In a few minutes a large hole had been made in one of the largest boxes of cigars which had been purchased by the prosecutor as evidence, and billows of tobacco smoke drifted through the court room windows.

Magistrate Simpson announced that he would hold the corporation for trial in Special Sessions on a charge of deceiving the public by mislabeling its product.

Tariff on Pipes and Smokers' Articles

WASHINGTON, D. C., May 8.—The Tariff Commission has issued the following announcement regarding an investigation of pipes and smokers' articles under the tariff:

"The Tariff Commission has ordered an investigation in accordance with the provisions of Section 315 of the Tariff Act of 1922 of the differences in costs of production of and of all other facts and conditions enumerated in said Section with respect to synthetic phenolic resin and smokers' articles made therefrom, phenol, cresylic acid and briar wood pipes as covered by Paragraphs 27, 28, 1454 of that Act.

"Formal notice of a public hearing in these investigations will be given in due time to all parties interested."—LAMM.

To Build Factory

MARTIN, Tenn., May 5.—The Martin Improvement Corporation, formed to build a building for the American Cigar Co., has been formed and directors elected as follows: T. H. Farmer, H. J. Ramer, L. A. Winstead, S. H. Hall, T. C. Wood, George M. Brooks and T. J. Taylor. The company was incorporated at $40,000.

St. Louis Trade Topics

Business Shows Improvement

ST. LOUIS, Mo., May 5.—Business is improving with the coming of pleasant weather. Retailers report good sales of all the brands they carry and the jobbers are making no complaints over the business they are doing.

Fred Baldwin reports the Don Julian and the Paramount brands are going well. Mr. Baldwin is the general representative for the manufacturers of these two brands which are distributed through Brinkman-Meisel Cigar Co.

A. A. White, representing the Consolidated Cigar Corporation, manufacturers for Dutch Masters, is here for quite a stay. He will conduct an advertising campaign for his brand, which is distributed through the Stickney-Hoelscher Cigar Co.

Leo Josias is a new addition to the retail selling staff of the Wm. A. Stickney Cigar Co.

Creve Cœur Lake, a well known and popular summer resort at the end of the Creve Cœur division of the United Railways Co., will have a first class cigar stand this summer, N. W. Conrad, of the Wm. A. Stickney Cigar Co., having opened one there.

D. F. Conroy, has sold his cigar store at 8th and St. Charles streets to Jos. M. Parks.

Visiting Representatives

The city is full of cigar representatives. Nearly every leading manufacturer has a spokesman here. Many new brands are being placed. Among the leading representatives are: Ludwig Lasker, of Perfecto Garcia & Co.; Hi Hammer, of Corral, Wodeska & Co.; W. E. Flecklee of Deisel-Wemmer Co.; Ed Wodeska, of Gonzales Mendez, Inc.; Tom Morton of the Hava-Tampa Cigar Co.; C. E. Terry of Bayuk Bros., and M. M. Willson, sales manager of the Andora Cigar Co.

Notable Window Displays

The Stickney-Hoelscher Cigar Co. has a display of Dutch Masters in their windows. Other displays are of D. & H. and V. Guerra Diaz by Dengler & Hatz; Dulce and Optimo by Louis Friedman; Infallibles by R. L. Stanley Cigar Co.; Safra and Navillius by Chas. P. Stanley Cigar Co.; Webster by Moss & Lowenhaupt and Reuh's Blunts by Rauh-Milius Cigar Co.

Opens Cigar Stand

Louis L. Solomon has opened a new cigar stand at 305 Broadway, and is featuring several high-class brands.

Federal Reserve Reviews Tobacco Situation

WASHINGTON, D. C., May 7.—The Federal Reserve Board in its monthly statement of business and manufacturing, has the following to say regarding tobacco:

"The marketing of last year's tobacco crop has been practically completed, and many markets in the bright tobacco sections have closed. The dark markets will close during April. During the closing months of the season much tobacco of lower quality was handled in the markets, and the prices were somewhat lower. The average price received by the growers in the Virginia markets in March for bright tobacco was $23.50 per hundred pounds, compared with $26.17 per hundred in February and $8.35 in March, 1922. Dark tobacco prices were also lower than in February, but remained higher than in March a year ago. The tobacco season has been successful from the standpoint of the growers, as the crop was larger and higher prices were received for the product, yielding the producers greater returns than in 1921. Up to April 1 the tobacco sold in the Virginia markets, including the receipts of the Tobacco Growers' Cooperative Association, amounted to 160,918,000 pounds, compared with 96,634,000 in the 1921-22 season. In the tobacco districts of Cleveland and St. Louis approximately 250,000,000 pounds of burley tobacco were sold by the growers, and the marketing season is nearing a close. Co-operative marketing associations functioned in most of the tobacco sections during the past season, and reports indicate that they have been very successful, despite the fact that many of them were recently organized and operated for the first time. In the Richmond district tobacco beds have been prepared and some plants are up. Transplanting is being done in the southern sections of the district. Cold weather has delayed transplanting in some sections of the St. Louis district, but with mild weather the young plants will develop rapidly, and transplanting will be completed with but little delay.

In the Manufacturing Fields

"Owing to the greater number of working days in March than in February, production of all tobacco products increased as compared with the preceding month, but only large cigars were produced in greater quantities than in January. Output of large cigars and cigarettes increased, as compared with March, 1922, but small cigars and manufactured tobacco decreased. In the Philadelphia district the demand for cigars improved during the early weeks of April, after a dull season lasting for several months. Cigar manufacturers report that the demand for their products is greater than in the corresponding period one year ago. The average of the operations of the district is approximately 80 to 85 per cent of capacity, although some small factories are operating at near capacity. Prices of cigars have remained firm and unchanged, while leaf tobacco prices are advancing slightly.—LAMM.

Burley News Notes

LEXINGTON, Ky., May 5.—The legal department of the Burley Tobacco Growers' Co-operative Association has been investigating conditions in Indiana and will proceed against each tobacco grower in that state who has violated his contract, evidence having been obtained in several cases the past week. Counsel for the association believe the present Indiana laws ample to protect the association from contract breakers, even without a co-operative marketing act, which Governor McCray vetoed.

Local workers in Harrison County aided by Harvey Edwards of the field service staff, signed up forty-three contracts for 125 acres and organized locals at Oddville, Breckinridge and Sunrise. Locals will be organized at Lair Tuesday night and at White Oak Wednesday night.

Organizes County Local

Miss Verna Elsinger, director of Social Service, spent part of the week in Harrison County, and organized a county local at Cynthiana. Miss Elsinger reported interest in that county on the part of the women as satisfactory.

Precinct locals in Carroll County discussed resolutions adopted by some of the precinct locals relating to the course of procedure to be followed in dealing with persons persistently unfriendly to the association. A committee was appointed to draft resolutions stating the attitude of the membership.

Twenty contracts have been signed in Carroll County by precinct local members working with E. M. Mansfield, of the field service staff. Among the new growers signed was Clint Pollard, a large producer and a man of influence, and as the result of his joining, several neighbors who have persisted in remaining out are expected now to come into the association.

Isaac Meyer Scheduled for Extended European Trip

Isaac Meyer, of Isaac Meyer & Co., tobacco growers, packers and dealers, of 158 Water street, has booked passage to sail for Europe May 29. He is to be accompanied by Mrs. Meyer and is to remain abroad for a considerable time. During his absence, the business will be efficiently conducted by his two capable sons, Ben and Wally.

Aeroplane to Feature the Havana Cadet Cigars

York, Pa., May 5.—Utilizing an air plane in an unusual advertising campaign, the Manchester Cigar Co. of this city is meeting with remarkable success in calling attention of the public to its product, the Havana Cadet, a 5 cent cigar, which is apparently filling a popular want. The Manchester Cigar Co. is said to be the first firm to advertise its product in this manner and big results are confidently looked for from the campaign, which is in charge of Raphael N. Paris, Rooms 208-209, Drovers and Mechanics National Bank Building, Baltimore, the sales manager.

A De Haviland plane, type 6, which was purchased from the Chamberlain

Lieut. K. S. Ort, the Havana Cadet Airman

Aircraft Co., New York City, is used in the publicity work and is in charge of Lieutenant Karl S. Ort, of York, an aviator of six years' experience, part of which was spent in the U. S. Army and the remainder in commercial flying, such as aerial advertising, passenger carrying and aerial photography. After the purchase of the machine, Lieutenant Ort, accompanied by Lieutenants Chamberlain and Noyes, of the Chamberlain Company, flew from New York City to York, where their arrival was heralded by the dropping of a blank bomb, which exploded in mid-air, over the center of the city. The plane carries three persons, including the pilot and has a gasoline capacity of 50 gallons. As soon as J. F. Reichard, the proprietor of the Manchester Cigar Co. saw the airplane, he was so well pleased with it that he ordered another of the same make and type for use in advertising the Havana Cadet.

Special Bombs to Attract Attention

The aerial bombs used by Lieutenant Ort are made especially by the Pain Fireworks Co. for the Manchester Cigar Co. and serve to attract attention to the airplane, from which are dropped parachutes to which are attached sample cigars and literature advertising the many good points of the Havana Cadet, "the best 5 Cent Cigar in the world" with "a joy in every puff." The Havana Cadet plane will also use smoke trails to attract attention. It is proposed to visit places where there are large gatherings of people, such as the various pleasure resorts and aviation meets. Present plans contemplate the use of the airplane through the summer around Milwaukee, Kansas City, St. Louis, and the Middle West, and during the Fall and Winter in the South. In the extensive advertising campaign which is being planned by Mr. Paris, at seaside resorts, it is proposed to have girls dressed as cadets, who will distribute samples of cigars and Havana Cadet literature. Some of the girls will also make flights in the airplane.

To Visit T. M. A. Convention

Lieutenant Ort and Sales Manager Paris will go to the T. M. A. Convention, to be held May 16 and 17 in Washington, D. C., where a demonstration of the airplane method of advertising the Havana Cadet will be made for the benefit of cigar manufacturers and others attending the Convention.

One of the initial flights out of York with the Havana Cadet plane was made on April 24, with Mr. Reichard of the Manchester Cigar Co. as a passenger. The flight was made over the part of the county South of this city, in which is located the village of Craley, the birthplace of the well-known cigar manufacturer. It was an experience of which Mr. Reichard speaks enthusiastically. The following day, Lieutenant Ort took Sales Manager Paris in the airplane from York to his home in Baltimore. It is needless to say Mr. Paris was delighted with the flight, which was his first air excursion.

Dorman E. Saylor, of Saylor Brothers, Market Street and Belvidere Avenue, distributors of the Havana Cadet, in York and Adams counties, also made a flight of three hours in which he passed over the principal points in his territory.

Advertising Slogans

The plane is appropriately decorated, and wherever surface is available for lettering the name of the Havana Cadet, its price, and such appealing phrases as, "Best 5 Cent Cigar in the World,"; "Guaranteed Havana Filler;" "It Has No Equal;" "You'll Smoke 'Em Later, Why Not Now?" are displayed with a picture of a cadet, standing out conspicuously. The fact that the Havana Cadet is manufactured by the Manchester Cigar Co., York, Pa., is also set forth.

The Havana Cadet Airplane Used by Lieutenant Ort

On a recent trip to the Aberdeen Proving Grounds, where the Annapolis cadets were making a tour of inspection, about 300 of them surrounded the plane, loudly demanding samples.

Western Conditions Improve

William R. Dittmar, of Manus, Muller & Co., has returned from a tour in the West, where he found business conditions improving and cigar manufacturers confident of the future of the industry.

Visitors from Canada

Alexander Wilson and Henry Lotz, of Alexander Wilson & Co., Toronto, Canada, were prominent among the visitors to the local leaf market this week.

NEW YORK, THURSDAY, MAY 10, 1923

COMING EVENTS

T. M. A. Convention at the New Willard Hotel, Washington, D. C., May 16-17.

* * *

Convention of the National Cigar Leaf Tobacco Association, in the assembly room of the Merchants Association of New York, in the Woolworth Building, Monday and Tuesday, June 4 and 5.

CREDIT FOR THE DESERVING ONLY

"Give credit to whom credit is due." Also stop shaky people from getting undeserved credit. Let the applicant for credit show that he is worthy. Put proper restrictions on the granting of credits. Be hard, if need be. Establish safeguards. Use judgment and discrimination. Have up-to-date information. Know the reliable. Honor the men who make honest statements. Distinguish those who pay in full, promptly. Recognize the conservative. Beware of the rash. Get wise concerning persons in the doubtful class. Make it easier to spot those who would abuse or misuse credit. Weed out the discredited.

Aid in making credit giving more safe in the leaf tobacco trade. Arrange for an exchange of reports. Compare notes. Check up, frequently. Ascertain the truth, systematically. Take effective steps to prevent imposition. Facilitate united action. Figure on 100 per cent co-operation. Avoid unnecessary losses. Proceed, speedily, with what has been planned.

Such, substantially, was the advice given by various speakers at the luncheon meeting of the New York Leaf Tobacco Board of Trade, in the Hotel Pennsylvania, on Tuesday. At the meeting, nearly every leaf tobacco house in New York was represented. Fred Bloch presided. Great interest was manifested. The importance of the discussion was obvious because the credit question is uppermost just now in the leaf tobacco business.

Losses, large, repeated and aggravating, inflicted on leaf merchants by people who obtained undue credit is one way or another, have more than shown the necessity for greater protection.

Leaf merchants, generally, have been liberal in giving credit. Customers, old and new, were accommodated, according to their needs, if not so strictly in accord with their deserts. The financial strength of some of the big leaf houses made it possible for favors to be extended, regularly, to customers who desired to buy tobacco on time. How leaf houses have helped and "stood by" those who dealt with them, is well known.

To many, credit has been extended again and again, without any cause for regret. Of the honesty of numerous customers, leaf merchants are sure.

Leaf dealers, likewise, have less pleasant knowledge of people who proved unable or unwilling to pay. Ambitious people who overestimated themselves; unwise people who attempted to do too much; speedy people disposed to rush matters; incompetent people who couldn't properly handle what they bought; people who purchased and then became discouraged easily; lazy people who wouldn't work hard enough to make good; imaginative people whose resources were more imaginary than real; unfortunate people who brought ill luck to their creditors; such people and others not willfully dishonest, often made leaf merchants suffer for giving credit.

Of late, however, more reckless and less conscientious seekers of credit have infested the leaf tobacco trade. By wiles and devices these slick customers have mulcted leaf dealers who granted credit. In some instances only mild deception was practiced. In others, very raw stuff was pulled off. Rank misrepresentations were made to obtain unjustified credit. Premeditated fraud appeared. Men on the verge of bankruptcy professed to be entirely solvent. Suave promisers "peddled bull" successfully. Supposedly safe customers "double crossed" merchants who had helped and befriended them. Half a dozen dealers were deceived simultaneously by one unscrupulous buyer. Failures occurred with distressing frequency. Loss followed loss.

Even the biggest leaf merchants are undesirous of bearing more. They don't care to acquire further the habit of responding to requests to take "ten cents on the dollar" or something like that.

The granting of credits, promiscuously, can't be done any more. It's too costly.

What leaf merchants of New York have lost, in the aggregate, through frauds and failures of people to whom credit was given generously, was not stated in figures at the meeting. But the losses sustained actually are much larger than most people suppose.

The speakers at the meeting did not waste much time in bewailing losses. Rather did they argue for the adoption of measures that would prevent or minimize losses in future.

N. Berman, of the Tobacco Products Credit Association, explained what could be accomplished through systematized co-operation in obtaining and supplying information pertaining to people who asked credit of leaf merchants.

Henry M. Duys, of H. Duys & Co., made an effective speech, describing present conditions and defining what would have to be done.

Asa Lemlein, Jos. Mendelsohn, Jerome Waller and E. A. Kline vigorously supported the proposal to go ahead and develop plans already outlined.

The meeting gave prompt and enthusiastic approval to suggestions that it was advisable and desirable to strengthen credits throughout the leaf tobacco trade. Before the meeting ended the big work was well begun. To the call for 100 per cent co-operation, the response was immediate and hearty.

LUNCH AND BUSINESS

The days when Russell Sage took five minutes out of his busy day to eat an apple and Edward H. Harriman munched a sandwich with his ear glued to the telephone have passed.

Today Wall Street people think more of their digestions and prefer to talk business and arrange deals over the lunch table.

As a result dozens of lunch clubs have come into being whose waiting list in some cases run into the thousands.

A deal is hinted at over the oysters and consummated with the sweets.

One can go into any of the leading lunch clubs in the financial district and see many of our financial and corporation leaders leisurely eating and chatting and afterwards the smoking rooms are thronged with these gentlemen discussing the matters of the day over coffee and cigars.—*Wall Street Journal.*

"BLACK TIGER" WANTED

A subscriber in Mexico wants Black Tiger. Have you seen Black Tiger? What is Black Tiger? Who makes Black Tiger?

TOBACCO WITH LESS NICOTINE

Experiments in the cross breeding of tobacco plants at the tobacco farm of the Pennsylvania State College has produced a cigar with less than half the nicotine content of the average cigar. The new type contains less than 2 per cent of this potential poison. Seven men in the college have been asked to smoke samples to see how they liked them. Their answers may help settle the question whether men smoke "to soothe their nerves" or to gratify their palates.

As far as taste is concerned, it is probable that not one smoker in a hundred could tell whether a cigar contained 2 per cent. of nicotine or 5 per cent. The gentleman who drank half an ounce of whiskey and concluded that there was a rusty pin in the barrel may have his counterpart among tobacco users, but such fastidious palates are rare. Flavor is so much a product of other qualities than strength that a variation in nicotine content alone might pass unnoticed.

If it were found that an improved kind of tobacco, perhaps a leaf of low nicotine content, were less harmful than most kinds in general use, few men would object on grounds of taste to making a change. The effect of tobacco upon physical health or mental condition is as yet far from a settled question. The Pennsylvania State experiments may help tell what tobacco really does.

M. V. O'Shea, professor of education in the University of Wisconsin, recently sought to discover whether tobacco was harmful. He sent questionnaires to scores of men distinguished for artistic, scientific or business achievement, asking detailed questions as to their experience with tobacco. He made many tests, physical and mental, upon men whom he kept constantly under observation. The results, published in a book entitled, "Tobacco and Mental Efficiency," showed that in some cases smoking hampered the mental faculties, in some cases helped them. They showed that for some individuals tobacco was harmful to physical health, while for others it had no discernible ill effects. Professor O'Shea concluded that the immature were usually injured by use of tobacco, but that in cases of grown persons the effects varied with individuals. So far as adults were concerned, he reached no general conclusion as to whether tobacco was a good thing or a bad thing.

A similar test might be made as to the use of tobacco with high nicotine content and tobacco with comparatively little nicotine in it. Perhaps a nicotine-less cigar could be produced and tried out. If it were shown that a smoker derived definite benefits from smoking 1 per cent. cigars instead of 3 or 4 per cent. cigars, there apparently would be no difficulty in producing such tobacco. Perhaps, too, some folk would call for a law limiting the stingum to one-half of 1 per cent of the leaf.—*New York Sun.*

SIGNS OF THE TIMES

Who isn't familiar with those forbidding signs: No Smoking? We see them in street cars, elevators, trains, public buildings. Yet who would ever think of looking for one in church?

The truth of the matter is that back in 1624 Pope Urban VIII found smoking in church so prevalent and so annoying that he issued a ban against it. We get a strong idea of the popularity of tobacco from the fact that 34 years before that, Innocent XII threatened to excommunicate men who smoked in church, but the threat had no effect.

"Them days is gone forever!"

STARVING FOR TOBACCO

Three men recently made a spectacular lash across rotten ice and open water to the nainland of northern Michigan, reporting hat nine men and a woman were starving on ne of the islands off shore. Thereupon six irplanes made a still more spectacular dash o the island, carrying food. Two of the lanes were wrecked on the way, and one was narooned on a small island after a forced anding.

Later it developed that those distressed slanders really had all the food they needed. nstead of starving for victuals, the men were starving for tobacco. The messengers made their perilous trip for help in the natural expectation that if food were sent, tobacco would be included with the supplies.

Perhaps the shipwrecked aviators who brought succor to those smokeless woodsmen are sufficiently human to appreciate the humor of it. But it goes against the grain to be lied to in a matter of life and death. Many a man, knowing the pangs of tobacco deprivation, might have risked his life cheerfully enough if those woodsmen had simply told the world that they were "dying for a smoke."—*Ironton (O.) Irontonian.*

QUEEN LOST ON WAGER

Not the least interesting story told of Queen Elizabeth as a smoker has to do with a wager Sir Walter Raleigh made with her.

According to the terms, he was to weigh the smoke she exhaled from her pipe.

A tough proposition, you say?

But Raleigh won.

He weighed the pipe full of tobacco, the pipe full of ashes after it had been smoked, and counted the difference the weight of the smoke!

And the poor Queen couldn't get out of paying up!

Japanese Tobacco Industry and Trade Fostered by the Government

A Monopoly Which Is Important and Carefully Nurtured—A Source of Considerable Revenue to the State—A Distinction Between Imports and Exports — Private Traders May Export But Not Allowed to Import—Successive Steps Summarized.

By T. SINGTON
Manchester, Eng., Written Expressly for TOBACCO

THE TOBACCO industry of Japan is an important and growing one, carefully fostered by the Government, and a source of considerable revenue to the State. It is a State monopoly with a distinction between imports and exports; free trade is permitted to exporters; but imports by private traders are not allowed. The climate over large areas protected by mountain scale; but in addition very considerable quantities are imported, mainly from the United States. The State control has varied from time to time, alterations and improvements have been introduced again and again, the result of experience. The present system may be said to have been reached by evolution and seems likely to remain unaltered for some considerable period.

Official Regulations

The successive steps of the Japanese tobacco monopoly have been officially summarized as follows:—Tobacco regulations were first issued 47 years ago (1876) when a tax was levied on tobacco; after the lapse of some 20 years (1898) this tax was abolished and in its place the Leaf-Tobacco-Monopoly-Law was adopted and put into operation. Within five years, the Government was able to announce a realized profit from the monopoly, which amounted annually to over $7,151,000. This law was replaced in the year 1904, by the Tobacco Monopoly Law, by which both the manufacture and the sale of tobacco were placed in the hands of the Government. According to the provisions of this law, the cultivation of leaf tobacco is allowed to private individuals, subject to permission from the Government, but the leaf tobacco gathered by them is taken over by the Government, suitable compensation being paid therefor according to its quality; the manipulation and manufacture is then carried out in the Government manufacturies. The manufactured article is sold at fixed prices by dealers licensed by the Government. Foreign tobacco cannot be imported except by the Government, but there is at present no restriction whatever as regards the exportation of tobacco. The results obtained by this most recent modification of the monopoly has been highly satisfactory; the net profits are increasing annually and now exceed $51,871,000. The figures for 1922 have not yet been published; they will probably have a large advance on this amount. The bad trade period of 1920-21 may have resulted in reduced receipts, but the official figures will not be published for some time; the official estimate was $42,611,000 a very cautious one. There are in all, three monopolies in Japan: 1st salt, 2nd camphor, 3rd tobacco; the first two are relatively insignificant.

Tobacco is the outstanding monopoly.

Tobacco Acreage

The acreage devoted to tobacco in Japan has fluctuated to some extent during the last decade, but on the whole has maintained its level; the most recent figures do not differ very materially from those of ten years ago, as shown below:

Year	Acres	Year	Acres
1910-11	74,300	1915-16	76,900
1911-12	69,300	1916-17	71,000
1912-13	73,400	1917-18	66,000
1913-14	78,700	1918-19	61,600
1914-15	90,400	1919-20	77,200

The boom year 1914-15 was clearly exceptional, the acreage for 1919-20 may be considered highly satisfactory.

Improved cultivation has increased the yield per acre, as shown by the following figures:

Financial Year.	Production pounds.	Quantity per acre in pounds.
1910-11	97,078,000	1,306
1911-12	83,186,000	1,200
1912-13	93,374,000	1,272
1913-14	104,932,000	1,345
1914-15	125,029,000	1,389
1915-16	107,935,000	1,403
1916-17	106,178,000	1,495
1917-18	93,168,000	1,411
1918-19	85,050,000	1,394
1919-20	117,307,000	1,523

With the exception of the year 1914-15, the last official return of production (1919-20) is the largest on record; any further increase in the acreage would send up the output to a record quantity, if the increased production per acre could be maintained. The quantity of tobacco collected by the Japanese Government as well as the compensation for the tobacco collected from the farmers are given below:

Year.	New Leaf pounds.	Old Leaf pounds.	Total pounds.
1910-11	27,085,000	690,000	27,775,000
1911-12	21,980,000	470,000	22,387,000
1912-13	28,237,000	452,000	28,689,000
1913-14	32,782,000	662,000	33,444,000
1914-15	30,870,000	1,025,000	31,895,000
1915-16	31,717,000	7,110,000	38,828,000
1916-17	31,072,000	830,000	31,902,000
1917-18	26,225,000	700,000	26,925,000
1918-19	23,200,000	995,000	24,195,000
1919-20	33,545,000	592,000	34,137,000

Amounts Paid for the Tobacco Collected

Year	New Leaf	Old Leaf	Total
1910-11	$4,596,000	$78,000	$4,674,000
1919-20	19,989,000	176,000	20,165,000

These figures work out at 16.2 cents per pound for the last year 1910-11 and 66.25 cents per pound for the last year 1919-20, showing an increase of 50 cents; that should result certainly in an increased acreage. Wages have increased in Japan as elsewhere, from two to three fold, during the decade dealt with above. For tobacco-cutters the wages index numbers have been as follows, taking the wages of the year 1900 as 100:

1911	144.2	1916	158.1
1912	148.8	1917	174.4
1913	153.5	1918	211.6
1914	162.7	1919	286.0
1915	160.5	1920	346.5

Wage Increases

The wages of the agricultural laborers employed on the tobacco fields, have increased still more, as shown by the following index figures, taking the 1900 wages at 100:

1911	155.1	1916	162.0
1912	167.6	1917	184.9
1913	161.5	1918	247.3
1914	167.8	1919	388.7
1915	167.2	1920	439.4

Limited Exports

Japanese exports of tobacco are on a limited scale and have shown a tendency to diminish during the last five years, as shown by the following figures:

1911	$444,000	1917	$865,000
1913	270,000	1919	360,000
1915	178,000	1920	253,000

The home market evidently absorbs the bulk of the output, no doubt any great increase in the output would have to find an outlet abroad. Cigarettes are exported to China, the Kwantung Province, Hongkong and in small quantities elsewhere; the totals being as follows:

1914	$120,000	1918	$223,000
1916	183,000	1920	253,000

Imports from the Philippines

Japan imports tobacco both leaf and other forms from the Philippine Islands in increasing quantities, as shown by the following figures:

1915	$22,000	1918	$84,000
1917	37,000	1920	374,000

There are also small imports from Turkey and Egypt and very considerable imports of tobacco leaf from the United States. During 1914, $603,000 and 1920, $2,755,000. The prices charged in Japan for cut tobacco have increased nearly by one half since the war, as shown by the following index figures, taking the pre-war year 1912 at 100:

1912	100	1918	115
1914	101	1919	126
1916	101	1920	143½

Thus it will be seen that the tobacco industry in Japan is a very important monopoly.

New Orleans Is Hopeful Over Cigarette Outlo

Rift Appears in Clouds of Discord Which Have Been Hoveri Over City—First Shipment of 150,000 Cigars to Spain To Feature Cigar Brand in "Movies"—News Notes.

New Orleans, La., May 5.—There appears to be a rift in the clouds of discord which have been hovering over the New Orleans cigarette situation for some time past. Representative Green, sales manager of W. Duke Sons & Co., was in the city during the week and made an exhaustive survey of the situation from the viewpoint of both the factories and the protesting distributors. He obtained much wholesome data which may prove serviceable to him in restoring harmony and good feeling. It is not improbable that the practice which now obtains here of selling direct to the retailers, through some mythical jobbers, which is alleged to be the source of all the trouble, may be discontinued. A. L. Rau, president of the Crescent Cigar & Tobacco Co., of this city, now in New York, has settled down at the Pennsylvania Hotel, to await developments in the matter, which prompted him to take his "flight" North.

Recently Incorporated

The Geo. Moroy Cigar, Cigarette & Tobacco Co., Inc., one of the landmarks of New Orleans, at 2133 Magazine street, is making flattering trade advances under the guiding hand of Geo. Nies, its energetic secretary and treasurer. Mr. Nies became associated with the company in 1920, having previously filled with credit, for several years, a responsible position with the American Tobacco Co. Mr. Moroy, whose name the company bears, has had an experience of 25 years in the business. The company has recently been incorporated. In the opinion of Mr. Nies the trade outlook is good, though buyers at present are purchasing conservatively.

Initial Shipment

The first shipment of 150,000 cigars to be made monthly to Spain by Joseph Berengher, who contracted for them with the N. B. Tuero factory in Carrol street, left for Barcelona during the week. Mr. Berengher, who is engaged in exporting leaf tobacco, has headquarters in the Natchez building, this city, and left during the week for New York, where he intends making a stay of eight or ten days. An unintentional error was made in the report that the Tuero contract called for $150,000 worth of cigars. It should have been stated that the contract called for a shipment of 150,000 cigars monthly. The factory has increased its working force and Jules Casse, formerly with the Consolidated Film Co., has been appointed sales manager. Mr. Casse had several years' experience in the cigar industry before having identified himself with the Consolidated Film Co. A new feature of the Tuero factory will be its film exhibit of the Paul H. Maloney brand of cigars in the chief moving picture houses of this city.

The B. Dohinquez cigar factory, at 2414 Broad street, is doing well with Spanish Special, a new brand recer acquired by the factory.

The Dolorez cigar people in No Peters street, after a brief period of activity, have reopened the factory a are actively at work.

Wallace Marine, of the Marine ci factory, in Gallatin street, now in Te on missionary work, is reported to h met with great success in Houston, wh he went to negotiate for the distribut of Marine's Little Havana, which taking well here.

Seeking Wider Distribution

The Southern Cigar Factory No. 50, 1015 Washington street, while a co paratively recent contender for popu support, as judged by some of the ol establishments in this city, of which th are many, is owned and operated Henry Estes, whose experience da back to childhood. He has spent fort two years of his life in the industry, introduction to it having commenced Germany at his father's factory, when was a lad of eight years. He manufa tures three brands of five-cent selle Buck Private, Estes Hand Made Lit Havana, and Hi Yalla, and two bran of 10-cent sellers, El Estes clear Hava and El Estes Corona, a perfecto shap sublima. The Southern cigar facto has heretofore confined its activities the local field and to Louisiana and Mi sissippi, but is now making preparatio to invade the Texas territory for wh it is now negotiating for distributors a a traveling representative.

Wants to Go Where Wages Are Higher?

It was currently reported on the stree during the week that one of the sma downtown factories contemplated disco tinuing business here and removing Detroit, Mich. Negotiations to this e were said to be in progress, though t arrangements had not yet been definite concluded.

The Esposito factory in Miro street holding its own for a little factory and turning out satisfactory work for sever of the local jobbing houses with whic the factory supplies its products.

M. J. Blum, leaf tobacco dealer, of 1 Water street, New York, was in the cit during the week on his way to Tamp Fla., where he has a large number of a counts in Florida shadegrown tobacco.

Working Full Force

The books of M. Trelles & Co. for th month of April show an increase of 5 per cent over the same period in 192 The factory is working to its full ca pacity, and is still hampered for sufficien working space, which gives rise to th belief that the three brothers who forr

San Francisco Trade Marred By "Disturbances"

Cigarette Price War Causing Greatest Amount of Discomfort to Dealers—Strikes and Lock-Outs Depressing to Cigar Manufacturers and Workers—Trade Topics.

San Francisco, Cal., May 2.—The most exciting event of the season just now, from the retailer's standpoint, is the cigarette war that has been precipitated. The announcement was suddenly made that the chain stores had cut cigarettes, and, of course, the various stands have been forced to follow suit. One of the chain groups and another dealer with two stores had for some time been maintaining these cut prices, so when finally the United met the price, all others fell in line. The war is not confined to San Francisco. Over in Oakland, the United also made the cut, and the Samuels stores promptly met the cut. The small dealers are voicing some loud but helpless complaint.

Disturbing Elements

Another item of more than usual interest has been the strike and lockout that has spread among the factories. It started over dissatisfaction with a foreman, whose dismissal was refused, but is intensified by the feeling among the cigar workers that they are getting less pay than in other parts of the country. Seeing the strike coming, some of the establishments dismissed their help. With the advancing price of leaf, they claim they cannot pay more wages. One of the workers who has turned his back on the business forever, says that the advent of the machine and the constant fluctuation of the market between busy and dull seasons made employment so irregular that he found it more profitable to do common labor. The leading employers of the city do not think the trouble will continue long.

One of the factories still running is that of Cimino, Cortini & Co. They have been busy making up some first-class local brands for the jobbing trade, and have just finished the first supply of their own new brand, the Governor.

Dingman & Van Dyke, putting out the Valleau, report a slow but substantial increase.

The Petri factory is still being developed, the run of business excellent. Their East-bay trade, under the capable management of Vitaich and Fraccia, is flourishing greatly. Keeping a large stock there saves the East-bay customers the trouble and expense of coming across the bay or telephoning and the additional expense of trans-bay transportation.

Judell in New Home

H. J. Judell & Co. have moved into their new headquarters at 334-6 Sacramento street. Here they have built a cement box basement for a humidor, and as the building runs from street to street, they will have storage for several million cigars. For a light, cheery place, with every convenience for business, it is the last word.

S. Bachman & Co., after resting on their oars, so far as general jobbing was concerned, have put in cigarettes and tobacco, and announced a general jobbing business. With their Gato, Cinco, La Palina, Muriel, R. B., New Currency and with every variety of sizes and prices, they feel that they have a splendid cigar line to please the trade, and have yielded to the wishes of their many customers that they come prepared to furnish them with whatever they want.

William H. Norden, just returned from Nevada, reports conditions good there, and that he had very gratifying placements of La Palina. He is now off to try his fortunes in Los Angeles.

A. Garcia, of Garcia y Vega, has been spending some time in the city, looking over the ground and visiting the trade with Walter Fricker, the San Francisco representative.

P. J. Leonhardt, of Goldberg & Leonhardt, has just returned from his long North Western trip, with excellent reports of conditions and business in that territory. They have had good success with their cigarmakers' sundries.

George K. Miller, formerly foreman for the La Gran Marca in Portland, Ore., has joined the sales force of Goldberg & Leonhardt.

Peter Fallis, manager of the Goldfield Candy & Cigar Co., is in the city purchasing supplies, preparatory to opening a local general jobbing trade.

Julian K. Solmonson is reporting fine sales in his high-class stand of Belmonts and Chancelors.

The stand of D. Buegeleisen at the corner of Fourth and Market streets is making use of some old goods and odds and ends to advertise give-away prices. They frankly tell what the goods are.

A thirty days' advertising campaign on San Felice is interesting the trade.

Featuring Wellington

W. R. Thomas, sales manager for The Christian Peper Tobacco Co., of St. Louis, arrived in New York, Friday, and made numerous calls on the trade, before leaving for Tampa, Fla., Monday night. Mr. Thomas is making a special feature of the Wellington smoking tobacco on this swing around the business circle. Success seems to have crowned his efforts in Gotham.

Cigarette Shipments Gain

Shipments of cigarettes by Phillip Morris & Co., Ltd., in the first quarter were 55 per cent ahead of the corresponding period of 1922.

Canadian Deal Consummated

The Tuckett Tobacco Co. of Hamilton, Ont., has purchased Tobacco Products Corp. of Canada, Ltd., and Tobacco Products Export Corp. of New York, which owned the Canadian subsidiary, has secured by private purchase a substantial interest in the Tuckett Co. President Howard S. Ambrose, of Tuckett Tobacco Co., Ltd., made the announcement.

The Tuckett Tobacco Co. has an authorized capital of $4,500,000, $2,000,000 being 7 per cent cumulative preferred and the balance common. All is issued.

President Ambrose states that "owing to the Tuckett Company's strong financial position the issue of additional capital stock will not be necessary." Regarding the purchase of Tuckett stock by Tobacco Products Export Corp. of New York, Mr. Ambrose says: "It is thought this will be a valuable connection for the Tuckett Company."

Pipe Cleaners of all Kinds, Tobacco Pouches, Pipe Gloves, Cigarette Cases.

E. T. GILBERT MFG. CO., Rochester, N. Y.

Cigar Company Incorporated

MIDDLETON, Ohio, May 5.—The Christman and Vital Cigar Co., which has been doing business here on a small scale since last September, has been incorporated for $25,000. Simultaneous with its incorporation, the company announces that construction will soon start on the erection of a new $10,000 factory on South Young street. This increase of capacity is necessary to accommodate the expansion in its business.

New Hoosier Corporation

SOUTH BEND, Ind., May 5.—The Golden D. Mann Cigar Stores Corporation has been chartered with a capital stock of $100,000. The company is to do both a wholesale and retail tobacco business. The organizers are Golden D. Mann, Blanche Mann and Clifford V. DuComb.

United Dividend

The United Cigar Stores Co. of America has declared a regular quarterly dividend of 1¾ per cent on preferred stock, payable June 15 to stock of record May 31.

Foreign Exchange Rates

In the subjoined table the quotation on sterling represents dollars and decimals of a dollar; all others represent cents and decimals of a cent. Quotations preceded by the decimal mark indicate a price measured in fractions of a cent.

Parity of exchange is given as reported by the United States Mint, except in countries with a silver standard, where parity fluctuates with the price of silver.

T. M. A. Protests the Chinese Tax

The Tobacco Merchants' Association of the United States has sent a protest to Secretary of State Hughes against the action of local officials of the Province of Chekiang, China, in levying a new 20 per cent ad valorem tax on cigarettes which, it was declared, was imposed in violation of treaties made by the Pekin Government.

Similar protests are being forwarded to the British Foreign Office by British tobacco interests, according to Charles Dushkind, counsel and managing director of the T. M. A.

Bagley Quarters Changed

The John J. Bagley Co., of Detroit, manufacturer of smoking tobacco, which was recently taken over by the Tobacco Products Corp., has moved its offices to the New York headquarters, at 44 West 18th street.

Drumming Pennsylvania

Ray S. Clark, of D. Dreux, Inc., is visiting the Pennsylvania trade with some excellent samples of new Sumatra leaf.

Retailers to Celebrate

The fifth annual banquet and ball of the Kings County Cigar & Stationery Corp., is to be held on Sunday evening, May 13, at the Broadway Central Hotel, New York. The committee has made comprehensive arrangements for the entertainment of their guests and an enjoyable evening is anticipated.

To Become Vice-President

Harley Jefferson, of the Jefferson Leaf Tobacco Co., Sparta, Wis., who was in New York last week, is slated for election to the office of vice-president of the Industrial Leaf Co., at the next meeting of the board of directors.

Schulte Sales

Sales of the Schulte Cigar Stores Corp. for the first four months of this year are reported at more than 25 per cent larger than during the same period of 1922.

Inspects New Sumatra

Henry Bobrow, of Bobrow Bros., Philadelphia, was a recent visitor to New York, where he inspected samples of new Sumatra tobacco.

Returns from Cuba

Jacob Labe, representative of H. Duys & Co., has returned from Cuba, where he has been inspecting the new crop for his firm.

Chess Is Speedy Compared With Up-State Moves!

First O'May Made Mass O'Changes in Albany!—Who's Where, and How They Arrived!—Dearstynes Under One Roof—Bruce Macdonald Co. in Maiden Lane!—San Felice Signs!

NEW YORK STATE CAPITOL DISTRICT

Week-o'Moving, 1923.

"There! That's done!" Sam Ash sighed deeply, as he sank into the nearest seat o' the Hot Chair Club, once again established in the wholesale and retail tobacco shop o' Stubb & Ash, Inc. "An' if yuh should mebbe ever git me to move again, y'unnerstan, unless the sheriff helps, I should then be a schnorrer, I bet yuh!"

"You tell 'em, Sam, you got a goozle!" urged Jim Stubb, collapsing onto the friendly top of a Chesterfield carton-crate. "But, just the samee, Sam, this moving stuff does clean the joint of a pile o junk eh?"

"Uh-huh, also cash," grieved Sam Ash, feeling in his right pants' pocket for his last trolley token, which should take him all the way home pretty soon. "Them there car-penters, also painters, plasterers, an' paper hangers might so well take this here cash register home each night, unnerstan, an' divide it a-tween 'em! Am I right or wrong?"

Farewell South Pearl Street!

"Right!" agreed Earl Goodrich, sales boss o' the Dearstyne Brothers Tobacco Company, as he tried to edge into the Hot Chair Club thru a jumble o' sawdust and shavings. "We know, because we've just moved the remainder of our wholesale and retail stock from the old store at South Pearl and Division streets to our new building at Broadway and Steuben street.

"Most of this moving was done some months ago when we first opened the Broadway headquarters. But there were lots of odds and ends to bring down to the new store, the accumulation of all the years the Dearstyne Brothers have been in business. For it was practically on this same South Pearl street spot that the firm opened up for their original trade some thirty years ago."

And Good Bye State Street!

"Well, we haven't been in business quite so long as that," admitted Bruce Macdonald, president o' Bruce Macdonald Company, Inc., "But it was just about six years ago that we opened up at 110 State street. Now we're moving to 57 Maiden Lane.

"There we have a store quite convenient to our old location, which is just around the corner. And though the space is smaller, we are so arranging it that all cigar and tobacco stock will be concentrated in the store itself, instead of being widely scattered in a vast storeroom. Yes, we are ready for business now, having lost only one day in the moving."

Painting the Town San Felice

"We're trying to lose no time at all in painting Albany all over with our new San Felice signs," laughed Eddie Quebec, tugging in Brother Dave for introductions all around as the D. G. Quebec Cigar Company, distributors o' the Deisel-Wemmer Company. "Dealers who never bought San Felice before are now asking for shipments, based upon the advertising we are doing.

"Why, it's a queer thing the way smokers and retailers themselves, even, will say, 'Gosh, but you're simply covering this town with painted bulletins, aren't you?' when the fact is we've tried to get distribution here for months of salesmanship!"

More Cigars for the Boulevard

"Yes, distribution is an odd thing," assented Henry Sickinger, one o' the big bosses o' the New Boulevard Rotisserie, as he squeezed his way into the Hot Chair Club. "Even in our business it's a peculiar thing about so-called salesmanship.

"For you know we express it in the restaurant business, not so much with direct advertising, but with the suggestive indirect. For instance, we are now remodeling our place at 108-110 State street. When ready in sixty to ninety days it will undoubtedly be the largest and the finest establishment of its kind in the city.

"Everything will be absolutely new. Even the kitchen service and fixtures. That is merely a part of the indirect advertising I've mentioned. And we will also operate an enlarged cigar and cigaret department, with all the cases and cabinets done right here in Albany by Spalt. Popular brands only will be featured, as I do not believe in labels the eating and smoking public has never heard of before."

One More Busy Beaver

"Neither do I," affirmed Apothecary Carey, he of the C. & F. Drug Company, formerly of 32 South Pearl street, and now around the next corner on Beaver street. "People want advertised goods. And that's why we figure this new location of ours will bring the business down here on Beaver street almost as well as it did on South Pearl, where rents are now absurd.

"Anyway, we will continue to feature popular brands, not merely in the drug line, but in the corresponding stocks of confectionery, cigars, and the like. Smokers will walk around the corner for a brand they want, notwithstanding that these piratical landlords make 'em do it!"

Not Moving This Year, Says Sam'l

"Yep, we settled our store problem a year ago," smiled Sam Fulder, the head o' the House o' Fulder, 37 Beaver street, as he managed to open the door o' the Hot Chair Club. "Moved down here on Beaver street, you'll remember, when everyone in town said we were crazy.

"Said we were insane to tackle a quiet side street, you know, when so many stores were available on the main lines. But nothing was said about the difference in upkeep—rent or taxes, whichever you like. In our case it's taxes, for we bought the building. And now others, many others, are realizing that Beaver street isn't so obscure after all, and that they'll come down and join us in the exile for a year or so until the City Administration decides to put in more lights, and bring even more merchants—in cigars or otherwise."

Neither Did the Lord Mayor Move

"Side streets seem to be the reply to the high rents of the main thorofares," concurred J. W. Stevens, the State street

dealer, as he obtained a temporary seat on a keg o' nails in a corner o' the Hot Chair Club. "But we remain for another year, at least, just where we've been for so long—State street and Broadway.

"Since 1869 we've been in the tobacco business here in Albany, and our locations here, with one exception, always been along Broadway. That one exception was 39 South Pearl street, a very excellent retail store. But we are acquainted with the trade along Broadway, and I guess we'd better stay around there somewhere."

But Johnson Went Out

"And after years and years on Maiden Lane, J. M. Johnson probably thought that way, too," suggested Jim Stubb, cocking his feet up on a tool box. "For, if rents at last became so high on Maiden Lane, and with no nearby stores available at reasonable leases, Johnson worked it all out that he might better retire, rather than hand the landlord even his life insurance.

"Quite a number of Johnson's old smoker friends will miss him, though. He was an established landmark for high grade tobaccos and pipes down on Maiden Lane. And he drew his trade from a source almost untapped in Albany—the well-to-do men of semi-professional business, who like to browse around an old tobacco shop, making acquaintance with new goods, and talking about the old time brands."—The Smoker.

Surbrug, Inc.

Miss Nancy Fitzgerald has been made an officer in one of the oldest tobacco firms in the city, and so on goes the feminine touch to the last remaining masculine possession, the "baccy" jar.

Miss Fitzgerald is secretary and part owner of Surbrug, Inc., a firm that has distributed tobacco since 1859, and which was one of the first six tobacco stores in New York.

The odd touch is that the men invited this intrusion themselves. Surbrug, Inc., was taken over by its employees and became co-operative recently, and since Miss Fitzgerald had been part of the firm for the last eleven years, they merely acknowledged the reality of things and took her in.

She Is a Pretty Blonde

Miss Fitzgerald is a pretty, capable young woman, with that shade of blond hair which in certain lights is auburn.

"I like it very much," she said when interviewed, "but I don't see any change from what things had been. I am rather used to being here."

The lady member of the firm keeps the books and she knows more about the fragrances of tobaccos than many men. She can tell you glibly the brand of tobacco and cigars that Bishop O'Connor, Frank Vanderlip, H. L. Pratt and Oscar Straus smoke, for they are among the firm's old patrons, and she can quite adequately advise a new customer as to which mixtures wear well on the palate and which others are best in rotation lest they "sour."

John W. Surbrug, son of John R. Surbrug, the originator of the business, is perhaps responsible for Miss Fitzgerald's present place. Mr. Surbrug has theories about employees. "If you can trust them to think for you, then they are worth anything to you." For the last twelve years he has split the firm's profits. He took half and the other half was divided among the employees, Miss Fitzgerald sharing with the rest.

When he wished to retire from the business, he offered up gratis the sixty-year good-will of the establishment his father had founded, and impulsively included the show case of briar pipes, just as it stood, into the bargain.

Employees Own Business

The four employees, Fred W. Hayward, service twenty-three years; H. V. Buck and John A. Garrity, employed for nineteen years each, and Miss Fitzgerald, now own the longest surviving tobacco trade name in the city's history. Mr. Hayward is president of the new corporation.

Surbrug's started in Barnum's Musuem, at Ann street and Broadway, which also housed the *Herald* and *Evening Telegram* in their youth, and Surbrug's remained there from 1859 to 1864 when Barnum's Museum was swept by fire. The firm then removed to No. 159 Fulton street, and by curious coincidence it is now again back in its old environs at No. 136 Fulton street.

Mr. Surbrug reminisced that at the time his father's shop first opened cigarettes were unknown, and cigars came in air tight barrels and were called "seegars" by everybody.

And to show the progress of events, Miss Fitzgerald admitted that they have a very distinctive feminine clientele who leave a standing order.

First Cigarette in 1879

Cigarettes, according to Mr. Surbrug, made their first appearance in 1879, and the first brands placed on the market were Sweet Caporals and St. James cigarettes. Afterward came Vanity Fair, Richmond Straights, Old Judge, Milo, Old Golden Sceptre and others, all of them dead now, except Sweet Caporals. The very elect of those days were initiated by hand rolled cigarettes known as Honradez, which were brought in from Havana.

Surbrug's has an old world custom shop air. Mr. Hayward, the new president, says the firm will seek to carry on the traditions of the establishment and not seek expansion. The Surbrugs were Swiss, and Mr. Hayward is an Englishman. "There is only a certain amount that you can eat," said he, "and a certain amount that you can drink and sleep and enjoy and expansion is not my goal.

"I am afraid that I am not on to modern business methods. Up in the suburban town where I live everything is running away with system. The grocer is a man we don't know, for the store is a digit in a chain. We have a druggist whom we all look up to, but I am sure that when he is gone we shall have only clerk hirelings who won't mean much to us or we to them."

Has Cigars 38 Years Old

Miss Fitzgerald proudly beamed upon the shop. She brought out one of the firm's treasures, a box of cigars 38 years old. The cigars were wholly intact and round and smooth to the touch. She handled them preciously.

Miss Fitzgerald can also talk pipes. "It's too bad," she said, "that vulcanized rubber is absolutely replacing amber for pipe stems, but the rubber ones are more durable."

And to prove irrefutably that woman's place is rightfully in a tobacco shop she took out a case of gleaming amber beads. She denied that they were an innovation with them. "Every select tobacconist carries them and always has. You buy them along with the amber pipe stems."

She justified herself completely. "When a gentleman wishes to purchase a string of beads I can try them on to accommodate," she said.—*New York Sun.*

Cigar Slogan Committee Much Disappointed

At a meeting of the Cigar Slogan Committee of the Tobacco Merchants' Association of the U. S., held at the offices of the Association on Thursday, May 3, the slogan, "A cigar, a smile, make life worth while," submitted by E. M. Freeman of Sidney J. Freeman & Sons, 123 Liberty street, New York, was declared the winner of the Cigar Slogan Contest conducted by the T. M. A. and awarded the first prize of $250.

The second prize of $150 was awarded to John D. Aviles, factory office manager of Salvador Rodriguez, Inc., Tampa, Florida, who submitted the slogan, "Man's Boon Companion—The Cigar."

The third prize of $100 went to Manuel L. Perez of Marcelino Perez & Co., 709 Sixth avenue, New York, for the slogan, "Cigars—The Ideal Smoke—The Friendly Gift."

Twenty-two of the 25 members of the Committee, embracing all branches of the cigar business were in attendance at the meeting, which was presided over by its chairman, C. R. Sherlock, vice-president of the United Cigar Stores Co.

All phases of the subject came up for consideration and discussion, and the keenest of interest was manifested in the matter of obtaining a suitable slogan for the cigar trade.

While the Committee found that the three prize winning slogans are respectively the first, second and third best of all slogans submitted in the contest, it is with keen disappointment and with profound regret to all that the entire list of slogans has failed to present a single slogan which, according to the unanimous judgment of the Committee, meets the test that a permanent national slogan for the cigar industry should meet.

Committee Continued

In view of this situation it was unanimously decided that the organization of the Slogan Committee be continued, and that a Sub-Committee of advertising specialists be appointed for the purpose of endeavoring to frame a desirable slogan to be submitted to the full Committee as soon as practicable.

The following were accordingly appointed as such Sub-Committee:

Frank W. Harwood, advertising manager of the General Cigar Co., New York, chairman.

Chas. H. Eyles, president of The Richard A. Foley Advertising Agency, Philadelphia, Pa.

F. J. Ross, president of F. J. Ross Co., Inc., New York.

George C. Sherman, president of Sherman & Lebair, Inc., New York.

C. R. Sherlock, vice-president of the United Cigar Stores Co., New York.

Bakelite Pipes Perfected by WDC.

At the beginning of this year, Wm. Demuth & Co., one of the world's largest makers of fine pipes, introduced to the trade what was considered to be a long step forward toward perfection in briar pipes with Bakelite mouthpieces, namely, a briar pipe with a Bakelite push tenon bit.

This progressive firm now announces a further improvement. That is, the addition of an aluminum tube lining, which extends from tip to tip of the bit (similar to the aluminum tube in the now-famous Duro-Bit line), reinforcing it throughout its entire length.

This aluminum reinforcement not only makes it possible to guarantee the Bakelite bit to be unbreakable at any point, but it also acts as a protection to prevent the nicotine and saliva which passes through the bore hole of the bit from penetrating and discoloring the Bakelite material.

The excellent talking points of this line offer the dealer an exceptionally fine sales leader—and to cap the climax, Wm. Demuth & Co. announce that all WDC push tenon Bakelite pipes will in the future be manufactured with the aluminum tube feature without any increase in price to the trade.

Acreage Increase Indicated

WASHINGTON, D. C., May 9.—Growers of tobacco are rapidly preparing the ground for planting, according to the Bureau of Agricultural Economics. Plant beds are generally in good condition, the Bureau says, and in most heavy growing districts the supply of plants will be ample and adequate for the planting of an increased acreage.

The Bureau also says that some damage to tobacco plant beds is reported from Virginia. Plant beds are late in Kentucky and Tennessee, but the supply of plants will be plentiful. The Bureau further states that planting is well under way in Georgia and South Carolina. There are indications of a heavy increase in acreage.—LAMM.

Visits Baltimore Trade

Herbert Holzman, of Strouse & Holzman, is visiting the Baltimore district this week with samples of fancy wrappers.

Customs and Revenue Receipts

TAMPA, Fla., May 5.—Cashier G. F. McWilliams of the U. S. customs office here reported receipts of $142,565.32 last month, compared with $118,326.33 in April, 1922.

Internal revenue collections at the Tampa office last month amounted to $315,398.05, compared with only $246,321.43 for the same month last year, and $303,674.40 for last March, it was announced by Charles H. Moyer, stamp deputy.

Number of cigars manufactured last month, in each of the five classes of grades, and value of internal revenue stamps sold to cover them, were as follows:

	Stamps	Cigars
A—	$42,713.25	10,678,340
B—	12,002.43	2,400,000
C—	192,810.78	21,423,420
D—	57,590.39	4,799,190
E—	2,917.73	194,510
Total	$308,034.58	39,495,460

Trade Notes

The American Box Co. has been absorbed by the Enterprise Box Co. and will occupy the Benjamin building temporarily. They plan to build an up-to-date factory in the near future. W. L. Wheeler, secretary and office manager of Arturo Fuentes Co., Inc., will go to the Enterprise Box Co. as Secretary and Sales Manager.

L. R. Whitney, for several years with the American Tobacco Co., succeeds W. L. Wheeler as Secretary and office manager of A. Fuentes Co., Inc.

Manuel Garcia has returned from the leaf markets of Cuba.

A. T. Rollins, secretary of San, Martin & Leon Co., has returned from a visit to the trade in Kansas City, Memphis, Atlanta, and intermediate points. He reports very satisfactory business.

A. L. Cuesta, Sr., is back from a visit to his Havana interests.

Harry Slavinski of the G & M Cigar Co., has returned from a conference with his Chicago partners.

Nat Berriman has returned from Havana.

H. S. Foley, Treas. of F. Lozano, Son & Co., is visiting the Windy City.

Then and Now

The Tampa *Daily Times* carries this item under caption:

"Thirty Years Ago"

"Last week Emilio Pons & Co. shipped 120,000 cigars. A larger part of their famous Lillian Nordica went to San Francisco. La Misma, their principal brand, is still holding its own."

In those days this was a record breaker. Today? Not worth mentioning. Many manufacturers exceed that in daily output.

Exhibit for Visitors to T. M. A. Convention

Room No. 1001 at the New Willard Hotel in Washington, D. C., promises to be a Mecca for the visiting cigar manufacturers who will be in attendance at the T. M. A. Convention on May 16 and 17. The Miller, DuBrul & Peters Manufacturing Co., of Cincinnati, Ohio, have secured this room which adjoins the meeting room where the sessions of the Convention will be held, and are making plans for a unique exhibit of the Durex Quality Production Power Bunch Machine. This machine received its premier showing at the International Tobacco Exposition in New York City in February, and the booth was one of the busiest places in the entire show during the week.

Cigar manufacturers are showing an especial interest in the machine, because of the absolute necessity under present conditions, of bringing production costs down to a minimum, and still maintaining quality. Another reason for the interest that is being shown is because of the increasing demand among smokers for return to the medium priced cigars, and yet getting the quality that they have been accustomed to in the higher priced cigars. Only through machine work and by the same token with short filler cigars, can sufficient production be maintained to keep down manufacturing costs to the point that will enable the manufacturers to produce cigars that will meet the requirements with any profit to themselves.

The plans for the exhibit at Washington are being kept a dark secret, but the cat was let out of the bag to a certain extent by R. M. Fleming, Publicity Manager for the company, who stated that something entirely different in the way of a demonstration would be shown. From another source, it is rumored that there will be at least two very attractive features in connection with the demonstration. Those manufacturers who attended the New York show will no doubt remember the Turkish Pipe demonstration.

A half dozen of the members of the Miller, DuBrul & Peters Mfg. Co. will be on hand to welcome the visitors and explain the advantages of their machine.

Key West Key Notes

KEY WEST, Fla., May 5.—The latest report from the customs district shows that Key West is still in the lead of exports for the state. According to the report, Key West exported $2,434,960 worth of merchandise to Cuba and other ports to the south of us. Pensacola comes next with $462,816; Tampa, $330,561; and Jacksonville with $207,186.

In imports for the same period, according to the report, Jacksonville leads in receiving goods from abroad. Jacksonville's imports amounted to $292,758; Tampa, $44,445; and Key West $63,901.

Cigar Production in April

There appears to be a slight depression in work here this week, and it will be seen from the report of the stamp deputy collector of Internal Revenue, Hon. J. F. Uhrback, that there was fewer cigars made in April than in March. Class C, which always reaches the 2,000,000 mark, fell off by 929,375. The number of this class manufactured in March is given as 2,872,479, while April's records show only 1,943,104 were made during that month.

Class A decreased by 387,700. This grade cigar numbered 1,225,225 in March, while April shows that only 837,525 were made, making a decrease of 387,700 in the production during the past month.

Class B is the only class cigar to show a greater number manufactured in April than in March. In March the number of this class was given as 235,675, while the records show that 451,966 were made in April.

Class D fell off by 87,526. During March there were 341,739 of these cigars made, while in April only 254,213 were put out by the local factories.

Class E, which is never very numerous, in March numbered 14,525, while in April this grade only showed 10,350, a decrease of 4,175.

Tobacco Imports

During the past month there were 361 bales of tobacco imported for the use of local factories. This tobacco was valued at $27,619.

From the monthly report of the Collector of Customs, it is seen that among the exportations of merchandise to Cuba and West Indian ports, the United States shipped through Florida ports, 15,000 cigarettes to Cuba and other countries in the Carribean. Of plug tobacco there was shipped 348 pounds, and of smoking tobacco 421 pounds. Cigars sent numbered 1,000.

Of tobacco imported through Florida ports, the report shows that 196,555 pounds of unstemmed leaf tobacco entered. Of cigar wrapper, there were 706 pounds. Of manufactured tobacco, there were 86,492 pounds and cigars to the amount of 105 pounds went to those who prefer the cigars made in this country.

H. B. Sandifer, deputy collector of Internal Revenue, who has been in Miami for several weeks, attending to revenue matters in that city, returned to Key West Friday, and will remain here until relieved for duty elsewhere.

Uncle Sam loses $7,330.01 by the falling off in the number of cigars made in April compared with the number made in March. In the month of March the sale of revenue stamps aggregated $39,402.26, while the April sales only amounted to $32,072.25.

Buckeye Co-ops Celebrate Second Burley Birthday

RIPLEY, Ohio, May 5.—Brown County tobacco growers, with many of their brethren from Mason and Bracken counties in Kentucky and some from Adams and Clermont counties in Ohio, celebrated the second successful year of the co-operative marketing of Burley tobacco at Ripley, Ohio, Thursday. Twelve hundred tobacco growers and their wives heard addresses by Director of Warehouses Ralph M. Barker, Miss Verna Elsinger, director of social service, and J. Sherman Porter, editor of the *Burley Tobacco Grower*, on the progress of the Burley Tobacco Growers' Co-operative Association pool and plans for the future. The Georgetown School band rendered music for the meeting, which was held in the receiving plant of the Burley Co-operative at Ripley.

Mr. Barker, referring to reports of bed-scraping in Kentucky, declared that nothing could be more harmful to the association at this time than violence, and advised the pool growers to adopt the policy in force in some Kentucky counties of "letting 'em alone," that is, of having nothing to do with non-members. He read the prices at which the 1922 crop has been sold so far and stated the amount received and the amount sold up to the present time.

Miss Elsinger told of plans for the organization of women's auxiliaries among the growers and of the benefits to the association likely to be derived from the participation of the women. She said that a number of members had already been added as a result of the work of the few women's auxiliaries that have been organized.

Mr. Porter discussed briefly the opportunity for public service presented by co-operative marketing associations generally in a better return to the grower for his product, and especially the increased return to tobacco growers since the organization of the Burley pool.

The growers had a big ball in the receiving plant preceded by another strong address by Mr. Barker.

Director C. C. Ellis presided at the meeting, which was attended also by Director at Large Charles H. Woodmansee, of Felicity. Probably 200 Kentucky tobacco growers also attended the meeting. The arrangements were in charge of a committee composed of James Henry, Lewis Gardner and Director Ellis and the meeting was one of the largest ever held in Ripley.

"The Burley Tobacco Growers' Association," said Barker, "controls nearly nine-tenths of the tobacco produced in the Burley district of five states. So long as it holds that control the price it asks for its tobacco is the world price for Burley tobacco, and for that reason the outside price will remain nearly as high as that paid to our members.

"This association has the protection of the law of the state and will continue to

Indiana Items

INDIANAPOLIS, Ind., May 5.—The Hook Drug Co. recently opened its fourteenth store in this city and featured its tobacco and cigar line with a full page display in all three of the daily newspapers. The drug company is probably the largest single retailer in the city. During the opening day cigars were given away to the men. The new store is located at Washington and Pennsylvania streets, near the heart of the downtown district.

Lady Nic in Dry Goods Store

For the first time in history in Indianapolis there is a department store with a tobacco stand. The Pettis Dry Goods Co. was the first one to take a chance. Officials of the store say the stand pays for itself. It is located right at one of the entrances and at one end of the men's furnishing goods department.

Heads Merchants' Association

Elmer Steffen, head of the A. Steffen Cigar Co., of this city, was elected president of the East Washington Street Merchants' Association recently at the annual election of officers. The Steffen company maintains a retail establishment in addition to a factory.

Max Manner will soon open a cigar factory at 813 East McCarty street.

To Give Quadruple Service

To have the finest store of its kind in Indianapolis was the ambition of Louis G. Deschler when he started to install a new combination cigar, soda, candy and lunch establishment at 40 North Pennsylvania street. And he spared no expense in the effort. The result is a store of simple elegance, equipped with the most modern facilities for supplying public tastes in the matter of the four subjects of his new business. To appreciate just how well-planned the new Deschler store is, one must start at the entrance and make a trip from there to the furthest corner of the basement. Everywhere along that journey the visitor is impressed with the modern manner in which the place has been equipped. Forward is the cigar department, presided over by C. C. Carter, and the pipes and other merchandise attractive to the smoker. Everything about the place is harmonious and calculated to attract the seeker after refreshment. Louis G. Deschler, whose name adorns the front of the store, has been a successful cigar and tobacco dealer in Indianapolis for many years. In this new venture he has applied, on a larger scale, and with a considerably larger investment, the same ideas that have made his other retail establishments successful.

To Help Solve Sales Problem

Dr. Paul W. Ivey, professor of marketing at the University of Nebraska, is to be in Indianapolis Thursday, May 10, to meet with local retail business men and their sales forces to advise them and help them solve their problems. In this work he represents Herbert Hoover, secretary of commerce, who is directing a nation-wide campaign to take advantage of gains made by the retail business of the country since the post-war slump, by reducing costs and increasing the selling capacity of retail sales forces without creating an additional drain on the public's resources, but with the idea of giving improved service and setting new standards for merchandising. His appearance here will be under the auspices of the retail bureau of the Indianapolis Chamber of Commerce. At noon he will address the managers of the downtown retail stores on costs and other problems that confront the retail merchant, solution of which is held to be vital to the future sound economic status of the retail business. In the evening he will address a general meeting of the retail sales persons on "How to Increase Selling Capability."

In Good Demand

Officials of the McInerny-Warner Co., of South Bend, Ind., report a good demand for El Productos, both in the Corona at fifteen cents straight and the Puritano Finos at thirteen cents or two for a quarter. The company has been pushing El Productos during the past few weeks.

Dissolution Notice

The Regan & Wrennick Cigar Co., of Richmond, Ind., has filed a preliminary certificate of dissolution with the secretary of state.

Schulte's New Honor

The house of D. A. Schulte, Inc., has been elected to membership in the British Empire Chamber of Commerce in the United States of America, and will be represented by Vice-President Arthur S. Meyer at its proceedings.

Inspects Shade Grown

Louis Leopold, vice-president of the American Sumatra Tobacco Co., left for Hartford last Monday and will spend several days in Connecticut reviewing the shade grown situation.

Connecticut Tobacco Plants Making Slow Growth

The "Weather" Which Seems to Be Chronic, Not Giving Much Aid Toward the Development of Seedlings—Delegates to Attend the T. M. A. and the N. C. L. T. A. Conventions.

HARTFORD, May 5.—Cold weather has not been conductive to the fast growing of seedlings in the beds; very little growth has been noted during the past week.

Notwithstanding the heavy rains of last week there is still some tobacco hanging on the poles, but the blame cannot be laid at the door of the weather man. Stray crops are now being assorted and going into the warehouses to be packed.

Much of the broadleaf which was assorted early in the winter has now come out of the sweat rooms and is ready for sampling. That which has been sampled is coming out well and is very satisfactory.

There were many crops found to be very poor and were sold in the bundle to ready buyers. The hail cut crops also found a ready market and were also sold in the bundle. One crop of Havana seed grown in Massachusetts was an exceptionally good crop. It weighed 24,781 pounds, from 15 acres, and graded as follows: Light wrappers, 20 inch and up, 3,235 pounds; medium wrappers, 22 inch and up, 4,162 pounds; dark wrappers, 20 inch and up, 9,237 pounds; seconds, 16 inch and up, 183 pounds; seconds, 18 inch and up, 5,658 pounds; broken, 914 pounds; fillers, 1,248 pounds; loose leaves, 144 pounds.

An exceptionally good crop of broadleaf in South Windsor shows from 9 acres a weight of 13,552 pounds, which grades as follows: Light wrappers, 2,232 pounds; medium wrappers, 1,828 pounds; long seconds, 2,609 pounds; short seconds, 4,170 pounds; No. 2 seconds, 928 pounds; dark wrappers, 1,986 pounds; No. 2 dark wrappers, 1,208 pounds; broken, 44 pounds; broken, 518 pounds, and fillers, 1,029 pounds.

This shows that the good growers are going to get a good cash return for their crops, while the careless and indifferent growers will get his pay for his crop on the basis of what the crop is. Heretofore, the growers thought tobacco was tobacco, and that the market price to all should be practically alike.

But new grading clearly demonstrates that the tobacco growers must wake up and give more careful attention to growing better tobacco if they want to get more money for their products.

Many members are much inclined to criticize the work of the officers rather severely, but there is no possible doubt but that the officers are using their best judgment in the way that they are handling the crop, so that it will net to the growers the very best prices possible. These men have had a wide range of experience with sweat tobacco and are familiar with the requirements of the trade. They are trying to meet these requirements in the putting up of crops.

Many of the growers are experts in growing, but have not had much experience in the handling of the tobacco after it went into cases, and this is one of the vital things in preparing a crop for the final market.

Meetings are now being held each week in the various districts to get the members to act definitely on the hail insurance proposition on the 1923 crop, which will be started now within the next few weeks. The proposition is made by a large insurance company to write hail insurance at a much lower rate than heretofore, with the provision that a large percentage of the members come in on the plan.

Timothy Miskill, one of Suffield's leading dairymen and tobacco growers, died at his home Friday night after a short illness. He was 84 years old and had lived in Suffield since he was 15 years old. He was born in Ireland and came to this country when a young boy. He had one of the largest cattle and tobacco farms in Suffield.

In Windsor, Conn., tobacco growers are having trouble to get help. As they require large numbers of men they apply to employment agencies in the city. In many instances the money is advanced for transportation and when the men get here they leave the job without any explanations. One grower had two fellows before the local court in Windsor for leaving and evading transportation charges. One was released, but the other fellow was made to make restitution for expenses incurred and to pay the cost of the court.

M. L. Floyd, of the Fred B. Griffin tobacco plantation at East Windsor Hill, is now planning to set out on the 21st inst., and will probably be the first to start setting the 1923 crop in this section. He is to raise 225 acres and has gotten the land all ready, which, aided by the recent rains, is in fine condition for the start off.

Association Holds Election

The Connecticut Leaf Tobacco Association recently elected the following officers: President, Benjamin L. Haas; Vice-President, Maurice Hartman; Secretary and Treasurer, G. W. Stewart.

Edward Winfree

RICHMOND, Va., May 4.—At a meeting especially called by the Richmond Tobacco Board of Trade, resolution being offered a committee was appointed to formulate appropriate resolutions and the following were adopted:

Whereas, death has again entered into the ranks of the membership of the Tobacco Board of Trade, and we are called upon to mourn the loss of the Secretary-Treasurer of our Board, Edward Winfree, and,

Whereas, Mr. Winfree, in his long experience in the various branches of the tobacco business, has always in every capacity measured up to his duties in the most conscientious and faithful manner, ever illustrating those qualities of innate honesty and frankness of purpose and absolute dependability that called from his friends and associates in business the feeling that they always knew where he stood. His crowning labor being that of Inspector of the Richmond Tobacco Trade, and he so well administered this office as to put the seal of his inspection on the highest plane of business rectitude and gave it a standing that reflected in a marked degree to the benefit of the business interests of the Richmond Tobacco Trade. Therefore, Be it

RESOLVED: 1. In the death of Edward Winfree, the trade has lost an officer and associate whose departure from our midst is most deeply deplored, and that we desire to record the high esteem in which he was held by the whole membership of the Richmond Tobacco Trade.

2. That a copy of these resolutions be sent to his family and be spread upon the minutes of the books of the Richmond Tobacco Trade and copies be sent for publication to the tobacco trade journals.

Tobacco Growers Elect Directors

RALEIGH, N. C., May 7.—Election returns reaching Raleigh headquarters of the Tobacco Growers' Co-operative Association from a majority of the counties of the Carolinas and Virginia, indicate that the election of delegates which took place May 5, was most successfully carried out. One delegate for each million pounds of tobacco, signed up in contracts of the Tobacco Growers' Co-operative Association, has now been elected to represent its membership, which extends to 127 counties of the three states, and includes 89,000 farmers.

The delegates elected by the organized tobacco growers last Saturday will meet at 22 district meetings May 12, to name the 22 directors of America's largest co-operative marketing association for the coming year.

The annual meeting of the stockholders and directors of the association will take place Tuesday, May 15, in Raleigh, at which time the present board of directors will hold their last meeting. The new board will meet on June 5 for the first time.

Membership Growing

A steady increase of membership has taken place since the decision by the Supreme Court of North Carolina, which upheld the contract of the tobacco marketing association. Over 450 new members joined the tobacco association in April, and since the Supreme Court decision last month the association has averaged well over a hundred new contracts a week. Many contracts were signed last week throughout the Old Belt of North Carolina and Virginia immediately following the payment of close to $2,000,000 to co-operative members who had delivered tobacco to the association since January 1.

With its rapidly growing membership, the Tobacco Growers' Co-operative Association has increased its local organizations of member-growers in 91 counties of three states to over sixteen hundred. These local associations are assisting headquarters to keep in contact with the entire membership. They are also aiding with information as to the size of the 1923 crop, and have assisted in the collection of over $60,000 in damages from contract breakers. Letters with news of the association are mailed each week from Raleigh headquarters to every local of the association in the Carolinas and Virginia.—S. D. FRISSELL.

Small Sales at Richmond

RICHMOND, Va., May 5.—The sales were again very small this week, consisting of odds and ends that were in condition to be brought to market. A good "season" is needed to get the balance of the crop in condition to be brought in and sold, as there is very little in the country. Total sales for week only 14,170 pounds, sold at $9.12 average.—R. O. MORTON & Co.

"Knocks" Dark Tobacco Growers' Association

SPRINGFIELD, Tenn., May 5.—According to the old adage, "Comparisons are odious," but the *Times* of this city appears to revel in them, especially if it can "knock" the Dark Tobacco Growers Co-operative Association of Kentucky and Tennessee, by making comparisons. In a recent issue, under the caption: "Robertson Farmers Pay Bonus to Western Kentucky," the *Times* said:

The Comparison

"The Sapiro Association in Robertson County will get about one-third of the 1922 crop, according to early estimates, and those who sold their tobacco over the loose floors are in a much better condition than those who poured their crops in the receiving station hoppers. And those who are still in the pool are beginning to grumble about the money end of the Sapiro game. The first advance was much smaller than had been promised, and our farmers are sore over the fact that the second payment goes out to Kentucky farmers before we get our second installment. There is also a lot of ill feeling over the fact that the Western Kentucky tobacco is graded the same as Robertson County weed.

Big Difference

"Now every one knows that there is a big difference between the tobacco grown here and any other in the world. Our tobacco has a peculiar flavor and quality that cannot be found elsewhere. It fills a special demand on the market. It is a fact undisputed by Mr. O. S. Dowen that our tobacco is worth $4.00 a hundred more than the same grades in Western Kentucky. In other words, every time a hundred pounds of Robertson County tobacco is sold, four dollars comes off the advance we get, and is kicked on the advance of the Western Kentucky poolers. Sapiro said we would have a separate pool here, but until he makes that promise good, it is a dead level cinch that our farmers are helping pay the grocers of Kentucky farmers. If that is co-operation, it is terribly one-sided.

They Are Pleased

"Of course, the tobacco growers in the western district are highly pleased with Sapiro's scheme. Out of that four dollars they can give salaries to numerous officials and still make more than ever before. It is a fact that those people down there grow tobacco only when the price of cotton is low. They are primarily cotton raisers, but in the future they will no doubt go in for tobacco. At present they plow the tobacco patch only once while it is growing, use Paris green to get rid of the worms, pull the suckers when they are about one foot long, and smoke it in the barn for a couple of days. There is poor quality to their tobacco, as they care for nothing but weight. They get the same price as our farmers, who pay high taxes on land that is worth five times as much as theirs. The Kentucky farmers in the western district do little or no work on their growing crop, while it is practically a year around job with us. Yet they get just as much money.

More Unfairness

"Nor is that all. The president of the association is a Paducah man, and he is bound to be popular with those farmers whom he has helped so wonderfully. He could be elected to any office that Bob Bingham should happen to want to control. This Bradshaw controls the Paducah bank that handles all our money. Messrs. Jim Brown, Henry Stratton, Charles Bell and Edgar Powell can tell us that they lent money to the pool that that was sent direct to Paducah. Our farmers are paid one-third, the western farmers get one-third, and no one knows what happens to the other third unless it is put out at interest, a matter that is not covered in the contract. In addition to this, President Bradshaw gets an immense fee from the insurance on all this pool tobacco. It all certainly fits in with Bingham's scheme for gaining political power.

Local Unrest

"This is only one phase of the Sapiro proposition that is on the mind of Tennessee farmers. In addition to the broken promises, loss of weight, small advances, objectionable officials, and a campaign of misrepresentation, the farmers realize that what they do deliver is tolled $4.00 a hundred that they will never see.

"And yet it is such a thing as this that Judge Peck aids and abets when he forces our farmers to pour their high quality tobacco into the hopper. The suit has not yet been filed, and when it is, let no man say that it was done in ignorance of the above convincing facts."

Fears Injury to Springfield Market

A writer, who signs himself "A Reader," in the Springfield *Herald-News*, says:

"On all sides we hear the association being discussed, and most of the talking is being done by its enemies. This talk is not only injurious to the association, but business in general has suffered through the condition such talk has created.

"I have visited every receiving station in the Springfield district, and I find that there is more kicking and complaining around Springfield than in all other sections of the county combined. This would indicate that the opposition is centering its fight in Springfield.

"A certain newspaper is largely responsible for the distrust among our people, and such tactics will work serious injury to the Springfield tobacco market. Other tobacco sections are glad to see Springfield suffer, and they realize that sooner or later a fight such as has been made on the association will greatly hamper the Springfield market.

"We all realize that tobacco growers must have a better plan of marketing their crop than the old barn buying and loose floor method. This association

seems to be the solution and farmers should maintain it.

"All of us know that certain features of the association need correcting, and at the proper time I am sure such changes as are needed will be made. In the meantime all knocking should be stopped.

"I am sure the association has been instrumental in holding up the price of tobacco; it has helped both the man inside and the man outside the association. I heard one tobacco buyer say it had helped prices 5 to 6 cents per pound, and I am certain it has done fully that much.

"Every grower of tobacco should help to perfect the organization, because it means financial independence. Quit your knocking and help us to better conditions."

Dark Co-op Growers to Get Second Payment

HOPKINSVILLE, Ky., May 3.—Plans for delivering to the 10,000 members of the Dark Tobacco Growers' Co-operative Association in the One Sucker District their checks for the second distribution of money on their crops delivered to the association, are rapidly being matured at headquarters here and will be announced as soon as approved by the executive board which meets next Monday. This will be the first district of the Black Patch to receive a second payment on their crop, and naturally it is being awaited with keen interest.

The distribution will be made on Tuesday, May 15, and every grower in that district who sold his tobacco through the association, will receive a check in proportion to the amount of tobacco he had. Approximately $1,000,000 will be paid the growers in this distribution, which will be an average of about $100 to each member in that section.

At present a large force of stenographers is hard at work making out the checks. Each one has to be signed separately. Rapid progress is being made on this, however, and the checks will all be ready in ample time to be turned over to the growers on May 15.

Payments to the association members on the cash advances made on delivery of their crops, which approximates 40 per cent of the grade price, now considerably exceeds $8,000,000. These advances are now running smaller than they have been, due to the lighter deliveries of tobacco that are coming to the receiving house. Every effort is now being made to hasten deliveries of the crops still in the growers' hands, so that the receiving stations may be closed by the end of the present month. This will not only eliminate the cost of operating these receiving stations, but will also hasten the making of a second distribution to the members in Dark Fired, Green River and Stemming Districts.

Substantial Enthusiasm

At Tompkinsville, Ky., this week the association members gave a splendid example of enthusiasm and confidence in the organization when they subscribed for $24,000 worth of the bonds, preferred stock of the Dark Tobacco Growers' Co-operative Association, in ten minutes' time with which to enlarge the receiving warehouse at Tompkinsville. There was a big crowd of association members present, and the proposition to build a warehouse outright, designed especially for handling tobacco under the association plan, went over with a whoop. This will give the growers of that section, which is in the One Sucker District, a much more convenient delivery point and a house that is thoroughly adequate and equipped with everything necessary.

Assurances have been given that the association securities will also be taken at Smith's Grove and Auburn, where receiving houses also will be enlarged.

All three of these points had receiving stations this year but these were inadequate and the floating of the additional stock is to enlarge these warehouses and outfit them completely.—PRESS SERVICE INFORMATION BUREAU.

Studying Hartford Market

Leopold Holzman, of Strouse & Holzman, left the city early this week for Hartford to study the local market.

"The Ardath Tobacco Co., Ltd., Worship street, London, E. C. 2, Sole Manufacturers and Proprietors of State Express Cigarettes, have pleasure in announcing that Leslie D. Worthington, of Kinston, N. C., has entered the service of the Company as Manager of the Leaf Tobacco Section. American Branch."

Dark Tobacco Growers Co-op Activities

HOPKINSVILLE, Ky., May 7.—Every possible effort is now being made by officials of the Dark Tobacco Growers' Co-operative Association to get the remnant of the crop still in the growers' hands delivered as speedily as possible so the receiving houses may be closed. There is still a considerable quantity of tobacco outstanding, possibly as much as 20,000,000 pounds. And if allowed to follow their own inclinations the growers are sure to dribble it along for weeks. This would not only handicap the association in its operations, but would also add heavily to the operating expenses of the association, for the cost of keeping the receiving houses open is considerable.

Director of Warehouses Cooper has announced that 19 receiving stations will be closed definitely on May 15 to 17, and that if possible all the others will be closed by May 31. The houses to be closed the middle of the present month are, in Kentucky: Lewisburg, Allensville, Pembroke, Greenville, Kuttawa, Gilbertsville, Hardin, Kevil, and Water Valley. In Tennessee: Puryear, Cross Plains, Greenbrier, Cedar Hill, Sadlers, Tullahoma, Portland, Dickson, Ashland City, and Pleasant View.

The closing of these houses does not mean that the growers of those vicinities will not have a place to deliver, provided they have not already completed delivery of their crops. Sufficient houses will be left open for several days longer throughout the district to enable any grower to reach them without an unnecessarily hard and long drive. But if any grower permits his local house to close on him, he will have to drive a few miles further in order to deliver his tobacco.

The May meeting of the board of directors will be held tomorrow (May 8) at Springfield, Tenn. This is in pursuance of the decision reached some time ago that the directors' meetings should be held at a number of the important towns throughout the Black Patch so that the directors might have an opportunity of getting first-hand information and learning conditions as they exist and for themselves. The first of these meetings was held in April in Owensboro and it proved very successful, and no less is expected of those yet to come.

At Springfield the meeting will not only be attended by the 25 directors, but also by a number of the officials and heads of departments. Robertson County has been the scene of possibly more antagonism to the association, and the most bitter war against it, of any other part of the district, and this will probably be given much consideration by the directors. However, conditions there have improved very materially and the association is in a very strong and commanding position in that county.

J. Lock Humphries, who was elected as assistant manager some time ago and first was stationed in the Hopkinsville district, has been assigned to the Western District and has taken charge. He succeeds Mr. Wright, of Mayfield, whose connection terminated a few weeks ago.

The Western District is comprised of all the counties west of the Tennessee River and several counties in Tennessee, and produces a large amount of tobacco. Mr. Humphries has his headquarters at Mayfield.

The second distribution of money to the growers in the One Sucker district will be made May 15. This is the first of the second distributions, and while it only affects the One Sucker district directly, it is a matter of much interest to all the dark tobacco districts, for each district will receive a similar distribution in due time. The thing now chiefly responsible for holding the distributions back is the incompleted delivery of the crop, and that is one of the strongest things being brought to bear upon the growers to get them to finish bringing in their crops.

There are 10,000 members of the association in the One Sucker district, and each man will receive an amount in proportion to the amount of tobacco he delivered. The total amount paid out in this distribution to the members in that district will be approximately $1,000,000, which makes an average of $100 per member. But the amounts will vary from a very few dollars up to several hundred.

For days a large force of stenographers

More Burley Suits

LEXINGTON, Ky., May 4.—Suits against six more alleged contract breakers were filed today by the Burley Tobacco Growers' Co-operative Association. Omer Hampton, of Fayette County, is sued for selling 11,000 pounds over auction floors, damages being asked in the sum of $550 and expenses and fees of $300 besides.

Others sued were Clyde Ewalt, of Harrison County, $200 damages and $100 fees and expense; M. C. Carter, Pete Craig and L. G. Abbott, of Trimble County, $100 damages and $100 fees each; Lee Hughes, of Trimble County, $130 damages and $100 fees.

Suits are being prepared against every grower who has broken his contract as fast as the evidence can be prepared for presentation, it was said at the offices of the legal department.

Hopkinsville Average, $13.97

Hopkinsville, Ky., May 5.—Total sales for the week, 224,665 pounds; average price per 100 pounds, $13.97. Sold to date of 1922 crop, 13,640,765 pounds; average price per 100 pounds, $14.58. Sold to same time last year, 19,521,960 pounds; average price per 100 pounds, $14.68.—J. W. Hancock, President, Hopkinsville, Tobacco Board of Trade.

Mayfield Season Sales

Mayfield, Ky., May 5.—The buying interest at this point has received of the 1922 crop 8,965,835 pounds from the independent market, with independent outstanding contracts of 111,655 pounds; and from the association 5,009,295 pounds, making total sales at this market to date 14,086,785 pounds.

We are unable to ascertain the receipts of the association, but would estimate they have received to date about 7,700,000 pounds.

During the past week deliveries have been large, especially to the association, and will probably continue large for the next ten days, after which time there will be no more rushes. At the independent market there is very little interest, as practically the entire offerings are of a low nondescript grade, which grades were passed up by buyers riding in the country.

Auction sales since our last report are as follows:

	No. of Loads	Leaf Avrg.	Gen. Avrg.	Year Ago.
Reported	4,074	....	....	....
April 23 and 24	7	$11.50	$9.50	$8.28
April 25 and 26	11	12.25	10.65	9.49
April 27 and 30	23	11.60	9.70	8.58
May 1 and 3	10	12.32	10.25	8.07
	4,125			

Hopkinsville average for the week, $13.97 on 224,665 pounds, against an average for the season of $14.58 on 13,640,765 pounds.—Wright, Smith & Co.

Paducah Prospects

Paducah, Ky., May 5.—Weather conditions have been favorable during the week for the movement of loose tobacco, and there have been steady deliveries to the Dark Tobacco Growers' Co-operative Association throughout the week. They have been kept busy with grading, delivering on contract and bulking their stock and seem to have the situation well in hand and are disposing of the stock about as fast as it is coming in. The condition of the tobacco is first class and the classification seems to be good,

hough the quality of this week's re-ipts shows some deterioration on ac-unt of having hung in the barn so ng.

The association has begun prizing at actically all of their storage points and king room for the remainder of their cks. Just how much is to be received hard to tell, but no doubt that some-ing over 25 per cent of their holdings still in the hands of the producers. I e a report from headquarters at Hop-nsville that they will begin closing me of the smaller receiving stations the 15th to 17 of this month, and will dertake to close all stations by the 1st June, which means that they expect to ve their tobacco all in by that time. his will mean heavy deliveries through-t the present month.

Farmers Making Good Progress

The weather during last week and up the middle of the present week has en favorable for doing farm work and rmers have made good progress in eparing and planting their corn and her crops, and are also working on ir tobacco ground and no doubt will ve everything ready when plants are ady. No doubt a little tobacco will be nted by the 15th, but the greater part the crop will be planted later on ac-unt of plants being late, which was used by the continued cold weather this pring, but now they are growing rap-y and with a continuation of favorable ather conditions the crop should be nted by June 1, which is in good time. is to be hoped that farmers will make great effort to make better tobacco d indications are that this will be done. he difference in values between good d common grades will widen and the nter making the common and low ades cannot hope for remunerative ices.—W. B. KENNEDY.

Hopkinsville Sales Lower

HOPKINSVILLE, Ky., May 6.—Tobacco ceipts on this market continued to ndle the past week, the loose floors porting a total of 224,665 pounds and e Dark Tobacco Growers Co-operative ssociation 450,000 pounds. The end the season on the 1922 crop is rapidly aring, and the loose floors are looking rward to the close for the Summer, ile the association is trying to get the bacco in so the receiving houses roughout the district may be closed ne 1.

According to grade, prices for the week nged: Trash, $3 to $5. Lugs, com-on, $5 to 7; medium, $7 to $9; good, $9 to $12; fine, $12 to $16. Leaf, low, $10 to $12; common, $12 to 20; medium, $20 to $30; good, $30 to $32. No fine leaf offered.

Continued rains for the past week have put an almost complete stop to cultivation of ground in many sections. Tobacco plants have grown rapidly, however, and prospects now are that they will be ready for transplanting before the ground is ready to receive them.—M. E. BACON.

Clarksville Average, $13.26

CLARKSVILLE, Tenn., May 5.—Tobacco sales on the Clarksville Loose Leaf Market this week amounted to 129,830 pounds. Sales for the season, 8,392,375 pounds. Sales to same date last season, 11,805,290 pounds. Average price this week, $13.26. Average for this season, $14.60. Average to same period last season, $16.04.—J. F. SMITH, Supervisor of Sales.

Owensboro Outlook

OWENSBORO, Ky., May 5.—J. S. Phelon, leaf tobacco broker, reports:

"While sales are practically over the independent floors as well as the Co-operative Association are receiving an occasional load of tobacco and conditions continue about as outlined during the past several weeks.

"The weather has not been altogether favorable to growing plants and it seems now that our tobacco crop will be planted somewhat later than usual."

Burley Pool Wins Court Case

LEXINGTON, Ky., May 5.—Judge Richard C. Stoll, of the Fayette Circuit Court, today overruled the demurrer of William Crawley to the petition of the Burley Tobacco Growers' Association, which sued him for damages for selling his crop outside the association. The court held that the Bingham Co-operative Marketing Act is valid and constitutional and not contrary to the law of Kentucky against monopolies or combinations in restraint of trade.

Judge Stoll pointed out that anti-trust laws of Kentucky have been repealed and said that the Bingham act changed the common law of Kentucky. He sustained the demurrer of the Burley Association to the second paragraph of the defendant's answer, in which a defense was attempted to be set up that the Burley Co-operative is a North Carolina corporation and not a Kentucky corporation.

The case will be heard before a jury later, as to the issues of fact involved, how much tobacco, if any, Crawley sold in violation of his contract with the association, and the amount of money to which the co-operative is entitled, if any, as damages.

Dark Tobacco Co-op Doings

HOPKINSVILLE, Ky., May 5.—Two unusually high averages for Dark Tobacco were reported at headquarters office today. W. E. Cansler of Christian County, Member of the Dark Tobacco Growers Co-operative Association, delivered 2,050 pounds which he raised on a one and one-third acre plot. It was graded for a total value of $632.63, or an average of $30.86 per hundred. Mr. Cansler said he was thoroughly convinced that quality tobacco grown on a small plot was more valuable than three times the amount of low grade weed.

J. Lewis Turner, a farmer of the Cerulean Springs section, Trigg County, delivered 6,485 pounds to the Receiving Station at Cadiz. His grade prices gave him an average of $25.52 per hundred. In speaking of the crop Mr. Turner said:

"I had 13,875 hills and only seventeen hills were missing when I cut it. It is quality production that pays."

The Association yesterday was granted

A NEW ERA

for

Porto Rican Tobacco

The day of prosperity for the Porto Rican Tobacco Industry has arrived.

The Phenomenal success of many of the advertised brands of "mild Havana Cigars" is largely due to the use of Porto Rican Tobacco either exclusively or blended with other Tobacco as a filler.

In the past it was not always possible to tell whether the Tobacco sold as Porto Rican was all grown on that Island or mixed with a Foreign Tobacco, but now

The Government Guarantees

the source of all Tobacco—either in the leaf, scraps, or in cigars—shipped from Porto Rico.

This is done by means of Stamps affixed to every barrel or bale of Tobacco and on all boxes of cigars or "little cigars."

The White Guarantee Stamp

on shipments of Tobacco guarantees that it is of pure Porto Rican growth; on boxes of cigars that the contents were manufactured from Tobacco grown on that Island.

ntended Acreage Increase

WASHINGTON, D. C., May 5.—The inations are that the tobacco acreage will 110.0 per cent of 1922, 108.9 per cent of 8-1922, and 155.1 per cent of 1909-3. The intended increase of 10 per t over 1922 is the result of proposed erial increases in practically all States, ntucky and Tennessee showing an inase of 14 per cent each, Virginia 2 per t, North Carolina, 6 per cent, South olina 20 per cent, New England 17 cent, Ohio 15 per cent, Wisconsin 12 cent, and Pennsylvania 8 per cent.

Gets Grand Rapids Lease

RAND RAPIDS, Mich., May 5.—Van Bosch & McVoy have leased to the ted Cigar Stores Co. for a period of ears with privilege of cancellation at end of five years, the ground floor of building at Monroe and Ottawa ave, formerly occupied by the Ellis . After remodeling, the quarters be occupied early in June, by a cigar e, the building thus returning to a of several years ago.

ccording to Mr. Vanden Bosch s for space in the building will be e on a five-year basis to allow for tion of a new building at the expiraof that period.

The Porto Rican Crop Estimate

SAN JUAN, P. R., April 30.—I beg to refer to the copy of your weekly TOBACCO review dated April 12, 1923, No. 24. I read under the heading "Porto Rican Prospects," that it is estimated that Porto Rican tobacco production of the actual crop will be upwards of 37,500,000 pounds. Everybody here in Porto Rico is much surprised about this figure.

According to the general opinion here in Porto Rico, not only of the farmers, but also of many leaf tobacco buyers, it is estimated that the actual Porto Rican tobacco crop will not be over 25,000,000 pounds, which, of course, is much less than your figures in above named article.

There is no doubt that there would have been a very much larger crop this year, but on account of the very heavy rains during December last and afterwards the heavy drought, the yield per acre has been reduced considerably and everybody knows today that the crop will be approximately 25,000,000 pounds.

I would recommend you to publish in your next number this new figure, so that the manufacturers will know the revised estimate of the actual Porto Rican leaf tobacco crop.—F.

Baltimore Market

BALTIMORE, Md., May 3.—Gieske & Niemann, leaf tobacco merchants, make report as follows:

MARYLAND.—Owing to the cool dry weather, receipts for the past week totaled only 57 hogsheads, while sales were 104 hogsheads. Prices held very firm for all grades.

OHIO.—Nothing to report.

Association Data

The Leaf Tobacco Association of Baltimore City issues these statistical for the week ending May 2:

Receipts, Including Reinspections

	This Week	Previously	Total	Net to Date	Same 1922
Maryland	142	2,369	2,511	1,925	1,566

Dasco Developments

The Dasco Import Co., Inc., has removed to larger and more convenient quarters on the fifth floor of the Schulte Building, 386 Broadway, New York, and are now in a better position than ever to execute their orders. Additional machinery has been installed at the Brooklyn manufacturing plant which has increased production fifty per cent.

Pennsylvania Tobacco Market Again Shows Life

About 2,000 Cases of 1922 Seedleaf Sold Last Week—Four Packers Had Share in the Sales—Price Thought to Be Around 30c—Prospects for New Crop More Encouraging

LANCASTER, Pa., May 7.—Almost startling and wholly gratifying comes the news that the long period of inactivity in the Lancaster market has been broken, and that during the past week four independent packers have disposed of their entire 1922 holdings. The small country packing industry, which depends upon the large manufacturing interests as a market for its wares, is the field that has been invaded by the buyers who contracted for about 2,000 cases last week.

Dispose of Seed-Leaf

The four packers who have disposed of their 1922 seedleaf are all in the northern section of the county, and in a district which produced some of the best tobacco that was grown in Lancaster County last year. This seedleaf was held at from 20 to 22 cents by the growers, and the majority got their price for it when they sold to the early buyers, many of whom bought from the shed, and in a few instances from the field. While the price realized by the independents in their sales last week is not definitely known, it is rumored that it hovers in the vicinity of 30 cents.

Four Fracture Congealed Moisture

Two New Holland packers, one in Terre Hill and the fourth in Intercourse, make up the quartette who have broken the ice and started the crop moving. And move it will! Within the next week or ten days, it is entirely safe to predict, there will be a general movement of buyers toward the Lancaster market with corresponding changes in local conditions. This premise has as its foundation the same underlying fact that brought about so many varying conditions in the tobacco world this year—the scarcity of seedleaf and the lack of an appreciable surplus. The identity of the concern which made the first inroads on the 1922 packing of Lancaster seedleaf is more or less shrouded in mystery, but Dame Rumor has it pretty well established that the corporation in question is the General Cigar Co. Supposing that this is true, it is not logical to assume that the other large manufacturers, all of whom are in need of their share of last year's tobacco, will stand idly by and let one of their number gather in all of the desirable packings. All of the small rural packers have some very choice goods in their warehouses, the total of which will not, according to indications at the present time, supply the demand later in the season.

Early General Activity Anticipated

Following this line of reasoning to an end, it may be clearly seen that a prediction of early general activity among the large buyers is not as highly problematical as it appears. In the face of the protracted period of sluggishness which has gripped the Lancaster market, a prospect of brisk buying will not be unwelcome.

Consider Plans for N. C. L. Conven tion

The regular quarterly meeting of th Lancaster Leaf Tobacco Board of Trad was held in the Hotel Brunswick o Saturday night, May 5, with 44 membe in attendance. The principal feature o business which was transacted was th formulation of preliminary plans for th National Cigar Leaf Tobacco Associa tion convention which will be held New York on June 4 and 5. Animate discussion of the coming event and th more than usual enthusiasm displayed i dicates that Lancaster will be represent by one of the largest delegations th has ever been sent to the conventio The delegates will be chosen on May 1

Plant Damage Less Than Suppos

A complete survey in all sections the county last week disclosed the fa that the supposed damage to the 19 crop through unseasonably cold weath was pretty largely "scare," and that t tardiness of the seedlings in appeari above the ground had led many growe to think that their seed had been froz or had rotted. Only here and there m a grower be found who has had his be frozen, and a surplus of plants will ta care of any who have suffered in t way. The cold weather, however, h exercised a detrimental influence on t young plants, and a large percentage the beds show under-developed sta and stunted growth. More than a we of warm weather has greatly haste the delinquent tobacco season to a po where growers are busy getting the la plowed and harrowed for the oncom crop. Transplanting will be about th weeks behind schedule this year, a every effort is being exerted to push seedlings to the limit so as to appro a normal growth fairly early in the s son.

Guarding Against Wildfire

A ceaseless campaign for the erad tion of wildfire and other tobacco d eases from the crop has been waged the Lancaster County Farm Bureau is now bearing fruit. A large majo of growers have already applied the f application of Bordeaux mixture to th beds, and preparations are in progress continue the spraying until transplant All of the recommendations for prec tion against the spread of the disease being carried out generally, and the c look for an exceptionally good, dise free crop of Lancaster-grown seedlea 1923, is very promising.—KEYSTONE.

York County Activities

York, Pa., May 7.—The depression reported in the cigar manufacturing business in a review given out at the York labor temple last month on the industrial situation in this city and vicinity is not reflected in the collections during the month of April at the York office of internal revenue from the sale of cigar stamps.

G. Frank Lindemuth, collector for the York-Adams division of the First U. S. Revenue District, says that while a number of the smaller factories have suspended operation temporarily, the situation is far better than usual at this season of the year. It is the custom for manufacturers who suspend business to file a "closing down" inventory at the office of the Internal Revenue Collector. The number who have done so this year is not any larger than that of preceding years, indicating that the industry in York county is holding out, despite the dropping off in business elsewhere. After the summer months, the owners of these smaller factories will renew their bonds with the government and reopen their factories for the Christmas trade.

April Stamps Sales Only Once Exceeded

The cigar stamp sales during the month of April surpassed the sales of the same month of any past year with the exception of 1920 when the industry was at its peak. The sales the past month amounted to $191,576.15. The sales during April, 1922, amounted to $157,635.35. The receipts from this source during March, this year, were $200,346.74.

The tobacco stamp sales for April amounted to $9,070.92, and surpass those of the same month a year ago, which totaled $8,992.53. March receipts were slightly better than last month and amounted to $9,091.17.

Six New Factories

Six new factories were opened during the month past and bonds filed in the York Internal Revenue Office. They were: T. I. Roth Cigar Co., McSherrystown; Charles F. Deitrick, Daniel Spangler and Walter C. Kellenberger, all of Red Lion, and Harry E. Koons and Sterling Rawhouser, both of Red Lion.

The Meade Tobacco Co. of Red Lion on April 30 at Muddy Creek Forks, York county, received from the farmers of that section of the county, six carloads of tobacco for shipment to its warehouses in Red Lion. Approximately 187,000 pounds were delivered.

An Active Veteran

Al Risser, of Maytown, Lancaster county, 71 years old, who operates cigar factories in that place and in York county, is said to be the oldest active man in his line in this section of Pennsylvania. His health is good and he can move about with the same agility of 30 years ago. He drives one of the first automobiles that came to his section of the state. He is a director of the Maytown National bank and one of its organizers.

The first meeting of creditors of Edward B. Stoner, the Hallam tobacco manufacturer, who disappeared from his home, December 18 last, and recently filed a voluntary petition in bankruptcy at Los Angeles, Cal., will be held May 29 in the office of Referee in Bankruptcy, William H. Kurtz, in the Security building, this city.

G. Harry Eimebrink, of Mt. Airy, Pa., production manager of the Eisenlohr & Brothers cigar factories, and Mrs. Eimebrink, were recent visitors in this city, their former home.

H. C. Esaley, cigar maker, 323 High street, Hanover, has purchased the tobacco and variety store of Harry Wrentzel at 113 Broadway in that town, taking possession on May 1. Mr. Esaley will conduct a wholesale and retail business in cigars and tobacco and will handle a sideline of candies. Mr. Wrentzel will move in about four or five weeks to Columbus, O. Mr. Wrentzel was Hanover's oldest merchant. He is nearly 89 years of age. He is a native of York county and went, in 1852, to Hanover, of which place he has been a resident ever since, with the exception of a few years spent in the West.

D. Frank Kaltreider, proprietor of the Red Lion Cigar Box and Lumber Company, who had spine trouble, has had the weakness adjusted at a Philadelphia hospital and already feels much relief.

E. B. Strickler and E. W. Leib, cigar manufacturers of Yorkana, are on a business trip to Mississippi.

A Good Job

Charles M. Schwab delights in telling the following story of an incident in one of the steel mills under his charge:

"One day while I was passing through the works I looked out a second-story window into the first floor of an adjoining shop and saw a big Irishman sitting on the handles of his wheelbarrow smoking his pipe. I called to him, 'What are you doing down there? Why don't you get to work?'

"To which the Irishman replied, 'Well, tell me, and who are you, sir?'

"I said, 'I'm the general manager.'

"'Well, young man,' said he, 'you've got a demned good job; you'd better take care of it.'"—*Forbes Magazine.*

Match Exports

Washington, D. C., May 9.—There were 165,891 boxes of matches exported in January, according to figures just made public by the Department of Commerce, valued at $74,050. The largest quantity went to Sweden with the second largest to Japan.

Returns from Amsterdam

Arthur Bornholdt, of A. Bornholdt & Co., has returned to New York from Amsterdam, where he has been attending the inscriptions. John A. C. Steur will represent the interests of the firm at the remaining inscriptions.

Established 1887

NEWMANSTOWN, PA.

Philadelphia Threatened By Price-Cutting War

New Outbreak Staged by Three Old Time "Slashers"—To Open Central Headquarters Store—A Dealers "Settlement" Offer Declined—New Company Formed—News Notes.

PHILADELPHIA, May 8.—A new price-cutting move is on—or the old renewed in a new form. Three of the most conspicuous leaders of the former price-cutting "war" which was supposed to have come to an end recently, as a result of an alleged agreement to discontinue the business-demoralizing practices, have come together and formed a triple alliance for offensive and defensive action. These three chief offenders against good business ethics announce that they intend in the near future to open a Central headquarters or "battle front" store, not far from the City Hall, where they are to carry into the very heart of Philadelphia, a price-cutting "campaign," which their spokesmen declare, will be the most sensational, not to say demoralizing, ever attempted.

Decline Settlement Offer

The offer of a thirty per cent compromise settlement made by Francis V. Wood who only a few months ago took over the H. B. Grauley stand at the northwest corner of Sixth and Chestnut streets, a landmark in the neighborhood and whose Orange Flower and State House were leaders for years, has not been accepted by them. This decision was reached at a meeting held in the rooms of the Philadelphia Association of Credit Men and upon the request of Harry J. Gerber, representing Mr. Wood. He made the offer of a 30 per cent settlement, but creditors took the position that they were unable to reconcile statements made by Mr. Wood at the time he secured a line of credit with present conditions, and therefore, that it was inexpedient at this time to sign off their claims on the 30 per cent basis, and meanwhile that the investigating department of the Credit Men's Association headed by C. H. Keelor should make further investigation and report. Representatives were present from the G. H. P. Cigar Co.; Bayuk Bros.; Antonio Roig & Langsdorf; Yahn & McDonnell; the Dusel-Goodloe Co.; Allen R. Cressman's Sons; the Congress Cigar Co., and Frings Bros. Unity of action by the credit men representing these various creditors, was, of course, promoted by the recently revivified association among them as described in these columns.

New Enterprise Launched

A new enterprise which is engrossing the closest attention of the few who thus far have heard of it is the Associated Cigar Manufacturers, whose best known member is George I. Watson, for many years associated with Sig. C. Mayer, and one of the best liked and admittedly best posted men in the manufacturing business. He has associated with him a number of others, although he will be most active in the promotion of the distribution of the new product. While a comprehensive plan of production is under contemplation the firm begins with the taking over of the Smith Cigar Manufacturing Co. of Reading and the Rey Oma title of the Mayer Co. Today headquarters were opened at 1037 Race street, where for the present the higher priced sizes will be made. Purchase of a number of Pennsylvania factories is under consideration.

Invincibles Selling Rapidly

Sam Paley of the Congress Cigar Co., accompanied by Steve Friend, well known in Water street, New York, is resting and golfing at Wernersville, Pa. Willis A. Andruss sales manager of the Congress is on a brief trip to New York. The firm reports a remarkably quick market response to its new packing of Invincibles, two in a foil and retailing for thirty cents. The newly organized baseball team of the Congress Cigar Co., with a record, however, of only two teams played, has at worst split even and if on the last occasion when it went down to defeat its team had been complete, Captain Lewis Bishoff and General Manager Gus Staud believe there would have been another story. Be that as it may they are anxious to get into touch with first-class semi-professional teams, particularly those in the cigar industry and desire communications addressed to their address, care of the Congress Co., Second and Market streets.

Ivanhoe Taking Well

Edward M. Lang, representing E. C. Fulwiler & Brother Co., 927 Sansom street, is now making a trip through the Northern territory taking in Northern Pennsylvania and New York State. The Ivanhoe brand in ten cent size, which the Fulwiler Co. is featuring, is taking very well in Philadelphia and Atlantic City, and will be one of the selling features with Mr. Lang upon his Northern trip.

In all the chain stores placards call attention to patrons to the fact that there is pending in the legislature of Pennsylvania a bill imposing a three per cent tax, additional to the heavy one already existing on various forms of tobacco and that passage necessarily means higher prices. The citizens are advised to get in touch with their legislative representative and to express their views on the subject.

Factory Transferred

Transfer of the property, 306-308 Cherry street, former factory of Sig. C. Mayer Co. to B. G. Davis & Co., was recorded during the week for a consideration not disclosed, subject to a mortgage of $45,000. The property occupied a lot 58 x 91 and consisted of five story brick building and is assessed at $40,000.

Operation of the factory formerly owned by William Murbeur, at Milford Square, Pa., is now in full swing under the new ownership of the General Cigar Co., possession having been taken this month.

A visit to New England was enjoyed by the executives of the G. H. P. Cigar Co., Third and Brown streets, who called on the distributors of El Producto in that territory. Accompanying Benjamin Grabosky were Thomas H. Dean, Western sales manager, H. H. Kynett, advertising manager and general sales manager, F. T. Will. The visitors made the rounds of Boston, Prividence, Lynn and Worcester, and found a very bright outlook for business after a hard winter and the lack of coal which wrought hardship among the manufacturing industries in that territory.

Hemler Replies to Federal Trade Commission

WASHINGTON, D. C., May 5.—G. F. Hemler, cigar manufacturer of McSherrystown, Pa., has filed an answer with the Federal Trade Commission in connection with its complaint in Docket 1,001. Mr. Hemler tells the commission in his answer that more than a year ago an official of the commission visited him, at which time Mr. Hemler put before the commission's representative all of the data which he desired. In concluding his answer, Mr. Hemler says:

"I have never tried to misrepresent and am not using any labels or bands with the name Tampa, Fla., on them, nor am I printing in any boxes the wording Havana Filler, Hand Made. These two matters being the subject of your representative's call a year ago. If you want any proof, will furnish the affidavit of my boxmaker as well as my lithographer that these words have been eliminated and that the original was put there by the manufacturer who resided in Tampa, Fla., and discontinued business and sold the labels and bands to a New York lithograph house who in turn sold them to me. All these facts have been set forth in the former call and cannot for the life of me see any occasion for any complaint and hearing. Please be kind enough to advise me and set aside this hearing and oblige."—LAMM.

Chicago Cigar and Tobacco Houses on the Move

Several Changes Take Place in the Loop—Some "Move Out," Others Open New Establishments—Sales Everywhere Moving Along at Reasonable Rate—Trade News.

CHICAGO, May 5.—Moving day found everybody busy. Several stores "moved out" and new ones opened. In the Loop the United closed up its store at Clark and Jackson. Schulte moved from Clark and Monroe streets. Charles Rosenstein vacated his store at 28 South Wabash, and Walter Eagle moved from 17 West Van Buren street to 116 N. La Salle St., buying the fixtures and stock carried there by Jos. Slater, thus smoothing a "troubled sea." This all happened in the Loop. Some moving has been in various sections, and everywhere sales are moving along at a reasonable rate. Business with the cigar box manufacturers is not so brisk just at present.

No Room for Doubt

Max Seckbach of the A. M. Seckbach & Bro., who operate two finely appointed Loop stores, says that "business IS picking up." If Max says so it is so, for he kicks even when it is going strong. Among their leading sellers are Medalist, D. A. Garcia, Redencion, Pancho Arango and Perfecto Garcia. The latest issue of TOBACCO can always be found here for the boys to read.

"What's Under the Wrapper"

Samuel Paley, president of the Congress Cigar Co., Philadelphia, is here personally conducting an advertising campaign. In large newspaper ads he tells, "What's under the wrapper," and explains "Why a La Palina Cigar burns so evenly, and draws so freely." Sam tells the smoker to "Keep a fresh box in the office humidor and also so in the humidor at home, for La Palina is full of rich aroma due special combination of tobacco used."

Mort Hammer came in to tell me of the fine order he received from Straus & Co., of Cincinnati, also the Pendennis Club of Louisville, Ky. No doubt these made Marcelino Perez & Co. feel good, for they are both fine accounts. His business here with the Hotel La Salle, Illinois Athletic Club, Oscar Klein & Co., Iwan Ries & Co., Anderson-Thorson Co., Eger & Co., and A. M. Seekbach & Bro., is very good.

Booking Orders

Frank MacDonald, who represents F. Garcia & Bros., Tampa bonded manufacturers, is in town booking orders for his well-known clear Havana cigar, which is distributed by the house of Ruhstrat-Christian Co.

The trade was greatly surprised this week when word reached here that Doc Rosobro has resigned from the firm of F. Vaga & Co., Detroit. Doc has a large following here and throughout the Middle and Northwest. All hope he will remain in the cigar game.

Chicago's big summer playground, the Municipal Pier, will open for the season Decoration Day.

Getting Good Reception

Blue Boar cigarettes have made good right off the reel. At 20 for 25 cents the sale increases weekly.

Humo, a Mazer product, "mild and sweet," at 2 for 15 cents is coming to the front fast for the Sanders & Watson Cigar Co., of 158 W. Lake St., the distributors here.

Leo Klein, of Oscar Klein & Co., 313 E. 55th St., reports a steady call for La Destino made in bond cigars from Marcelino Perez & Co. This sure must be good "music" to Mort Hammer, the factory representative, who says, "all us bonded fellows should talk made in bond cigars."

Eduardo Gonzalez & Co. are putting out Tales of Smoke, a very classy, long, slim cigar, to retail at 10 cents. It has been placed with many dealers here by Jack Rosenberg of the factory.

William Tobias, manager for Iwan Ries & Co., 104 N. Wells St., is very busy these days. He has a force of salesmen out selling pipes, Pancho Arango, Girard, Emerson, Ries' Tampa Cubans, and he says he don't get time any more to eat. The "Ejector" cigarette case is selling well with this big wholesale house.

Making Big Hit

Life size cut-outs of the Herbert Tareyton "gent" now appear in many of the store windows. This latest work of art of the Falk Tobacco Co. is very attractive and is making a big hit with the dealers.

A sales force of 24 men turn in many orders each day to the cigar department of Many-Blanco Co., who feature, Shrine, Mi Hogar, Henry the Fourth and Popper's Ace cigars.

In the Vanguard

Tadema, clear Havana cigars from Arguelles, Lopez & Bro., continue to be the leaders at both of the Wm. F. Monroe Cigar Co.'s stores.

Anderson-Thorson Co., 54 E. Monroe St., report a strong call for Bering, clear Havana cigars, made by Coral-Wodiska & Co., of Tampa.

Don Nieto, a locally made cigar, is on sale in a number of stores.

Patrick Guoski, 186 N. Wells St., is featuring Virginia Lee, Tampa made cigars. He has a large window display.

In the Public Eye

New Chesterfield window strips are seen on the stores and new billboards are up all over the city.

Herb Mesick has returned from a trip to Ohio, where he booked many orders for Cuesta-Rey cigars.

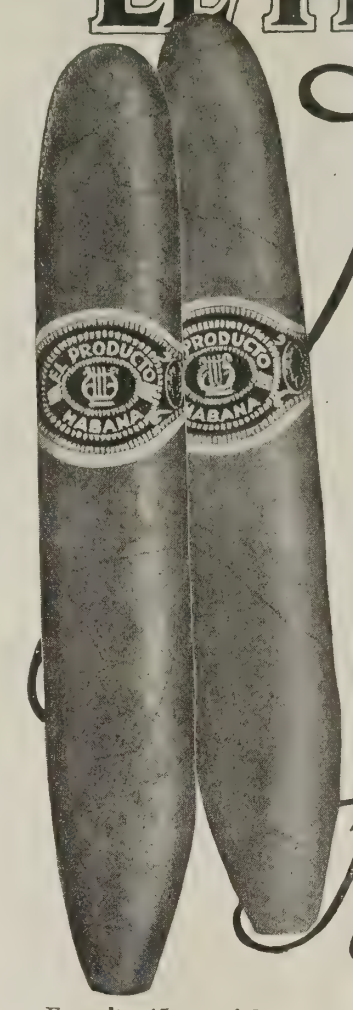
Featuring Seidenburg Brands

Jake Brill has arrived at Chicago headquarters after a trip through Michigan and Ohio for the Wm. J. Seidenberg Corp. He reports business good and has opened several new accounts for Pancho Arango and Virginia Lee. A. S. Coleman of Frankfort, Ky., has closed to distribute Frat cigars. The University Club, of Cleveland, Ohio, is to feature Pancho Arango, made in bond cigars; the opening order for fancy sizes has just been placed at Tampa. S. P. V., an all Havana filled and Havana wrapped, four-inch blunt, made in Tampa, to sell at 5 cents, is being placed with the trade by the Chicago office sales force.

Growing in Public Favor

The Dutch Master continues to grow in popularity here. The advertising campaign which the Consolidated Cigar Corp. conducted on the Dutch Master brand is surely bearing fruit.

Estos-si, Tampa made, is one of the leading cigar sellers with S. Bloom, the jobber at 916 S. Halsted St.



Clear Havanas

In clear Havana cigars the chain of Neubauer & Weber stores feature a large line. They carry Tom Palmer, La Venga, Charles the Great, Cyrilla, Perfecto Garcia, Lozano, Cuesta-Rey, etc.

Business Holding Up Well

A. Zaphirio, head of A. Zaphirio & Co., Turkish cigaret manufacturers, 112 E. South Water St., states that their business is holding up very good. They manufacture private brands for most all

EL PRODUCTO *mild*

Not only is there a shape and size of El Producto to suit every taste, but you can offer your customer El Producto in the colors he prefers—with the absolute knowledge that every El Producto is the same mild but distinctive blend—unvarying in quality, in character and in workmanship.

That's why your customers get the El Producto habit—they are sure that the next smoke will give the real enjoyment they seek.

TOBACCO MERCHANTS' ASSOCIATION OF THE UNITED STATES

OFFICERS AND EXECUTIVE COMMITTEE.

Jesse A. Bloch, Wheeling, W. Va., president.
Chas. J. Eisenlohr, Philadelphia, Pa., ex-president.
Edward Wise, New York, chairman executive committee.
Capt. G. W. Hill, New York, vice-president.
George H. Hummel, New York, vice-president.
Julius Lichtenstein, New York, vice-president.
H. H. Shelton, Winston-Salem, N. C., vice-president.
Wm. T. Reed, Richmond, Va., vice-president.
Wm. Best, Jr., New York, vice-president.
Asa Lemlein, New York, treasurer.
Chas. Dushkind, New York, Secretary.

of the clubs and high class hotels. Their Zaphirio brand of cigarettes is sold by all the better stores.

The Trans-Pacific Trading Co., 222 N. State St., is putting a great deal of push behind the Don Julian cigars. Blue Jay, a 5 cent cigar, is being well placed by this wholesale house.

Sol Lazar of Newman Bros., finds city trade good. Newman Bros. distribute Andrew Jackson, Lord Clair, Gil Barnard and Chicago Motor Club brands. One can find them on sale in all the Chicago stores.

Hoyle's high class retail store at 439 S. Wabash Ave., shows a fine line of La Mega cigars. Another clear Havana that sells well with them is the Tampa made D. A. Garcia.—H. L. H.

Claim Mileage Rate Cut Nearer Than Ever

A conference is being held in Washington this week, between counsel of the National Council of Traveling Salesmen's Associations, Assistant Attorney General Blackburne Esterline, and Chief Counsel Farrell, of the Interstate Commerce Commission, in preparation for filing an appeal before the United States Supreme Court on the recent decision of the District Court, which granted an injunction in favor of the railroads, thereby restraining the Interstate Commerce Commission from enforcing its order directing all Class I carriers to issue interchangeable mileage books to the value of $90 for $72 per book.

Whether a joint appeal will be filed or individual appeals, by the Government, and by the National Council of Traveling Salesmen, will depend upon the outcome of the conference in Washington.

Since the announcement of the decision of the United States District Court, there has been considerable pessimism about the ultimate hopes of obtaining the worthwhile savings represented by the constructive legislation enacted unanimously in the last session of Congress.

Realizing the possibility of such misconstruction, the National Council of Traveling Salesmen's Associations has authorized the following statement:

"We wish to assure our own members and all of our friends in all lines of industry that while the injunction granted by the District Court is a 'permanent' injunction, it was made possible by the mutual understanding that the District Court hearing should be final in that court, so that time and money might be saved in promptly bringing this matter up for final adjudication before the nation's highest tribunal, the United States Supreme Court.

"The fact that the injunction was made permanent and that so much publicity has been given to this fact has unfortunately discouraged some of our good friends and has caused them to feel, perhaps, that there is faint hope of finally obtaining this much-desired reduction of the present exorbitant cost of railroad travel. The true situation is just the reverse. We are nearer to victory than ever!

A Hopeful Sign

"The Interstate Commerce Commission subsequent to the permanent injunction, and in spite of it, has since extended the date of the order from May 1, directing the railroads to place these books on sale January 1, 1924. This is a hopeful sign, for it indicates that the Interstate Commerce Commission does not consider the issue closed, but by its action automatically continues its order until such time as the United States Supreme Court shall have had an opportunity to review the injunction proceedings, the evidence and argument appertaining thereto, and to render its decision.

"Despite the injunction granted by the lower court, the decision on most of the controversial features was decidedly in our favor. Former United States Senator Hoke Smith, concurring with Samuel Blumberg, two of the five attorneys representing the National Council, in the injunction proceedings, after reviewing the decision rendered, have stated:

"'The court sustained our contention that the action of Congress must be upheld as constitutional.

"'The pending injunction was predicated upon technicalities, in which we think the court erred in its construction of the Act of Congress and the Commission's subsequent order.

"'Immediate steps will be taken to appeal the case, and we are more than ever confident of our ultimate success.'

"The National Council of Traveling Salesmen's Association are earnestly reorganizing their forces for the final test, and they are calling upon all branches of industry vitally affected by this mileage book to support them in this fight. Plans are under way for a series of Sunday night testimonials which will provide substantial sums of money for the Mileage Defense Fund. It is felt that the theattrical managers should readily co-operate, because they undoubtedly will benefit directly and indirectly; that the artists should gladly contribute their talent to these testimonials, because they will share liberally in the reduction of their personal traveling expenses; and the public, particularly the business public, will respond generously because of its own share in the savings and because of its natural sympathy in assisting the plucky and winning fight which the traveling men have put up almost single-handed against the combined railroads of the country."

Tobacco with Less Nicotine

Experiments in the cross-breeding of tobacco plants at the tobacco farm of the Pennsylvania State College has produced a cigar with less than half the nicotine content of the average cigar. The new type contains less than 2 per cent of this potential poison. Seven men in the college have been asked to smoke samples to see how they like them. Their answers may help settle the question whether men smoke "to soothe their nerves" or to gratify their palates.

As far as taste is concerned, it is probable that not one smoker in a hundred could tell whether a cigar contained 2 per cent of nicotine or 5 per cent. The gentleman who drank half an ounce of whisky and concluded that there was a rusty pin in the barrel may have his counterpart among tobacco users, but such fastidious palates are rare. Flavor is so much a product of other qualities than strength that a variation in nicotine content alone might pass unnoticed.

If it were found that an improved kind of tobacco, perhaps a leaf of low nicotine content, were less harmful than most kinds in general use, few men would object on grounds of taste to making a change. The effect of tobacco upon physical health or mental condition is as yet far from a settled question. The Pennsylvania State experiments may help tell what tobacco really does.

M. V. O'Shea, professor of education in the University of Wisconsin, recently sought to discover whether tobacco was harmful. He sent questionnaires to scores of men distinguished for artistic, scientific or business achievement, asking detailed questions as to their experience with tobacco. He made many tests, physical and mental, upon men whom he kept constantly under observation. The results, published in a book entitled, "Tobacco and Mental Efficiency," showed that in some cases smoking hampered the mental faculties, in some cases helped them. They showed that for some individuals tobacco was harmful to physical health, while for others it had no discernible ill effects. Professor O'Shea concluded that the immature were usually injured by use of tobacco, but that in cases of grown persons the effects varied with individuals. So far as adults were concerned, he reached no general conclusion as to whether tobacco was a good thing or a bad thing.

A similar test might be made as to the use of tobacco with high nicotine content and tobacco with comparatively little nicotine in it. Perhaps a nicotineless cigar could be produced and tried out. If it were shown that a smoker derived definite benefits from smoking 1 per cent cigars instead of 3 or 4 per cent cigars, there apparently would be no difficulty in producing such tobacco. Perhaps, too, some folk would call for a law limiting the stingum to one-half of 1 per cent of the leaf.—*New York Sun.*

New Orleans

the firm may yet have to obtain larger quarters.

Bought Building

A. Falk & Son, the Chartres street cigar manufacturing and leaf tobacco dealers, today acquired two buildings at Decatur and Bienville streets, for $32,000 cash, into which they will move after having remodeled and renovated their purchase so as to adapt it to the cigar manufacturing and leaf tobacco business. Ferdie Falk, the junior member of the firm, is making preparations to shortly start on another leaf tobacco selling tour through the South.

Julius Kahn has opened a large handsomely equipped establishment for the sale of cigars, cigarettes and tobacco at 500 Texas street, Shreveport, La.—CRESCENT.

Co-op. Activities

have been busy writing the checks for this distribution, which will run two or three times as large as the total number of members.

Warehouse to be Enlarged

An indication of the satisfaction the growers feel with the association, and their confidence in its future, was given this week at Tompkinsville, Ky., which is in the One Sucker district. The receiving house there proved inadequate to properly and expeditiously handle the crop this year, so it was decided to build an addition to cost $24,000. To finance this the people of that section were asked to take that amount of the bonds and preferred stock in the association warehousing corporation of that district. The amount was subscribed in ten minutes' time. The meeting was largely attended and it was a time of great enthusiasm.

The same situation exists at Smith's Grove and at Auburn, both in Kentucky, and already the banks at those places have agreed to take the amount of association securities necessary to provide the necessary enlargement of the receiving houses there.

The organization of the school district "locals" is proceeding most satisfactorily in a number of counties. Probably a hundred of these "locals" have now been formed and they are holding regular meetings which are being largely attended. The programs are following closely those suggested from headquarters and prompt reports are being made. These are bringing into headquarters much valuable information on crop prospects, the outlook for increasing the membership, etc.—M. E. BACON.

Dark Tobacco Co-op. Doings

(*Continued from page* 33)

judgment in the Daviess County Circuit Court against George W. Cummings, a resident of that section who is alleged to have violated his contract and sold a portion of his crop on the loose leaf floors. Under the provisions of the Court decree Mr. Cummings will pay liquidated damages in the sum of $115.75 and $50.00 attorney's fees, making a total cost to him of $165.75.

Louis Wade, a Christian County farmer, responded to a similar suit with a proposal to pay liquidated damages of five cents per pound for all tobacco he sold outside the Association.

Records compiled today in the Accounting Department show that a total of more than 140,000,000 pounds of tobacco have been received on the Pool floors. Something over 100,000,000 pounds have been contracted for by buyers and much of that has been delivered to them. It is believed now that the end of the season will show 160,000,000 pounds handled by the Association. This is in spite of the fact that the crop in the Dark Fired section is averaging less than 650 pounds to the acre. In the Green River, Stemming and One Sucker Districts however the acre average is higher.—PRESS SERVICE BUREAU.

have that protection so long as it remains within the law. We should endeavor to enroll all outsiders in the association, but if they do not want to come in we should not attempt to coerce them by unkind remarks about them or by attempting to intimidate them. If we should resort to violence and intimidation we should immediately lose that public which has been one of the chief assets of this organization so far."

Mr. Barker said that only a very small percentage of the members of the association had been disappointed by the results obtained by the association for them in the marketing of their crops.

In closing Mr. Barker assured the growers that every man who violated his contract to deliver his tobacco would be proceeded against under the Bingham co-operative law and be made to pay the penalty provided by that law for such violation. He declared the loyal and honest grower is entitled to the protection of the association and assured his hearers that they would receive that protection. He said that several hundred growers already had paid the association the five cents per pound damages assessed against them for violation of their contract, and that he did not believe those who had violated the contract this year would do so again.

A WEEKLY TRADE REVIEW

ESTABLISHED 1886

Vol. LXXVI. No. 3 NEW YORK, MAY 17, 1923 Per Annum, $3.00 Per Copy, 10 Cents

The Tobacco Merchants Association Holds Its Biggest Convention

About 450 Delegates and Guests Attend Third National Assembly of Tobacco and Allied Industries—Interesting Program Carried Out—Men Prominent in Public and Business Life Take Active Part in Making the Triennial Meeting a Grand Success.

WASHINGTON, D. C., May 17.—The largest and best convention yet held by the Tobacco Merchants' Association of the United States, took place at the New Willard Hotel here yesterday and today. This was the third national assembly, and it brought together about 450 representatives of the most important concerns in practically every branch of the tobacco and allied industries. Among them were visitors from Australia, England and Cuba.

Delegates began to arrive early Tuesday and every train entering the magnificent station brought new recruits who made their way to the big lobby of the hotel, where they met many friends whom they had not seen since the previous Convention; old friendships were renewed and new acquaintances formed. Without doubt the gathering was the largest and most influential ever seen in Tobaccodom.

At 10:45 A. M. Wednesday, the Convention was called to order by Chas. Dushkind, Managing Director, who requested Chas. J. Eisenlohr and Julius Lichtenstein to escort President Jesse A. Bloch to the Chair. The president cordially welcomed the assembled delegates and guests.

Asa Lemlein read the rules of the Convention and the president appointed the secretaries for the various groups.

Hon. Herbert C. Hoover, Secretary of Commerce, was then introduced and spoke. The reading of the President's address completed the morning session.

Group Meetings

During the afternoon the Cigar Trade, the Leaf Trade and the Jobbers and Retailers held very interesting meetings in rooms assigned to the various groups. Some of the discussions were of vital importance and it is to be hoped that much good will result.

This morning's session opened with President Bloch in the Chair. Reports of the various committees were read and acted on. Several resolutions were passed.

For the Good and Welfare of the Industry

Among the speakers for the good and welfare of the tobacco industry were A. L. Cuesta, Sr., who said the good name of Tampa was being abused by firms established in other parts of the country, and using the word, Tampa, as their trade-mark.

Asa Lemlein said that the meeting had been a great success.

H. H. Shelton spoke of the wonderful success of the Convention.

E. Canle spoke of the small importation of cigars in comparison with the cigars made in the United States; last year only 32,000,000 cigars were imported from Cuba. A reciprocity treaty of 40 per cent would give some relief, he said.

Sidney J. Freeman spoke of the Salesmen's Association and asked for the full co-operation of the T. M. A.

F. A. DePilis said he represented an old as well as a new company and thought it was a fine thing to have the big man sit around the table with a little man and discuss their interests. He said there was room enough for all.

H. Case, who represented 89,000 growers of tobacco in Virginia, North and South Carolina, said his association would gladly co-operate with the Tobacco Merchants' Association.

D. Emil Klein advocated truth in advertising brands. He said the smokers would buy a cigar if they liked it, whether it contained Havana or not.

J. J. Ollendorf, President of the National Tobacco Salesmen's Association, explained what they had accomplished regarding the Mileage Books, and stated that it had been done by co-operation.

A Vote of Thanks to President Bloch

Before adjournment a vote of thanks was tendered to President Jesse A. Bloch.

Machines Exhibited

Of considerable interest to the trade were the exhibits of Miller, Du Brull & Peters Mfg. Co., who had installed their Durex Bunch Machine. The Universal Tobacco Machine Co.'s Stripping Machine, and Universal Short Filler Bunch Machine, also an International Banding Machine was shown. All of these were in operation, and showed commendable enterprise on the part of the three companies making the exhibits.

Convention Program

The official program was carried out substantially as follows:

FIRST DAY

Wednesday May 16, at 10.30 a. m.

Morning Session

(10th Floor)

1. Opening.
2. Rules of Convention.
3. Address: Hon. Herbert C. Hoover, Secretary of Commerce.
4. Address of President.
5. Recess.

Afternoon Activities

Group Meetings

Cigar Trade

Met at 2:30 P. M. on the 10th Floor in the Convention Hall.

All Cigar Manufacturers, Cigar Leaf Concerns, Box Makers, Lithographers, and others interested in the Cigar Trade were invited to attend and participate in the meeting.—Henry G. Wemmer, Chairman.

Address: Herbert Kaufman.

Suggested Topics for Discussion

1. Light Wrapper Question.
2. Report of Slogan Committee, by Harvey L. Hirst, Acting Chairman.
3. Co-operative Advertising.
4. Large size cigars.
5. Shipping problems—carload rates. Address: George C. Lucas, T. M. A. Traffic Bureau.
6. Such other topics as brought up for consideration.

Leaf Tobacco Trade

Met at 2:30 P. M. in Room 1003.—Joseph F. Cullman, Jr., Presiding.

Address: Dr. Julius Klein, Director, Bureau of Foreign and Domestic Commerce, Department of Commerce.

Suggested Topics for Discussion

1. Export Trade.
2. Duties and taxes on American tobacco in foreign countries.
3. Transportation.
4. Warehousing.
5. Standardization of types and grades.
6. Porto Rico mail and cable service.
7. Such other topics as brought up for consideration.

Jobbers' and Retailers' Meeting

Met at 2:30 P. M. in Gridiron Room under the auspices of the National Wholesale Tobacconists' Committee.—E. Asbury Davis, Presiding.

Executive Committee

E. Asbury Davis, F. A. Davis & Sons, chairman.
Wm. Deiches, Jr., president Wm. Deiches & Co., Inc.
J. Vipond, Jr., Scranton Tobacco Co., Inc.
Geo. Frings, president Frings Bros.' Co.
Wm. W. Anspach, president Reid Tobacco Co.
Geo. L. Stallman, C. H. Stallman & Son.
John T. Woodhouse, John T. Woodhouse & Co.
J. P. Manning, president Jos. P. Manning Co.
George W. Barnes, vice-president the Weideman Co.
Address: Hon. Joseph E. Davies.

Suggested Topics for Discussion

1. Price-cutting situation and proceedings before Federal Trade Commission for Trade Practice Submittal.
2. Such other topics as brought up for consideration.

Committee on State of the Industry

Met at 4:30 P. M. in Room 138.—Jonathan Peterson, Chairman.

Committee

Jesse A. Bloch, of The Bloch Bros. Tobacco Co.
J. M. Dixon, of Tobacco Products Corp.
Charles J. Eisenlohr, of Otto Eisenlohr & Bros., Inc.
Major George W. Hill, of The American Tobacco Co.
Fred Hirschhorn, of General Cigar Co., Inc.
George H. Hummel, of P. Lorillard Co.
Karl Jungbluth, of MacAndrews & Forbes Co.
W. T. Posey, of United Cigar Stores Co.
P. Larus Reed, of Larus & Brother Co.
H. H. Shelton, Esq., of H. H. Shelton, Esq.
Richard L. Strobridge, of Newell-Emmett Co.
Luis Toro, of Porto Rican-American Tobacco Co.
E. G. Weymouth, of Liggett & Myers Tobacco Co.
S. Clay Williams, Esq., of R. J. Reynolds Tobacco Co.
Jonathan Peterson, of United States Tobacco Co.

Evening

Banquet at 7:30 P. M., 10th Floor.

A Buffet Supper was served in the boxes for the ladies present. They were requested to enter the boxes before the speaking began.

SECOND DAY

Morning Sessions

Committee on Nomination

Met at 9 A. M. in Room 126.—S. P. Coe, Chairman.

Committee

S. P. Coe, of Faber, Coe & Gregg, Inc.
Edwin S. Hecht, of Wm. Deiches & Co., Inc.
John Loughran, of Daniel Loughran & Co.
Sam Mayers, of American Exchange Cigar Co.
Charles B. Perkins, of Charles B. Perkins Co.

Convention Sessions

Opened at 10:30 A. M.—President Bloch in the Chair.

1. Election of Directors.
2. Reports of Committees.
3. General Welfare.

Afternoon Sessions

The Jobbers' and Retailers' meeting continued in the afternoon in the Gridiron Room.

The Election of Officers

The newly elected Board of Directors are to meet later in New York for the election of officers.

Committee on Rules

Asa Lemlein, Chairman.
William A. Hollingsworth, of William A. Hollingsworth.
E. E. Kleiner, of E. Kleiner & Co.
Julius Klorfein, of Julius Klorfein.
Percival R. Lowe, of Percival R. Lowe.
F. J. Maudsley, of American Lithographic Co.
J. A. Voice, of Pasbach-Voice Lithographic Co.
Asa Lemlein, of Gans Bros.

Reception Committee

Ben R. Lichty, Chairman.
Julian S. Bach, of Elias Bach & Son.
M. E. Canle, of Union of Manufacturers of Cigars and Cigarettes, of the Island of Cuba.
L. Lee Combs, of L. Lee Combs.
Wm. Deiches, Jr., of Wm. Deiches & Co., Inc.
A. Freeman, of Sidney J. Freeman & Sons.
W. B. Growtage, of American Lithographic Co.
R. E. L. Hall, of Capital Cigar & Tobacco Co.
Ben R. Lichty, of Otto Eisenlohr & Bros., Inc.
Dr. C. E. Moehle, of Moehle Lithographic Co.

SAMUEL BAYUK
OF BAYUK BROTHERS
BLEW INTO THE CONVENTION
IN HIS GOLF SCENERY

Morris D. Neumann, of Morris D. Neumann & Co.
S. Major Newburgh, of Louis Newburgh Co.

J. B. Rovira, of Benito Rovira Co.
Milton Samuels, of Stern-Mendelsohn Co., Inc.
W. E. Young, of George W. Cochran & Co.

Secretary Hoover's Speech

Herbert Hoover, Secretary of Commerce, addressed the convention on Wednesday. He said, in part:

"Tobacco and its products are looked upon by the Government as commodities that will enable the United States to maintain its foreign trade, when the readjustment in Europe permits countries now suffering from the upheaval which followed the war to resume production, and to regain some of the markets that they have lost. Tobacco now comprises about seven or eight per cent of America's total exports, and it has more importance, looking forward to the future, than might appear on the surface.

"Our foreign trade is undergoing vital shifts in a great many directions. The war has changed the appearance of trade and commerce throughout the world, and one of the great changes has been the tremendous increase in the exports of American agricultural products, which have nearly trebled since before the outbreak of hostilities abroad.

"Russia and the eastern belt of Europe has suffered the most, but with the recovery of those sections no doubt they will recover their markets. Over the long vision, we must look for a decrease of our exports of agricultural produce, and as these commodities comprise nearly one-half of our total exports, shifts in trade again brought about must be of a great deal of concern to us.

"We are faced, over a period of time, with a decrease in the exports of a portion, at least, of our agricultural produce, and therefore commodities, such as tobacco, where we can look forward to an expansion in our exports, takes on great importance. It was with this in mind that the Department of Commerce has recently created a tobacco division to consider tobacco as one of our very important fractions of our foreign trade.

"A preliminary survey of the foreign field had shown that in those countries where there is a monopoly of the tobacco industry, only the poorer grades of American tobacco are purchased for consumption there. I had observed that fact during my residence in some of these countries, being a consumer of tobacco. They buy the worst of our tobaccos, and one opening for the expansion of our tobacco trade is through inducing these monopolies to purchase goods of a grade similar to that demanded by American smokers. Better merchandise will create a better demand abroad for our tobaccos, and tobacco products, and increase our exports.

"America must maintain an even balance of trade and avail itself of all opportunities for export expansion to meet the coming decrease in agricultural exports. I appeal to the tobacco men to assist the department in its work, which will include a survey of European markets, the requirements of foreign countries, and many other things that will be productive of valuable information to form a basis for a campaign to secure a larger share of the foreign business."

Secretary Hoover was introduced to the more than four hundred delegates present at the opening session by President Jesse A. Bloch, of Wheeling, W. Va. Mr. Bloch is a member of the West Virginia Senate and is the man who used an airplane to reach the State capitol to cast his vote in favor of woman's suffrage, when no other means of transportation could get him there in time to do so, permitting him to keep a promise he had made to the women of his district.

President Bloch Scores Antis

Scandalous statements, maliciously fabricated reports and stories broadcast all over the country is a "systematic propaganda of shameful abuse and vilification of the tobacco industry," were attacked by Jesse A. Bloch, president of the association, in his address marking the opening of the convention. He declared that State legislatures have been worked upon by experienced agitators of "anti" organizations and every form of attack that the well-trained leaders of the intolerant forces could possibly think of has been made upon the tobacco industry.

"I am happy to be able to report to you that in this last war against tobacco, as in all previous wars, the tobacco industry came out with a glorious victory," he told his applauding audience. "The tobacco industry, or, I would rather say, the freedom-loving people in this country, have won such a decisive victory that it should serve to discourage similar movements for many years to come. Not only have we repulsed all attacks, but laws of four of the six States that the 'antis' succeeded in placing in the prohibition column many years ago, have been repealed.

"It is particularly gratifying to note that in all our activities to meet the attacks of the 'antis' we have employed none but clean, dignified, open and above board and straightforward methods. We have subsidized no groups or organizations, have used no subterranean devices, and have sailed under no colors but our own.

"Our great victory is due, not so much to the activities of our association, but to the public resentment, the public reaction and revolt that the persistent efforts of the 'antis' evoked. The fact is that the anti-tobacco agitation has aroused such indignation throughout the country that practically not a day passes without some organization or some other group of citizens inaugurating new movements or starting new publications to combat it.

"Our first step in planning to intelligently combat the anti-tobacco agitation was to take stock of public opinion and to ascertain the attitude of the public press in respect to the use of tobacco. A questionnaire was sent to the newspapers, the belief being that editors can best judge the sentiment of their communities. No arguments accompanied the questions, and from their form it was clearly indicated that what was sought was the unbiased opinion of the replying editor.

"The answers of the editors show an overwhelming opposition of the public to anti-tobacco legislation. Some 7,847 editors, representing a combined circulation of 21,870,046, replied to the questionnaire, and of these, 7,393 editors, or 95 per cent, represented public sentiment in their communities as opposed to anti-tobacco legislation."

Seven billion cigars are annually produced in the United States, according to Mr. Bloch. Within the last decade or so the consumption of cigarettes has increased forty billions per annum.

The speaker paid tribute to those members of the Tobacco Merchants' Association who have died since the last convention three years ago, among whom was Colonel Fred W. Galbraith, national commander of the American Legion, who was vice-president of the tobacco organization. Colonel Galbraith met his death in an automobile accident in Indianapolis, June 9, 1921.

Joseph E. Davies Speaks

E. Asbury Davis presided over a meeting on Wednesday afternoon, in the Grid-

iron room, of the jobbers and retailers, which was under the auspices of the National Wholesale Tobacconists' Committee, organized in this city about a year ago, to take up some trade problems with the Federal Trade Commission.

At this meeting Joseph E. Davies, former chairman of the Federal Trade Commission, and now counselor for the association in this special work, and Charles Dushkind, manager of the association, spoke at some length.

Mr. Davis opened his address by referring to the meeting which was held just about a year ago, when the committee was formed, and he briefly stated that the purpose of the committee was to improve the jobbing situation, as it exists today. He then called upon Mr. Davies for some remarks.

Mr. Davies reviewed, for the benefit of those present, many of whom were not in Washington at the committee's organization meeting, the work which has been done since that time, and brought the situation right down to date. He spoke first of the organization of the committee, and of the petition which was drafted at last year's meeting, and presented to the Federal Trade Commission, requesting a trade practice submittal hearing on the tobacco industry by the commission. He told of the cordiality shown to the committee by Nelson Gaskill, the then chairman of the committee, and of the assurance which the tobacco men seemed to get at that time that such a hearing would be granted. However, the matter was placed before the full commission, with the result that the commission refused to hold the hearing. An appeal was made to the commission later, but this also was refused.

Mr. Davies told the jobbers that at the present time there are some fifteen complaints now pending before the commission in connection with the tobacco industry. The gist of these complaints, he said, is a conspiracy for price fixing. The testimony in all but two of the cases, he said, is all in.

The Trade Commission turned down the request for a trade practice submittal, Mr. Davies seemed to think, because of the pending complaints. This in spite of the fact that such hearings have been granted to many other industries. He called the retailers' attention to the fact that Mr. Gaskill, who is still a member of the commission, but not now the chairman, recently said in a speech that selling below cost is an unfair method of competition, showing that this one commissioner at any rate has the same thought about the matter that the jobbers have.

Mr. Davies suggested that it would be a good thing to have the committee pass a resolution of practice and ethics in the tobacco trade, stating in effect that selling below cost is unethical, with absolutely no mention made of what costs are, and without any agreement as to what costs are. Such a resolution, if passed, he said, should be filed with the Department of Justice, and the Federal Trade Commission, by the committee, with the understanding that if the government took no action, the new code of ethics would go into effect at such and such a time.

He also suggested that a test case might be made of unfair price-cutting in the industry. Such a case, he said, could have full publicity and be thoroughly known as being nothing but a test case.

Mr. Dushkind's Remarks

Mr. Dushkind, when called upon to talk on this subject, said that in his estimation no tobacco sales should be made below cost. The tobacco industry, he said, has to deal with the situation, not as it would like to have it, but as it is today. He said that the study he has made of the situation makes him feel sure that the tobacco industry can't protect resale prices without additional legislation, which is not now in sight. He said that the merchants should adopt the policy of not selling below cost of production. He said the wholesale druggists and grocers are getting more and more to be competitors, because of their price-cutting of tobacco products. The discount proposition, he said, is a bad one, and some method should be worked out which would be fair to all. However, even after it had been worked out, the question of how to enforce it would be a great one.

Following the talks of Mr. Davies and Mr. Dushkind, questions were asked by Charles A. Ruby, of Chicago, and others, during the course of which the general price-cutting situation and the proceedings before the Trade Commission were quite generally discussed.

H. G. Wemmer Talks

Henry G. Wemmer, chairman of the Cigar Trade group, said that the reduction in taxes on tobacco, which would enable cigar manufacturers to produce the good nickel cigar, so popular before the war, will be sought at the next session of Congress.

Tobacco taxes today, he said, are as high as at any time during the war period, and the tobacco taxes are among the very few war levies that have not been reduced. At the same time, the cost of leaf tobacco is higher than before the war; wages in the cigar-making industry have more than doubled in the last decade, while retail prices of cigars, based on wholesale and manufacturing costs, have been reduced at least twenty per cent since the war peak period.

Mr. Wemmer said that because of these conditions, it has been only by the exercise of the strictest economy that the manufacturers have been able to prevent a steady climb in prices to the smokers. So successful has this work of economy been, however, that it has been possible to reduce the cost of tobacco products to a greater degree than in many other industries.

Admission by Treasury officials that there will probably be a good surplus in the Treasury at the end of the current fiscal year, said Mr. Wemmer, and the feelers sent out by the administration leaders to learn the sentiment regarding revenue legislation at the next session of Congress, should make possible some action tending to relieve the tobacco industry from the tax burden under which it now labors; and every effort will be made when Congress convenes in December to have these taxes reduced. If taxation it lightened, it was promised, this relief will immediately be passed on to the public in the shape of lower prices.

Attention was called by Mr. Wemmer that before the war 60 per cent of the cigar sales were of the nickel variety. During the war, the increase in cost made the production of this grade impossible, he said, but it was not until former Vice-President Marshall made his famous plea for a return of the five-cent cigar that public interest was really aroused. Since then, at a considerable sacrifice to themselves, Mr. Wemmer said, manufacturers have been putting out a five-cent smoke, and although the quality, of course, is not comparable with that of the pre-war cigar of equal cost, it is estimated that 40 per cent of the total cigar sale today are at that price.

A general discussion was indulged in by the groups of the light wrapper question, co-operative advertising, large-sized cigars, and shipping problems, including carload rates.

Speech by G. C. Lucas

George C. Lucas, of the association's Traffic Bureau, also made an interesting address, as follows:

"The transportation business of our country has grown to such a magnitude, and the rates, rules, and regulations governing the movement of freight have become so complicated, that the solving of traffic problems has become a subject for specialists, and because of these complications your association felt it advisable to establish a traffic department for the benefit of its members.

"This department was created last November, in order to render special assistance to individual members of the association, whenever possible, and to help guard and protect their combined interests in any rate adjustment or change in the rules and regulations governing the transportation of tobacco and its products.

"Since its establishment, the department has been called upon by various members for information and advice in regard to freight rates, classification, claims and embargoes, and while we cannot undertake to handle the detail shipping problems of each member, we are, nevertheless, willing and anxious to render whatever service is possible, and for this reason I desire to urge each of you to feel free in calling for help or advice whenever it is needed, and to know that this bureau is a part of your association and its facilities are for your use.

"Some of our members have perhaps not felt the need of our services, and undoubtedly others have not fully understood that they could have the benefit of this service without any additional cost, and for these reasons the management of your association has felt that I should take a place on your program to discuss some traffic matters, and show you how this department can be of service to you.

Some Vital Traffic Problems

"In presenting this subject of traffic, it is not my intention to discuss, in any way, the merits of the Transportation Act of 1920 or how it should be amended, if at all, nor do I intend to offer any solution of the general transportation problems that today confront both the carriers and the shippers, although this is indeed an important matter, as the transportation needs of our industries are growing faster than the facilities of our carriers.

"My idea is to present to you some of the traffic questions that are of vital interest to the tobacco industry, and especially to many of our members who do not give this subject much consideration. I want to show the importance of the traffic element in your costs, and in the service which you buy for your customers.

"It is true that the ultimate consumer is the Mr. Jones who pays the freight, but it is up to the tobacco industry, and therefore to the individual members of an association of this nature, to see that the transportation which they buy is adequate, and the cost reasonable, and in this way prevent any undue burden being placed upon the smoker who makes your industry possible.

"I appreciate the fact that the tobacco industry is conducted by various interests, and is composed of a few very large companies, some medium-sized companies, and a great many that would be considered small when the volume of their business is compared with those first mentioned, and it has been the general custom to let all transportation problems be settled by the traffic managers of those large companies, as they are experts in the business, and the smaller companies feel that they are being protected, and can easily afford to accept and be governed by what these traffic men secure from the transportation companies.

"This practice is all right as far as it goes, but it does not give you the protection you need, for the interests of these large companies may not be similar, or in the same territory as years, and even though the railroads may have established reasonable rates for the movement of your commodities, their various employes may not be skilled in the application of those rates to your shipments, and unless the individual who actually pays your freight bills is able to understand what you are entitled to, and properly verifies those bills, you will invariably pay a great deal more freight than you should.

"It has been stated that the railroads of the United States collect over ten million dollars annually in freight charges to which they are not entitled, and this is not due to any intent on their part to do so, but due to lack of knowledge on the part of their employes, and on the part of the shipper, to be able to determine what is the proper charge on such shipments.

"Let me illustrate this by a concrete example that was recently brought to the attention of your traffic department. One of our jobbers, in a city in western Pennsylvania, receives many shipments of cigars from Tampa and Key West, Fla. These shipments were being delivered to him by the same railroad, and still his freight bills showed many different freight rates, and he did not know which were right, so asked for our assistance.

"We found that some of these shipments were overcharged, because the railroad clerk did not apply the proper rates, but we also found that there were three different rates properly applicable to those shipments, dependent on the route by which they moved. These cigars could move by any of several all-rail routes, and the rate applicable to such movement was the highest of the three. They could move via boat line direct to New York City, thence by rail, at a rate lower than by the all-rail route, or they could move by rail to Jacksonville, Fla., thence by boat line to Baltimore or Philadelphia, thence by rail to destination at a still lower rate.

"From this you will see that there is another important element, in addition to the question of proper freight charges, and that is the matter of routing, and in this particular case it would be advisable at times to use the all-rail route, and pay the highest rate, rather than use the mixed rail, water and rail route, at the lowest rate. Therefore, the routing of such shipments should be thoroughly understood in the light of both cost and service.

"The freight rates of our country are very complicated, because of the extensiveness of our railroads, and the competition between localities, and different transportation lines. The carriers are just as anxious as the shippers to simplify their tariffs, which name these rates, but it is a task that will take many years, and perhaps cannot be properly accom-

plished without injury to some industries that have been securing lower rates than what they were entitled to, because of competitive reasons.

"In the meantime, the buyers of transportation can only be protected by having their transportation costs properly verified, and if possible a survey made of their traffic, to see that they get the kind of service for which they pay, and that their freight rates are on a proper basis. By proper basis, I mean the rates should be reasonable. The reasonableness of any rate is only determined by comparison with rates on the same commodity in other localities, or by its similarity to other commodities.

"Every shipment that moves by freight or express is covered by a bill of lading, which is a contract with special conditions binding on both shipper and carrier, but if the shipper is not acquainted with those conditions, that are placed there for his protection, he may lose many of his rights that have been secured for him by legislative action.

"It might be advisable for me to dwell for a time on some of the features of these contracts that need your attention. Congress has prescribed certain restrictions and definitions of carriers' liabilities, and the Interstate Commerce Commission have approved a uniform bill of lading for use in interstate commerce for rail or water carriers.

"On shipments moving by rail lines, the carriers are responsible for the full amount of any loss sustained by a shipper from practically all causes, except such, as—an act of God, the common enemy, the authority of the law, or consignee's neglect to remove shipments from carrier's possession within the free time allowed for such removal by the carrier's tariffs.

"But here is where the shipper must know the conditions under which he can recover for any such loss or damage. The contract provides that 'claims for loss, damage, or injury to the property must be made in writing to the originating or delivering carrier within six months after a reasonable time for delivery has elapsed.'

"There was a time when the carriers did not follow this rule literally, and paid claims regardless of when presented. But now the courts have decided that they cannot pay unless these conditions are met by the claimants. It is, therefore, necessary for shippers or receivers of freight to file such claims as soon as possible, but sometimes it happens that a claim cannot be properly prepared and supported within this time limit, and for this reason it is advisable for the shipper or consignee to serve a written notice on the carrier that a claim will be filed. This protects him against the time limit clause.

"This is called a prospective claim, and in case it is for non-delivery, it is suggested that a protective claim tracer be filed with either the originating or delivering line, preferably the originating line, by advising them of the value of the shipment, furnishing them with a copy of the bill of lading, and advising that the shipment has not been received, and requesting them to endeavor to locate and hurry delivery: but if they are unable to show delivery, for them to advise you to that effect, when original bill of lading, and proper claim papers, will be presented for voucher to cover the value thereof.

"The contract covering express shipments allows only four months and fifteen days for the filing of such claims, instead of six months as in the case of freight shipments, and the same prospective claim notice or tracer should be used to protect the running of this limitation.

"On interstate shipments moving by water lines, the bill of lading exempts the carriers from 'perils of the sea.' This exemption is authorized by law on all water-borne traffic either in domestic or foreign service. However, if the service is domestic, and the water line rates are competitive with the rail line rates, the boat line can assume this liability by including in their freight tariff a clause showing that those rates include 'marine risk' and this is frequently done.

"When a water carrier's rates do not cover marine risk the shipper should see that proper insurance is placed, which can be done either through his own insurance broker, or by asking the carriers to insure it for the shipper's account, which they will do, and collect the premium with the freight charges.

"We have an entirely different situation in connection with water-borne traffic in foreign commerce. The conditions of the bills of lading of the various boat companies are not uniform, although there is an effort now being made to make them similar under the Hague rules. The modification of these rules is still under investigation, and it is hoped that an agreement will soon be reached, and then a shipper will know the conditions under which his traffic is moving, without it being necessary for him to carefully examine all of the printed clauses on the ocean bill of lading.

"The Hague rules at the present time, as adopted by many of the foreign countries, and by some vessels under our own flag, do not protect the shipper to the extent that our domestic bills of lading do, and therefore it is necessary for a shipper to see that he has insurance to cover possible losses from all of the many causes from which the carriers are exempted.

"In connection with foreign traffic, where the freight rates are not governed by any such body as our Interstate Commerce Commission, it is important that the importers of tobacco appreciate the advantages that can be obtained by them in signing contracts, where possible, for you take proper action to protect your interests in case of loss or damage to your shipments.

"It may be that some of you have some specific problem on your mind relating to your traffic, or possibly it has been suggested to you by something that I have said, and if it is agreeable to your chairman, I will be very glad to answer, at this time, any questions, or join in any discussion covering problems of a general nature. Or, if you prefer, will be very glad to discuss your individual problems with you, at your convenience."

Unusually Enjoyable Banquet

What was voted as quite the most enjoyable banquet which the association has ever given, was held in the large ballroom of the Willard Hotel on Wednesday night, which was made doubly attractive by the presence of the ladies, who occupied boxes, and who were served a buffet supper.

The speakers of the evening included the Secretary of Agriculture, Henry C. Wallace; Director of the Budget, General Herbert M. Lord; Dr. Thomas E. Green, director of the American Red Cross; Joseph E. Davies, former chairman of the Federal Trade Commission;

JULIUS LICHTENSTEIN'S CONVENTION FACE—

the protection during a given period, usually a year, of certain freight rates. This is especially advisable at times of severe competition, or rate wars between different lines, such as has recently taken place on our Porto Rican traffic.

"The rail lines have a great many rules governing the packing of cigars and cigarettes, and these must be met fully, or the shipment will not be accepted for transportation, or if accepted, a heavy premium is added by way of a penalty to the freight charges. These rules were made primarily for the carriers' protection against pilferage by their own employes. It is undoubtedly true that the strapping, cording, and sealing, and the other precautionary devices do prevent some pilferage, but not to the extent to justify the additional cost to the shipper to meet these requirements.

"One of the main functions of your traffic department is to guard against the imposition of additional requirements, and to endeavor to simplify the existing requirements when that can be done, without sacrificing any necessary protection to the productions. There are a great many other features in connection with traffic movement that it might be advisable for me to call to your attention, but time will not permit.

"I have tried to impress upon you, particularly, the need of knowing that you do not pay more freight than that to which the carriers are entitled, and that

James C. Stone, president and general manager of the Burley Tobacco Growers' Co-operative Association; and Herbert Kaufman, the well known writer. H. H. Shelton made an excellent toastmaster.

Secretary Wallace's Speech

"Although representing only about one-half of one per cent of the cultivated crops of the United States, tobacco is one of the most valuable items of agriculture," Secretary of Agriculture Wallace declared in his address.

Secretary Wallace told the delegates that "the total value of the tobacco crop is exceeded only by corn, hay and forage, cotton, wheat, oats and potatoes. The United States leads the world in tobacco production. It is grown in forty-two states, although three states, Kentucky, North Carolina and Virginia, produce almost two-thirds of the total crop.

"Columbus found the American Indians using tobacco in all the forms in which it is now used, he said. It was the first article of export. In 1790 about three-fourths of the crop was sent abroad; at the present time 35 per cent is exported. About one-fourth of the crop is used for cigars, a like amount for cigarettes and the remainder for smoking and chewing tobacco and snuff. In 1910 only about five per cent of the crop was used for cigarettes.

"The Department of Agriculture gives much attention to tobacco growing," Secretary Wallace explained. "It has made extensive studies of soils required for various types of tobacco, has improved the cultural methods, better varieties, means of controlling disease and insect pests and has worked out new curing and handling practices. The department's work in developing the shade grown tobacco industry in New England and Florida has been most helpful. It has also developed varieties of Burley and other types which are resistant to root rot disease.

"The bulk methods of storing tobacco in the northern tobacco districts is credited to department workers. Studies of the kind and quantities of fertilizer best for various types of tobacco together with better cultural methods and varieties has resulted in increasing the average yield from seven hundred to eight hundred pounds per acre during the past twenty-five years. Studies of the effect of the length of day on the flowering and fruiting of plants promises to be very helpful to tobacco growers.

"In addition to trying to help the grower improve the quality of his crop and increasing the yield and helping develop better markets, the department is seeking also to help the manufacturer. For example, the growing shortage of cedar for cigar boxes and the increased price has forced many manufacturers to seek cheaper woods. These lack the quality of fragrance which makes cedar desirable. The department is trying to find ways to supply this fragrance through a specially treated paper insert and thus make it possible to use cheaper boxwoods."

General Lord's Remarks

The national budget was explained by General Lord as simply the ordinary, everyday, common sense of successful big business applied to the routine business of the United States, the biggest business in the world. He declared the creation of the Budget Bureau to be largely due to the efforts of various trade associations throughout the country, who realized the need and put their powerful influence back of it.

Among the savings effected by the operations of the Budget Bureau referred to by the speaker, was the cut of $200,000 through the cancellation of leases in Chicago by the Federal Real Estate Board, and $300,000 saved by the Federal Traffic Board "which is getting some sort of businesslike co-ordination between the various transportation agencies of the Government."

Through the operation of the Budget system, he said, the Administration hopes to balance the budget, with a surplus of $60,000,000 approximately over expenditures. All of the collecting agencies of the Government are being speeded up for the purpose of enabling the Government to show a balanced budget at the end of the fiscal year, on June 30.

General Lord further said:

"The National Budget is simply the ordinary, every-day, common sense of successful big business, applied to the routine business of the United States, which is the biggest business in the world. For many expensive, extravagant years, the United States Government operated without consideration of the need of a balanced budget, no attempt being made to keep expenditures within probable receipts. The Chamber of Commerce and other trade associations, however, realizing the need of a revision in the Government's methods of doing business, earnestly labored to develop public sentiment for a budgetary system for the National Government.

"The World War so emphasized the wisdom of this plan, that there was enacted into law the Budget and Accounting Act, which was approved by President Harding on June 10, 1921. This Act recognized the President of the United States as the head of the Goveernment's routine business organization, and gave him an agency styled the Bureau of the Budget, to carry out the provisions of the Act, which required scientific preparation of estimates for funds, and gave him an agency for the control and co-ordination of expenditures.

"Under this new system, the whole program of estimating for funds, and spend-

ing the funds so appropriated, is based on the need of a balanced budget. Under the old system, there was no restraint whatever upon the forty-three departments and independent establishments of the Government, in their calls upon Congress for funds. As a result of this lack of control, from 1890 to 1922, the estimates submitted to Congress called for twenty-three billions of dollars more than were actually appropriated. That condition no longer obtains.

"The experience of the present fiscal year relative to appropriations for the next succeeding fiscal year, 1924, makes an excellent illustration of the change in procedure, the amount submitted to Congress by the President, as prepared in the Bureau of the Budget, being approximately two hundred million dollars less than the amounts asked for by the various executive bureaus of the Government, and two hundred and thirty million dollars less than the amounts asked by the departments of the Government for the current fiscal year.

"At the beginning of this fiscal year, the Government was faced with a rather extraordinary problem, in that the program of expenditure as prepared by the various departments called for $823,000,000 more than the expected receipts. In line with good business policies, the President announced that there must be a drastic revision downward of proposed expenditures, and an increase in every legitimate way possible of income from established sources of revenue.

"When the Budget was submitted to Congress in December last, as required by the Budget and Accounting Act, it gave a statement of the expected receipts and proposed expenditures for this current fiscal year. At that time the discrepancy had been reduced from $823,000,000 to $273,000,000. Today we confidently expect to balance the Budget, with a surplus of $60,000,000 approximately over expenditures.

"No effort is being spared by the Bureau of the Budget, acting as the agency of the President, to eliminate this threatened deficit. All expenditures are being carefully watched, curtailed or postponed wherever possible, while all of the collecting agencies of the Government are being speeded up for the purpose of enabling the Government to show a balanced budget at the end of the fiscal year, June 30 next.

"One of the great sources of waste in the Government has been the entire lack of team work, the departments and independent establishments operating without regard to any thought of unified purpose, and without regard to the possibility of any national policy. To bring about this necessary team work, so essential for efficient and economical operation of the Government agencies, there has been appointed under the Bureau of the Budget, an official styled a Chief Co-ordinator, and serving under him are eight important boards made up of details from the various departments of the Government, who develop policies that tend to bring into the Government what it has lacked all these years, that is, a broad, unified national policy—team work.

"Among these boards is the Federal Traffic Board, which is getting some sort of businesslike coordination between the various transportation agencies of the Government. This board has succeeded since July 1 of this year in effecting savings amounting to approximately $300,000. This amount does not include so-called paper savings, or savings due to more efficient and scientific methods within the departments.

"Other boards are the Federal Purchasing Board, the Federal Specifications Board, and the Federal Board of Contracts and Adjustments, which has to do with the introduction of businesslike methods of procurement based on standardized specifications, and standardized contracts, drawn along business lines, the aim being that the Government in all its procurement and construction activities may be able to obtain its supplies and services, and its construction, at as reasonable rates as private parties.

"Another board is the Federal Liquidation Board, which has co-ordinating control over the sale of the immense accumulations of war supplies which have been declared surplus and offered for sale. Still other boards are the Federal Board on Printing, Hospitalization, and Real Estate. The Federal Board on Printing has instituted economies in operation that have resulted in material savings. The Federal Real Estate Board has an interesting and important field.

"Although the Government is one of the largest owners of realty in the world, including office buildings, houses, warehouses, storehouses, railroads, wharves, and the like, until the institution of the Federal Real Estate Board there was no agency in the Government to see that it got the best distribution and use of its immense holdings.

"It frequently happened that in the same city one activity of the Government would have under its control unoccupied space, while another activity of the Government was renting space in the market. In Chicago, through this co-ordinating control, the Government was enabled to cancel leases amounting to something more than $200,000 annually.

"The Bureau of the Budget is in every sense of the word a non-political, impersonal, impartial agency. Its creation is largely due to the efforts of various trade associations throughout the country, who realized the need, and put their powerful influence back of it. It was favored by both President Taft and President Wilson, and enacted into law by the members of both of the great parties in the House and Senate, passing the Senate without a dissenting vote, and only three voting against it in the House. It is, and should be, as impartial as an adding machine.

"The Bureau of the Budget has no policies of its own; it carries out the policies of the administration, as represented by the President, who is recognized, as he should be, as the head of the Government's routine business organization."

Dr. Green Made Patriotic Speech

Dr. Green, of the American Red Cross, made a red blooded Americanization speech, in which he took occasion to call particular attention to the red propaganda which is being spread throughout the country. He caused great rounds of applause, when he took occasion to thank all branches of the tobacco industry for the part they had taken in winning the great war. He thanked the convention, on behalf of the Red Cross, for the help which had been given his organization. Nothing, he said, helped the convalescent soldier more than the cigarettes. The cigarettes and "good American smoking tobacco," did a very great deal to help win the war. The tobacco sent overseas was a token of sympathy to the thousands across the water, when they were most in need of something to quiet their nerves.

Dr. Green called the convention's attention to the fact that some $14,000,000,000 worth of agricultural products were produced on the farms of the United States last year. He also said that, during the past year, the American people have sent more than $300,000,000 across the seas for humanitarian purposes.

J. C. Stone Talked on Co-operative Marketing

James C. Stone, of the Burley Tobacco Growers' Co-operative Association, spoke at some length on tobacco conditions in the fields. He also called the convention's attention to the fact that he appreciated being at the convention, because he thought it made for closer co-operation between the tobacco manufacturers and the growers. There should be more co-operation, and more get together meetings, he said, so that one branch of the industry would know what were some of the problems of the other branches of the industry.

The interest of the tobacco growers, Mr. Stone said, are the same as the interest of the manufacturers. The tobacco producer, he said, has had all along the wrong impression of the manufacturer. The various branches of the industry must get around the table, and come more closely in touch with each other for the benefit of all concerned. The theme of the whole convention, Mr. Stone said, seemed to him to be one of co-operation, and why not co-operate with the grower as well as with each other. He called the delegates' attention to the fact that they are interested in the welfare of their own employees in the way of welfare work. They should be interested in like manner, he said, in the welfare of the workers of the tobacco fields.

The Tobacco Merchants Association banquet, held in the large ball room of the Willard Hotel, Washington, was the most successful event ever held in the history of the Association

Davies Spoke on Monopolies

Mr. Davies spoke at some length on monopolies, their evils and possible future legislation. He said that monopoly means state socialism. Competition, he said, must be given a fair chance. He caused a great wave of enthusiasm when he said that legislation must be passed, sooner or later, that will allow some governmental agency to tell the business world just what can be done in advance to stay within the law instead of waiting until an act is committed, and then say that that act was unlawful.

The souvenirs given out at the banquet this year were as usual both useful and ornamental. They were desk clips and calendars combined, capped by the insignia of the association. Good music was provided during the course of the dinner.

Report of Cigar Manufacturers' Committee

The committee representing the cigar manufacturers, cigar leaf dealers, box makers, lithographers and allied interests met in the convention hall, Wednesday afternoon, at 2:30 p. m., Henry G. Wemmer in the chair. Mr. Wemmer briefly and

interestingly introduced the principal speaker of the afternoon, Herbert Kaufman, who thereupon discussed the cigar business from the standpoint of the consumer. The gist of Mr. Kaufman's address was that the cigar trade should put its house in order, simplify and standardize its production, educate the distributing agencies of the trade and then unite in a campaign to familiarize the public with the merits of cigars. Mr. Kaufman carried on a running debate with various members of the trade present, and it was unanimously agreed that Mr. Kaufman was remarkably well posted on cigar trade matters.

The following subjects were discussed:

Light Wrappers

Milton Wertheimer, of Wertheimer Bros., suggested that the old Claro, Colorado Claro, Colorado Maduro and Maduro markings be abolished and other terms indicative of the character of the cigar—rather than the color of the wrapper—be substituted.

Julius Lichtenstein, speaking from his experience as a leaf tobacco merchant, explained that the lack of demand for medium and dark wrappers caused unnaturally high prices for light wrappers, contributing in this way to the high cost of cigars.

Julius B. Annis recounted some interesting experiences of competition between cigar manufacturers upon the basis of furnishing light wrappers.

No specific recommendation was made with respect to this subject.

Big Sizes

Benjamin R. Lichty suggested that as the Standardization Committee of the Chamber of Commerce of the United States had had experience in the standardization of styles, etc., in other industries, their co-operation would be helpful in the tobacco industry, and that consequently this committee be invited to cooperate with a similar committee appointed by this association. This motion was adopted.

Harvey L. Hirst, chairman of the Slogan Committee, reported that prizes of $250, $150 and $100 had been awarded for slogans submitted in a contest recently held; that in the view of the committee none of the slogans selected were suitable for adoption by the industry at large; that a good slogan would be of inestimable benefit to the industry.

F. J. Rose then addressed the committee on co-operative advertising, outlining the campaign of the paint and varnish trade.

Shipping problems of the industry were discussed in an interesting speech by George C. Lucas, head of the T. M. A. Traffic Bureau.

Chairman Wemmer announced that, subject to the will of the committee, a sub-committee would be appointed with instructions to consider how best to achieve the objects brought out in the course of the addresses of the afternoon.

Harvey L. Hirst thereupon moved that an Educational Committee be named to consider how best to stimulate the consumption of cigars, and this motion was carried by acclamation.

The committee thereupon adjourned.

Resolution on Stimulating Consumption

The resolution adopted providing for the appointment of an educational committee to consider the problem of stimulating cigar consumption is as follows:

Whereas, the production and consumption of cigars for a great many years past has not been increasing in proportion to the increase of population in this country, but on the contrary has been standing still while other forms of tobacco have shown enormous increases, and

Whereas, the present situation appears to be more acute than was every known before in the history of the industry, and it is certain that unless radical steps are taken to remedy the difficulties that have been retarding the growth of the manufacturer and consumption of cigars, the industry will, within a few years, decline to much smaller proportions, THEREFORE BE IT

RESOLVED, that the chairman of this committee be empowered to appoint a sub-committee, consisting of cigar manufacturers and cigar leaf dealers, of which committee the chairman of the meeting shall be an ex-officio member, whose duties it shall be to consider the broad problems that confront the industry and to take such steps as in their opinion shall be deemed proper and advisable to stimulate the consumption of cigars in this country, among the points to be considered by them being the question of light colors, big sizes, prices, standardization of sizes, and the advisability of a co-operative advertising campaign to educate both the cigar dealers of the country and the smokers as to the true facts of the industry.

Committee

Julius Lichtenstein, George W. Van Slyke, Benjamin R. Lichty, Jacob Mazer, Mortimer Regensburg, Malvin Haas, D. Emil Klein, George H. Hummel, Samuel Bayuk, R. E. Christie, Fred Hirschhorn, Julius Klorfein, Joseph F. Cullman, Jr., Julian S. Bach, Nathan I. Bijur and John H. Duys.

On Standardization

RESOLVED, that the Standardization Committee of the Chamber of Commerce of the United States be invited to co-operate with the Educational Committee of this organization with respect to standardization of cigar sizes and simplification of the cigar business.

Report of the Leaf Tobacco Trade Committee

The committee representing the leaf tobacco trade met in Room 1003, Wednesday afternoon at 3 o'clock, Joseph F. Cullman, Jr., acting as chairman in the absence of W. H. Winstead. The meeting had been under way about ten minutes when Dr. Julius Klein, the principal speaker of the occasion, arrived, and, out of deference to him, discussion was temporarily suspended to give the distinguished visitor an opportunity to deliver his address.

Mr. Cullman then introduced Dr. Klein, director of the Bureau of Foreign and Domestic Commerce, who, in an interesting and very enlightening address, developed in greater detail some of the ideas expressed earlier in the day by the Honorable Herbert C. Hoover, Secretary of Commerce, relative to the position of tobacco in international trade and the possibilities for greater increase in the exportation of this commodity.

Dr. Klein's Address

Dr. Klein spoke about the institution of the new tobacco division in his Bureau and the great work it proposes to do for the benefit of the American Tobacco Industry in foreign markets. He said the new department plans to make a complete investigation of international trade in tobacco covering among other important phases, the following:

Imports and exports of all countries, pre-war and post-war market trends, methods of distribution, a comprehensive survey of the fifteen most important government tobacco monopolies, and a study of methods of sale, financing and warehouse facilities in all foreign tobacco markets.

Enough cigarettes to encircle the globe 26 times, if laid end to end on the equator, were manufactured in the United States in the first three months of 1923, declared Dr. Klein.

In round figures, cigarettes made in America in January, February and March this year, numbered fifteen billion, compared with ten billion in the same months of 1922. This fifty per cent increase in cigarette production and consumption, says Dr. Klein, is partly responsible for the fact that the greater part of the 1922 crop of burley and bright flue-cured tobacco has passed from the hands of growers at prices approximately five cents a pound greater than those which prevailed in the sale of the 1921 crop, despite a pronounced increase in production of both these types of tobacco. Another important factor in the price increase, Dr. Klein remarked, is the improved economic condition of Continental Europe and the pronounced appreciation of the English pound sterling, which has resulted in a better demand for our cigarette and smoking tobacco abroad than in 1919, 1920 or 1921.

The destruction of vast stocks of tobacco during the Græco-Turkish War in Asia Minor has also been reflected in our markets for these tobaccos, since it has been determined that our imports of the Turkish type of tobacco will be much smaller than in former years and will be replaced to a great extent by domestic tobaccos. Although a 10 per cent increase in production in 1923 is predicted by crop experts, the demand for these tobaccos continues strong at former prices.

The market for dark-fired tobacco of Kentucky and Virginia has not shown a proportionate increase in price over last season, but, Dr. Klein asserted, there need be no apprehension as to the successful sale of this tobacco if ingenuous methods of selling are employed. Practically all the old stocks of desirable cigar leaf have been absorbed by the trade, and in the face of increased production of almost all types of cigar leaf, except Connecticut, the demand seems strong at better prices than obtained in the sale of the 1921 crop. It is believed that the evolution in the marketing system which has been effected in many producing districts has been an important factor in advancing the price level for this crop of tobacco.

Our average annual exports of leaf tobacco for the five-year period, 1918-22, has been 42 per cent of production. There are encouraging indications, according to Dr. Klein, that exportation can be increased, and that loss of it will pass through the hands of foreign intermediaries. Some of our enterprising exporters have developed valuable direct connections in Scandinavia, Czechoslovakia, and Poland, and the new Irish Tariff is likely to cause large exports of leaf directly to that country, instead of through English agents, as formerly. Importation of cigarette and smoking tobacco by China since the prohibition of the use of opium has been constantly increasing and is destined to continue to increase. American tobaccos have become very popular in South America, particularly in Argentina and Uruguay and some parts of Brazil, and it is believed that if our exporters cultivate the markets of these countries, and of Mexico, good results will follow. Spain and Portugal also appear capable of cultivation as markets for cigarette and smoking tobacco.

Following Dr. Klein's address, which was warmly applauded by the committee, there took place a general discussion of the various topics outlined for the consideration of the committee, and much valuable information regarding the subjects of export trade, standardization of types and grades of tobacco, warehousing, etc., was exchanged.

The Leaf Tobacco Committee was highly pleased in being given an opportunity at the convention to talk over its particular problems, and commended Mr. Dushkind and the T. M. A. for their thoughtfulness in having included such a meeting in their convention program. This expression of thanks to Dr. Julius Klein for his work in the interest of the leaf tobacco trade, and to the T. M. A. and its managing director, as well, found more concrete expression in resolutions, for the adoption of which, motions were made and passed unanimously.

Resolution of Thanks to Dr. Klein

The resolution adopted expressing thanks to Dr. Julius Klein and the Bureau of Foreign and Domestic Commerce for their co-operation with the Leaf Tobacco Trade is as follows:

Whereas, the American Leaf Tobacco Trade has for many years been in greater need of ready information relative to conditions in foreign markets, and

Whereas, there has been inaugurated in the Bureau of Foreign and Domestic Commerce, of the Department of Commerce, a Special Tobacco Division to supply the American Leaf Tobacco Trade with prompt and reliable information on this very important matter, and

Whereas, the Leaf Tobacco Trade has been signally honored by the presence and offer of every co-operation by Dr. Julius Klein, director of the Bureau of Foreign and Domestic Commerce,

THEREFORE, BE IT RESOLVD, that a concrete expression of the thanks of this committe be sent to Dr. Klein and an expression of our whole-hearted reciprocation of co-operation for his splendid work in our behalf.

Resolution Thanking Mr. Dushkind

The resolution adopted expressing the gratification of the Leaf Tobacco Trade Committee to Mr. Dushkind and the T. M. A. reads:

Whereas, the opportunity afforded the

Leaf Tobacco Trade by Charles Dushkind and the T. M. A. to meet in special conference at the T. M. A. convention for a discussion of its problems has been of particular and lasting benefit to our trade, Therefore Be It

RESOLVED, that the Leaf Tobacco Trade Committee extends its sincere thanks to Mr. Dushkind and the T. M. A. and assures them of its hearty co-operation in their every endeavor to advance the interests of the industry.

Resolution Adopted by Jobbers

Resolution adopted at jobbers' meeting held under auspices of National Wholesale Tobacconists' Committee:

Whereas, the unfair practice has developed in the tobacco industry whereby by means of special discounts, rebates, concessions or allowances, jobbers are inducing and encouraging retailers to sell staple brands of cigars, cigarettes or tobacco at abnormally low prices, which are insufficient to cover the cost of the merchandise plus operating expenses, for the purpose of destroying competition in the retail trade, and for the purpose of injuring or destroying such brands, thereby lessening competition among producers or manufacturers, and

Whereas, in various communities there has developed among certain jobbers and retailers a practice of selling staple brands of cigars, cigarettes or tobacco of standard values below the cost of the merchandise plus operating expenses for the sole purpose not of meeting legitimate competition, but of destroying, injuring and lessening competition, and

Whereas, certain jobbers and retailers who handle a wide variety of commodities, besides cigars, cigarettes and tobacco, have engaged in a system of unfair price discrimination in that they are selling below the cost of the merchandise plus operating expenses, certain standard staple brands of cigars, cigarettes or tobaccos for the purpose of stimulating sales of other commodities than tobacco upon which they make up the losses sustained on their sales of tobacco products. Such practices being indulged in with the purpose and effect of injuring and lessening the competition of those engaged exclusively in the tobacco business, and

Whereas, by reason of these practices the wholesale tobacco business has become demoralized to such an extent that commercial ruin and disaster are facing many of the tobacco jobbing concerns and that the very existence of that branch of the tobacco industry is threatened with destruction, as a result of which the established channels or avenues of distribution which are indispensable in the maintenance of the competitive system, both among manufacturers as well as among retailers in the tobacco business, are likely to be exterminated, and

Whereas, we recognize that in the conduct of our business and in our relations with our competitors and our customers, justice and fair dealing should characterize every transaction, now therefore, be it

RESOLVED, that the National Wholesale Tobacconists' Committee condemns the aforesaid practices, and be it further

RESOLVED, that, recognizing that every tobacco dealer must enjoy the fullest freedom of individual action to determine for himself all questions of selling prices, as well as all policies of competition, and avowing its position in such matters to be that of the strictest observance of the law, we hold that selling staple brands of cigars, cigarettes, or tobacco of standard value below cost as an inducement to purchase other commodities, such as groceries, drugs, candies, and other articles; or for the purpose of stimulating sales of privately owned or controlled brands; or with a view to inducing or encouraging retailers to slash retail prices on leading brands; or to use any staple brand of cigars, cigarettes, or tobacco as a leader—a fighting brand—selling it below cost, in order to divert trade from competing concerns; or selling, as regular standard goods, stocks which are stale, damaged, or deteriorated, and which were purchased as such, without clearly disclosing the fact to both retailer and consumer that such stock is not of the regular standard goods, constitutes unfair methods of competition, and be it further

RESOLVED, that the word "cost," as referred to in the within preambles and resolutions, is defined to mean the actual net purchase price of the merchandise plus all actual charges applicable thereto, together with a correct proportion of all expenses, overhead, and operating charges incurred by each merchant in the carrying on of his own business, including wear and tear, interest on money borrowed or invested, losses on bad debts, rent, taxes, insurance, office, clerical and selling expenses and fair salaries to proprietors who give their time and attention to the business, and be it further

RESOLVED, that these preambles and resolutions be respectfully submitted and filed with the Honorable Federal Trade Commission, and be it further

RESOLVED, that the presentation of these resolutions and subsequent action looking to the making of them effective be delegated to the Executive Committee of the National Wholesale Tobacconists' Committee, including the General Counsel, Mr. Charles Dushkind and counsel, Mr. Joseph E. Davies, with full power to act.

Resolution by Committee on State of the Industry

Whereas, the salesmen connected with the Tobacco Industry coming in contact as they do, with the great army of retailers, are thus in a position to exercise large weight and influence upon the trade in regard to all matters that are of common interest to the entire industry, and

Whereas, it is manifestly the policy of the Tobacco Salesmen's Association of America to promote the general welfare of the tobacco industry and to co-operate in all movements looking to the protection of the industry from all sorts of hostile actions, now therefore, be it

RESOLVED, that the Tobacco Merchants' Association of the United States in convention assembled expresses its grateful appreciation of the co-operation of the Tobacco Salesmen's Association of America in all activities tending to promote the general welfare of the tobacco industry, and be it

FURTHER RESOLVED, that these resolutions be spread upon the minutes of this meeting, and that a copy thereof be forwarded to the Tobacco Salesmen's Association of America.

Resolution Commending the T. M. A.

Whereas, at the last National Tobacco Men's Convention held in Washington, D. C., three years ago, a resolution was unanimously adopted designating the Tobacco Merchants' Association of the United States as the national organization of the tobacco industry to deal with all matters relating to the promotion of the general welfare of the industry and the protection of the industry from hostile attacks of all sorts, and

Whereas, the T. M. A. has acquitted itself in the performance of its functions in a most satisfactory manner, and has proven itself eminently capable and safely dependable as an institution truly representative of the tobacco trade in its entirety to safeguard the interests of the whole industry, now therefore, be it

RESOLVED, that we heartily commend the Tobacco Merchants' Association of the United States for its splendid activities in the interest of the tobacco industry and for the successful achievements that it has attained, and we reaffirm and ratify the resolution adopted at the last National Tobacco Men's Convention that the entire industry and each and every person, firm, corporation or association interested therein, connected therewith or allied thereto, ought to support and cooperate with and be guided by the T. M. A., or its Executive Committee in all its actions or activities, intended to combat, prevent or frustrate any attack upon the industry or any part, branch or division thereof, whether such attacks be in the form of hostile legislation, or in the shape of agitation or propaganda against the use of cigars, cigarettes, or any other type of tobacco or tobacco products.

The Election of Directors

The election of directors took place this morning, resulting as follows:

New Directors

H. H. Shelton, Esq., of Washington, D. C.

George W. Van Slyke, President, G. W. Van Slyke & Horton, Albany, N. Y.

J. A. Voice, Secretary, Pasbach-Voice Litho. Co., Brooklyn, N. Y.

Malvin Haas, of Haas Bros., Cincinnati, O.

Jacob Mazer, Secretary, Mazer Cigar Mfg. Co., Detroit, Mich.

Fred E. Barnes, President, Barnes-Smith Co., Binghamton, N. Y.

Aaron J. Bach, of Elias Bach & Son, New York, N. Y.

Karl Jungbluth, President, MacAndrews & Forbes Co., New York, N. Y.

Re-elected Directors

Maj. George W. Hill, Vice President, The American Tobacco Co., New York, N. Y.

William Best, Vice President, General Cigar Co., New York, N. Y.

Jesse A. Bloch, Vice President, The Bloch Bros. Tobacco Co., Wheeling, W. Va.

William T. Reed, President, Larus & Brother Co., Richmond, Va.

Jonathan Peterson, President, United States Tobacco Co., New York, N. Y.

George H. Hummel, Vice President, P. Lorillard Co., New York, N. Y.

James M. Dixon, President, Tobacco Products Corp., New York, N. Y.

A. L. Sylvester, President, American Cigar Co., New York, N. Y.

Charles J. Eisenlohr, Chairman of Board of Directors, of Otto Eisenlohr & Bros. Inc., Philadelphia, Pa.

Martin J. Condon, President, American Snuff Co., Memphis, Tenn.

Julius Lichtenstein, President, Consolidated Cigar Corp., New York, N. Y.

Henry G. Wemmer, Vice President, The Deisel-Wemmer Co., Inc., Lima, O.

A. L. Cuesta, Sr., President, Cuesta, Rey & Co., Inc., Tampa, Fla.

Daniel F. McCarthy, Secretary, H. Fendrich, Evansville, Ind.

Harvey L. Hirst, Vice President, Bayuk Bros., Inc., Philadelphia, Pa.

D. Emil Klein, President, D. Emil Klein Co., New York, N. Y.

Arthur M. Eisig, President, Metropolitan Tobacco Co., New York, N. Y.

Asa Lemlein, of New York, N. Y.

J. L. Graham, of R. J. Reynolds Tobacco Co., Winston-Salem, N. C.

William A. Hollingsworth, of New York, N. Y.

C. A. Speakman, Vice President, American Lithographic Co., New York, N. Y.

George Frings, President, Frings Bros. Co., Philadelphia, Pa.

S. P. Coe, Vice President, Faber, Coe & Gregg, Inc., New York, N. Y.

W. H. Winstead, President W. H. Winstead, Inc., Baltimore, Md.

Charles B. Perkins, President, Chas. B. Perkins Co., Boston, Mass.

Arthur Bachmann, President, S. Bachman & Co., Inc., San Francisco, Cal.

Alexander Herbert, President, Philip Morris & Co., Ltd., New York, N. Y.

W. W. Flowers, Vice Pres., Liggett & Myers Tobacco Co., New York, N. Y.

Delegates and Guests

Associations Represented

Cuban

Union de Fabricantes de Tobaccos y Cigarros, M. E. Canle.

United States

President Jesse A. Bloch's Address

Gentlemen of the Convention:

It gives me great pleasure to address so representative a gathering of tobacco men of the United States as that grouped in this Assembly Hall. It is needless for me to say that I appreciate the honor conferred upon me as President of the T. M. A. to call to your attention many vital questions affecting the tobacco industry in which we are all so greatly interested, and I assure you that it is with no little degree of trepidation that I approach the task. But convinced as I am that all of you are animated by the spirit of amity and mutual helpfulness, I have little fear that my appeals to you for hearty co-operation in the work we have to perform will be indifferently heeded. Gentlemen, I repeat, it is indeed a great privilege vouchsafed to me to address so intelligent a body of tobacco men as I see before me, and I do not hesitate to predict that your deliberations will be harmonious and friendly and result in enduring benefits to the entire industry.

Before entering upon the discussion of the affairs of our industry in which you are all vitally interested, I desire to pay a deserved tribute to my predecessor in the office of President of this Association—Charles J. Eisenlohr.

While Mr. Eisenlohr's record as President of the T. M. A. eloquently speaks for itself and needs no eulogy from me, we who know Mr. Eisenlohr and admire his qualities, realize to the full that the progress and growth of the Association since he relinquished the cares of his office, have been largely due to the solid foundation that he laid for the upbuilding of the Association.

Since our last convention we have also lost the invaluable services of Mr. Edward Wise, as Chairman of the Executive Committee, who has been ably succeeded by Mr. William Best, Vice-President of the General Cigar Co. In this connection, I cannot refrain from saying that Mr. Wise was a great force in the affairs of the Association from the date of its very inception, and until by reason of his new business enterprises he relinquished his duties as Chairman of our Board. We are indeed very much indebted to Mr. Wise for the splendid services that he rendered the Association, and, through it, the entire industry, and while we deeply regret that his retirement from the tobacco business necessitated the severance of his official connection with our Association, I know that you and all our members will join me in extending him the sincerest wishes of a grateful and appreciative organization, for unbounded success in all his future undertakings.

I shall have occasion, in the course of this report, to call to your attention the various problems that we may have to deal with at this convention. It will be your duty and mine to exercise the soundest judgment in the consideration of the problems that face our industry, to the end that its best interests may be advanced and our prosperity along the most substantial lines, be reasonably assured.

The State of the Industry

The tobacco industry, like every other industrial activity in this country, has undergone vital changes in the last few years, as a result of the readjustment of all industries from a war-time basis to peace-time conditions.

MILTON H. RANCK — (his pipe was too!)

I shall make no attempt to enter upon the realm of figures and statistics—nor is it at all necessary, for with the elaborate and detailed data, statistics, charts and analyses of the business conditions in our industry that are presented from time to time in the Tobacco Barometer published by the T. M. A., those who are interested therein may readily find this valuable information always at their disposal.

Consumption of our products has fluctuated with the trend of times and industrial conditions in general, but I am happy to state that with the improved industrial conditions now prevalent throughout the country, the consumption of our products is again growing.

So, too, the prices of our finished products have been forced down and this, in spite of the fact that the high tax rates imposed by the War Revenue Law are still in force, and that the cost of labor, as well as the cost of raw material are still much higher than in pre-war times.

The marketing of leaf tobacco also has undergone quite an evolution. Co-operative growers' associations have been formed in the large tobacco growing districts, and instead of the old method of disposing of tobacco, a great many farmers are now selling their products through co-operative sales organizations. This new method of trading may, however, be said to be still in its experimental stages, and the entire industry is watching its progress with the keenest interest.

There is one branch of our industry, namely, the distributing branch, which is unfortunately in a serious predicament, due to ruinous and cut-throat price cutting. This subject is of such vital importance and so difficult to deal with that I shall presently discuss it in a separate chapter.

The Cigar Business

Although I am not a cigar manufacturer, I trust that I may be pardoned, as President of this Association, which embraces every branch of the industry, for presenting a few observations on the cigar business, which, it is to be regretted, has not been keeping pace either with the progress of the other branches of our industry, or with the growth and progress of other industries in this country.

It has sometimes been contended that the consumption of cigars has been arrested because of the increased popularity of cigarettes; that cigar consumers are constantly shifting to cigarettes; and that the cigarette business is steadily growing at the expense of the cigar business.

In my judgment this is a much mistaken idea. A mere glance at the figures of the respective totals of consumption of both cigars and cigarettes is sufficient to demonstrate that if, as it is sometimes said, the increased consumption of cigarettes is due to the defection of cigar smokers, there would long ago have been nothing left of the cigar business. For manifestly even if the entire army of cigar smokers who normally consume seven billions of cigars a year would have turned to cigarette smoking, they probably could not consume the forty billion increase in cigarettes within the last decade or so. But the cigar business, although it is unfortunately not growing, still retains its following to the extent of 7 billions a year. Where then did the increased cigarette consumption come from?

As a close observer of all branches of our industry, it is my sincere conviction that the cigarette industry is the fountain source that constantly supplies the cigar trade, as well as the pipe tobacco business, with new consumers. As smoking is becoming more popular from year to year, and as there is probably a yearly addition to the great army of tobacco users of approximately a million young men who attain maturity, the cigarette is the form of tobacco that gets the first call in the great majority of cases, for usually the new tobacco consumer begins with the cigarette, but eventually he adds also the other forms of tobacco, the cigar for one occasion, the cigarette for another occasion, and the pipe for a still different occasion.

Thus, with the multitude of new consumers that the cigarette industry is apparently creating from year to year, cigar smoking, as well as pipe smoking, should secure their proportional shares of increased business.

Pipe smoking, it may be said, apparently does get a fair measure of the increased business, but unfortunately cigars seem to be lagging. What is the cause of this? Is there anything wrong with the cigar business? Is there any reason for the cigar business failing to attract more of the new consumers than it seemingly does?

These questions require considerable study and most thoughtful consideration. With the large assemblage of leading factors in the cigar trade that we have here, there is a splendid opportunity to deal with the cigar problem in a manner that should be productive of beneficial results.

As I am not a practical cigar man, I can, of course, venture no suggestions, but it seems to me that the cigarette business, instead of being a detriment to the cigar business, is in fact constantly creating new consumers, the great majority of whom, although indulging perhaps exclusively in cigarettes at the start, in due time add cigars as well as pipes to their smoking requirements; that instead of diminishing cigar consumption, the cigarette is from time to time opening up new fields, new avenues, and new outlets for the other forms of tobacco; and that instead of the cigarette being the cause of the apparent retrogression of the cigar business, there may perhaps be something wrong, something faulty, or something lacking in the cigar business itself.

It is my firm belief that an interchange of views along these lines will soon lead to the finding of ways and means to advance the cigar business, strengthen its position and enlarge its output.

I do hope that the deliberation of the cigar trade's representatives at this convention may lead to increased prosperity in the cigar branch, as well as in all other branches of our industry.

The Jobbing Situation

The T. M. A. may proudly point to its past record of activities and achievements in the interest of the industry which it represents. There are, however, certain trade problems and trade evils that neither the T. M. A. nor any other association, strictly observing the law of the land, can undertake to eliminate.

One of these evils is "price-cutting." This has become particularly intense in the last few years. Undoubtedly in most cases it was precipitated by the general downward movement of prices necessarily brought about by the readjustment of commerce from the war basis to peace time levels.

However, the slashing of prices of leading

New Crop Sumatra Tobacco

Do you realize that 95 per cent of the time of our principals, representatives and employees, is occupied in the buying, selling and handling of Sumatra and Java tobaccos?

This makes a business of 15,000 to 18,000 bales per annum, possible, a record that has never been surpassed by any one firm at any time.

H. DUYS & CO., Inc.

142 WATER STREET NEW YORK

American Headquarters for Sumatra and Java Tobaccos

obacco brands as a means of attracting trade or other commodities, has been the principal ause of all price-cutting eras in the tobacco ndustry.

As a result of the ruinous price-cutting conitions in the jobbing trade numberless comlaints have poured into the T. M. A. from all arts of the country. For while the T. M. A. s neither a jobbers', nor a retailers', nor a nanufacturers' association—it being an instituion supported and maintained by tradesmen in ll branches of the tobacco and its allied indusries, from the grower of the raw leaf to the nan who hands out the finished products—and hile its functions are strictly confined to the romotion of the general welfare of the industry as a whole, with no power or authority to egulate trading methods in any branch of the ndustry, yet as a National Tobacco Men's Intitution it was not unreasonable for jobbers to ook to it for a remedy in a situation of this ind. Accordingly, the appeals that came to the '. M. A. from struggling jobbers throughout ie country were indeed appalling.

But unfortunately, as it was not and is not ithin the functions of the Association to preribe or regulate trading methods, and, as assoiations are precluded by law from prescribing, egulating or controlling trading methods which ould in any way limit or restrict the freedom f any manufacturer, producer, jobber, or reiler to sell or dispose of his goods in any ay, or upon any terms, or at any price that e may see fit to demand, the T. M. A. could rovide no remedy in the premises.

Petition to Federal Trade Commission for "Trade Practice Submittal"

However, it being universally recognized that uinous price-cutting is an unfair method of ompetition, especially in instances where cerin commodities are sacrificed for the purpose f stimulating business in other comodities, and s the Federal Trade Commission is not only mpowered, but directed by statute "to prevent nfair methods of competition," Mr. Charles ushkind, our Counsel and Managing Director, onceived the idea of appealing to the Federal rade Commission for relief in this distressful tuation.

Briefly, the plan worked out by Mr. Dushind was to call a conference of representative obbers and to petition the Federal Trade Comission for what is technically termed a "Trade ractice Submittal," that is, a procedure deigned, to quote the language of the Commision.

"To eliminate, simultaneously and by the onsent of those engaged in a given industry, ractices which, in the opinion of the industry s a whole, were unfair.

"In such a situation the Commission therere may invite representatives of the entire ndustry to meet with it and discuss frankly nd fully all practices which the members of ne trade may have questioned. The Commison itself makes no decisions or ruling, but reuests the members of the trade out of their xperience and technical knowledge to put their onclusions respecting such practices as they reard as unfair, into concrete form."

Obviously, the selling of staple brands of igars, cigarettes or tobacco for less than the anufacturers' prices, plus actual operating and verhead charges, for the purpose of destroying r lessening competition, constitutes an unfair ethod of competition and is therefore one of ne prevalent unfair practices that may be liminated by means of such "Trade Practice ubmittal."

Accordingly such conference was called and eld in Washington on April 25 and 26, 1922. o thoroughly were the jobbers impressed with ne feasibility of Mr. Dushkind's plan, and its nportance, that they formed a permanent oranization, known as the National Wholesale obacconists' Committee, and charged it with ne duty of prosecuting the plan outlined to ne fullest extent. The Hon. Joseph E. Davies, ormerly Chairman of the Federal Trade Comission, was retained as special counsel to be ssociated with Mr. Dushkind in the presentaon of the case.

The entire body of the conference appeared efore the Chairman of the Commission to preent their petition, and the members were more an delighted when Chairman Gaskill, in reiving the petitions, delivered a most interestg and encouraging address, saying among other ings that, speaking for all the members of e Commission, he was glad indeed that so presentative a body of merchants had seen fit appeal to the Commission as a possible means r the solution of their trade problems and fficulties.

ommission Denies "Trade Practice Submittal" and Proceeds Against Jobbers Association

You can readily imagine our intense disapointment when a few weeks later the Commison announced its decision denying this petion.

No reason has officially been assigned for the enial of that application, but it seems that the ommission thought that this proceeding might some manner interfere with its investigans then under way.

However, the efforts to secure a legal and rmanent remedy for the conditions in the bbing trade were immediately thereafter rewed and an application for a rehearing and reconsideration of the Commission's decision as promptly presented.

While this second petition was pending, the Commission announced the issuance of complaints against certain tobacco jobbers and jobbers' associations, as well as against manufacturers, charging violations of the law in employing co-operative methods to maintain re-sale prices of tobacco products.

Since the original jobbers' petition was apparently denied because it was likely to interfere with the Commission's investigations then under way, it was thought that with the institution of these price maintenance cases, the way had been made clear for the Commission to consider the other angle of the situation and that it would then, in fairness to the jobbing trade and to the tobacco industry as a whole, apply its constructive powers by means of a Trade Practice Submittal, or otherwise, that the middle man in the tobacco business might be saved from ruin and destruction.

Unfortunately, however, the Commission again saw fit to refuse to come to the rescue of the army of struggling jobbers and denied the petition for a rehearing and reconsideration, thus leaving the jobbing trade in a thoroughly helpless condition.

Since then the Commission has issued a number of additional complaints against jobbing concerns and associations in different parts of the country, including also manufacturers of cigars as well as of cigarettes and tobacco, charging, in substance, price maintenance combinations which are alleged to have been formed prior to the decision in the Beech Nut case. All of these cases are still pending.

While, of course, no forecast can be made as to the judgments, orders or decrees that these cases may evoke, nor does it matter much, for the industry is suffering from price demoralization which the jobbing trade has petitioned the Commission to remedy, rather than from price maintenance against which these proceedings are directed. However, it is certain that the jobbing situation has become more acute than ever and has been growing more serious from day to day, and unless the Commission shall soon see its way clear to extend some constructive relief in the premises, it is difficult to predict what the existing condition may lead to.

What Is the Remedy?

I am frank to confess that I can see no *complete* remedy except by legislation—I do, however, see the possibility of a partial remedy in a proceeding before the Federal Trade Commission.

Price maintenance, as has been pointed out, is practically impossible except by legislation, but ruinous price-cutting, selling staple commodities below cost, undoubtedly constitutes an unfair method of competition which it is well within the power of the Commission to halt. This proposition seems to be upheld by authorities of great weight, but we need no better authority than Commissioner Gaskill who, in a speech delivered some time ago in Chicago, said:

"Because I believe that selling below cost is an unfair method of competition I believe that a group agreement not to practice this method of doing business is a lawful agreement.

"One may not conduct his own business so as to injure another. Selling below cost with compensatory gains in an allied line is the use of the seller's property in a way which clearly injures his competitor.

"Habitual selling below cost as a method of doing business is in my judgment an unfair method of competition.

"The elimination of sales below cost by no means implies a stabilization of prices nor a uniformity of prices. It is when properly applied in no sense a restraint upon competition. Costs will vary and prices should vary as costs vary within market limitations. But the application of the principle 'no sales below cost' by each to his own business is simply the recognition and adoption of the fundamental principle of the competitive system."

No sale below cost, seems to be all we may expect under the existing law. Cost means, of course, the price of the merchandise, plus operating expenses.

This may not supply a wholly adequate remedy, but if the practice of using the leading brands of cigars or cigarettes as bait to stimulate other sales should be stopped; if the dealer, whether tobacco man, grocer, druggist, or any other merchant, should be obliged to add operating expenses to every brand of cigars, cigarettes, or tobacco before fixing the selling price, the jobber will make his fair profit at least on the non-slaughtered brands and realize, at least, his operating expense and overhead on the fighting brand.

The Manufacturers' Position

Virtually in all industries dealing in proprietary or trade-marked commodities, distributors have habitually been looking to the manufacturer for protection of resale prices. But it is no longer practicable for manufacturers to maintain the resale prices of their products. Surely no manufacturer can fail to realize that the progress of his business depends in a large measure upon the success of the distributers of his products, whether jobbers or retailers, and upon their good will and their friendly interest in the brands they are selling. This is particularly true in the tobacco business where the jobber performs an indispensable function and renders a needful service to both the manufacturer and the retailer. With an army of over 500,000 retailers selling tobacco products it

A Cigar

of *rare excellence*

Millions of smokers insist on Manuel because they know from experience that it always delivers a distinctive satisfaction, which they can obtain in no other cigar.

In the making of Manuel, only certain selected tobaccos can be used to produce the quality that meets the high Cressman standard, and we respect the confidence that Manuel smokers place in us by adhering strictly to this high standard.

nust be perfectly obvious that the wholesale gencies are indispensable in reaching this vast rmy of retailers. But I repeat that it is no nger practicable for the manufacturer to enorce a system for the maintenance of the reale prices of his products.

While the Supreme Court has reaffirmed the nherent right of merchants or manufacturers trade or refuse to trade with any person hey may see fit, the Court has placed such estriction or limitation upon the methods or neans that may be used in maintaining resale rices that it is practically impossible for manuacturers to effectively control the resale prices f their products, without running counter to he law.

For under the decision of the U. S. Supreme ourt in the Beech Nut case the producer's ight is but a bare privilege to refuse to sell to hose who fail to maintain resale prices, without the right to adopt co-operative methods of ecuring information and making his wishes nown, that might make this right to refuse to ell, available and effective.

Moreover, aside from the legal phase of the ituation, and considering it only from a busiess point of view, it must be perfectly obvious hat no single manufacturer can undertake to arry out a policy of price-maintenance while is competitors adhere to a different policy, for hat must inevitably happen to any brand hich, by reason of the manufacturers' price-naintenance policy, should be sold at a higher rice than its competitive brands is a question eadily answerable by all who understand the orking of competition.

Furthermore, do we tobacco men, whose comodity is habitually used as price-cutting bait o stimulate sales of other lines of merchandise, ave to be told that a protected price on one rand only means more price-cutting on its ompetitive brands?

Would it be of any benefit to the dealer to nake 10 per cent. on one brand, if in order to nake the 10 per cent. he would be forced to ell the competitive brands at cost or below ost?

Surely, the manufacturer of the price proected brand cannot undertake also to control he prices of his competitive brands. He must xercise the greatest care to operate strictly within the narrow limitations of the law in proecting the price of his own brand, or the Federal Trade Commission will soon place him under an order to *cease* and *desist*. How much ooner would the Federal Trade Commission roceed against him, and how much more strinent would be the application of the law, if he ttempted to control the selling prices of his ompetitor's goods?

A separate meeting of jobbers has been arranged for to be held entirely under the auspices of the National Wholesale Tobacconists Committee, their own organization formed last year t the Washington Conference. I know that it s the genuine wish of the entire industry that the jobbers may find a happy solution of their difficult problems.

Anti-Tobacco Agitation

And now we turn to an old subject, a theme which is as aged as the divine plant itself dating back almost to the period of the discovery of tobacco itself.

At all times, throughout all the ages, and in all parts of the world, there always existed, and probably always will, certain elements which found fault with almost everything that contributed to men's solace, comfort and enjoyment of life, even the most wholesome and legitimate gifts of nature to mankind.

Accordingly, tobacco has been one of the objects of attack almost from the instant when it was first introduced to the world. However, with all due respect to the honest, well-meaning and fair-minded, but ill-advised and misinformed, reform elements, it must be said that tobacco has not only survived every attack that was ever made upon it, but it is most significant that the more bitter the opposition the more universal became its use, and the more widespread its consumption.

In the United States, for more than fifty years, tobacco has been the subject of attack and more or less hostile legislation.

While at first they succeeded in a measure in stirring up some public agitation against the cigarette and in some instances have even persuaded some of the legislative bodies to take action tending to condemn the use of cigarettes, their sensational statements when finally submitted to the acid test of experience and science, were completely refuted and totally discredited.

As a result of scientific investigations conducted years ago which emphatically refuted and exploded the baseless and groundless arguments against tobacco, the tobacco industry and the millions of tobacco consumers enjoyed comparative rest for quite a number of years. But the passage of the 18th Amendment seems to have left many of the professional antis without mission, with the result that they lost no time in switching their activities not only to tobacco but also to tea and coffee as well as to many harmless and wholesome amusements that are universally enjoyed by our citizenry.

Intensive drives against every form of tobacco were inaugurated in all parts of the country. At this time they made no secret of the fact that their object was the annihilation of tobacco in all its varieties. To quote from one of their official bulletins:

"A campaign must be waged against the cigarette, the pipe and the cigar until tobacco is buried in the grave with John Barleycorn."

Scandalous statements, maliciously fabricated reports, and slanderous stories have been widely broadcasted all over the country; a systematic propaganda of shameful abuse and vilification has been carried on through the press and from the platform and by mail on a most extensive scale; State Legislatures have been worked upon by experienced agitators of anti organizations and every form of attack that the well trained leaders of the intolerant forces could possibly think of has been made upon our industry.

Tobacco Wins Decisive Victory

But I am happy to be able to report to you that in this last war against tobacco as in all previous wars, the tobacco industry came out with a glorious victory. The tobacco industry, or I should rather say, the freedom-loving people in this country, have won such a decisive victory that it should serve to discourage similar movements for many years to come. The enemy was not only repulsed in every section of territory that it sought to gain, but we recovered four of the six states that the antis succeeded in placing in the prohibition column many years ago.

Thus in 1918, when the present anti-tobacco movement was inaugurated, six states, to wit: *Nebraska, Tennessee, Iowa, Arkansas, North Dakota* and *Kansas,* had incorporated cigarette prohibition laws in their statutes. Today, North Dakota and Kansas are the only states that still retain their prohibition statutes, the other four states having obliterated them from their laws.

But what is particularly gratifying is that in all our activities to meet the attacks of the antis we have employed none but clean, dignified, open and above-board and straightforward methods. We have subsidized no groups or organizations, have used no subterranean devices, and have sailed under no colors but our own. What we had to say we said as a tobacco men's organization speaking for an industry which we are proud of and which now stands completely vindicated and universally recognized as a boon to mankind.

I am, however, frank to confess that our great victory is due not so much to the activities of our association as it is attributable to the public resentment, the public reaction and revolt that the persistent efforts of the antis evoked.

Almost daily new associations, leagues, committees and groups of citizens were formed all over the country to repel the onslaught upon their freedom to use tobacco, and publications of all descriptions condemning this attempt to deprive American citizens of men's comfort and solace appeared from time to time in every section of the country. And it is of interest to note that, as vitally interested as we have been in all these public movements, we have, from the very beginning, adopted a strict policy of refraining from in any way supporting, stimulating, subsidizing or backing such movements or activities as may be readily seen from the following stereotyped answer that we uniformly sent to all requests for aid:

"The fact is that the anti-tobacco agitation has aroused such indignation throughout the country that practically not a day passes without some organization or some group of citizens inaugurating new movements or starting new publications to combat it and quite naturally they all call upon us for contributions.

"But we feel that the attack upon tobacco concerns the public, or at least the 30 million consumers constituting one-third of the public, as much as it concerns the individuals engaged in the tobacco business. Furthermore, any publication or public movement would soon lose its influence upon the public if it were supported, directly or indirectly, by tobacco interests. For these reasons we believe that such enterprises or activities should be conducted entirely independent of the tobacco interests.

"While we are of course exceedingly gratified with the public activities that are being inaugurated throughout the country in opposition to intolerable reforms or restrictions, we cannot, for the reasons stated, render any financial assistance in such cases."

Public Opinion for Tobacco

Our first step in planning to intelligently combat the anti-tobacco agitation, was to take stock of public opinion and to ascertain the attitude of the public press in respect to the use of tobacco. Accordingly, an actual though indirect poll of popular opinion was undertaken by the Association through a Press Service Company. This agency, by means of a questionnaire, canvassed newspaper editors of the country in the belief that they can best judge the sentiment of their communities—a belief which it had put to the test in polls on other public questions.

No arguments accompanied the questions and from their form it was clearly indicated that what was sought was the unbiased opinion of the replying editor.

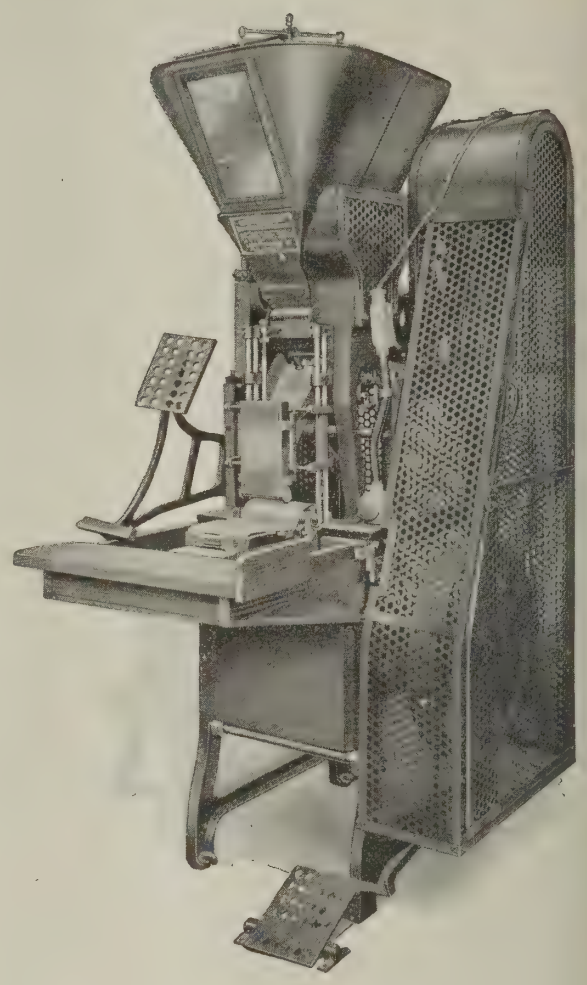
The answers of the editors show an overwhelming opposition of the public to anti-tobacco legislation. Some 7,847 editors, representing a combined circulation of 21,870,046, replied to the questionnaire and of the 7,847 replying editors, 7,393, or 95 per cent., represented public sentiment in their communities as opposed to anti-tobacco legislation.

The questionnaire furnishes an excellent survey of the state of public opinion throughout the country, the accuracy of which has already been fully demonstrated by the legislative returns since then.

One of the strongest and most recent demonstrations of public opinion against tobacco

ANNOUNCEMENT

You can now **BUY or RENT** latest improved Liberman Power Scrap Bunch Machines—illustrated at the right.



The work they are now doing in many high grade cigar factories PROVES that they:

1. **Make Perfect Bunches** of any size and shape, out of any size scrap, large and small together, always evenly distributed.

2. **Enormously Increase Production**—4,000 to 7,000 Bunches Daily according to speed of operator.

3. **Save Binder** enough to more than pay for the machines.

4. **Have no complicated mechanism** — requiring no mechanic to adjust and keep in order.

estrictions occurred in Utah. In that state a aw had been enacted making it a misdemeanor o use tobacco in certain designated public laces, such as cafes, hotel dining rooms, and n the corridors of public buildings. This law ay dormant for a year or more, no one eemingly paid much attention to it.

But suddenly there came a reaction. Several rominent citizens of Salt Lake City were placed nder arrest by a Deputy Sheriff for daring to ppear in certain public places carrying lighted igars or cigarettes. What was the result? No oner had the arrest of these citizens been nnounced than, figuratively speaking, the resi- ents of Salt Lake City arose in arms.

What was the result of the Utah action hrough which reputable citizens were haled nto jail and court like common malefactors? 'HE ANTI-TOBACCO LAW WAS RE- EALED! Never has a more salutary lesson een more effectively taught than this—that the nalienable rights of American citizens cannot afely be disregarded by short-sighted reformers ho seek to impose their wills upon others hrough the agency of laws with which the ma- rity of law abiding citizens have no sympathy, nd which they cannot respect.

The Utah fiasco proves indisputably that ublic opinion is a force with which so-called eformers must deal in future.

The Utah incident illustrates another thing f vital importance to all of us. The average merican citizen is tolerant and in the enacting f legislation affecting him often too unheed- ul. It is because of this that many revolting estrictions are placed upon our statute books. ut when the enforcement of these obnoxious aws commences and the public at large finds self within the pincers of the law, then wrath, rotest and revolt are inevitable.

The entire tobaco trade, the users of tobacco n any form, and all who love liberty and jus- ice and despise intolerance as a relic of a by- one age, owe a great debt of gratitude to the nti-tobacco reform element of Utah for demon- trating the resistless power of public opinion hen it is arraigned against injustice.

Science Again Vindicates Tobacco

Almost simultaneously with the inauguration f the new anti-tobacco activities, science once nore began to investigate. A committee of 50 cientists, under the title "Committee of 50 to tudy the Tobacco Problem," was formed and hree distinct investigations to ascertain the ffects of smoking either cigars, cigarettes or ipes were inaugurated and completed. Two f these investigations were conducted at the ohns Hopkins University, and the sum and ubstance of their findings, as a result of the irst investigation may be gathered from the fol- owing excerpt from the "General Summary" f their report:

"It is strongly indicated that the immediate ffect of smoking, both on smokers and non- mokers, is a lowering of the accuracy of finely o-ordinated reactions (including associative hought processes),"

dding, however, that,

"There is no indication that speed of com- licated reactions is affected by smoking. Nor s there indication that thoroughly mechanized eactions requiring no fine motor adjustments, re affected."

The second investigation, which, as indicated n the report, was conducted largely for the urpose of checking up the first investigation on account of the relative smallness of the ndicated effect, and the negative results of ests on certain other functions under smoking onditions," as was the case in the first tests, ailed to disclose any, but negligible, effects of moking. Thus the report says:

"The results so far, then, indicate that the immediate effects of moderate smoking (1 cigar or 2 cigarettes) vary from negligibility to slight disturbance of accuracy by the smoking; results quite in accordance with Carver's findings."

The third investigation was conducted by M. V. O'Shea, Professor of the University of Wisconsin, whose report, embodied in a volume of 258 pages, has just been published. Professor O'Shea has not only subjected tobacco smoking to most searching scientific tests, but by means of a quesionnaire addressed to "persons of distinction," "men who had attained noteworthy success" in their respective fields, he also collected an abundance of opinions based upon actual observation and experience as well as upon historical data. The result of all these researches and investigations may be gathered from the following lines which I am quoting from Professor O'Shea's conclusions:

"We cannot secure conclusive evidence, either from a study of the work of the leaders in thought and action during the past three hundred years. Some of them have used tobacco while others have not, the balance being somewhat in favor of the former.

"Leading reformers, who should be regarded as creative thinkers, have quite generally been non-smokers; but the men who have created new nations, new types of government, who have welded nations together, and who have in other ways exhibited marked creative ability have often been smokers."

In an editorial that appeared in the American Medicine, a leading Medical Journal, in August, 1920, the author said:

"The victory of the prohibition forces in America has inspired a campaign for the purification of the race in England and America on the part of a very powerful and altogether too meddlesome group of reformers who are determined to rid humanity of its most harmless **vices.**

* * *

"Of all the attempts to cope with life, to enhance it or to improve it, this is assuredly the most futile. Granted that coffee is a poison, that tea is a poison, that tobacco is a drug, few have succumbed to these poisons, and the mere handful that have injured themselves by lack of moderation should not be used as a pretext for enforcing total abstinence on the huge masses to whom these 'poisons' are a comfort and even a stimulus.

* * *

"Life is a constant battle with poisons and hostile elements. The air we breathe is laden with poisons and harmful germs. The food we eat is constantly exposed to poisons and germs. These hostile elements are inescapable, but we make little of them except when they become too menacing. Coffee, tea and tobacco have not become a menace in the lives of most of us. Indeed, there is more evidence at hand of the good than of the harm they do, except in very rare instances.

* * *

And so William J. Gies, D. Sc., professor of biological chemistry, Schools of Medicine and Dentistry, Columbia University; Max Kahn, M. D., associate in biological chemistry, College of Physicians and Surgeons; attending physician, diseases of metabolism, Beth Israel Hospital, and O. Victor Limerick, M. D., director, department of pharmacology, Brooklyn Diagnostic Institute, who have recently made a searching investigation of tobacco, have reached the conclusions that

"The habitually moderate use of tobacco is not harmful to adults.

"The moderate use of tobacco proves distinctly helpful to certain adult types.

"The habitually excessive use of tobacco may prove harmful to certain individuals. But the same holds equally true of all foods."

I can stand here for hours reading reports of scientific authorities to the same effect, but I believe it is sufficient to say that once more has science vindicated the use of tobacco. And in this connection I may point with genuine satisfaction to the significant fact that every organized attack upon our industry only brings forth an additional mass of scientific authority testifying to the harmlessness of tobacco. But do we need any testimonials? Have we not the best proof of the harmlessness, or rather of the wholesome and the beneficial effects of tobacco in the fact that the largest tobacco consuming country in the world is the leading, the greatest, the most powerful, the most prosperous and the most progressive nation in the world? I need not tell you that I refer to our own glorious commonwealth.

While our victory in this recent anti-tobacco war is almost complete, the menace has not as yet passed and is not likely to pass so long as professional agitators are able to pass their hats and collect the coin. We must, therefore, remain on guard and hold ourselves constantly in readiness for renewed attacks, if any shall come.

In closing this chapter, I cannot refrain from reporting with real pleasure that in all the Association's activities to combat the attacks, which, though ostensibly directed only against cigarettes, were in fact intended against tobacco in all forms, every branch of the tobacco industry has stood solidly behind the Association and has fully demonstrated its firm belief in the principle so aptly laid down by my predecessor, Mr. Charles J. Eisenlohr, in his address at our last convention, namely, that the tobacco industry must stand, *"one for all, and all for one."*

So-called Tobacco Cures

Attention, too, has been given in the last few years to the traffic in so-called "tobacco cures," of which quite a variety have been extensively advertised.

As vitally interested as we are in stimulating consumption of tobacco we, of course, would have no cause to complain against the selling of any preparation constituting a cure of the tobacco habit to anyone who may desire to be cured of it, nor would we find any fault with the sale of alleged cures which, in fact, do not even have a tendency to cure, but we do have a right to object to the vilification of our industry, as well as the users of our commodity, and to refute the false and scandalous statements against the use of tobacco broadcasted throughout the country, by vendors of the so-called "cures."

As a result of a mass of evidence placed before the Post Office Department against one of these "cures," the department has issued a fraud order against the concern, and in a lengthy memorandum handed down by the solicitor of the Post Office Department, he emphatically condemned that nostrum as a glaring fraud, saying, among other things:

"I find that this is a scheme for obtaining money through the mails by means of false and fraudulent pretenses, representations and promises, and therefore recommend that a fraud order be issued against the name set forth in the caption of this memorandum."

One of the facts disclosed by the testimony in that case, which is painfully amusing, is that the vendor of that "cure" in some of the literature that he used has led the reader to believe that he himself was formerly "a heavy smoker," and that he had cured himself of the habit, whereas the evidence shows that he is still a tobacco smoker.

"cure" does not cure, but that the statements made by the vendor against tobacco for the purpose of creating a demand for his nostrum were in themselves false and misleading.

Evidence was also placed before the Associated Advertising Clubs of the World, and they, too, issued a strong condemnation of one of the "cures" and cautioned the Press against accepting its advertisements in the following language:

"Every publication which values the confidence of its readers and its own good name should rigorously exclude this fraudulent advertising from its columns; even those periodicals which, from conviction, oppose tobacco and its use, being ill able to afford the support of their advertising space to a fraudulent nostrum of this sort."

As a result of these and other investigations, advertisements of these "cures" have greatly diminished.

Leading newspapers throughout the country have apparently come to realize the inconsistency of printing in one and the same issue display advertisements of tobacco products and disguised advertisements appearing in the form of reading matter, of alleged tobacco cures, in which almost every disease known to the medical science is attributed to the use of tobacco.

The results of these investigations seems to have enlightened publishers who are catering to none but honest and legitimate advertising as to the real character of the nostrum ads.

Legislation

The legislative branch of our operations is by far the most important, the most interesting, and the most exacting work of the Association.

You cannot fail to recall our activities in connection with the Federal Tax Bills, the Emergency Tariff Acts, and finally, the Permanent Tariff Act. You will remember the original recommendation of the Secretary of the Treasury to raise an additional $100,000,000 out of tobacco products, in spite of the fact that we are still paying the extraordinary rates of taxes imposed by the War Act, and undoubtedly you still remember the activities of our committees appearing before the tax-making powers; our popular petitions; our briefs and our memorials, and all the steps that we took in our relentless efforts to protect our industry from unbearable tax burdens. But Congressional legislation is not all with which we have to contend. It has also been our lot to watch legislation affecting our industry in the 48 State Legislatures, 42 of which always meet at about the same time.

Scarcely does a legislative season begin when interests inimical to tobacco loosen a veritable flood of anti-tobacco measures of every description. On some occasions the tobacco industry seemed to be facing a perfect epidemic of hostile legislation.

Altogether no fewer than 297 measures affecting the tobacco industry were introduced in different State Legislatures in the last three years. The range of subjects included prohibition of smoking in public places, prohibition of the use of such wholesome ingredients as licorice, sugar, etc., the prevention of teachers and others from smoking, conducting anti-tobacco propaganda in public schools, prohibitive license laws, and local options, imposition of stamp taxes and sales taxes by States; in fact, they ran the whole gamut from trivial restrictions and discriminatory taxation to absolute prohibition.

Undoubtedly the tobacco trade in every State, supported by the great army of consumers, constitutes a force sufficiently powerful to combat hostile legislation. But to set that force in motion, to render it effective, and to secure concerted and quick action, it is necessary to supply direction and leadership. This is a task of no ordinary difficulty, especially in cases, as is frequently true, where legislative measures are introduced and advanced to a point of passage before the trade or the public at large is at all aware of their pendency. It is here that the services of a national bureau with its eyes wide open, and with adequate connections in every State in the Union, becomes indispensable.

Fortunately our Association, being constantly in correspondence with leading tobacco men in every State in the Union, has always had a ready nucleus for organized activities on the part of the trade in every State where such activities were required, and it is with great satisfaction that I am able to state that our calls for action, addressed to members of our industry, in the various States involved—whether by letters, wires, or special bulletins, which were widely circularized—have always brought forth warm responses and stimulated lively activities in opposition to all hostile legislation.

What seems to be of important significance is the fact that the great burden of legislation at the recent sessions was not that of restrictive legislation, but rather of tax legislation.

With most, if not all, of the States in need of additional revenue, and looking for new sources of taxation, tobacco seems to have been the first target, notwithstanding the heavy taxation already levied thereon by the Federal Government.

It is also important to note that while in former times the cigarette alone was regarded as a prospective source of revenue, cigars and tobacco are now being considered as subjects of taxation by the States. Thus attempts were made this year to impose stamp taxes or sales taxes on cigars and tobacco as well as on cigarettes in several States, and I am happy to report that all of these bills with but one unfortunate exception have been justly killed.

It is with profound regret, however, that I am compelled to state in a tax bill recently passed in South Carolina, which imposes stamp taxes or sales taxes upon a variety of commodities, cigars, as well as cigarettes and smoking tobacco, have been made subject to the tax, making this State the first State in the Union that has imposed a stamp tax on cigars and tobacco. It is unnecessary to state that every proper effort was made, not only by the T. M. A. supported by the leading tobacco men in that State, but by all the other industries affected, to defeat this tax measure, but unfortunately all these efforts proved futile. Every proper effort will, of course, be made at the next legislative session in that State to secure the repeal of this tax, and there is every reason to hope that this will be accomplished.

What we really need in connection with State legislation is a strong, active Legislative Committee in every State of the Union, representing and looking after the tobacco interests; and I am more than hopeful that with the constantly growing membership of the T. M. A in all parts of the country, it will not be long before such committees will be functioning in every section of this country.

The Association and Its Activities

The success of the association depends upon two fundamentals:

First.—It must have members in order to be able to do things, and

Second.—It must do things in order to secure members and retain them.

In other words, it must have a solid constituency and adequate support in order to carry on needful activities, and it must carry on such activities in a satisfactory manner in order to retain its constituency and insure continued support.

It is with genuine gratification that I am able to report that the T. M. A. has achieved more than ordinary success in both fundamentals.

It has not only built up a solid constituency in every branch of the industry throughout the country, but it has earned and is enjoying universal recognition as the representative organization of the tobacco industry of the United States—as the authoritative body that speaks and acts for the industry in all matters of common interest.

We have not only succeeded in building up a great National Institution, but we have every reason to be satisfied with the association's activities and achievements, as well as with the nation-wide reputation it has established for itself as a thoroughly dependable institution.

What is particularly gratifying is that the association is not only receiving the wholehearted support of its members, but it proudly enjoys the confidence of the entire industry, for it has thus far never issued a call for support or co-operation in any of its activities without receiving cordial responses from all over the country.

As an example of the splendid co-operation rendered by the trade in the association's activities, I may cite the popular tax petition, to which about a million signatures were obtained by retailers throughout the country.

This was by no means a small task. It required 500,000 petition blanks, which were distributed among 37,000 of the country's more prominent retailers. Pasted together end to end these petitions would have attained a length of 134 miles, while in bulk, they represented 10,000 pounds of paper.

Surely the task could never have been performed without co-operation from thousands of retailers, as well as from a great many manufacturers and jobbers.

And so, in every movement or activity of the T. M. A. where popular support is deemed essential, it is only necessary for the association to issue a bulletin or a call for co-operation and it may always safely count on enthusiastic and helpful responses.

I shall not attempt to even epitomize the manifold activities of the association. Not only our members, but the trade in general is indeed fully familiar with its activities and achievements. The numberless bulletins and publications that the association has issued have served to keep the entire trade well posted in respect to all important matters affecting our industry.

What, however, I believe to be the most gratifying point in connection with all our work is the fact that we have succeeded in carrying on these vast activities without ostentation or display.

As president of the association it has been my duty as well as my privilege to make frequent calls at the association's headquarters and to keep in close touch with its activities, and I say to you in all sincerity that I have never seen an office that is conducted in a more orderly, more efficient and more modern and up-to-date manner than the T. M. A. office.

Whether members or non-members of the association I most earnestly invite you to visit the T. M. A. headquarters whenever you happen to be in New York and see for yourself the elaborateness and magnitude of this institution. You will find that every branch of the association from its Accounting Department which is conducted under the supervision of a firm of certified public accountants; its Trade-Mark Bureau which contains the records of

ROCHESTER, N. Y.

Visconsin Tobacco Market Quiet on the Surface

espite Disconcerting Factors a Strong Undercurrent Discloses Rather Stiff Demands for Old Binders in Cases—Preparations for New Crop Are Much Delayed.

Edgerton, Wis., May 12.—The market quiet on the surface, and has been so r the past few weeks. But for a mar- t that contains the disconcerting factors loadly aired in all sections as possible, even probable, for the cigar and leaf ade for the rest of 1923, and early 1924, ery week contains its elements of sur- ise by more evidence of a strong under- rrent of a rather stiff demand for old nders in cases. Samples are being own, and lots of binders are continually ing out of first hands at prices that are t diminishing.

The national brand companies seem to in the market right along for the scat- red lots of good binders when they can had at anything like reasonable prices. hether it is because they are ready for mediate use, or other reasons, it is only ssible to guess. One very important ase, which the trade is discussing a od deal these days, is the fact that the ade is now realizing their packings of e 1922 crop contains more common, eap tobacco than they have had before. he pool's method of selling has done is. Those concerns who have not pur- ased heavily from the pool, of course t around this. But the way the 1922 op graded out, those concerns who re- d on the farmers' co-op as their source supply, had to dip deeply into the wer grades to get their allotments filled.

Cash Renting Goes On Apace

The pool cannot be blamed for this. he crop year determined the percentage the better grades. In fact, they should praised for it, as their avowed purpose to get the grower better prices for eir product. Whether it should prove tisfactory to the trade or not, is not imarily their concern. Corresponding- , then, the growers should be pleased ith their selling organization. But they e not—decidedly not. Cash renting es on at a rapid rate, and it is being eely estimated by operators in the south at the pool's total holdings of the 1923 op in the south will be diminished by is evasive method of procedure to 30 40 per cent of the 1923 crop.

In the north, cash renting is being re- rted to also. Also, news has it that one ge operator is leasing tobacco fields d hiring growers to raise tobacco for n on these fields. With all these fac- s, and with widespread discontent ong the rank and file of the growers, the crop year of 1923 promises to be fully as hectic a one as that of 1922. It will be a big crop, with a bigger independent end to it, and it also will be the crop with which many of the more tolerant pooled farmers are "going to give the pool one more chance."

Spring Work Held Up

Spring work on the new crop is still being held up by the cold, dry weather. The ground is hard and dry, and unless Jupiter Pluvius and Old Sol loosen up, the season will not be a propitious one for the coming crop. The farm labor question is in its most terrible year, with no signs of alleviation in sight. War wages on the farm are daily being eclipsed in the bidding for the meagre supply of labor.

The pooled warehouses started up last Monday, with reports of five to seven assorters at different warehouses. In Edgerton they have only six assorters, after soliciting other warehouses help on the street all week with promises of higher pay, and allowing more poundage. To the writer, the pool's ethics seem possible of criticism in those organized, if unsuccessful, methods of attempting to deprive their own customers of help needed to put up goods purchased from their own organization.

Explains Harried Letter Episode

C. E. Sweeney, local packer of great prominence and prestige, who was publicly accused by the co-op of being the author of the Ole Harried letter, published a statement in the Janesville *Gazette* refuting charges of being the originator of it. Mr. Sweeney maintains that Mr. Harried came to him in the attitude of an old friend, expressing dissatisfaction with the pool, and wanting to print the open letter condemning the pool, which was the first of a series by disgruntled growers to the press. That his work was mostly merely spelling and punctuation, and that the letter was much more moderate in expression as a result of his collaboration.

Rally Meetings Proved Fruitless

In the recent series of pool rally meetings, no new members are known to have signed. The pool officials have scouted all alleged faults of the organization, with the exception that the growers who drew down the stemming grade on their best ends of the crops, after religiously and laboriously following out the pool's stripping letter containing orders to strip their tobacco out in three or four sections, have suffered an injustice. Especially when they had delivered what the grower himself designated stemming at six and eight cents, and then delivered their "binder" end at eleven cents, and received actually less than ten cents through for the entire crop, besides the extra time and expense involved in the stripping it out into three or even four extra grades.

Fine Tobacco "Up in the Peak"

Just how the pool is going to get around this is a problem. If the pool men come around when it is hanging in the shed, and instruct the grower to strip it straight, it will make the grower howl. He will accuse the official of grading it in the shed by the lower hangers only. The grower always has fine tobacco "up in the peak" of the shed. None will believe tobacco can be graded while hanging. Also, it will take a crew of higher-priced men to grade it out in the shed than the mere sample pullers were. Then, too, with many graders, there will be bound to be a decided personal equation factor brought in, to determine the point upon which the grower's sorest spot is so touchy—his grading.

If they let it go until case weather comes around, the grower will immediately start to strip his crop, and two or three months, anyway, will elapse before all crops will be visited and enough tobacco inspected to appease the grower that an intelligent opinion of his crop has been arrived at. Then it will be the same as last year, all over again. This question will cause the pool as much worry as any single thing next year, and is apt to cause many gray hairs before it can be solved.—Badger.

Revised Inscription Schedule

The remaining inscriptions at Amsterdam and Rotterdam are scheduled as follows: Friday, May 18, Amsterdam, Java; Friday, June 1, Amsterdam, Sumatra and Borneo; Friday, June 8, Amsterdam, Sumatra and Borneo; Wednesday, June 13, Rotterdam, Sumatra; Friday, June 15, Rotterdam, Java; Friday, June 22, Amsterdam, Java; Friday, June 29, Amsterdam Sumatra and Java; Friday, July 6, Amsterdam, Sumatra and Borneo; Friday, July 13, Amsterdam, Java, and Friday, July 20, Rotterdam, Java.

Pennsylvania Tobacco Tax Bill Defeated

Harrisburg, Pa., May 15.—By an overwhelming majority in the House, the entire program of the Ways and Means Committee to raise $19,000,000 additional revenue was defeated last night. The tobacco tax bill was dropped after a vote to postpone the measure had failed by 149 to 35. As far as this session is concerned, the tobacco tax is "gone forever." Because it was dropped from the calendar without a roll call, it is impossible to reconsider the vote, as there is no record of how the votes were cast.

Crounse on the Commerce Relations Committee

Washington, D. C., May 16.—William L. Crounse, of this city, has been named chairman of the Commerce Relations Committee of the tobacco industry for the Department of Commerce.

It is understood that in the near future a letter will be sent out by the committee to the trade explaining in detail the scope of the inquiry which the Department of Commerce is about to undertake with reference to determining all the factors affecting the tobacco export trade.

It is understood that the inquiry will consist of a comprehensive survey of the international trade in tobacco, with a view of determining post-war and pre-war trends of markets, methods and costs of distribution, as well as financial practices and other pertinent facts relating to the tobacco export trade. An intensive study will also be made of about 15 of the most important foreign tobacco monopolies which control the industry in their respective countries.—Lamm.

Inter-Changing Duties

Henry M. Duys, of H. Duys & Co., sailed for Holland last Saturday on the steamer *Rotterdam*, to attend the remaining Sumatra, Java and Borneo inscriptions at Amsterdam and Rotterdam, in place of his brother, John H. Duys, who arrived in New York from Europe the same day on the French liner *Paris*, to take charge of the New York office.

DISCOURAGING MISBRANDING

Possibly more than appears on the surface now may come from the action begun by the American Fair Trade League to prevent the misbranding of cigars.

As raised, at present, the question pertains to cigars, by label or imprint, designated as Havanas.

What cigars legally are Havanas?

It would seem that cigars made in Havana, Cuba, have an unquestioned right to be regarded as Havanas.

For more than a century, cigars have advertised the city of Havana, Cuba's capital and metropolis. Whithersover civilization extends, good cigars are associated with Havana, by name and origin.

Since De Cabanas established the first cigar factory there in 1804, the reputation of cigar manufacturers has been upheld in Havana.

How far the genius of an artist may be expressed in a cigar, how near to perfection an expert may come in blending tobacco, what care may be taken to insure high quality, cigar makers in Havana long have shown.

However, at times, by war or untoward conditions of commerce, manufacturing might be impeded or exportation retarded, prestige was maintained and long established high standards of production were not lowered.

To some extent associated with government regulation, cigars exported from Havana are guaranteed to the limit, unquestionably, by *costumbre del pais,* by strict adherence to practice that virtually is unwritten law, by trade conditions, by circumstances peculiar to Cuba and by unfailing co-operation of all concerned in manufacturing and selling.

Tariff of $5 per pound on tobacco of every description makes it entirely unprofitable if not practically impossible to bring any foreign grown tobacco into Cuba.

Therefore, of necessity, as well as from choice, all tobacco used in the manufacture of cigars in Havana must be exclusively a product of Cuba.

Every box of cigars exported from Havana must bear a Cuban government stamp attesting that the cigars are "products of Cuba."

If, on inspection prior to exportation, the cigars should be found unworthy, or of quality not creditable to Cuba, attaching of the stamps would be stopped and export consequently not allowed.

While Cuban government regulations regarding the export of cigars pertain almost entirely to the use of the export stamp, additional regulations apparently are not required because all manufacturers, actuated by enlightened self-interest and pride in their business, undeniably are maintaining standards, determinedly.

Because Havana cigars coming into the United States must pay duty (at the rate of $4.50 per pound and 25 per cent ad valorem, less a differential of 20 per cent allowed on all imports from Cuba) cheap Havana cigars are automatically kept out of this country by the tariff law.

To the excellence of tobacco grown in Cuba, the fame of Havana cigars is largely due. Soil and climate, in favored districts of Cuba, are admirably adapted to the production of tobacco. But not entirely to the natural advantages of the land, can be ascribed the continued success of Cuban tobacco growers. Experience, skill, especial knowledge, shrewd judgment, assiduous labor, painstaking care and unremitting attention are required to bring tobacco crops to approximate perfection. In Western Cuba, for generations, the *vegueros* have specialized in growing fine tobacco. All the advantages and efficiency of scientific farming are added to native comprehension of what is needed to induce the tobacco plant to impart superlative desirability to its leaves.

By utilizing tobacco of the better grades grown in Cuba, by employing proficient workmen skilled in making cigars according to the Spanish method, by using the judgment and care demanded in accredited Cuban factories, it is possible for a manufacturer in the United States to produce cigars that rival the finest Havanas in quality.

Such cigars, generally known to the trade as clear Havanas, have been made in this country since 1866.

Cigars in this class, in "the sixties," were sold as imported Havanas and only a few smokers were able to detect the difference.

But no self-respecting manufacturer cared, then, to be known as a maker of imitations.

By establishing brands, by building up reputations, fortunes were made. The good repute of the old time "clear Havanas," manufactured in the United States, endures to this day.

Between the "genuine imported" Havanas and the so-called "legitimate clear" Havanas, made in Tampa, Key West or elsewhere, most smokers can choose without prejudice or difficulty. Both cigars may be exceedingly good.

Yet precedents, alone, do not create rights. Nor does a long prevailing trade custom amount to much, if it becomes contrary to law.

How is the smoker guided in buying cigars? Is his choice restricted by the price? In picking and choosing, can he depend on his knowledge of brands? Does he trust to luck? Do colors or shapes appeal to him? Does he judge principally by appearances? How far is he influenced by what the salesman says?

It all depends on the individual. Humanity is divided into many groups. Mental attitudes of prospective buyers are as various as the diversity of human nature. One man knows exactly what he wants. Another is undecided, never quite certain, always vacillating.

Things that promote contentment and peace of mind are more desirable than a bit of silver. If a man's days may be made happier and his nights more restful by the expenditure of a few dimes at a cigar store, why shouldn't he spend the money?

A cigar may bring solace; it may cause satisfaction; it may increase contentment; it may confer pleasure; it may alleviate pain; it may assist ill temper to disappear; it may induce unhappy thoughts to flee; it may relieve fatigue; it may help to obtain desired composure; it may enable a man to better endure the horrors of war; it may make peace seem sweeter; it may add to comfort; it may encourage mental effort; it may be soothing, gratifying or stimulating; it may offer consolation, inspiration, hope and joy.

The law that penalizes misbranding surely is for the protection of the public.

Let the label tell.

On their own worthiness, cigars of every kind and brand should be sold.

Merit proclaims itself.

Each man according to his taste can buy the sort of cigar he likes.

There should be neither confusion nor deception pertaining to markings on cigar boxes.

If the label is misleading, if a deceitful statement is imprinted on a cigar box, if through improper misrepresentation a smoker is persuaded to buy what he doesn't want, the offense seems tantamount to obtaining money under false pretenses. Fraud should be punished.

A cigar isn't bought to be looked at. The brand, according to the manufacturer's reliability, is a guarantee of the pleasure a cigar will confer.

To the effect that the cigar is a joke or a fake, information obtained while smoking does not add to the smoker's enjoyment. Neither does any practice that suggests unfairness or deceit assist to promote enduring trade.

In the cigar industry, real prosperity will not be retarded by rigorous efforts to stop misbranding.

When smokers have a better understanding of what they are buying, trade will increase.

Sometimes, the law has teeth.

If enforcement of the law will discourage or stop the misrepresentation that is associated with "long shotting," the dependable manufacturers and dealers will obtain better protection from the worst sort of competition.

Cigars are not improved by untruthful labels. Whatever its origin or composition may be, let a cigar be described honestly and sold on its merits.

The dependability of his brands should be the most carefully guarded asset of a cigar manufacturer.

GETTING MORE MEN INTO STORE

There are two methods by which the cigar store can increase its sales and make more money.

First—It can increase the average amount of goods sold to each individual customer.

Second—It can get more men into the store and thus by "exposing" itself to more sales, make more sales.

The first method is the harder of the two for it involves super-salesmanship on the part of the sales force, a high tension about the store at all times and a forcing of goods on the customers which, eventually, may react against the store and keep men away instead of bringing them to the establishment.

The second method, in addition to being easier to put over, also offers the greater possibilities because there is a limit to the quantity of goods that can be sold on the average to each individual customer no matter how intensive the salesmanship may be, while there is practically no limit to the number of men that may be brought to the store by various forms of advertising, publicity and promotion work.

Since, then, this second method is the best for the tobacco store owner to adopt in going after more business, let us look at some of the ways by which more men can be brought into the store and after enumerating some of the best methods for doing this let us examine the specific ways and means by which each individual method is to be best put over.

These best ways of getting more men into the tobacco store are as follows:

A.—Staging special displays, exhibitions, etc., in the store which will arouse the interest of the men and make them want to come to the store and see what's going on.

B.—In addition to giving the results of ball games and other events in which men are in-

erested, showing pictures of the events, inside he store on the same placards on which the re-ults are given.

C.—Getting men to vote on various proposi-ions that are of interest locally.

Almost nothing is done by many stores oward the staging of special displays and ex-ibitions, etc., and yet this method of getting eople into the store is a tried and true plan hich is used with good effect many times year by the average department store. The verage department store is constantly putting n style shows and special parties and events f one sort and another for the purpose of etting more people into the store and there's o reason in the world why the tobacco store an't do something along the same line with qually good results.

One show which might be staged by the obacco store inside the establishment with plendid results in the way of getting more eople into the store would do in putting on a isplay of old-time pipes and pipes of various inds which are in the possession of local eople. It would be an easy matter to get the oan of these pipes from the folks who had hem and to then put them in a rack on the all of the store in a safe place where they ould be seen without being handled or stolen. he local people who would have such pipes ould be some of the older folks who had been round the world a bit and these people would e mighty glad to get their pipes into such an xhibition. Of course with each pipe shown n the exhibition there should be a liitle card iving the name and address of the owner and, erhaps, giving something of the history of the ipe if the history was particularly interesting.

This sort of an exhibition could be played up y the store in its advertising and exhibition ould be sure to get a lot of attention and bring ore men into the store.

Again the establishment could stage a show, nside the store, of old-time relics from the early days of the city. These relics could be secured for the purpose from some of the older residents of the city and each relic when displayed in the exhibition should carry a card giving the name and address of the owner.

Shows and displays and exhibitions of this sort would make the store tremendously interesting to many men and so would be sure to get more men into the establishment and help business just that much.

The second method, that of using pictures of sporting events as well as the reports of sporting events, appeals to the interest which every person has for pictures of affairs upon which a lot of attention has been showered. Pictures are never failing in getting more attention for the show windows in which they are displayed and it is certain that they will get more attention for the stores in which they are exhibited.

Pictures of sporting events could be secured from the local newspaper offices and from local people who have cameras. Each picture displayed in the store should carry the name of the person taking it, if a local amateur was the cameraman, and should also, if possible, give the names of the people appearing in the picture and describe the action going on in the photo.

The display of sporting event pictures in the tobacco store would be a certain method of adding greatly to the interest felt by the average man in the store and so would be a sure method of getting more men into the store and "exposing" the store to more sales, thus enabling it to make more money.

The third plan of getting men to vote on various matters of local interest has never failed. whenever tried by a tobacco store, in getting more men into the store and in making more money for the store.

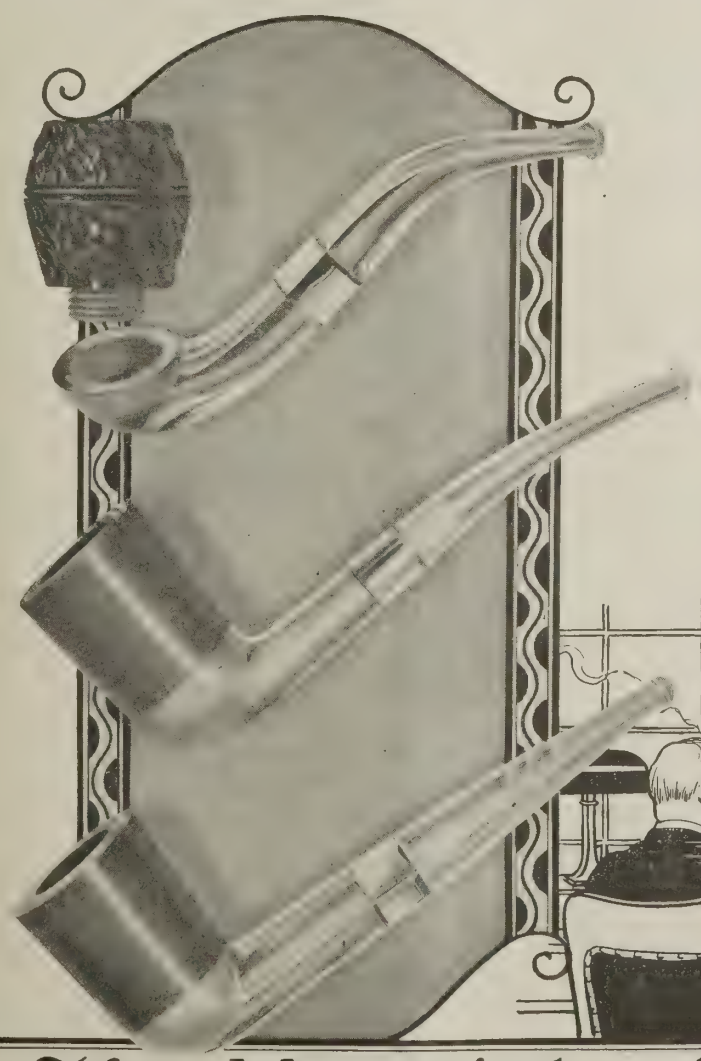
Here are some of the things on which the men may be asked to vote by means of cards printed up and provided for the purpose and deposited by the voters in a convenient box after expressing their opinions in the spaces provided on the cards for the purpose:

Whether or not a local golf course should be established by the city and be operated free of charge.

Whether or not the limitations on down-town parking should be extended and if so how far and for what periods.

Whether or not the city should go ahead and buy more land for use as parks.

And so on.



Only topics should be chosen in which there is a great deal of public interest and the voting should be done only infrequently, as too much of it would kill the interest in the thing.

GOOD WORK IN PENNSYLVANIA

The State Legislature did a good piece of work last night when it dropped the Alexander "luxury" tax from the calendar. The bill, which had been amended to affect only cigars, cigarettes, chewing gum and tobacco, did not even get to a vote, the opposition was so overwhelming.

As pointed out last evening this bill, if enacted, would have worked thinly veiled discrimination against this county, where the State's tobacco industry is centered. All of the local representatives were lined up against it, and they had practically the unanimous support of members from the agricultural districts. The framers of the bill expected that it would be supported by the big cities, but their hopes were baseless, for the city members were well aware of the unpopularity of any so-called "luxury" tax, and in addition they were reluctant to aid legislation which so clearly placed an unfair burden upon one locality.

The revenue raisers will have to turn their attention elsewhere. The tobacco tax proposition is dead.—*Lancaster (Pa.) New Era.*

Pipes that appeal to Particular Smokers

It takes an unusually good pipe to meet the exacting ideas of the pipe smoker of today. His pipe must have "class"—must be made of materials that are inherently beautiful.

Pipes with clear or cloudy amber stems of genuine Bakelite or Redmanol phenol resin have an appeal that makes them easy to sell to all pipe smokers.

Our national advertising is constantly adding to the prestige of Bakelite and Redmanol—is building up an insistent demand for pipes and holders bearing these trade-mark names.

Have your jobber show you this quick selling line.

Detroit Trade Still Affected By Price Cutting

Legitimate Tradesmen Labor at Disadvantage—Manufacturers and Jobbers May Have to Intervene to Curb Conduct of Cut-Throaters—Live Trade Topics.

DETROIT, Mich., May 12.—The cut-raters are still cutting 'em from both ends and the middle. I believe it is up to the manufacturers and jobbers to co-operate for the purpose of finding some means of curbing the cutting of prices on cigars and cigarettes. It is not fair to the legitimate dealer, with the present high rents, salaries, etc., to allow conditions, such as are prevailing in Detroit at the present time, to continue. Profits to the retailer at the best are none too great, and it is only in doing a volume of business that they can hope to have the balance on the right side of the ledger when the day's work is over.

I do not allude to the cut-rate to the man who is forced to go out of his way, which he must in a great many instances do, in order to save a penny or so on a cigar, but the ridiculous cuts that are being made when some of the cut-raters are actually selling cigars at the price the dealers are forced to pay for them and who must be encouraged by some jobber who surely sells them at a price that is lower than is made to a legitimate dealer.

I have no hesitancy in saying this condition prevails right here in Detroit, and if the jobber is not broad enough to realize that this is far from being fair treatment. then it is up to the manufacturer to step in and take a hand, both on cigarettes and cigars. Otherwise the time is not far distant when the retailers will be forced to protect their own livelihood by discontinuing the handling of such brands.

Three States are Large Consumers

There has been much activity the past few weeks around the headquarters of El Moro Cigar Co. Mr. Penrose, general sales manager, tells me the factory is on capacity production, with standing orders from jobbers in Michigan, Ohio and New York States taking the entire output.

Sol Smith Russell cigars (Wm. Legge & Co.) are moving at a great pace these days. Local dealers report the demand for this popular smoke increasing daily.

Van Dam cigars, manufactured by Tunis Johnson, Grand Rapids, Mich., are going well in this market, in all sizes.

Joe Muers' Swift cigars are moving at a fast pace these days. Claude E. Howell jobs this smoke in Detroit, and reports all sizes big repeaters.

Meeting with Success

The Chancellor cigar, jobbed in Detroit by John T. Woodhouse, is one of the most popular Sumatra wrapped cigars in this market. Harry Parr, the American Cigar Co.'s Michigan ace, designs all of his own advertising, which is always original and carries plenty of punch.

High Powered Line

Bayuk Bros.' high powered lines, Prince Hamlet, Mapacuba, Philadelphia Hand Made, Havana Ribbon and Chas. Thompson, are going stronger than ever. Each month business shows a fine increase in volume.

Eddie Hosley, representing the Bernard Schwartz Cigar Corp., is doing some splendid work on R. G. Dun cigars in the downtown section. Eddie is a live wire and knows how to find the contact points which get the business. Previous to joining the sales force of the Schwartz Corp., Eddie was connected with Bayuk Bros., in the Michigan branch, for a number of years, and in his capacity of salesman became widely acquainted and well liked by the downtown trade.

J. D. Walsh, with Tobacco Products Corp., is bucking the line hard these days and getting big results. Melachrino and Natural cigarettes stand higher in the estimation of smokers of high grade cigarettes than ever before. Many beautiful window trims of Melachrino and Natural cigarettes are to be seen throughout the city.

Potpourri smoking tobacco, a product of the J. S. Pinkussohn Cigar Co., Charleston, S. C., is becoming very popular with pipe smokers who like something just a little bit better than the average, and in Potpourri they are getting a tobacco that is one of the finest. It is stocked by all leading cigarists and clubs throughout the city.

Tuval cigars, made by Marcelino Perez & Co., are popular in Detroit with discriminating smokers. Mort Hammer visited us this week and found the welcome sign hanging out as it always does when he arrives. The only trouble is he doesn't stay long enough.

Matt Behrman returned to Detroit this week after making his initial trip through the State of Michigan as representative of the Mazer Cigar Mfg. Co. Matt reports the demand strong for all Mazer products and opened several new accounts.—JIM.

Featuring the Elm and the Manhattan Cigars

Attractive window displays throughout Brooklyn provide visual evidence of the campaign that the Central Cigar Manufacturing Co., of New York, have just inaugurated to put their Manhattan and Elm cigars over in the Metropolitan market. The Central Cigar Manufacturing Co., who are nationally known as the producers of the famous Na-Bocklish cigars, have recently greatly augmented their city sales force, and at the present time ten men are making an intensive canvas of the Brooklyn market.

More than 200 new Manhattan accounts were opened last week in Brooklyn, and Willard G. Stanton, the recently appointed sales manager of the company, predicts that inside of a month the Manhattan and the Elm will be on sale in practically every retail stand in Brooklyn. The company is planning an extensive advertising campaign behind their initial distribution, which will include bill posting, street car cards, newspaper advertising and specialty work directly to the consumer.

The Manhattan, which the Central Cigar Manufacturing Co. confidently expects to make its leading seller, is a full Havana filled, Sumatra wrapped cigar, and is being put on the market in three sizes and six popular shapes priced at 10 cents, 2 for 25 cents and 15 cents straight. The company's long experience in the cigar manufacturing business, and their unusual success with the Na-Bocklish assures the smoker that in purchasing the Manhattan he will be securing the finest cigar that can be made for the price asked.

The Manhattan has sold exceptionally well outside of New York, and is ranked as one of the leading sellers on the Pacific coast, where the house is represented by the National Tobacco Co. The campaign in Brooklyn is the first organized attempt that has been made to introduce the brand to the Metropolitan smokers, but initial successes secured last week have already assured the company of a cordial reception for a brand that has a real New York flavor.

Gans Bros.' Affairs

In the United States District Court, Justice Knox assented to the discharge of the equity proceedings of the old firm of Gans Bros.

Ralph M. Gans, of the old firm, has received power of attorney to dispose of the assets for a friendly disposed creditor who has purchased them. He is to turn over the new corporation, which is to be formed shortly, all the good will, rights and titles and brands of the old firm of Gans Bros.

In the course of a week or 10 days, a new corporation will be formed, with which Asa Lemlein will be connected.

Sails for Porto Rico

Javier Alonso Riera, president of the Combate Tobacco Corp., of San Juan, Porto Rico, who has been on an extended visit to New York, sailed for Porto Rico last Saturday on the steamer *Ponce*.

Cleveland Trade Has No Outstanding Complaints

Goddess of Business Escapes Severe Criticism—Price-Cutting Deserves Censure—Cigarettes Suffer as Result of Poor Business Methods—Some Improvements Noted.

CLEVELAND, Ohio, May 12.—The month of April saw no great change in conditions pertaining to the tobacco industry around Cleveland. Business kept coming along on an even keel and there have been very few dealers about town who have any complaints to make with the way the Goddess of Business Fortune has treated them. Price conditions have not been of the best and there have been many remarks about the deplorable cutting war waged by a very few. Cigarettes only have been the subjects of these price cutters' activities and the small margin of profit on this article have led many to take in a large and assorted specialty line on which the margin of profit makes it worth while to handle. Sporting goods, razors, cards, shaving creams, candy, soda, etc., have been but a few of the many articles that dealers have seen fit to place and which, in a great many instances, have been slowly but surely replacing the cigarette as a profitable commodity. A fine improvement has been noticed in the arrival of shipments and dealers now have no fears as to their being unable to supply all their customers with all they need. On the whole, April was an ordinary month with business conditions fair and with a slight improvement over the preceding month in a good many instances.

Pleased with Trade

R. N. Paris, salesmanager of the Manchester Cigar Co., of York, Pa., dropped in on us this past week. Paris was greatly enthused over the fine way in which Havana Cadets are going over on the Fifth City market. No store has a complete stock without a large supply of this brand.

Selling Plenty

Met Bill Oberfell downtown the other day. Bill who hustles orders for the A. L. Ehrbar Cigar Co., tells me that he never saw the time when he could land more orders than he can right now for El Productos and Cincos. Both of these standard brands are amongst the most popular in their respective classes.

For Mazer Cigar Co.

Jake Mazer, active head of the Mazer Cigar Co., and J. M. McKinnon, superintendent of the Columbus factory branch, spent the past week in the Fifth City. Both spent a great deal of their time around the Baer-Wolf Co., distributors of the fast selling Detroit Hand Made cigar. This brand is going along like the proverbial house on fire and sales and repeat orders keep mounting up day by day.

A Hot Pace

El Roi Tans are maintaining a hot clip in the local sales race. The Seidenberg product is well supported by its local representative, R. J. Williams, who is working in conjunction with the George B. Scrambling Co. sectional distributors. "Big league" advertising campaigns have made the Roi Tan even more popular in the eyes of the many smokers through here.

Back in Harness

A. D. Goodman, head of the A. D. Goodman Co., got back in town the other day after a short vacation jaunt to Mount Clemens. Mr. Goodman was in the best of health and spirits after his trip to the resort and was feeling even happier than when he left to find that Websters, T. R.'s, Farraguts, etc., were hitting along at even a higher rate of speed than when he left.

A Caller

J. B. Annis of the firm of Gradiaz, Annis & Co., was a caller in town this week. Don Julians are popular with smokers of quality cigars and the new Don Julian Kits are meeting with lots of calls.

Jimmy and His Car

Jimmy Rowen made a fine "appearance" as he "strutted" in his new car down Euclid Avenue the other day. The popular salesmanager of the A. D. Goodman Co., has received many congratulations on his ability to pick out a good-looking machine and this time he quite outdid himself. I don't want to mention the name of the car but these new Willys-Knight sport models make a fine appearance.

Gratified with Business

Sam Gates of the Webster Cigar Co., was a visitor in town this week. Sam gets here quite often and every time he comes he is more enthused over the fine way Cleveland smokers are taking to Websters and Farraguts. The A. D. Goodman Co., keeps the retail stores in this neighborhood supplied with the Webster product.

Pipes

Charles Houpt spent a few days in town this week getting orders for the fine line of pipes and smokers' supplies made by S. M. Frank & Co., of New York. The Frank pipe is a thing of beauty and all stores carry this as a valuable addition to their line of fast selling pipes.—HERB.

Tobacco Products' Earnings

Tobacco Products Corporation earnings for the first four months of this year show a remarkable growth. In this period earnings totaled $2,012,000, including dividends, as compared with $450,000 in the corresponding period last year, before Retail Stores had been acquired. These earnings are sufficient to pay the preferred dividends of the corporation for three and a half years. The corporation's present volume of business is running at a record-breaking rate.

Visiting Keystone State

Harry S. Rothschild, of Cullman Bros., big tobacco house, is visiting his Pennsylvania clientele this week.

Confers with Chiefs

L. F. Muller, Philadelphia representative of Cullman Bros., visited New York this week to confer with his chiefs.

Investigating Leaf Market

Walter Sutter, of the Walter Sutter Co., of Havana, Cuba, is studying the leaf situation in New York this week.

Kohlberg, Gonzales Co.

Kohlberg, Gonzales Co., of New York, has been incorporated, to grow and deal in tobacco. Capital stock, $250,000.

Porto Rican-American Revise Plans

Under date of May 10, President L. Toro sent a letter to the stockholders of the Porto Rican-American Tobacco Co., of which the following is a copy:

"Your Board of Directors on the 13th of March, 1923, adopted certain resolutions calling a special meeting of the stockholders and recommending that the charter of the Company be amended increasing the authorized capital stock; the conversion of the present stock of the Company into seven per cent cumulative preferred stock; the issuing of a like number of shares of common stock without nominal or par value and disposing of the latter without first offering it to the present stockholders.

"Some of the stockholders strongly insisted that the right to take the non-par common stock should be given to the stockholders in proportion to their holdings of the present outstanding stock.

"Out of deference to the views of the stockholders opposing the plan, your Board of Directors reconsidered and rescinded the resolutions calling for a Special Meeting of the stockholders and definitely abandoned the plan, and in lieu thereof they are now proposing the new plan evidenced by resolutions of the Board adopted on May 3, 1923, a copy of which is set out in the notice herewith enclosed calling the Special Meeting of stockholders on May 31, 1923. Amongst other things, it appears from these resolutions that the Board recommends that the charter be amended so as to authorize the increase of the capital stock of the Company, the same being all of one class, by adding thereto 100,000 additional shares designated as Class B common stock without nominal or par value or voting rights, and that there be offered to the present stockholders one share of Class B common stock at $25.00 per share for each share of the present stock held by them, respectively. It is deemed but proper that you be advised that the entire surplus of the Company has been consumed. It is of great importance that necessary working capital be provided, and it is for the purpose of raising the same that the Company is seeking to sell an additional amount of stock of the Company.

"Due to the several bad years experienced by the Company, mainly attributable to labor conditions in Porto Rico, your Company, as you will recall, sought and secured in 1921, at a time when there was great stringency in the money market, a loan of $3,000,000, for which it issued its Ten Year Gold Bonds at the then prevailing high rate of eight per cent interest. There was a provision for a sinking fund, through which up to the present, something more than the required number of bonds have been purchased and retired. The bonds are redeemable at any semi-annual interest due date. We submit that the Company should be relieved as quickly as is practicable of continuing to carry the burden of interest on these bonds. Besides, your Company needs additional working capital for the general expansion of its business and especially for the purchase of the present crop of tobacco, which is of good quality. To the extent it can acquire tobacco of the present crop at fair and reasonable prices, it is thought to be good policy to invest in the same, to the extent of the needs of the Company.

"It is the hope and desire of your Board of Directors that the stockholders will appreciate the conditions and promptly respond to the notice of the special meeting of stockholders to consider and act upon the resolutions of the Board."

Special Meeting May 31

The notice referred to by President Toro, was signed by Secretary H. Catlin, and reads as follows:

"To the Stockholders of Porto Rican-American Tobacco Co:

"Notice is hereby given that a special meeting of the stockholders of said company will be held at the company's principal office, 15 Exchange place, Jersey City, N. J., at 11 o'clock A. M., on Thursday, May 31, 1923, for the purpose of considering and acting upon the following resolutions adopted by the board at a meeting held on the 3rd day of May, 1923, and for the transaction of such other business as may properly come before the meeting:

"'Resolved: That it is advisable and for the best interest of the company to so amend the certificate of incorporation and increase its capital stock as that:

"'(1) In addition to the present authorized capital stock of 100,000 shares of the par value of $100 per share, all of one class (hereinafter referred to as Class A common stock only for the purpose of differentiating it in these resolutions from the proposed new common stock denominated Class B Common stock), there be authorized an issue of 100,000 shares of Class B Common stock, without nominal or par value and without voting power, which the board of directors may issue in their discretion in whole or in part to the holders of Class A Common stock as a stock dividend, or offer to them the right to subscribe for same, or otherwise dispose of in accordance with law. Said Class B common stock shall enjoy the privileges and be subject to the further following restrictions and conditions:

"'(a) That when and not until cumulative dividends of seven per cent shall have been paid upon Class A common stock there may be paid dividends in the aggregate equal to $7 per share on Class B common stock for the fiscal year. As to all further dividends that may be declared for the fiscal year, Class A common stock and Class B common stock shall share equally, share and share alike.

"'(b) Upon dissolution of the corporation, or upon final distribution of its assets, and after the payment of its debts, Class A common stock shall be redeemed at par with accumulated divi-

dends, if any, if the assets of the corporation, including surplus and accumulated profits, are sufficient; if the assets are not sufficient, then all said assets or their proceeds shall be distributed ratably among the holders of Class A common stock. If the assets are more than sufficient for such redemption, all remaining thereafter shall be distributed ratably amongst the holders of said two classes of common stock.

"'(2) The board of directors may issue any authorized and unissued Class A common stock and Class B common stock, or either, at such times, respectively, and on such terms as in its discretion may seem best and in accordance with law, and upon issuance of Class A common stock the holders of Class B common stock shall not have any preferential right to receive or subscribe for the same.

"'(3) In order that any other class of stock may be authorized, not only the consent of those holding two-thirds of the issued and outstanding shares of Class A common stock shall be given, but as well the consent of those holding two-thirds of the issued and outstanding Class B common stock.

"'FURTHER RESOLVED: That a special meeting of the stockholders be and the same is hereby called to be held on the 31st day of May, 1923, at eleven o'clock A. M., at the principal office of the company, 15 Exchange place, Jersey City, N. J., for the purpose of considering and taking action on the foregoing resolution for the amendment and increase of capitalization of the certificate of incorporation of the company and that due notice of such meeting be given and that upon obtaining the assent in writing and the approving vote of the stockholders of the company as required by law, the certificate of incorporation be amended and the board of directors be authorized and empowered to issue stock as hereinabove provided.

"'FURTHER RESOLVED: That in the event of the certificate of incorporation being amended and the capital of the corporation increased as hereinabove provided, the board of directors be empowered to forthwith give to the holders of Class A common stock the privilege of subscribing and taking one share of Class B common stock for each share of Class A common stock held by them, respectively, in consideration of $25.00 per share.'

"In the event of your being unable to be present at the meeting, you the requested to kindly sign and return the enclosed proxy immediately. The proper revenue stamp will be affixed by the company."

American Can Co.

All indications point to a record year for American Can Co. Sales so far have been well ahead of those of the corresponding period of 1922 and crop prospects are excellent. Any estimate of 1923 earnings at present is premature as the company's season of largest earnings is in Summer and early Fall.

Profits from the manufacture of munitions were not the greatest benefit American Can received from the war. The conflict brought home to all the necessity of conservation of food resources and permanently increased the demand for food containers.

American Can inaugurated dividends at a 5 per cent rate on its $41,233,300 common stock last November. If the promise of the present is fulfilled, stockholders will probably get larger returns later this year. However, the management does not look favorably on the suggestion of a stock dividend.

American Can is unusually well supplied with working capital, this item standing at over $37,000,000 at the close of last year. Cash and security holdings on January 1 were $18,927,445.—*Wall Street Journal.*

Eisenlohr Dividend

PHILADELPHIA, May 12.—The directors of Otto Eisenlohr & Bros., Inc., have declared the regular quarterly dividend of one and three-quarters (1¾%) per cent. on the outstanding preferred stock of the corporation, payable June 30, 1923, to stockholders of record at the close of business June 30, 1923.

Foreign Exchange Rates

In the subjoined table the quotation on sterling represents dollars and decimals of a dollar; all others represent cents and decimals of a cent. Quotations preceded by the decimal mark indicate a price measured in fractions of a cent.

Parity of exchange is given as reported by the United States Mint, except in countries with a silver standard, where parity fluctuates with the price of silver.

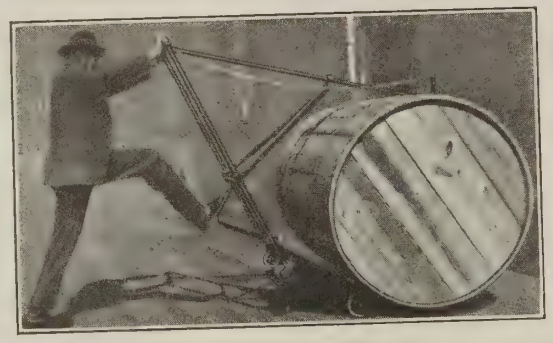
Another Reason Why

Another reason why tobacco growers are so enthusiastic about the JOHNSON PATENT TOBACCO CURING FURNACE is that it's



"so easy to get on to it"

Simple to operate, built to eliminate continuous repairing and priced within the reach of the smallest farm. Installed as fully explained in the Johnson catalog—and given proper care—the user will be certain of the best obtainable cures without the fears of finding his barn burnt down by improper curing methods.

Where Profit for the Tobacco Grower Is Found

Justice Hickey Submits Proof That It Pays to Raise Quality Crops—A Showing of What Can Be Done in the Connecticut Valley Even in an Adverse Year.

HARTFORD, Conn., May 14.—The rewarded tobacco grower isn't lazy. Nor is he a careless man. Success, in tobacco culture, doesn't come by chance. Prosperity, such as the tobacco farmer has, usually, is deserved. Hard work, incessant care, unremitting attention to details, full knowledge of what must be done, experience, energy and shrewdness are good excuses for any extra money a tobacco grower can get. Advantages of soil and location may be nullified by failure to do the proper thing at the right time. A financial penalty attaches to each error of judgment. Neglect is costly. Mistakes are destructive. In tobacco growing, opportunities to lose coin constantly are presented. Whether ephemeral or otherwise, the beneficence of favorable weather, occurring opportunely, includes most of the luck a grower reasonably may expect. Given sunshine and rain as desired, untouched by hail and frost, a tobacco crop is an attestation of what the farm and farmer are.

For the use of his land and for his labor, time and expenditure, the returns to the farmer, at most, in fortunate years, are not too great, considering all his outlays and what risks he has to take. The compensation of the tiller of the soil seems inadequate indeed when crops are poor or prices are low.

Admittedly, the farmers cannot control the weather. Neither may human beings, however active or gifted, hope to be absolute masters of all circumstances. To a certain extent, though, the tobacco grower can make his crops more profitable.

What a thing should sell for, may be a matter of opinion. Values fluctuate according to supply and demand. The worth of an article, partly, depends on the condition of the market.

Merit appeals. Excellence creates enthusiasm. Desirability induces the buyer. Quality and reputation assist in fixing a price.

More than any other farm product, perhaps, tobacco is associated with reputation. Especially is this true of tobacco used for cigar purposes. To obtain good repute as a tobacco grower, a farmer must prove his dependability. He should show aptitude and good judgment. His product has to be above the average. The higher his tobacco is graded, the better his reputation will be.

In endeavoring to obtain more per acre, in trying to improve the quality of their crops, in seeking to produce a higher percentage of superior leaf, tobacco growers in the Connecticut Valley are working to financial advantage, particularly in upholding reputation.

Quality pays. How desirable it is to grow tobacco that will grade high, not all of the farmers fully realize. But they are learning. They have object lessons.

The Connecticut Valley Tobacco Association, an aggregation of 3,322 growers, is telling the world that prosperity for the tobacco farmer is dependent on quality and yield. In its disbursements to members, the association reiterates the statement.

In selling "sun grown" crops co-operatively, the association is handling tobacco strictly on a merit basis.

The "sun grown" tobacco, principally Broadleaf and Havana seed, produced by farmers who belong to the association, is no longer sold "by crops," but on the grade and pool basis. After the individual member's tobacco is sweated and graded, it goes into a pool and loses its identity. The grower's compensation corresponds exactly to what he puts in the pools.

Though, because of weather conditions the 1922 "sun grown" tobacco crop of the Connecticut Valley was not so large or good as usual, some of the growers who exemplified careful methods, were able to show results, especially satisfactory.

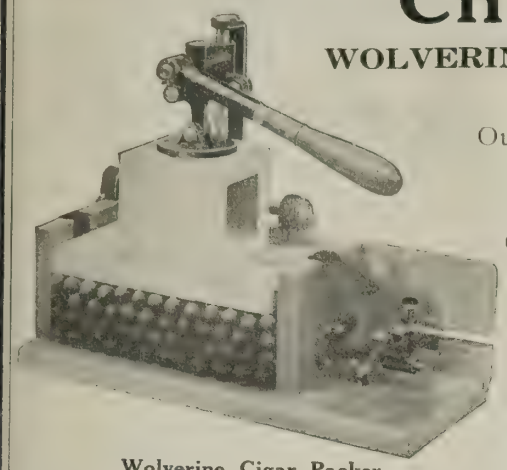
At Easthampton, Mass., the yield of a fifteen-acre field of Havana seed went to an association warehouse and was graded as follows:

	Pounds
Light wrappers, 20″ up	3,23
Medium wrappers, 22″ up	4,16
Dark wrappers, 20″ up	9,23
Seconds, 16″	18
Seconds, 18″ up	5,65
Brokens (case)	91
Fillers (case)	1,24
Loose leaves (case)	14
	24,78

Another illustration of what can be done, even in a bad year, is given by Justice Levi M. P. Hickey, of East Hartford, Conn.

Justice Hickey reports a nine-acre field of Broadleaf grown at South Windsor, Conn. and handled by the association. The crop that, after being thoroughly graded, was found to contain:

	Pounds
Light wrappers	2,2
Medium wrappers	1,8
Long seconds	2,6
Short seconds	1,1
No. 2 seconds	9
Dark wrappers	1,9
No. 2 dark wrappers	1,4
Brokens (case)	
Brokens (bale)	
Fillers	1,0
	13,7



For what he put into the association pools, from his fifteen-acre field of Havana-seed tobacco, the Easthampton grower received as a first payment $915, a sum equivalent to $327 per acre. Concerning subsequent payments the Easthampton farmer may obtain, Justice Hickey says:

"Assuming that the tobacco goes through the sweat sound, it will bring

the basis of the prices at which the bulk of the Havana seed has already been contracted for, between 50 and 55 cents per pound in the bundle. This means that the crop will have to sell for 10 cents, in addition to that, in order to pay off the overhead for assorting, packing, etc. It is needless to say that this type of grower is getting more money out of his crop than he ever dreamed possible before."

For his nine-acre field of Broadleaf, the South Windsor grower got, from the association, as a first payment, $2,504, "after paying off the entire association overhead, at the rate of 8 cents per pound, amounting to $1,015. If this crop comes through the sweat sound, as it probably will, the return to the grower, on the basis of the probable Broadleaf market prices, will be between 50 and 55 cents per pound bundle weight. When it is possible to average over 50 cents per pound in the bundle for brokes, fillers, as well as the upper grades, the grower certainly has no kick coming."

While the presented examples may not be typical, they do prove what success practical farmers can achieve growing tobacco in the Connecticut Valley, even in a year so unpropitious as 1922 was.

Whether his tobacco field represents two acres or a larger area, every tobacco grower has a financial incentive to strive for the production of a quality crop.

Whatever the variety or strain of his tobacco may be, if he wants to succeed, it's up to him to do all he can to have that tobacco grade high. For, according to the excellence of his crop, he may hope to be rewarded.

Surely it pays to raise quality tobacco in Connecticut. And the inducements to grow superior leaf are equally alluring in every other tobacco district.

Wherever he may be, the grower who is distinguished as a producer of tobacco that grades high, almost without exception, is a substantial man in his community. He is looked up to, his achievements are cited, his reputation inspires pride. He gets by, all right.

But sorrow camps at the door of the farmer whose crops range from indifferent to poor.

Failures occur because of inability to perceive how necessary quality production is to success.

By unwillingness to take the extra pains required to obtain a superior product, many growers deprive themselves of opportunities to get better prices.

Too many farmers owe their troubles to scorn of new-fangled methods, disinclination to attempt betterments, disregard of approved methods and dislike for up-to-date procedure.—NUTMEG.

The Dominican Crop Much Diminished

WASHINGTON, D. C., May 16.—According to a report from Consul W. A. Bickers at Puerto Plata, Santo Domingo, the prospect of a record tobacco crop in the Dominican Republic this year, which was predicted in a previous report, will not materialize.

A very large acreage was planted under favorable conditions and a crop of forty to fifty million pounds was forecast, but heavy freshets in February and tobacco pests have done much damage to growing plants and have materially reduced the yield. The effect of these two setbacks was small in comparison with the heavy damage caused by the drought, which has prevailed since the last of February until the present time.

If the drought continues, the yield will probably be as low as fifteen million pounds, while under the most favorable conditions the crop will not exceed twenty-five million pounds.—LAMM.

Havana Tobacco Market Almost at a Stand Still

Sales of Old Crops Practically Nil, Except Some Transactions in Remedios Botes to Cigarette Factories at High Prices—No Competition in Vuelta Abajo.

HAVANA, May 10.—There is hardly anything to report about sales of tobaccos of the last and other previous crops, except some transactions in Remedios Botes sold to local cigarette factories at very high prices. For a pretty large quantity of old Botes, of the 1920 crop, $20 per qq and more were offered in vain. This shows, that prices for new tobaccos are expected to be much higher than last year.

In Vuelta Abajo many of the Havana Almacenistas have started to buy and by today more than half the crop of this section is said to be sold and mostly received. The prices paid are rather high and it is strange that the Havana packers, almacenistas, being able to operate without any competition of American and foreign houses, allowed prices to reach such a high limit, more so, as they recognize and admit, that the proportion of upper grades, especially 14as, will be very small this year. Certain houses, who started buying early, have operated favorably and by the end of this month several packings will start. So far, only a few lots of Hoja Semilla and Libra de Pie came to Havana. Of these grades, some Libra de Pie were sold at $55 per quintal, a very good price. For the Hoja Semilla around $30 per qq are asked. Vuelta Abajo Colas will have to bring from $35 to $40. The quality of the tobacco is reported to be a good one and pretty heavy.

In the Remedios section, due to the dry weather, most of the farmers were not able to pack their tobacco in pile and as every farmer has the highest pretensions, almost nothing has been sold. One American export-house bought a few small Vegas at $34 to $37 per qq and another firm offered for a large and good Vega in vain, $40 per qq. At similar prices and even a little lower, we will again have prices like they were at the beginning of 1920, and partly higher perhaps, just according to the scarcity of one and the other grade. There is very little animation in Vuelta Arriba. All packers went out there to look at the tobacco and came back without having bought or compromised a single leaf. Nearly all of them confess that the prices asked make business next to impossible, and several of them dropped this section, increasing their purchases in Vuelta Abajo and Semi Vuelta. Under such circumstances it will be undoubtedly the best policy to let the farmer pack, as, without having the slightest idea whether the North and South American trade can or will pay such prices, it will take quite some nerve to go in and buy on speculation. A fact is, that there is nothing left in our market, and besides this, there is and will be quite some demand, but, notwithstanding all this, can the foreign manufacturer afford to pay such enormous prices? Many packers will not very easily forget 1907 and 1920!

The cigarette factories have raised their prices for cigarettes from 5 cents to 7 cents, which is nothing compared with the much higher prices for cigarette material. Stripping scraps, not the best class, were sold from $26.30 per qq, and there seems to be a great demand, as several brokers and buyers are looking for this class.

Today a circular was sent around the tobacco trade announcing the sudden death of Don Manuel Fernandez Mendez, one of our old packers at Monte 139. The funeral services were held today. Our sympathy goes out to the bereaved family, and especially to his sons, Juan and Angel, his successors.—GALLO.

On Hail Insurance

WESTFIELD, Mass., May 12.—Joseph Alsop addressed about 100 local tobacco growers at the city hall last night on "Hail Insurance." Members of the local district, affiliated with the Connecticut Valley Tobacco Growers' Association, were present.

Tampa Tidings

TAMPA, Fla., May 12.—Francisco arcia, head of F. Garcia & Bros., con- ary to custom, was not with us this st winter. Late information, however, that he will shortly pay his Tampa ctory a visit. Notwithstanding the iiversal slack demand for clear Hav- as, his F Garcia retains its hold on the iblic.

This is also true of the clear Havana e put out by Villazon & Co., who re- rt no falling off in demand.

Enjoy Good Demand

With Arango & Arango, their Don ebastian and Don Pancho are spreading er the East and West like oil on the aters. There is no let-up in the de- and for these favorites, and Geo. W. ocking is kept very busy on his rounds. ikewise Senor "Pancho" Arango is ept on the go 'twixt Tampa and his bacco warehouse in Havana, feeding af to his factory. He is back in Tampa is week.

Louis Mistretta of the Big 4 Cigar Co. finding ready sale for his Tampa istom House, put up in cans. A 50,- 0 lot to one customer this week. icago, Milwaukee, Cleveland, Cincin- ti and St. Paul take about all his tput.

The recent campaign of J. B. Annis Gradiaz, Annis & Co., over the East d Middle West shows good results, d Leo Gottsegen, in charge of the ampa factory, is kept busy supplying e demand. Don Julian continues to a favorite.

H. L. Diaz, superintendent of the cal factory of the Preferred Havana obacco Co., goes to New York next eek.

A. H. Caro, southern salesman for A. ntaella & Co., has been visiting Tampa, d has again hit the trail. Optimo goes sy in his territory.

Sails for Havana

Jorge Leon sail tomorrow for Havana secure a larger supply of the fragrant af that makes Hoyo de Cuba and San- artin y Leon so popular. Jorge is now viding his time between Tampa and avana while Secretary Rollins does the casional scouting East and West, and good effect. He has recently re- rned from Kansas City and interme- ate points, bringing in generous orders.

A. L. Cuesta, Sr., to Leave Soon for Spain

A. L. Cuesta, sr., and family of No. 800 South Willow street, will leave shortly for the Cuesta home at Santander, Penamellera, Panes, Spain, for the summer months. They expect to return to Tampa about September 15.

Indorse Tobacco Station

QUINCY, Fla., May 12.—The Florida-Georgia Tobacco Growers' Association in a recent meeting, endorsed the work of the local tobacco experiment station, which was made possible by an appropriation of $30,000 made by the legislature two years ago.

That fund is practically exhausted by the construction of a laboratory building and other expenses, and an appropriation of $20,000 for the next two years is now being asked of the present legislature. In view of the importance of the work being done in the matter of plant breeding, disease and insect control, etc., it is believed that such an appropriation will be favorably considered.

A Huge Purchase

Jacob Mazer, of the Mazer Cigar Manufacturing Co., of Detroit, visited New York early this week. Mr. Mazer recently purchased a large consignment of fancy Sumatra wrappers from E. Rosenwald & Bro., consisting of more than a thousand bales, and representing a value of $1,300,000, including duty.

Off to Havana

Following the T. M. A. convention, Alfredo Selgas, of Selgas & Co., is scheduled to leave Washington for Tampa, and thence to Havana, Cuba. He expects to return to New York towards the end of the month.

From Louisiana

George C. L. Mayer, of P. D. Mayer & Sons, cigar manufacturers, of New Orleans, was among the prominent out-of-town visitors to New York this week.

Down in Florida

John L. Fielding, of Cullman Bros., is visiting Tampa, Fla., this week, in the interests of the Cullman organization.

Connecticut Growers Anxious About New Crop

Severe Weather Still Retarding Development of Plants—Field Preparations Going Forward Despite Unreasonable Temperature—Old and New Conditions.

HARTFORD, May 12.—The tobacco plants have not grown much during the past week, due to cold weather and lack of sunshine. On a couple of nights the temperature went down to freezing point and stayed cold all the day, while a few flakes of snow were noted in East Hartford. Farmers are anxious. However, they have been taking advantage of the cool weather by plowing and preparing their fields for the time when the plants are ready. Precaution is being taken by most of the growers to dust their seed beds, and all the known precautionary measures to stamp out "wildfire" are also being taken.

A few of the growers have still got some of their 1922 crop hanging on the poles. Some growers are busy assorting, and, unless another damp spell comes along the work of packing the 1922 crop will soon be completed. The warehouses will be closed after the work is done.

The headquarters of the Connecticut Valley Tobacco Association present a busy scene. A large clerical force is engaged in making out the gradings of the tobacco that has been packed, and sending out first payment checks. However, it will take at least another week to finish the work. As yet, it is not definitely known how soon prices will be made on the Broadleaf tobacco, but it is rumored that they will be fixed within the next few weeks.

Sales of Havana seed have been very satisfactory, and within a short time it is expected that the Association's notes on this department will all be paid off. From present indications it appears likely that the second payment will be made during July and the final payment during August. However, the Broadleaf section will come along with its payments later, as much of the Broadleaf will be natural-sweated, and will not be ready for sampling for some time to come. Some sales have been made of Broken, No. 2 Seconds, Fillers and Loose Leaves, from the Broadleaf, at satisfactory prices, and shipments have already been made.

It is understood that the cigar manufacturers of the country will shortly be notified of the time when the Broadleaf will be ready for the market, and invited to look over the samples, and make their purchases. As the work of grading the green samples is progressing, many banner crops are being found. The percentage of fine tobacco is much larger than was anticipated and the growers who produced the crops are naturally gratified. The Broadleaf has been classified and packed in the following types: John Williams, Hockanum Broadleaf, Roberts, Barber and Bantle seed.

Hail Insurance Plans Explained

Meetings are being held in each of the tobacco districts to explain the new hail insurance policy decided upon for the coming season, which is different from the policy used in former years. The policy, as presented, will be issued at a rate of $24 per acre on a $300 basis, in effect June 1. This rate applies only to Association members' crops, and a certain acreage must be signed up before the policies become effective. Canvassers are being appointed in each district to personally present the proposition to each individual member for his approval or disapproval.

Fertilizer manufacturers are finding that the Association is of much assistance to them in collecting their bills and in one month over $60,000 was turned over to them.

In agreements with other sections of the tobacco industry, the growers are coming to the conclusion that the seasons have materially changed during the past decade, and that the production of a crop of tobacco is a greater problem now than ever. Thirty to forty years ago the use of glass was unknown on seed beds, and usually the only protection that the seed beds had was to be covered with brush. The beds, received comparatively little attention other than weeding and occasional watering. Despite this condition, the plants were thrifty stock, and when transplanted, would come right along, unless destroyed by the cut worm.

The average yield was from 1,800 to 2,000 pounds to the acre, the work of assorting was done on the farm, and the grades were wrappers and seconds. Much of the tobacco was assorted on the stalk before it was stripped. It is true that the prices received in those days were low, but to offset the low prices, the cost of production was less and help could readily be engaged at prices ranging from 75 cents to $1.25 per day, with the working day from 10 to 12 hours.

Seasons and other conditions have gradually changed, and although commercial fertilizers are now being used almost exclusively, the weight per acre has greatly decreased. There are many theories advanced as to why the weight has decreased, for the leaf seems to grow to a sufficient size to expect a large weight. Some experts wonder if the constant use of the land has anything to do with it and others suggest that too much commercial fertilizer may be used.

Growers are now confronted by many hazards not known years ago. Bad storms have become more frequent, labor is becoming scarcer each year, and the spread of wildfire is making the growing of tobacco still more hazardous. Scientific experts are gradually solving the soil, fertilizer, and wildfire problems, and are doing much to overcome some of the conditions.

Porto Rican Samples Ready

Pedro Costa, leaf tobacco dealer, of 98 Water street, returned from Porto Rico last week, where he found the new crop very good and the prices rather high, but despite these conditions, purchased several hundred barrels. Samples are now ready for inspection.

Virginia's Warehouses Practically All Closed

Season Permanently Ended and All Active Participants in Auction and Co-operative Markets Shift the Scene of Their Activities—The 1922 Crop a Money Circulator.

New Canton, Va., May 12.—Practically every tobacco warehouse in Virginia, co-operative and auction, has been permanently closed for the season, and buyers, handlers, bookkeepers, graders, and managers are taking vacations, or have gone into other business until the Fall opening, the dates to be determined later. It may be said conclusively that the last selling season was one of the best, everything considered, that was ever known in the Virginia dark belt, and all parties seem satisfied with results. Growers are particularly well pleased with the prices allowed by the association and the amounts paid in cash by the outside buyers; and it is generally stated in business circles that more money was put into circulation by the marketing of this crop than has ever been done by any crop in central Virginia. This, too, taking into consideration the fact that one payment of the Co-operative Association remains as yet undistributed. Just when the money will come the growers have no idea; when it comes it will generally be considered to be an "extra" or bonus outside of the usual price of tobacco.

Plan Unusual Crop of Dark Tobacco

Growers in the dark belt are preparing for an unusual crop of tobacco this Summer. Activity in this line is measured by the amount of fertilizer which is being distributed from every small town, city, and railroad station throughout the territory. Everywhere trucks and wagons are taking the product from the cars out to the farms where preparations are in the making for planting. It is interesting to note that very large quantities of high-grade material is being used. In most cases the 3-8-3 goods are being bought and will be used liberally. Many large growers have come to the conclusion that it pays to use from 600 to 1,200 pounds of fertilizer to the acre under all circumstances, and small growers seem determined to use the material up to the utmost resources.

Complain of Plant Shortage

It is as yet too early to tell anything definitely about the coming crop. Just at this time there is widespread complaint about the plantbeds, which many say are fairly ruined by insects. This is nothing unusual, however, as every year this cry comes up. Still, owing to the cold weather, insect pests have been unusually active and plantbeds have suffered materially. Just why insects are worse during a cold, damp Spring, the entomologists have to tell us; but the fact is established. One traveling fertilizer man who recently visited New Canton stated that considerable areas of tobacco lands in the southern tier of counties would be planted in cotton and other crops, owing to the failure of the plantbeds. As the middle section of the state is usually two or three weeks behind the southern counties, it is as yet too early to say that any considerable amount of tobacco land will be given up to corn, hay, or truck crops. Central Virginia is far too cold for cotton and too heavy of soil for peanuts.

Interest Centered on Suit

Tremendous interest centers here in the coming trial (as reported here) of Dr. Garland Lightfoot Morriss, of Buckingham, Va., who is to be prosecuted by the Tobacco Growers' Co-operative Association for selling his tobacco crop to the auction people last Winter. It is stated here that the trial will be held at Buckingham, a town 20 miles south of New Canton, next Tuesday, Aaron Sapiro to be the prosecuting attorney and John L. Lee, of Lynchburg, perhaps the ablest criminal lawyer in Virginia, the defending attorney. Dr. Morriss is one of the most prominent and prosperous citizens of the county, a man of ability and vast influence. Early last Fall he severed his connection with the association, which he had joined, and, it is alleged, assisted in the opening of an auction warehouse in the town of Dillwyn, selling his large crops of tobacco there.

It is predicted here that a crowd of five thousand tobacco growers will be at the trial to hear the oratory of the famous lawyers on each side.

The *Tri-State Tobacco Grower,* the organ of the Co-operative Association, has adopted the policy of printing advertisements, and the number for May is a large one with a number of widespread announcements of fertilizers, seeds, farms, and other things connected with country life and farming. This number of the paper contains much material upon the subject of the recent "victories" of the association in the courts of North Carolina, and prints in full the opinion of Chief Justic Clark, which was handed down on April 11. One sentence is quoted prominently: "The Co-operative system is the most hopeful movement ever inaugurated to obtain justice for and improve the condition of farmers."

The election of the twenty-two directors of the Co-operative Association is scheduled to take place in a town of each district at noon on May 12, exactly the moment when this paragraph is being written; and naturally this writer does

not know who is being elected and "what he signs of promise are." Suffice it to say that many are on the anxious bench just about now when the clocks are striking high noon. Really and soberly, however, it does not matter materially to the association members just who is elected. It is assumed that all the candidates are men who will answer all the purposes of the association.

Regarding the general surroundings of the dark tobacco business of central Virginia, it may be said: Business in general is good; stores are selling goods at rather above the usual rate, largely for cash. The banks are in good shape, with money on hand to lend; and any tobacco grower who has any standing whatever can be financed through the year if he so desires.

The rather unusual product, sumac, a wild plant that grows in the woods and fields, is in high demand this year, with high prices offered, and nearly every tobacco receiving warehouse in this section will temporarily be turned over to the sumac people for weighing, storing and packing the leaves of the sumac. Many small farmers and tobacco growers gather this material in July and August, the hot Summer months, and sell it at the uniform price of one dollar a hundred pounds. Many small tobacco growers get more for sumac than they do for their tobacco crop, all things considered. Many thousands of dollars will no doubt be put into circulation here as a result of the sumac activity this year.

A number of large tobacco growers are planting large commercial apple orchards. This means that for the first four or five years of the apple trees' life tobacco will be grown between the trees. It is generally considered that nothing whatever is better for a young orchard than tobacco. The cultivation of the crop leaves the land in perfect condition, free from weeds, grass or anything which interferes with the growth of the trees. Frequent cultivation causes the trees to grow while the roots are getting much of the high-grade fertilizer used under the tobacco plants. The stalks of the plants, disintegrating, serve to repel the hosts of insects which in these days do such damage to apple trees. Clarence O. Davidson, Dr. Boatwright, Plummer F. Jones, A. L. Pitts, Percy Baker, and other tobacco growers are among those recently registered for new or additional apple orchards here in the Piedmont Virginia fruit section where apples grow to wonderful size and evince surpassing flavor.

Retail Tobacco Business Good

The retail tobacco business here in the towns continues good. So far as is known, the demand for all tobacco products is good. This means that the usual amount of chewing and smoking is industriously and indefatigably going forward. Of course this also means that the fishing season is on and the evenings are long and loafing around the corners at its very best. Who is it who could not chew vigorously between the "strikes" of a big-mouth bass or puff contentedly in the balmy fragrance proceeding from blossoming locusts out in the dim light of the crescent moon!—PLUMMER F. JONES.

Trivial Sales at Richmond

RICHMOND, Va., May 12.—The sales of the past week were hardly worth recording, much less reporting. There were less than two thousand pounds of tobacco sold at not over 10 cents average.

The continued drouth prevents not only the remnant of this crop being sold, but it is very serious on the plants for the next crop, which is not as promising as it was. Whereas a large increase was expected, it promises to be no larger than the last crop.—R. C. MORTON & Co.

Face Various Problems

DANVILLE, Va., May 16.—Continued chilly weather is tending to retard further the tobacco crop. The cold nights and the complete absence of growing weather have set the farmers to wondering if after all there is not some truth in the recent statements made by scientists that the sun is failing in its usual degree of radiation. Some farmers have been compelled to replant their tobacco beds because of frost damage and the havoc wrought by tobacco flies. Many farmers, however, have started planting

their tobacco, though the plants are yet small. An added difficulty which is facing the farmer is the labor shortage which is said to be more acute than it was last year. The migration of negroes to the north, while not in volume in this section, is beginning to tell when coupled with the increasing lure which the city has for the young white man on the farm.—TETLEY.

Majority of the Co-op. Directors Returned

RALEIGH, N. C., May 14.—The 89,000 tobacco farmers who form America's largest co-operative marketing association expressed their approval of their leaders by electing a large majority of their directors to another term of office, according to the returns which had reached Raleigh headquarters up to tonight, the eve of the annual meeting of stockholders.

The old belt of North Carolina was the only section in which the member growers of the association chose a completely new set of directors. This was somewhat in accordance with expectations, as several of the association directors from the old belt had expressed a desire to retire from the board, and transfer the responsibilities of representing their districts to other shoulders.

The farmer delegates of Franklin, Vance, Warren and Halifax counties meeting at Henderson elected Clyde P. Harris, of Mapleville, Franklin county, to succeed S. T. Peace, of Henderson, as director for district 7. C. T. Hall, of Woodville, Person county, succeeds E. G. Moss, of Oxford, as director of the 8th district. In the 10th district J. R. McQueen, of Lake View, was chosen by the elected delegates to succeed Southgate Jones, of Durham. The organized growers of Caswell, Guilford, Randolph and Rockingham chose R. H. Montgomery, of Reidsville, to succeed J. W. King, of Greensboro, who was appointed to fill the place left vacant by the death of John M. Galloway, the first director from the 11th district. The western area of the old belt of North Carolina, including the growers of Surry, Stokes, Yadkin, Rowan, Forsyth, Davie, Iredell, Alexander, Mecklenburg, Wilkes, Davidson and Caldwell, through the elected delegates of the organized farmers, named A. S. Speer, of Boonville, Yadkin county, as the next director, to succeed A. L. Bunker.

Most of the new directors are distinguished as real "dirt farmers," although identified in several cases with the most important banking and other interests of their section.

The latest returns from Virginia from South Carolina and from eastern North Carolina indicate that a majority of the directors from those sections who labored with the association during its first year of growth and accomplishment will be returned by the members from their districts. The certified returns reaching Raleigh headquarters up to tonight showed no other changes throughout the tobacco area of the Carolinas and Virginia than those in western North Carolina, although several districts were still to be heard from.

Non-Member Minor Son Case

The tobacco association won its first jury trial and a far-reaching decision last week at Charlotte Court House, Virginia, before Judge Hundley, when the association received a verdict of 5c. per pound liquidated damage, attorney's fees and court costs for tobacco grown by a non-member minor son of a member of the association.

Major W. T. Joyner, of Raleigh, who conducted the case of the Tobacco Growers' Co-operative Association, with the assistance of Robert Hutcheson, of Charlotte Court House, stated his opinion that this decision in favor of the association was only second in importance to the recent decision of the North Carolina Supreme Court, in that the right of the association to market all tobacco grown upon the land of its members was upheld by a Virginia jury.

Similar rulings in favor of other co-operative marketing associations and recent news of the decision of the Kentucky court in the case of Garrett Watts, have further strengthened the organized Carolina and Virginia growers in their contention that the co-operative associations have prior claim to all tobacco grown upon the land of members.—S. D. FRISSELL.

Night Riding Reported in Virginia

DANVILLE, Va., May 16.—Quite a stir has been created among tobacco growers in this section as result of the first exhibition of "night riding" on record in Virginia. S. E. Alcorn, a tobacco grower living a few miles south of here, a few nights ago suffered the entire destruction of his tobacco beds, which were at full maturity, the plants being ready to be set out. On one of the uprooted beds he found a note addressed to him reading as follows:

"We helped you get a good price for your tobacco this year. Now join the Co-ops and help put it over. Sign up and do your part or you will not make a crop of tobacco.

(Signed) "Fair Play."

Mr. Alcorn, on viewing the havoc jumped into his automobile and went to the nearest town, Leaksville, and there filed formal complaint of the outrage. He has offered a reward of $100 for the arrest of the culprits. While there is nothing in the anonymous note by which the perpetrators of the act can be traced Alcorn, in making his complaint, told the officials that he was certain tha

Someone connected with the Co-operative Marketing Association was responsible for it. Mr. Alcorn is an independent grower and has elected to sell his tobacco on the auction floors.

Members of the "pool" are highly indignant over the affair and appear just as anxious as Alcorn is to find out who did the damage. They feel that while the "Co-ops" may not be responsible for the affair, the organization will have to shoulder the odium of it in the public mind. Some of the members have already given out statements declaring that as the "pool" members are reputable and first class farmers and that it is unlikely that they did it. They are inclined to believe that "mischievous boys" played the prank, but the writing, the choice of words and the sinister warning lead many to believe that the work is that of adults.—TETLEY.

Virginians in Europe

DANVILLE, Va., May 16.—Several well known tobacco men of this section are in Europe on business trips. Included in the number are W. Crews Wooding and A. Berkeley Carrington Jr., of Dibrell Brothers, Gordon Tuggle, Danville, and Weldon Lea of South Boston.

Tobacco Lost in London Fire

DANVILLE, Va., May 16.—Between five and ten thousand hogsheads of Virginia-Carolina tobacco were destroyed in the fire which recently visited the London government bonded warehouse according to reports received here.

Expansion of Tobacco Industry in Ireland

WASHINGTON, D. C., May 16.—The Department of Commerce has the following report from American Vice Consul Collins regarding the expansion of the tobacco manufacturing industry in Ireland:

"The cigarette and smoking tobacco manufacturing industry in the Irish Free State seems to be entering a period of expansion, as a result of the imposition of a duty of 8 shillings 6 pence per pound on smoking tobacco and 10 shillings 5½ pence per pound on cigarettes imported from Great Britain which became effective April 1, 1923.

"The retail prices of the popular brands of British made smoking tobacco and cigarettes have already been advanced 20 to 25 per cent, and Free State manufacturers, whose prices have not been advanced, are beginning to find their production facilities severely taxed to meet the demand for their products.

"The total annual consumption in the Free State of smoking tobacco and cigarettes is about 7,200,000 pounds valued at about $10,572,880 at the present rate of exchange. Of this amount Great Britain supplies 5,200,000 pounds or more than 70 per cent, and domestic manufacturers about 2,000,000 at the present time. Cigarettes constitute probably 75 per cent of the imports from Great Britain, but of the domestic production smoking tobacco constitutes about 75 per cent.

"It is rumored that the British firm whose products have figured most prominently on the Irish market may establish a factory in the Free State to avoid the new import duties. Regardless of whether this is done, or whether the domestic manufacturers succeed in capturing the 70 per cent of the grade which now goes to the British manufacturer, it appears that there will be, in the near future, a brisk demand for machinery for the production of smoking tobacco and cigarettes.

"If there is no preferential rate of duty established in favor of the British tobacco, this will afford an opportunity for American tobacco manufacturers to invade the Irish market under conditions not heretofore prevailing.

"It is also probable that purchases of tobacco in this country ultimately destined for Ireland will be more widely distributed.

"In view of the fact that practically all the cigarette machines now in use in the Free State were imported from the United States and are very favorably regarded, American manufacturers of tobacco machinery should get in direct touch with tobacco manufacturers in Ireland, as it is apparently a potential market for both cigarette and smoking tobacco machinery.

"A list of manufacturers of smoking tobacco and cigarettes in the Free State, with full particulars as to packing, etc., is on file in the bureau and may be made available on request."—LAMM.

Achievements Through Co-operative Work

"A business that cannot pay a living wage to its employes has no right to exist. No man has a right to pauperize the citizens of this or any other country. When a man tells me he cannot pay a living-savings wage, he admits that he is either incompetent to run a business, or is not endeavoring to make his profits out of that business, but out of those who work for him," said Wood F. Axton, president of the Axton-Fisher Tobacco Company, in introducing Samuel Gompers at the laying of the Louisville Labor Temple corner stone.

Axton Acts as Toastmaster

Organized labor in the Kentucky city, in which Axton-Fisher factory is located, thought so much of the head of the Clown cigarette company, that he was invited to act as toastmaster at the great event of laying the corner stone of the home of labor in that city.

"There is more pleasure in running a business than merely in seeing how much money can be squeezed out of everything and everybody connected with it," declared Mr. Axton. "Those who produce the wealth of this country are human beings and are entitled to some of the luxuries as they go along. At least that is the way I feel about it."

That Mr. Axton practices what he preaches, can best be illustrated by the conditions surrounding the entire factory. At Axton-Fisher's, it's just like

Vote to Join National Co-Op. Council

HOPKINSVILLE, Ky., May 14.—The directors of the Dark Tobacco Growers Co-operative Association, at their meeting at Springfield, Tenn., voted unanimously to make application for membership in the National Council of Co-operative Marketing associations when it is formed. This had been recommended by the executive committee when they met here the day before.

Reports made to the directors showed conditions all over the district as being in splendid shape and the morale of the members as being high. Conditions at Springfield, where the most outspoken opposition to the organization has been met, were gone into carefully and found to be most satisfactory.

Pursuant to the plan of holding the directors' meetings at different places throughout the district, the June meeting will be held at Paducah and the July meeting Clarksville, Tenn.

The business men of the One Sucker district are showing a lively interest in the second distribution of about $1,000,000 among growers, and are looking forward to a brisk trade after the growers have received and cashed their checks.

As yet no intimation has been given as to when a second distribution will be made in the other three districts. It has been said all along that this would be strongly influenced by the completion of the delivery of the crop. At the meeting last week the board of directors fixed June 15 as the final date for closing the receiving houses all over the district. Nineteen of them will be closed this week, but enough will be left to handle the crops of those farmers who have been delayed in making their delivery. But June 15 will be absolutely the last day for delivering and with the crop all in, it is expected that distributions will be made soon thereafter in the other districts.

Splendid progress is being made in organizing the county and school district "locals." The members of the association have evinced a real interest in this proposition and are not only organizing but are having splendid meetings at regular intervals. To date about 15 locals have been formed, these being dotted about all over the dark tobacco di-

trict. Not only are the neighborhood locals being organized but the county organization has been perfected in a number of counties. One of the highly pleasing features is that the very best men in each county and community is taking the lead in this project.

Discuss Vital Matters

Reports of the meetings which are coming into headquarters here show that real work is being done. The farmers are discussing matters of vital interest to them and especially problems connected with the association. The weekly newsletters sent to each local from headquarters keep them fully posted on conditions and suggest topics to be considered.

The crop reports contained in the minutes of each meeting are already proving of much value to the association officials for the spring this year has been a most unusual one, with all farm work greatly delayed and the wet and cold weather holding on far longer than usual.—M. E. Bacon.

Clarksville Average, $13.82

Clarksville, Tenn., May 12.—Sales on the Clarksville Loose Leaf Tobacco Market this week, totalled 128,260 pounds. Sales for the season, 8,520,635 pounds. Sales to same day last season, 12,207,730 pounds. Average this week, $13.82. Average for the season, $14.59. Average to same date last season, $15.90 per hundred pounds.—J. F. Smith, Supervisor of Sales.

Hopkinsville Average, $12.64

Hopkinsville, Ky., May 12.—Total sales for the week, 107,965 pounds; average price per 100 pounds, $12.64; Sold to date of 1922 crop, 13,748,730 pounds; average price per 100 pounds, $14.56; Sold to same time last year, 19,809,955 pounds; average price per 100 pounds, $14.64.—J. W. Hancock, President Hopkinsville Tobacco Board of Trade.

Owensboro Outlook

Owensboro, Ky., May 12.—J. S. Phelon, leaf tobacco broker, observes:

"I have to report very unfavorable cool weather during the week which has further retarded the growth of tobacco plants; and it is now assured that the crop will be appreciably later than usual."

Paducah Prospects

Paducah, Ky., May 12.—The movement of loose tobacco was very heavy the first part of the week, but the weather turned cold and very dry on Thursday, which checked deliveries. The association receiving houses were taxed to capacity, but they were fortunate enough to deliver to buyers as much or more than they have received, which left them in good shape. If we have another season we will see heavy deliveries continue.

The quality of deliveries this week showed some improvement over last and

Kentucky Tobacco Sales During April

Figures Compiled by the State Commissioner of Agriculture

Frankfort, Ky., May 12.—W. C. Hanna, State Commissioner of Agriculture, makes report of sales of tobacco in all warehouses in Kentucky during the month of April, 1923, as follows:

TOBACCO
You need every week

Where Does It Go?

Last year over twenty-five million pounds of TOBACCO—think of it.

25,000,000 lbs.

Were shipped to this Country from Porto Rico. This, of course, has been absorbed by manufacturers of cigars.

WHY DO THEY USE PORTO RICAN?

Because they have found out by experience that the average American smoker wants a Cigar that is mild but at the same time possesses aroma.

This satisfying cigar has been produced by either using Porto Rican exclusively or by blending it with other Tobacco, as a filler.

THE GOVERNMENT GUARANTEES

now the source of all Tobacco—either in the leaf, scraps, or in cigars shipped from Porto Rico.

This is done by means of Stamps affixed to every barrel or bale of tobacco and to all boxes of cigars or "little cigars."

HOW TO TELL

CIGARS:

WHITE—Manufactured in P. R. with Tobacco produced in P. R.

BLUE—Manufactured in P. R. with Porto Rican and other tobacco.

PINK—Manufactured in P. R. with tobacco not a product of P. R.

TOBACCO:

WHITE—Genuine Porto Rican growth.

BLUE—Mixture of tobacco grown in P. R. and other countries.

PINK—Tobacco of foreign growth.

the order of the tobacco is on the dry side.

There has been more demand recently for tobacco with good body than we have had for some time and the market has been quite active. The sales on the loose floors and wagon markets of independent stock were insignificant, and present indications are that independent stocks are practically exhausted.

Farmers have generally gotten their tobacco stripped out ready for delivery, and when they can do so they will complete deliveries. The indications are that the greater part of the crop will be delivered during the present month. However, farmers are somewhat behind with their farm work and will attend to that in preference to making deliveries.

Farmers have made very good progress in preparing land and planting their crops, but are still very much behind and all crops will be later in planting this year than usual. Tobacco plants are plentiful and were growing rapidly during the warm, damp weather, but the recent cold weather checked their growth. However, a few days of warm weather will make them grow so they can be transplanted very quickly and with favorable weather conditions the crop should be planted in ample time. It is hard to say what the planting will be this year, but the indications are that the acreage will not be as large as last year. Farmers seem more determined to try to make better quality and not overcrop as they have done in the past.—W. B. Kennedy.

Operation of Swedish Tobacco Monopoly

Washington, D. C., May 16.—The annual statement of the operations of the Swedish Tobacco Monopoly, which has just been published, discloses information that should be of interest to the tobacco industry according to a report reaching the Bureau of Foreign and Domestic Commerce from Consul General Murphy. The report says:

"Although the total turnover in sales of the monopoly declined more than 10,000,000 kroner (1 kroner equals $0.268) or 7 per cent below that of 1921, on account of the general depression, it was able to increase the net profits from 11,481,376 kroner in 1921 to 15,187,866 kroner in 1922. After placing 2,000,000 kroner to the credit of the pension fund, which at the close of the year amounted to 3,260,000 kroner, the monopoly paid a dividend of 10 per cent on the 17,000,000 kroner preferred stock, compared with 9 per cent paid last year, and 40 per cent on the common stock of 29,800,000 kroner, which is owned by the Swedish State, compared with a dividend of 31 per cent in 1921.

Gross Income

"The gross income from manufacture and sales was 85,290,000 kroner, to which must be added receipts from license fees of 3,250,000 kroner, making a total of 83,540,000 kroner. The expenditures of the monopoly consisted of 35,360,000 kroner in taxes to the Swedish Government, 19,970,000 kroner to retail dealers in discounts on sales, and 4,554,314 kroner for the expense of the principal office in Stockholm and the 15 branch offices. A great saving was effected in the operation of their offices, the expense being reduced 1,365,686 kroner under that of 1921.

"As a result of increased sales on some of their products, and curtailing their imports, the monopoly was able to reduce their inventory of raw leaf from 37,000,000 kroner to 20,000,000 kroner. The following table shows the quantity of manufactured tobacco produced and sold during the years 1920, 1921, 1922.

"The area of land devoted to tobacco culture by the monopoly in 1922 was about one-third less than in 1921, and owing to unfavorable growing conditions the yield was below normal both in quantity and quality.

"The imports of raw leaf tobacco during 1922, by countries, was as follows: United States, 7,602,309 pounds; Southeastern Europe (Turkish), 149,350 pounds; China, 283,507 pounds; Cuba, 186,745 pounds, and other countries, 173,740 pounds.

"The total consumption of leaf tobacco in Sweden for 1922 was 10,892,090 pounds of imported leaf and 1,163,391 of domestic leaf. It will thus be seen that there was a considerable draft on stocks on hand of 2,315,679 pounds.

"The imports of manufactured tobacco by the monopoly during 1922 were 6,400,000 cigars, 19,100,000 cigarettes and 3,968 pounds of smoking tobacco. The quantities imported by the dealers were 12,800,000 cigars, 11,300,000 cigarettes, 40,100,000 cigarettes and 201,948 pounds of smoking tobacco. There was a pronounced decrease in cigar imports which may be attributed to the tariff of 4 ore (100 ore equal 1 kroner) on each cigar."—Lamm.

Season Nearing End

Hopkinsville, Ky., May 13.—The steady decrease in sales of unpooled tobacco over the loose floors continued the past week. The season is rapidly nearing the end and this fact, together with the quality of the offerings, does not offer much that is calculated to excite the market. The offerings now are confined to the small crops, or the odds and ends of the big ones.

Prices for the week ranged: Trash, $3 to $5. Lugs, common, $5 to $7; medium, $7 to $9; good, $9 to 12; fine, $12 to $16. Leaf, low, $10 to $12; common, $12 to $20; medium, $20 to $28.50. No good or fine leaf offered.

Transplanting Greatly Delayed

Nearly freezing temperatures, which were accompanied at least one night by a white frost, caused much uneasiness on account of the plants in the beds. But reports show that little, if any, material damage was done to these, especially where covered with canvas. The farmers are far behind with their preparations of the fields to receive the plants and the setting of the crop will be considerably later than usual.—M. E. Bacon.

Big Porto Rico Purchase

Reginald Bray, the representative of E. Rosenwald & Bro., in Porto Rico, has purchased within the last few weeks, approximately 7,500 packages of high-grade Porto Rican 1922 tobacco, for his organization. It is understood that the prices ranged around 35 to 36 cents, as compared with 28 to 30 cents for same quality of tobacco last year.

Back from Porto Rico

Robert Gans, of Max Gans' Sons, arrived in New York from Porto Rico on the steamer *Porto Rico* last Monday. Charles Gans is remaining on the island to take care of the Gans interests in Porto Rico.

Porto Rican Tobacco Arrives

The first shipment of new crop Porto Rican tobacco consigned to Selgas & Co., arrived in New York last Monday, in excellent condition, and created great interest in Water street.

San Francisco Still Hears "Cutting" Complaints

Dealers Whose Trade Is Confined Mainly to Cigars Not So Much Worried—Slight Cut in of Others Sometimes a Matter of Vital Importance—To Increase Manila Output.

San Francisco, Cal., May 8.—There is still much of murmuring and complaint in San Francisco over the cigarette cutting. The stand whose trade has been largely cigars is not at all worried; but with others, a slight cut in margins is sometimes of very vital importance.

Complain of Narrowed Margins

The Mirsky Cigar Co., old-time jobbers, with a well-established clientele, especially among the old-timers, report that a number of these dealers are complaining that the margins have become so narrow that they cannot see their way clear to continue. These stands as a rule also depend to some extent on their candy trade, and should the rising cost of sugar cause candies to become dear, they will find themselves in uncomfortably close quarters.

Not Borrowing Trouble

One of the stands that is not borrowing trouble over cut-raters is that of Henry Falck on Market street. Henry does a little original business on his own book. He purchases his own leaf and has it cut for a tobacco mixture all his own. He does the same with his own brand of cigars, a Havana brand. And next week he proposes to offer his customers a five-cent cigar filled with pure Havana shorts. He is one of those who does not think the cut-raters are liable to be stopped, as so much tobacco is damaged in the warehouse, and so much is sold out of bond for enough to cover revenue charges. Be that as it may, the cut-raters continue an increasingly active trade in places where the crowds swarm. The stands like that of Mr. Falck, not catering to this trade, but building a trade that is more particular, are not directly affected.

Conditions Across the Bay

Frank McArdle, manager of the Oakland Tobacco Co., says that on that side of the bay, they find some complaint also among the retail trade, not especially because of the cigarette situation, but because general conditions do not seem to come up to their expectations. The volume of their jobbing trade, however, shows no decrease. The Optimos, Roi-Tans, and Philadelphia Hand Mades have become so permanent a fixture in the trade that they do not think of passing them by without an order. A brand that has been developing well is the Pippin. As the manufacturers recently reduced the price from $63 to $59, the retailers enjoying a larger margin, take more interest in sticking it under their customers' eyes. There are a few brands that are beginning to take their place under the counter until called for.

Customer Takes Choice

H. C. Walter, manager of the distributing depot for the General Cigar Co., has devised a plan to make it convenient and attractive for the dealer in White Owls. Two boxes of different shade are bound together as one and put under a transparent cover, for cleanliness, to be placed on the counter at once for the customer to help himself.

Featuring La Insular

Henry Marx, of the Marx Cigar Co., distributors for La Insular, the fine Manila cigar, is now in New York, having been busy placing La Insular in eastern territory. The success of La Insular in the East has been gratifying, and repeat orders have been coming along well. Mr. Marx will go on from New York to Spain, and locate the brand there. He will make use of the opportunity to visit Paris, Italy and various other places of interest.

Does Not Fear to Tread

Arthur Meyer, of Michalitschke Bros. & Co., has gone to Los Angeles to push the Henry the Fourth campaign in the City of the Angels. They have made fine placement of the attractive insets in the San Francisco territory.

M. Markovits, of the Jos. Rinaldo Cigar Co., states that the campaign on San Felice is bringing good results. Henry Wemmer, who was here for a while giving the campaign a push-off, is doing the repeating act in Los Angeles.

Having Great Run

Speaking of San Felice, the blue-front stores, the Ash cigar stores of Oakland, have been having a great run on the little San Felice, selling at ten-for-twenty-five. They are bragging some, too, on the excellent run of Detroit Hand Made. And while the Ash stores are boasting about the Detroit Hand Made, Henry Bercovich, of the distributing house of H. & S. C. Bercovich, is boosting the Champaign as a hummer in the 5-cent line.

But M. Peters, sales manager of S. Bachman & Co., is just as certain that there is nothing going to be able to hold its own with New Currency, and he ought to know.

Clarence Marx, of the Marx Cigar Co., is rejoicing in the fact that their Manila factory has announced a million and a half addition to the La Insular factory, and they will soon be in shape to do big things. Their new size, the Niagara, is filling a real want in the trade. "We are having a fine bunch of box sales," he says, "to customers who are taking outings, and don't like to miss their favorite brand."

Pennsylvania Tobacco Market Sees New Activity

Renewed Buying Starts in Earnest—About 25,000 Cases o Seedleaf Changed Hands Recently—Practically All Hold ings of Small Country Packers Under Contract.

LANCASTER, Pa., May 14.—As was forecast last week, the rush of buyers to the Lancaster market has begun in earnest and the operations of at least three large manufacturers recently have resulted in nearly 25,000 cases changing hands. This represents the bulk of the seedleaf in the open market, and that remaining will find ready sale among several other large cigar companies who have as yet made no purchases of Lancaster county seedleaf. Practically all of the tobacco held by the small country packers has been contracted for, and the majority of the larger independent packers have also sold their holdings for September delivery.

Leaders in the Buying Movement

The representatives of the General Cigar Co., Morris Levy & Sons, started the rush of buying and have been most active of the large manufacturers in the ensuing scramble for 1922 packings. Their purchases total between 10,000 and 15,000 cases, with Bayuk Brothers running a close second with purchases aggregating, it is said, close to 10,000 cases. It is rumored that Cullman Brothers have also been operating on the Lancaster market and have bought a considerable amount of seedleaf from independent packers. Several other large concerns are said to have bought small packings in different sections of the country and are contemplating a concerted drive on what remains of the Lancaster crop in the very near future.

Various Holdings Sold

Bayuk Brothers have confined their purchases largely to the city and to Landisville, the packing center to the north of Lancaster. B. F. Good, of Lancaster, has disposed of a part of his packing; E. H. Swope, the Lancaster County Tobacco Growers' Co., and Cooper & Martin, all packers whose warehouses are located in Lancaster, have sold their holdings of 1922 seedleaf filler and wrapper tobacco. P. W. Baker, one of the largest of the independent country packers who has warehouses in many different parts of the county, has sold all of his goods, as has S. N. Root, of Landisville. Country packers in Lititz, New Holland, Terre Hill and Ephrata have sold their packings almost to a man, and very little tobacco remains to be bought in the rural districts.

Prices "Pretty Fair"

Prices have varied from 26 to 32 cents in the transactions completed to date. These are termed "pretty fair," but as the examination of the goods proceeds, many packers are beginning to doubt whether their 1922 business will show a balance on the profit side of the ledger. A more than ordinarily severe epidemic of damage is showing up, and in several packings losses amounting to about 25 per cent are apparent. The inspection of the case goods has not gone forward to any great extent and the surmises of the packers as to the harm done their tobacco is far from definite. "Black rot" and "mush rot," however, have taken their toll and the inroads made by these infections may be seriously felt. Various conditions are ascribed as the cause for the prevalence of these forms of rot, chief among which are the extremely dry growing season last year and the condition of the tobacco when it came into the packer's hands.

Three Classes of Packings

The tobacco packed locally may be divided into three general classes: First, that packed by the manufacturers themselves, which, as a rule, constitutes but a small percentage of what they use i the course of a season. Second, tha packed by independent packers who hav a regular outlet for their holdings ar whose tobacco is not considered as bein on the open market. Lastly, that bough and packed by independent packers wh hold it for whatever customer the seaso may bring forth. The total amoun packed may run in the neighborhood o 75,000 cases. Of this amount, approx mately 15,000 cases is annually in th hands of the small country packers wh look to the large manufacturing concern to buy their seedleaf. The effect of th co-operative packing industry was th year practically negligible, for the thr co-operative associations which operate packed less than 2,000 cases. The Ge eral Cigar Co. is the largest packer the manufacturing group and held 29,0 cases of the 1922 crop in its warehouse With its recent purchases, the Genera total share of the Lancaster county t bacco output will run about 40,000 case

Views Differ as to Early Buying

It is quite evident that the independe packer has his own private opinion as the reason back of the unexpected a almost unprecedented early rush of bu ing. It is equally as evident that the opinions differ among the various pac ers. Nothing specific as to the movi force behind the premature scramble f Lancaster grown tobacco was available interviews with a number of packers th morning—possibly because there is no ing specific except the much discussed a all-important lack of a surplus on hand

Low priced and scrap cigars are s in disfavor, and their manufacturers a slipping farther back all the time. F ports of brisk business in the York d trict notwithstanding, it is a fact th several cigar factories have closed do in that section and that several m manufacturers will have to follow suit business does not take a decided turn the better.

Richard Bondy, vice-president of General Cigar Co., and his wife w guests in Lancaster last week. Mr. a Mrs. Bondy were registered at the S vens House for the entire week, dur the course of which Mr. Bondy was conference with several prominent bacco men of the vicinity.—KEYSTONE

York County Cigar Manufacturers Protest Tax

Appear Before Ways and Means Committee of Pennsylvania State Legislature—Explain That Tax Would Work Great Hardship—Profit Too Small to Permit Additional Burden.

York, Pa., May 12.—York County gar manufacturers on May 8 appeared efore the ways and means committee f the Pennsylvania state legislature at arrisburg and protested against the lexander luxury tax bill, which would ipose a five per cent tax on cigars. Exaining that one-eighth of the cigars the United States are made in York ounty, the manufacturers said that the oposed tax would work great hardip upon them as they made mostly a gar retailing at five cents.

The margin of profit for the manucturer, the jobber and the retailer, it as explained to the legislators, is very ose, and it would be impossible for the anufacturer to sell this cigar for more an at present. Cigars are graded into e classes, according to their retail ice, when they reach the market. It upon this classification that the tax is gured which the Internal Revenue Dertment receives from the manufacturs. These grades are: Class A. cigars tailing at not more than 5 cents each; lass B, cigars retailing at more than e cents each, but not exceeding eight nts; Class C, cigars retailing for more an eight cents each, but not exceeding cents; Class D, cigars retailing for ore than 15 cents, but not exceeding 20 nts, and Class E, cigars retailing for ore than 20 cents. To sell a Class A gar for more than five cents would be violation of the federal laws, it was inted out to the legislators.

The classification of cigars put the atter in a new light to members of the mmittee.

The appearance of the cigar manufacrers before the ways and means comttee was arranged for by Assemblyan Flinchbaugh and Senator Lanius, no acted as hosts. Those who spoke ainst the luxury tax before the comttee were: Senator Lanius, Assemblyan Flinchbaugh, B. M. Hannigan, present of the York County Cigar Manucturers' Association; T. E. Brooks, S. LaMotte, H. M. McGuigan, J. C. eckert and I. J. Rojahn.

The delegation of cigar manufacturs included: S. P. Shearer, Windsor; chard Snyder, Windsor; W. H. omey, Red Lion; T. C. Miller, Red on; Roy Snyder, Windsor; D. E. ltreider, Red Lion; Stewart Shindler, d Lion; George Roseman, Red Lion; T. Gemmill, Red Lion; W. M. Gemll, Red Lion; H. M. McGuigan, Red on; T. E. Brooks, Red Lion; C. O. eads, Red Lion; Charles Meads, Red on; W. H. Raab, Dallastown; J. C. eckert, Dallastown; I. H. Rojahn, Dalltown; Edgar Flinchbaugh, Windsor, d W. J. Neff, Red Lion.

Trade Notes

The J. C. Heckert cigar factory, Dalltown, which had been closed for a ek, resumed operations on May 8.

. M. Ehehalt, a member of the ltreider Cigar Co., Red Lion, returned week from an extended trip through Middle West in the interest of the n.

David A. Horn, a member of the npa Cigar Co., Red Lion, left May 8 a business trip to the Middle West.

The Meads Tobacco Co., of Red Lion, eived on May 8, at the Maryland and nsylvania Railroad station, this city, n farmers of this vicinity, another e shipment of York County tobacco. shipment amounted to approxiely 120,000 pounds. The tobacco was n to the Meads warehouse in Red n.

he condition of the cigar business at ghtsville which had been exceedingly shows no improvement. Several ories are closed, while others are king only three days a week. Four ories, however, continue to work on time.

. C. Frey & Son, who had been coning a cigar factory in Delta, have d it and moved with the working tools to their home headquarters, Red Lion.

A general improvement in the cigar trade at Red Lion is reported. No cigarmakers are idle. Some factories are advertising for help.

Multum in Parvo

Much in a little space is what has been accomplished by Bill Knaub, who on May 11 opened his little cigar store at 30 North George street, this city. Just the width of a hallway and hardly more than three times the width in length, he has a fully equipped place of business for handling cigars, smokers' accessories, newspapers and magazines and space for card tables to accommodate eight players. The fixtures have all been made to order to fit the place.

Calvin E. Shenberger is building an addition to his cigar factory in Felton.

Baltimore Market

Baltimore, Md. May 10.—Gieske & Niemann, leaf tobacco merchants, make report as follows:

Maryland.—Receipts continued small; 71 Hogsheads, and Sales 81 Hogsheads for the past week. There was no change in prices.

Ohio.—No receipts, Sales 10 Hogsheads.

Association Data

The Leaf Tobacco Association of Baltimore City issues these statistics for the week ending May 9.

Home for Brief Visit

Charles J. Waxelbaum, the well-known Water street leaf importer and dealer, who has been attending the Amsterdam and Rotterdam inscriptions, arrived in New York last Friday on the Cunard liner *Berengaria*, for a brief visit to his headquarters, 173 Water street. He is scheduled to return to Europe next Saturday on the White Star liner *Olympic*, and expects to attend the remaining inscriptions.

Returning to Holland

James Willing, of the American Malaya Trading Co., returned to New York last week from Amsterdam and is this week visiting his home in Montreal. Mr. Willing plans to return to Holland shortly to attend the remaining inscriptions.

MARSHALL FIELD

NO OTHER CIGAR IN AMERICA LIKE IT
IT IS DIFFERENT
THERE ARE REASONS FOR IT

The manufacturer has devoted his life in the science of tobacco curing, and the art of blending. The objectionable properties which tobacco contains are eliminated, such as Rosin Gum which makes tobacco strong, and the natural Ammonia which makes tobacco sharp and bitey. It is then ripened, mellowed, and blended.

All Marshall Field Cigars are

Very, Very Mild Regardless of Color

Distinctive Quality

Liked by all who smoke them

Philadelphia Business on Fairly Good Ground

Cigar Manufacturers Find Trade Satisfactory in the Face o Surrounding Conditions—Taxing Measure Arouses Kee Interest—Reserve Bank Reviews Tobacco Industry.

PHILADELPHIA, May 15.—Though the bulk of business done by all the manufacturers of the city does not show as large an aggregate thus far in May as had been anticipated earlier in the year for this season, business is entirely satisfactory when the surrounding conditions are understood. Rather exceptional causes are responsible for what superficially would seem to be a comparative quiet, but which at worst means only a small decline in the rate of production hitherto maintained. Because of the exaggerated outlook which many took earlier in the year, and which resulted in exceptionally large orders during January, February and March, ordinarily rather quiet months, there existed in many parts of the country a really over-purchased and over-stocked condition. Now the buyers are holding off until all of these excess purchases have been absorbed. Another factor of some importance dates back to the Winter and so far as some sections are concerned, only to within a month ago. That was the tremendously heavy snow falls which congested traffic, made collections by the distributors from the outlying dealers almost impossible and thus tied up their capital so that they are now taking a little breathing spell until they can recover. One of the larger factories in this city which has a special organization devoted to the prosecution of claims against railroads for delayed deliveries, reports many cases where 30 days elapsed after accounts were due and payable on invoices, before the goods themselves actually were received.

In the retail field the central dealers report but little falling off in buying and what there is applies more to the box trade than to counter sales.

The jobbing situation for the nearby territory is slightly improved but is not yet very active.

Tax Move Causes Much Concern

All branches of the trade are very much concerned in a new state revenue-raising measure, an emergency tax program to raise $19.000,000. One feature is a sales tax providing for five per cent on retail sale price of cigars and cigarettes, and a three per cent tax on retail sale price of all other forms of tobacco, the tax to be collected by stamps and with an estimated biennial year of $4.000,000.

In its survey of conditions in the cigar and leaf trade in the Philadelphia district, largest center of the country in this industry, the Third District Federal Reserve Bank, in its official publication of recent date said:

"Although the demand for cigars was rather light during the closing week of March and the first week of April, there has been a distinct increase in purchases since. The majority of manufacturers, both large and small, report that the call for their goods is greater than it was either in March or in April, 1922. Makers of Class B cigars state that since the first of April the demand has been very good, and several of the large factories, which were operating on only part time in March, have returned to a full-time schedule. Class C cigars, particularly ten-cent brands, are in excellent request, and several of the large manufacturers are oversold on this size. The five-cent cigar, too, is in good demand, although on account of the high prices prevailing for leaf tobacco some manufacturers are limiting their output of this grade. One big cigarmaker, who contemplated the production of a five-cent cigar at the beginning of the year, abandoned the plan because he could n make a cigar of the quality he desir to retail at five cents. The average operations in this district is approx mately 80 or 85 per cent of capacit The majority of large factories are o erating at above 85 per cent, but t small facories are running at from to 100 per cent. Most of the orde booked by cigarmakers are for immed ate shipment, less than 10 per cent beir for future delivery."

A chart, based upon sales of intern revenue stamps, shows that in Marc 1923, the sales of large cigars were per cent, and of small cigarettes 38.6 p cent greater than those of March, 192 The report continues:

"Prices of cigars are firm and u changed, but leaf tobacco prices are st advancing slightly. Although the co of production are from 12 to 15 per ce higher than in April, 1922, the makers cigars have not found it advisable raise their prices, which on the wh are the same as they were a year ago.

"Stocks of cigars held by most man facturers are moderate and at many fa tories are decreasing. A few report t stocks are light and that they are pla ning further expansion and a larger o put. In general, manufacturers' sto of tobacco leaf are moderate.

"At several factories a scarcity skilled operatives is apparent, althou the majority of manufacturers have adequate supply of all grades of lab However, in Philadelphia, the labor s ply is not as plentiful as it was month and skilled cigarmakers are scar A few manufacturers have advan wages about 10 per cent in order to br their rates up to the general level est lished two months ago. But in gene wages are unchanged.

"Collections are slightly better t they were last month and are from f to good.

"Purchases in the Philadelphia Lancaster leaf markets have been li during the past five weeks and consid ably smaller than they were in Ap 1922. Leaf packers and dealers rep that although many inquiries have b received from cigar manufacturers, b ing is, on the whole, for immediate ne only.

"Most of the 1922 crop of Penn vania tobacco has been purchased, than 10 per cent being still held by growers, as against about 50 per last April. Current quotations in 1 wrappers vary from 18 to 20 cents pound, and fillers are bringing fron to 7 cents per pound, a considerable vance over the Fall prices of 17 c for wrappers and 3 cents for fillers. J bers report that the Pennsylvania fa ers will realize 30 per cent more for t 1922 crop than they got for that of 1

"At the first four sales of Sum tobacco at Amsterdam, Holland, rec breaking prices were established and prices ranged about 20 per cent hig than in 1922. At the first sale the q ity of the tobacco offered was not high as last year, but at the three l sales better qualities were forthcom For the very choice lots of light sh wrappers, the prices ranged from $ $10 per pound without duty and fre Cigar manufacturers view these pr with much concern and are trying induce smokers to use cigars with da wrappers, as these wrappers can bought at a fair price. Manufactu point out that a light wrapper does necessarily mean a cigar is mild, a is the blending of tobaccos in the and binder that determines flavor

ength. Despite the very high prices, okers bought heavily at Amsterdam, l dealers report that many inquiries being received, although actual buy- by manufacturers has not yet become ensive.

"The supply of Wisconsin and New gland binders is only about half as ge as had been anticipated, and leaf lers believe there will be an actual rtage of these grades before the 1923 p is ready for use. The Ohio crop, ich is of good quality, is now almost irely in the jobbers' hands.

"The new Porto Rico crop is re- ted to be much larger than last year's of very good quality. To date, how- r, there has been little buying by kers, because the growers are de- nding prices from 20 to 40 per cent ve last year's price. The Cuban crop, ecially Vuelta and Partido, is reported be good, and the yield of these two des is greater than in 1922; the nedios crop is said to be short. But no actual figures are available, little definitely be said as yet about the l Cuban yield. Some sales of the ly part of the crop have actually been le at 20 per cent above last year's es."

Gumperts in New Location

Gumpert Brothers, whose plant at 227 rch street recently was closed in or- that production could be confined lusively to the Tampa, Fla., plant, shortly to be located at 207 Market et with William H. Hartley, for- ly of the firm of Hartley & Winslow, 3 North Eighth street, in charge. A. Gumpert, head of the firm, is now a Western trip which will be of an ensive character. The firm is enjoy- a really tremendous favor locally for Philadelphia Club, particularly Tri- ulares, which are being packed most actively and which shortly are to ap- r in a new and still more attractive el. In the new location at 207 Market et, a stock will be carried for im- liate local service, although large ments will be made direct from npa.

Bayuk Activities

Fred Moroitz, of the Bayuk Brothers anization, is now doing missionary k with A. Reuben & Co., of Pitts- gh, the newly appointed distributors that territory. Victor Marks, who assigned from the factory to co- rate with the recently appointed dis- utors in the Baltimore district, the idecker Tobacco Co., is sending back almost record-breaking number of ers.

At La Palina Headquarters

Walter Sutter, of Havana, Cuba, a l-known grower, was a visitor during week to headquarters of the Con- s Cigar Co. He was accompanied Samuel Paley on his visit to New k. The Congress Co. hopes to be in mammoth new home, Third and ace streets, at the end of the month. executive offices will be located e, but tremendous as is the manu- uring space, the present factories, nd above Market and Third above ace, will be continued. Miss Ger- trude Lenhart, office manager, was painfully, though not seriously, injured during the week in an auto accident. While on her way to the tennis courts the machine in which she was riding was run into and she was injured about the head and shoulders.

Max Lipschutz, owner of the Madame Butterfly factory, left during the week for a Western trip as far as Canton.

José Alvarez, Second and Chestnut streets, has returned to his business after being confined to his home for a long period suffering from bronchitis. He spent some days at the shore recuperating.

Samuel Grabosky, of the G. H. P. Cigar Co., 3rd and Brown streets, who spent some time in the Connecticut fields, is now in Porto Rico for a three weeks' trip.

Jacob Krauss and Edwin Wile, of Roig & Langsdorf, Seventh street above Vine, are in Connecticut on a buying trip.

Reports from the Consolidated Cigar Corporation are that all its factories are now on full time operation, orders being particularly heavy for Henry George, 44s, and Dutch Masters.

A Unique Campaign

Most attractive and really unique and distinctive local advertisements are now appearing in the daily newspapers of Philadelphia as the beginning of a campaign which the advertising manager, Douglass Irvine, will conduct throughout the year. It will be confined to Philadelphia for locality and to Henriettas for the goods. Each day in one of the papers but each day in a different one there appears this original display advertising designed by Mr. Irvine, the features being a sailing vessel in silhouette form, so catchy in character that the cleverly worded exposition of the merits of Henriettas impress themselves indellibly. The campaign, it is believed, will largely increase the already big demand for the Eisenlohr leader.

From Sunny Spain

R. A. Echevarria, secretary of Theyskens & Shaw, arrived in New York last Saturday on the steamer *Paris*. Mr. Echevarria spent three months in Spain, and, as a member of a delegation from the Spanish Chamber of Commerce of New York, attended a number of important conventions in Barcelona and other Spanish cities.

Studying Local Conditions

Cesario Echevarrio, of Aragundi & Co,. leaf tobacco growers and packers, of Cayey, Porto Rico, and brother of R. A. Echevarrio, secretary of Theyskens & Shaw, is on a visit to New York with a view to studying conditions in the local leaf market.

Visiting Quaker City

I. M. Jacoby, of Meyer & Mendelsohn, is visiting his Quaker City friends this week. It goes without saying, that if quality tobacco is wanted I. M. can "fill the bill."

NOW IS THE TIME!

President Jesse A. Bloch's Address

(*Continued from page* 18)

more than 250,000 trade-mark registrations; its Library and Information Bureau which is regarded as the most extensive tobacco library in the world; its Traffic Bureau, which is in charge of an expert traffic man of more than 20 years' experience, down to its mailing department with is equipped with modern machinery; in all of its bureaus of departments you will find abundant evidence of the highest order of efficiency coupled with uniform courtesy and an intense desire to be of service.

There is one outstanding figure to whom the entire industry owes a debt of gratitude for this magnificent institution. He not only conceived and formed this association, but he has been in active charge of its management from its very inception, and it is to his able, energetic and untiring activities that the splendid achievements of the T. M. A. are due. I need hardly tell you that I refer to the counsel and managing director of the association, Mr. Charles Dushkind.

But the association should have more members and more support. As big as the T. M. A. is today it is merely a nucleus of the size of an association that the magnitude of our industry requires. The association has long since passed the period of "watchful waiting." In the eight years of its existence it has stood the acid test on all occasions and in all emergencies. It has clearly demonstrated its usefulness and has fully earned the support and co-operation of every branch of our industry, as well as of its allied trades.

With an enlarged membership and increased resources the T. M. A. could, of course, be of still greater usefulness to our industry. It may and should add other needful and beneficial activities and services, such, for instance, as insurance inspection and advice, scientific researches in respect to the culture, cultivation and treatment of tobacco, and the prevention and elimination of certain elements which sometimes injure the raw leaf or destroy the usefulness of the finished product. It may also embark upon cost accounting and furnish expert advice on how to improve the attractiveness of retail stores and their show windows. In fact the T. M. A. should be so equipped that it might render every possible service that the industry may reasonably require from an institution of this nature.

The T. M. A. stands on the threshold of a new and greater development along broader lines that will keep it constantly abreast of the times, insure wider scope for its numerous activities, and vastly enhance its usefulness to the trade. Because of this, the association needs not only your wise counsel, but your aid. It is for you, gentlemen, to point the way to a still higher and better development of its purposes, influence and power, and having indicated that course to follow it vigorously and steadily to the end.

In Memoriam

It is now my solemn duty to beg this convention to pay a tribute of respect to the memory of such members of the association as have been called by death since our last convention three years ago. It always is a painful task to speak of associates in our work who have crossed the Great Divide, for it touches the memory with sadness and reminds us that the void caused by their passing, may not yet have been satisfactorily filled. We owe it to the memory of our departed members to pay them the meed of our heartfelt respect for the good they accomplished and the greater good they might have done had they not been called to the life beyond the tomb.

Chief among those of our membership whose untimely passing provoked universal sorrow and whose tragic death in an automobile accident in Indianapolis, Ind., on June 9, 1921, shocked the nation, was Col. Frederick W. Galbraith, National Commander of the American Legion and a vice president of the T. M. A. A soldier of distinction, whose valor on the battle fields of France won him many medals of honor; a man of signal merit whose staunch patriotism in peace as well as in war, was his most distinguished trait, Col. Galbraith's untimely death was not only a sorrowful loss to the nation, but notably so to this association, of which he was a revered member.

The Association also suffered another great loss in the passing of Jacob Wertheim, its first President, who most ably guided its activities from the time of its inception until February, 1918, when he retired from this office in line with his most commendable policy of devoting his entire time to the philanthropic and charitable work so close to his heart.

From an humble beginning, Mr. Wertheim not only achieved fame in our own Industry through his great vision, foresight and ability in organizing and founding one of our greatest cigar manufacturing concerns, but his unswerving loyalty to the interests of humanity generally won for him the respect of the citizenry throughout the length and breadth of our land.

Other members of this association who have passed away since our last convention, whose passing we deeply deplore and whose death has been a distinct loss to this association and to society at large, include the following:

Ismar S. Ellison, who as Publisher and Editor of the United States Tobacco Journal was an outstanding figure in the Industry for a great many years;

C. Fred Crosby, an editor of tobacco trade papers for more than a score of years, and one of the founders of the T. M. A.

John B. Adt, President of the John B. Adt Co.,

Eacunda P. Arguelles of Arguelles, Lopez & Co.,

Adolph D. Bendheim, President of the Metropolitan Tobacco Co.,

Abraham Bijur of E. Rosenwald & Bro.,

Louis H. Eisenlohr, Vice-President of Otto Eisenlohr & Bros., Inc.,

Albert Falk, President of the Falk Tobacco Co.,

Joseph S. Flynn of R. G. Sullivan,

Chas. Fox of F. Miranda & Co.,

Col. Alvaro Garcia of Garcia & Vega,

Samuel Heineman of Heineman Bros.

William H. Jones, Pres. of the Jones-McIntosh Tobacco Co.,

Henry Kraus of Kraus & Co., Inc.,

Joseph Monday of S. Monday & Sons,

Marcelino Perez of Marcelino Perez Co.,

J. S. Pinkussohn of the J. S. Pinkussohn Cigar Co.,

Frederick W. Plugge of The Washington Tobacco Co.,

Oscar Reinach for many years connected with the Cigar Trade,

Peregrino Rey of Cuesta-Rey & Co.,

Walter R. Reynolds, Vice-Pres. of the R. J. Reynolds Tobacco Co.,

Salvador Rodriguez of Salvador Rodriguez, Inc.,

Benito Rovira, Pres. of the Benito Rovira Co.,

Carl Upmann, cigar manufacturer of many years' standing,

Asa W. Vandergrift of Sheip & Vandegrift, Inc.,

Benoit Wasserman of B. Wasserman Co.,

I. H. Weaver of I. H. Weaver Co., and at the time of his death President of the National Cigar Leaf Tobacco Association, and a Director of the T. M. A.

While we deplore their passing from the activities of life, we rejoice that we are able to testify to their merits as men who honored themselves, their families and business associates and whose careers shed lustre upon the industry with which they were so closely allied. To the wives, children and others who loved them, we extend our deepest sympathy in their affliction, and we mourn with them in complete accord. Let us rise and for one minute in silent meditation and prayer, pay our final tribute to their memory.

Conclusion

In bringing my remarks to a close, permit me once again to remind you that this convention has highly important duties to perform —tasks that are likely to tax your energies to the utmost to master. We have not gathered here merely to engage in social converse, or to spend our time in the discussion of inconsequential affairs, but we have before us great problems to the solution of which we must devote all our attention.

The eradication of the evils to which I have referred, and how we are to provide adequate remedies therefor, are questions which demand our most earnest consideration. As business men who have the best interests of the great tobacco industry at heart, we must deal with the important questions that may arise in the course of our deliberations unselfishly, and with a spirit of co-operation and mutual helpfulness.

The tobacco industry like all other industries must have its "ups and downs," its days of prosperity and its eras of depression, its periods of ordinary and normal competition and its time of intense rivalry. The tobacco industry has developed as large, if not a larger proportion of commercial successes as any other industry. Let us hope that whatever evils or ailments the industry is now suffering from are merely temporary and that a readjustment for the better may soon come.

JESSE A. BLOCH,
President.

Washington, D. C., May 16, 1923.

Plant Shortage Feared

GREENEVILLE, Tenn., May 14.—Reports from different sections of Greene and adjoining counties indicate a shortage in tobacco plants. For some reason the plant beds did not produce as they should have, and in many instances the beds that were advanced far enough for uncovering were badly injured by the recent cold spell. To what extent this will affect the crop of Burley this year is yet problematical. Tobacco men are hopeful that the year's crop will not be affected to any great extent. The time for setting the plant is at hand and with the splendid season now on, farmers will be busily engaged during the current week in getting their crop out.

Fred H. Austin, tobacco warehouseman, of the Austin Co., Inc., returned yesterday from a trip to Boston.

Kings County Celebration Proves Big Success

The fifth annual banquet and ball of the Kings County Cigar and Stationery Corporation was held last Sunday, May 13, at the Broadway Central Hotel, New York. More than three hundred guests participated in the festive event, which proved an unqualified success. Barnett Wolff acted as toastmaster and made everyone feel at home with his spontaneous and humorous remarks. Appropriate addresses were also delivered by J. J. Ollendorf, president of the National Board of Tobacco Salesmen's Associations of America, and Henry H. Hunter, secretary of the Kings County Cigar and Stationery Corporation.

To Inspect Shade-Grown

Leopold Holzman, of Strouse & Holzman, plans to visit Hartford next week to inspect the Connecticut shade-grown market.

Achieved Through Co-operative Work

(*Continued from page* 39)

one great family where each and every one works for the good of all.

For happy, well-satisfied, well-paid well-treated, loyal workers, working under proper working conditions and proper working hours, the Axton-Fisher plant and plan are generally regarded as ideal as in any factory in America. And every member of the firm is just as glad of it as is every worker.

Conceives Right Idea of Business

It is through this co-operative work between employer and employes that this concern from a small plant, has grown to be one of the leading ones in the tobacco industry, and it was Wood F. Axton, who, while lugging a grocery drummer's sample case way out in the "sticks" 30 years ago when he saw people having to work under all sorts of conditions, hours, and wages, conceived the idea that there must be more to running a business than merely seeing how much money could be squeezed out of everybody connected with it.

So he dropped his sample kit, hunted up a partner and started to making "Old Hill Side" smoking tobacco. They started in the name of the "Axton-Fisher Tobacco Co." with as good working conditions as their little two-by-four factory in Louisville, Ky., would afford and with their employes as co-workers instead of workers.

They realized that it was only from satisfied workers they could get the most satisfactory results, and to have satisfied workers they felt that they must provide satisfactory working hours working conditions and pay a wage that would enable the workers to improve their standards of living and have something left for the proverbial "rainy day."

Business Increased Rapidly

Business came so fast they soon had to move into bigger space, which they soon had to do again and then again. Their fourth move was into their own big modern steel and concrete plant which they are now occupying, which has to be doubled, owing to the trebling of the factory's business last year from sales on Clown Cigarettes.

The present Axton-Fisher factory, in which the "Clown" cigarettes are made is a solid concrete and steel construction thoroughly modern, strictly sanitary throughout, properly heated, lighted and ventilated, and practically all work done in "broad" daylight. It has individual steel lockers, rest rooms, assembly room, shower baths, kitchen, dining room, library and other modern features for the pleasure and welfare of everyone who works therein.

Nothing in the way of modern equipment for the protection and general welfare of their workers has been overlooked. In the middle, fore and afternoons, every female employe is given a 15-minute recess, and at noon every worker gets a free, well-cooked warm meal, served in the spacious dining room provided for that purpose and it's a real square meal, too.

Every worker is also provided with free insurance policy from $500 to $1,500. This applies to the colored as well as the white help.

Union Label on All Products

The Axton-Fisher plant owners did not start out with the idea of just how "cheap" they could get help but how good. They went to organized labor which they saw was seeking to improve the standards of living through decent wages, earned under decent hours and decent working conditions, and they proved so satisfactory that ever since they have employed union labor only for which they have never had cause to regret.

The Union Label is placed on all products, and it has remained there for nearly a quarter of a century with pride and satisfaction to both employer and employe. In all that time it may be said there never has been a strike in the Axton-Fisher factory nor any occasion for the removal of the Union Label.

The Axton-Fisher products are the Clown Cigarette, Old Hill Side smoking tobacco, Old Loyalty, Booster Twist, White Mule and Axton's Natural Leaf and the union label is found on all of them, not only the International Tobacco Workers Label, but on the package there also appears the label of the International Typographical Union.—*Kansas City (Mo.) Mule.*

CLASSIFIED ADVERTISING

Old established, small manufacturing business abroad, capable of great development, requires an executive to take full charge. Experience all phases manufacturing, marketing cigars, cigarettes and smoking tobacco desired. Apply giving record and salary required to C. America Leads the World in Tobacco Production

A Comprehensive View of Our Two-Million-Acre, Half-Billion-Dollar Tobacco-Growing Industry in Yearbook—Department of Agriculture Issues Interesting Data.

WASHINGTON, D. C., May 21.—A comprehensive view of our two-million-acre, half-billion-dollar tobacco-growing industry is to be found in the 1922 Yearbook of the United States Department of Agriculture which has just come from the press. Although this crop uses only about five-tenths of 1 per cent of the acreage devoted to all crops, it has a high value per acre and requires a great deal of labor both in the growing and manufacturing into forms for consumption. Most of the crop is grown in a few States, Kentucky, North Carolina and Virginia being the leaders, but some tobacco is grown in 42 States.

In 1919 tobacco was grown on nearly 450,000 farms. In that year North Carolina stood first in value of the crop and Lancaster County, Pennsylvania, was the leading county in acreage and production. Hartford County, Connecticut, where a large acreage of shade-grown tobacco is produced, led in value of the crop which was $13,600,000, more than two-thirds of the value of all crops produced in the county.

The World's Leader

This country leads the world as a tobacco producer and in the number and diversity of types produced to supply varying demands. Census returns show that in 1919 there were 10,291 tobacco-manufacturing establishments employing 183,000 persons. The products manufactured—cigarettes, cigars, smoking and chewing tobacco, and snuff—were valued at more than $1,000,000,000. The internal revenue from tobacco now amounts to nearly $300,000,000 yearly.

So far as statistics are available they show that the 11 principal tobacco-producing countries each produced upward of 50,000,000 pounds annually before the war. In the order of quantity produced these countries are the United States, British India, Russia, Hungary, Dutch East Indies, Japan, Germany, Philippine Islands, Brazil, Cuba, and Northern Caucasia. China undoubtedly produces much tobacco, but statistics are not available.

In the Yearbook article much attention is given to the historical and economic development of the tobacco crop since earliest colonial times. It is said that when America was first discovered the natives were growing the crop from Canada as far south as Brazil, and that they understood such fundamental practices as proper spacing in the field, topping and suckering the plants, and the distinctive processes of drying now known as air curing, sun curing and fire curing. Commercial tobacco growing was first begun in the West Indies and Central America by the Spanish settlers long before Jamestown was established. In the early days the Virginia and Maryland growers competed for the European trade with these Spanish planters. From this time to the present, when cigarettes are produced at the rate of 60 billion a year, the various changes in the industry are discussed and shown by maps and graphs. Although expansion has been one of the most noticeable features, various other changes have occurred, including the development of new types and varieties and new cultural methods. Special attention is given to certain regions, to factors influencing production, and to tobacco's position in the farming system.

The work of the Department of Agriculture is shown to have had an important influence in the improvement of the industry, and in the last 25 years, because of new methods, better varieties and greater use of fertilizers, the yield per acre has increased. Great progress has been made in the ways of marketing the product from the farms, particularly in co-operative marketing.

Shade-Grown Wrappers

The growing of cigar wrapper tobacco under shade, which has become very extensive in Connecticut and Florida, is one of the important developments in the industry which has come from the experimental work carried on by the Department of Agriculture. This method has made it possible to produce a high-grade leaf for the purpose which formerly could be secured only from foreign countries. Another contribution by the department is the steam sterilization of tobacco seed beds whereby destructive fungous diseases and weed seeds are destroyed. This simple method eliminated one of the very serious troubles of the tobacco grower. Studies have also been made of the kinds and quantities of fertilizers best adapted to different soils and various types of tobacco. Varieties have been improved by breeding and selection and new varieties have been created. It was through experimental work on one variety, Maryland Mammoth, that the discovery was made of the effect of the length of the day upon the flowering and fruiting of plants, a discovery which has interested scientists in all parts of the world and which has important practical applications in plant breeding and in the commercial production of seed of certain plants.

Types Confined to Certain Limits

Although there has been a great increase in the consumption of tobacco since the Civil War, the crop advances very little into new territory. Each type of tobacco is rather closely limited to certain localities because of soil and climatic conditions. In most of the tobacco-growing regions only a small part of the farm land, about 10 per cent, is devoted to the crop in normal years and any noticeable increase in price results in an increase in acreage in the original region. Because of the rapid rise in the use of cigarettes there has been a great demand for the flue-cured type of tobacco grown in the South Atlantic States. In these States there is much land lying idle which is not sufficiently productive for general farming, but which by the use of fertilizers can be made to supply the demand for any increase in acreage of tobacco. The trade also has come to look to certain localities for a certain kind of leaf. For these reasons commercial tobacco culture is not likely to spread to new territory.

Tobacco Consumption Shows Steady Increase

The consumption of tobacco, according to figures in the Yearbook, has increased steadily since Colonial times, but since the Civil War it has been rapid. Before the Civil War it was less than 4 pounds per capita. Since that time the rate of consumption has steadily climbed until it is now 8.5 pounds per person. The conclusion is that a steadily increasing proportion of the population is using tobacco. The outstanding feature of the expansion in the last quarter of a century has been the great increase in the use of machine-made cigarettes. From 1895 to the present time the manufacture of cigarettes has risen from 4 billion a year to 60 billion. Chewing tobacco has been giving way to smoking.

The article covers all factors in the industry from fighting diseases and pests to marketing and international trade. It is the most complete statement on the industry ever issued by the department.

Sails from Montreal

James Willing, of the American Malaya Trading Co., has been visiting his home in Montreal, and sailed from that port last Saturday for Europe on the White Star steamer *Megantic* to represent his organization at the remaining inscriptions.

Returns to Europe

Charles J. Waxelbaum sailed for Europe last Tuesday on the Cunard liner *Aquitania*, to attend the remaining inscriptions at Amsterdam and Rotterdam.

More Kentucky Outlawry Reported

LEXINGTON, Ky., May 22.—Bloodhounds from here have been ordered to Mason county, northeast of this city, to run down depredators who last night destroyed tobacco beds of seven prominent growers of that section, who are not members of the Burley tobacco pool.

This is the first outrage of this kind reported from that section, and feeling is running high over depredations. This is the fifth county in the Burley tobacco district where beds have been destroyed. Gov. Morrow has been petitioned to offer a reward for the capture of the raiders.

Reward Not Claimed

DANVILLE, Va., May 21.—While the Saunders local of the Tobacco Growers Co-operative Marketing Association has offered a reward for the apprehension of culprits who did damage to the tobacco beds of S. E. Alcorn near here, there is a growing disposition on the part of the "Co-ops" to minimize the damage done and to charge the farmer with having made a mountain out of a mole hill. Growers who have visited Alcorn's plantation and who viewed the damage done, report that only a few plants in one bed were torn up and that the people of the neighborhood are inclined to look upon the matter as a joke.

This, however, has not deterred Alcorn from raising a hue and cry over the affair and his reward of $100 still stands for the person who gives him information leading to the arrest of those guilty.—TETLEY.

Wisconsin Tobacco Market in Quiescent State

Several Sample Lots Sent Out for Inspection—Companies "Picking" at 1922 Crops—Prices Show No Signs of Weakening—Regrading Likely to Cause More Wailing.

EDGERTON, Wis., May 19.—There is nothing to report on the cased tobacco market this week. Several lots of samples have been sent out for inspection. Also shipping of old sold lots is steadily going on.

The 1922 crop is still being picked at by the different companies who have steadily refused to withdraw their hats from the ring, ever since the buying started last fall. Carle, Jones, Sweeney, Bekkedal, Nelson and McIntosh have furnished the bulk of the movement, with Lorillard and the General receiving scattered bargain lots from the co-op.

The prices show no signs of lessening. The pools, however, have gone over their unsold portion of southern binders, and regraded a lot of it back into the stemming. This will cause more roars to go up without any doubt, but that is a mere nothing to the pool officials "nowadays."

The receiving is still lagging on, with more of the stemming to be delivered as it is graded back from the assorting grades. The disgruntled growers are still refusing to deliver their tobacco, or even allowing the pool weighers to weigh it up in the shed and pay them their advance. Authentic reports from Richland county indicate that perhaps as many as one hundred new signers were obtained by the pool as a result of the series of rally meetings. Richland county was not over ten or fifteen per cent pooled today, somehow the organizers there never could make any headway. This will perhaps offset the cash renting in that county by pool members, and leave it about the same as formerly.

The weather has been a little more seasonable. A good rain helped out a lot, but the nights are discouragingly cold yet. Almost nightly the thermometer sinks down to forty degrees.

Ben Meyers, of the General Cigar Co., Inc., breezed into these parts this week. He now is scampering about the state with precision and eclat. There is something stirring, or about to be stirred, when that gentleman is nigh. As always, he is the cynosure of all eyes. The ducks are not flying, but Ben is as quick with his check book as he is on his trigger. His appetite for both ducks and fine packings is something "awful" when he once swings into his stride.—BADGER.

Increasing Interest in Missouri Tobacco

BRANSON, Mo., May 19.—The success that has attended the efforts of tobacco growers near Branson, where prices obtained last year were said to have exceeded those obtained at the famous Missouri tobacco center at Weston, has resulted in a great interest being taken in the promotion of the tobacco industry in the Missouri Ozarks and this section of the state promises in a few years to become an important commercial point for the tobacco industry and will aid in boosting the previous records of 4,000,000 pounds annually in the state with a valuation of more than a $1,000,000, to a much higher figure even this year. Tobacco production in Missouri previously was confined chiefly to the dark, fire-cured type and used principally in the manufacture of "plug" tobacco.

The reduction in the price of this commodity resulted in almost a complete cessation of activities along that line and for a number of years there was a decadence in the tobacco industry in the state, with the exception of several isolated localities. For the past several years the production of white burley tobacco, used largely in the manufacture of cigarettes, has gained commercial importance in the state and especially in the Ozark section the growth of the industry has been rather marvelous.

Chambers of Commerce and Commercial Clubs have taken up the matter of furthering the industry and they have brought tobacco experts into this section to carry on experiments to determine if tobacco can be profitably raised in the Ozark region. The result of these experiments have been highly satisfactory and the experts declare that the farmers of the hill sections of southwest Missouri will be able to gain a great deal larger returns from their lands by growing tobacco than from any other crop. As a result of these reports the civic and commercial organizations have gotten solidly behind the movement and are assisting the farmers and ranchers in getting started by furnishing them with tobacco seeds and bringing more experts here to assist the farmers in getting a knowledge of the game and instructing them in the planting and culture of tobacco.

Probably no phase of agricultural pursuit, with the probable exception of the strawberry industry, has made such rapid progress in the Missouri and Arkansas Ozarks as the tobacco raising during the past several years and those furthering the proposition declare that it is really just in its infancy and within the next five years will see this section of the state producing the bulk of the tobacco in the state. Experimental plots have been established in a number of cities in this section of Missouri this year and the progress of the crops is being closely watched and noted.

Misbranding Condemned

WASHINGTON, D. C., May 23.—In an order directed to G. F. Hemler of Mcsherrystown, Pennsylvania, the Federal Trade Commission has condemned the use of cigar labels and brands that are misleading to the trade and general purchasing public.

In its investigation of the case, the Commission found that the respondent manufactured cigars and placed them on the market under the name of "Tampa, Florida," and that on the box containing such cigars the words "All Havana Hand Made."

The Commission further found that the cigars so labeled were not manufactured in Tampa and were not made from tobacco grown in and imported from Havana.

By the specific terms of the Commission's order the respondent must cease from using the words "Tampa, Florida" and the words "All Havana Hand Made," or any of them, in bands, labels or legends on cigars and the containers thereof manufactured by him in Mcsherrystown, Pa., or in any other place than at the City of Tampa, or the Tampa District, in the State of Florida, or sold by him, if such cigars, in fact, are not made in the City of Tampa, or the Tampa District in the State of Florida, and are not composed of tobacco grown in and-or imported from Havana, Cuba. —LAMM.

Co-ops Lose Suit

BUCKINGHAM, Va., May 19.—In the Circuit Court here the case of the Co-operative Marketing Association against Dr. Morris, was dismissed. No civil case in many years has attracted so many people to the Court House. The village was literally filled with automobiles; men and women representing both sides were here.

Col. Aubrey E. Strode represented the defense and J. Taylor Thompson and others were council for the association. It is said that the association people will renew their suit in some form.

This was a case where Dr. G. L. Morris was charged with selling tobacco in the auction warehouse while he was a member of the association.

The amount for which suit was brought was $700.

Turns to His Pipe for Consolation

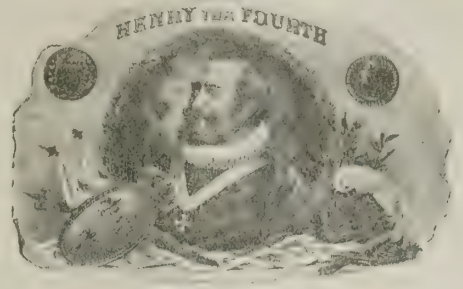
WASHINGTON, D. C., May 19.—President Harding, after reading assaults on his administration, sometimes lays down his newspaper and turns "to a fresh pipe of tobacco for consolation," he says in a letter to Senator Harrison, Democrat, Mississippi.

The letter was occasioned by an article written by Senator Harrison concerning the visit of the executive's father, Dr. George Harding, to New Orleans to attend the Confederate reunion.

"I am writing you," the executive said, "to thank you for the kindly things you have said concerning him and his visit and the courteous reference you have made to the present occupant of the White House.

"In your capacity of chief party trouble maker in the Senate you have said some things which have made me lay my newspaper down and turn to a fresh pipe of tobacco for consolation. This very generous and considerate article has antidoted all the things that have gone before. You will be interested to know that my father was very greatly pleased by the article, and that he had the time of his life in meeting the Confederate veterans at New Orleans.

"The visit of my father was a very simple thing to do, but if it has contributed in any way to the concord of union and the completeness of reunion I am glad that he made the trip."



* * *

TOBACCO avails itself of this opportunity to say that future historians will have the authority of the President's own letter to enroll his name among the illustrious smokers of today. It is generally known that President Harding is fond of a strong cigar and does not waste any time in looking for a "light wrapper." His intimate friends know how he loves his pipe. It is pleasant to be able to quote his views regarding the consoling influences of tobacco, when the President is perplexed and wearied by the cares of State.

A Boost for Cigarettes

WASHINGTON, D. C., May 19.—In the case of the cigarette, detested by reformers, the worm has turned. Joseph S. McCoy, Government actuary, the last word in facts and figures in the Treasury Department, has found that the state of the nation's prosperity can be judged better by the consumption of cigarettes than by any other commodity. Mr. McCoy is not a cigarette smoker.

Now comes the Chemical Warfare Service with a real boost for the cigarette as a remedy for tuberculosis. Major Gerald B. Webb, speaking before the Missouri State Medical Society, discussed the effects of inhaling cigarette smoke on weak lungs. He concluded tobacco inhaling was a protective agent against tuberculosis and cited his examination of army recruits. Many more non-smokers were discharged for tuberculosis than were smokers.—LAMM.

Chicago Cigar Dealers Lose Out to Candy Shop

Lady Candy Purveyor Secures Small Store Much Sought After by Cigar Interests—Conscientious Scruples Weighed Against Smoke Emporium—News from Windy City.

CHICAGO, May 19.—It isn't often one hears of Loop office building owners turning down a would-be store tenant who offers $10,000 annually for a shop 11 x 17 feet, and then renting it to another party for several thousands less, just on account of religious scruples. The Chicago Temple, at Clark and Washington streets, just completed, and which is 556 feet high, has a small shop at 79 West Washington street, which is ideal for a cigar store. It is so promising a site that several big cigar store concerns have made persistent overtures to the agents of the building, only to be told that the Methodist Church, which owns the building, would as soon think of having a saloon in the building as a smoke shop. One concern offered $10,000 annually and got just as emphatic a "No" as another big chain cigar store company, which offered several thousands less. And then Mrs. Ora H. Snyder, who was looking for a store to care for her discontinued candy shop at 30 West Washington street, heard about the much sought after 11 x 17 shop, and in less than five minutes after applying for it had secured it, and at several thousand dollars annually less than $10,000. In the lease is a clause unique in the history of Loop leases, so 'tis said. It reads: "The shop is not to be open on the Christian Sabbath." Mrs. Snyder, whose fame as a purveyor of sweets is nation wide, opened her first candy store here 13 years ago. She now has six in the Loop, and her business has proven a tremendous success.

Louis Nathanson, of Minneapolis, who has been visiting the Eastern manufacturers, passed through the Windy City on his way home.

The dealers are expecting Ed. Berriman to come in for a short visit. His representative, Gordon Nussbaum, has several fine accounts here.

Muriel cigars continue to forge ahead with Faber, Coe & Gregg.

Harry McCrary, of San Martin & Leon, reported from "Down in Ohio," where he is opening new accounts on the San Martin & Leon and Hoyo de Cuba brands.

Showing Results

Leo Abraham, Milwaukee chain store owner, and sales agent De Luxe, passed through on his way home from a visit to the Webster Cigar Co. factory at Detroit. Leo also represents José Escalante & Co., of Tampa, and is putting their Corina cigar on the map in Wisconsin.

This is "Cinco time" for E. Hoffman & Co., and their sales force has secured a fine distribution on this 2 for 15 cent cigar.

John W. Merriam, of M. Bustillo & Merriam, of Tampa, was a caller, and as usual he booked some good orders.

Sells Millions of Manilas

Ed Elam, who sells millions of Manila cigars out West, spent a few pleasant hours here on his way to New York. Ed hails from San Francisco.

Catering to Greek Trade

The *Greek Star*, the leading Greek newspaper here, shows many cigar ads. In each issue is seen El Roi Tan, Tom Palmer, Chas. Denby, La Palina Corina, Girard, Humo and Helmar cigarettes. P. S. Lainbros is the publisher of the *Greek Star*. The Greek trade of Chicago is a large one and much sought after by all the jobbers and local manufacturers.

Goes with Seidenberg Corp.

Abe Cohen has resigned from the sales force of Newman Bros. and has connected with the Wm. J. Seidenberg Corp. to represent them on the South Side. He will feature Pancho-Arango, made in bond, and Virginia Lee, Tampa made mild Havanas.

Sol Korn, a New York manufacturer, spent several days here. His Cuban Crop, a 10 for 35 cent short smoke, has a large sale locally.

Featuring Garcia y Vega Cigars

A clever letter, boosting the quality of the Garcia y Vega cigars, has been received by the trade from the New York office of Garcia y Vega. A fine booklet showing nine high priced sizes of the Garcia y Vega brand was enclosed with each letter.

The City Club of Chicago now features several sizes of the Pancho-Arango, made in bond cigar.

Offers Tailor-Made Smoke

Harry Mitchell, a popular local tailor, is pulling a clever stunt these days. Through large newspaper ads he invites his friends to bring along their matches and stop in his store at 16-18 East Jackson and have a cigar on him. Harry says "it's not an El Cabaggo, but a real, honest-to-goodness Havana that will carry away your troubles in every puff, and you'll be satisfied with my cigar and my perfect tailoring." This is a brand new advertising scheme nad the first time ever tried here by a tailor.

Peter Soteros has come back to the Rialto, and is now the owner of Peggy's Grill at 161 North Dearborn street.

Cinco newspaper ads again appear. A quarter of a page showed Cinco off to the public this week. E. Hoffman Co., 30 South Wells street, finds Cinco showing a lot of life and has secured a large distribution in this market for Otto Eisenlohr & Bros., Inc.

Sol Bernstein, of Sol M. Bernstein & Co., has returned from his vacation to West Baden.

C. D. Maxwell, for some time one the sales force of Tebbetts & Garland, has resigned and is now with the Miles Cigar Co., 28 East Monroe street. He will feature to the box consumer Pancho-Arango and DuBelle, both made in bond cigars from the Tampa factory of the Wm. J. Seidenberg Corp.

Humo, the big selling 2 for 15 cent seller of the Sanders & Watson Cigar Co., continues to be featured in the Chicago newspapers.

Emil and Karl Eitel, owners of the Bismark Hotel and the Marigold Garden, have just purchased the southwest corner of La Salle and Randolph streets, 181 x 132 feet. They are to erect a 2,000-room hotel and theatre on the site, which is one of the best locations in the Loop.

Big Club Building Proposed

A $4,000,000 twenty-five story club is to be erected at 168-176 West Adams street and to be known as the Midland Club. Its membership will consist of several thousand Middle West executives of out-of-town concerns who visit Chicago a number of times a year. It is planned to have 726 sleeping rooms.

New Schermerhorn Store

The new Schermerhorn store at Dearborn and Monroe streets will open in a few days. It will be one of the best located and the finest retail cigar store in Chicago. H. M. Schermerhorn, Inc., has been in business here for over 25 years and operates a chain of stores in the Loop.

Celebrating 22nd Anniversary

The United Cigar Stores Co. has moved out of the location southwest corner of Clark and Jackson boulevard. The United is celebrating its 22nd anniversary by giving 10 full certificates with each $1 purchase.

The Mutual Cigar Co., with a store at 18 East Van Buren street, will in a few days open store No. 2 at 304 South Clark street.

Down in Louisville today is E. P. Oakes with his new straw hat, watching the Kentucky Derby run. Fred Lampert, who is manager of Oakes' retail business, is also along with the boss.

Oscar Buxbaum, jobber of Milwaukee,

Durex Quality Production Bunch Machine Shown at T. M. A. Convention

A miniature cigar factory in full operation making cigars from short filler bunches prepared on the Durex Quality Production Bunch Machine was one of the most interesting side features at the T. M. A. Convention at the New Willard Hotel in Washington last week.

The Miller DuBrul & Peters Mfg. Co. of Cincinnati, manufacturers of the Durex, planned the display which was held in a large room adjoining the one where the general sessions of the Convention took place, and the steady stream of interested visitors at times taxed the capacity of the room.

The Durex Quality Production Bunch Machine, manufactured by Miller, Du Brul & Peters Mfg. Co., shown at the T. M. A. Convention. It is being explained by Mr. Du Brul (center) to Geoffrey Freeman (right), and M. E. Canle (left).

Built on New Principle

The Durex machine is built on an entirely different principle of feeding the filler, than has ever been used on a short filler bunch machine. The filler is fed forward horizontally and keeps the original combination both as to size and quality of tobacco during all the operations. This assures both uniform bunches and mixture.

The interest shown in the Durex by cigar manufacturers in attendance at the convention is an indication of the trend in the industry towards methods which will insure increased production at lowered manufacturing costs, and the many favorable comments heard from men prominent in the tobacco industry—men who realize the vital necessity of controlling the factors of cost and production—would indicate that the Durex Machine will play a prominent part in the new order of things.

The Durex is peculiarly fitted to perform the mission of increased production at lowered manufacturing cost because of the elimination of waste in filler and binder stock, the speed with which bunches can be produced and the decreased labor item of machine versus hand work.

An Exclusive Feature

The machine measures and shapes the bunch simultaneously by means of an expanding matrix, one of the exclusive features of the Durex, which opens to receive the filler, and contracts to the desired shape after it has been filled. A compensating plunger controlled by a spring adjustable as to pressure, makes certain the uniform filling of the matrix from head to tuck. The excess filler is sheared off by a pair of knives, resulting in a uniform bunch, and the positive

It produces 20 bunches a minute and can be run continuously because the only manual operation performed by the operator is the laying of the binder. The bunch is formed, shaped and placed in the mold automatically and from the time the tobacco is placed in the hopper until the finished bunch is placed in the mold, the filler and bunch are under positive control.

and complete elimination of plugs, or chokers,

E. B. Kincaid, Erecting Engineer of the Miller DuBrul & Peters Mfg. Co., was in charge of the operation of the machine used in the demonstration and its features and principles were explained by C. J. DuBrul, President of the Company; J. F. Sees, assistant to Mr. DuBrul, in Charge of Engineering; F. Chudoba, Sales Manager and R. M. Fleming, Publicity Manager.

After the bunches were made on the machine they were finished by two attractive young ladies clad in white costumes and caps bearing the old familiar "triangle in a circle" trade-mark of the Miller DuBrul & Peters Mfg. Co. Each process of cigar making was carried out and the finished cigars were placed in boxes. An interesting feature was the fact that every bit of equipment used in making the cigars was made by the Miller DuBrul & Peters Mfg. Co. Later the finished cigars were placed in pouches bearing the trade-mark of the company, and the request that the recipient smoke one and open the other so as to convince themselves of the quality of work done on the machine. These were handed out to all the visitors and from the comments heard the workmanship made a favorable impression.

The accompanying photograph shows the exhibit and was taken as the machine was being explained by Mr. DuBrul to two of the overseas visitors to the convention, Geoffrey Freeman of J. R. Freeman & Son, Ltd. of London, and Cardiff, and M. E. Canle, the official representative to the convention of the Union de Fabricantes de Tabaccos y Cigarros of the Island of Cuba.

To Operate Cigar Store on the "Leviathan"

Faber, Coe & Gregg, the well-known importers and distributors, have secured an important and unique contract to operate a retail cigar store and several cigar stands on the Shipping Board steamer *Leviathan*, ex-German steamer *Vaterland*.

As the result of her recent reconstruction, the board claims that the *Leviathan* is now the largest ship in the world and the country is looking forward to July 4 next, when the huge liner is scheduled to steam from New York on her first voyage in the transatlantic passenger service under the American flag.

The cigar store and stands will be stocked with a high-grade assortment of imported and domestic brands, and also a general supply of cigarettes, smoking tobacco and smokers' articles. The innovation bids fair to become popular with transatlantic passengers and Faber, Coe & Gregg are to be congratulated on their enterprise.

St. Louis News Notes

ST. LOUIS, Mo., May 21.—Business continues at about the same pace it has been going for some time. With pleasant weather in sight, after several days of very rainy weather, jobbers and retailers look for an increase in their business.

W. W. Haynie, of the Haynie System, is back after several weeks spent in Arkansas, Texas, Louisiana, Oklahoma and Kansas City. He tells of the connections he made during his trip. The Paris (Texas) Grocery Co., a concern controlling eight houses in eastern Texas, he states, will distribute the Haynie System brands hereafter. The Adkins-Polk Co., will take care of Dallas. The Carter Co., in Fort Worth and western Texas will be taken care of by the eighteen branches of the J. M. Radford Grocery Co. There will now be fifty-two concerns in Texas taking care of the distribution of the Haynie System goods.

Sues Former Receivers

Suit was filed in the Circuit Court of this city, last week, by Edward E. Butler, a lawyer, against M. R. Hoffman, Jesse M. Falk and the American Surety Co., for $20,000, which represents a bond which Hoffman and Falk filed in the Circuit Court when they became assignees for the creditors of the Dienst Tobacco Co., of St. Louis. It is alleged in the suit that Hoffman and Falk were appointed by the court in July, 1922, when the company went into voluntary bankruptcy. On February 10, 1923, Falk and Hoffman filed a motion asking that they be removed as assignees. Butler then was named assignee and furnished a $25,000 bond, but when he made demand upon the former assignees for the books of the company, his demand was refused, he alleges.

A Valuable Concession

The Charles P. Stanley Cigar Co., as usual has the cigar and tobacco concession at Forest Park Highlands, a big summer resort on the outskirts of the city. The late Charles P. Stanley, obtained the concession when the resort was started, many years ago and it has been controlled by the company ever since.

Recent Visitors

Many visitors have been here recently. Some of them were H. J. James, sales manager of the Lovell-Buffington Tobacco Co., Covington, Ky.; Tom Monroe, sales manager of the Spietz Cigar Co.; Frank Schaeffer and Sandy Stuart of Jos. J. Schaeffer; Nat J. Rice of the American Cigar Co.; Howard Pent of the Coraza Cigar Co., and Harry J. Godfrey of George C. Kindt & Co., Inc.

NEW YORK, THURSDAY, MAY 24, 1923.

COMING EVENTS

Convention of the National Cigar Leaf Tobacco Association, in the assembly room of the Merchants Association of New York, in the Woolworth Building, Monday and Tuesday, June 4 and 5,

* * *

Annual convention of the Tobacco Association of the United States, at the Grove Park Inn, Asheville, N. C., June 28, 29 and 30.

A POWER IN THE LAND

A part of the recorded history of the tobacco trade, the proceedings of the T. M. A. Convention, at Washington, have been spread before the public.

Expectations were justified. A fine showing was made. The meetings were well attended. More than usual interest was manifested. For the good and welfare of the industry, many able men deliberated.

There was no lack of direction. Alert leaders were on the job all the time. Precisely, as intended, various things were done. From the carefully prepared program, there was little deviation. Perforce, the convention devoted much of its time and efforts to routine work. Nothing very new or startling was developed. But for what was achieved, surely there is cause for congratulation.

The eminence of the speakers was a tribute to the importance of the tobacco industry.

Admittedly, the T. M. A. is a power in the land.

Necessarily, its far reaching influence will become stronger.

Ably led, wisely guided, the Association gives assurance that it can be of greater service.

For the American tobacco industry, the T. M. A. is obligated to do its utmost. It should grow. It should obtain a larger membership. It should be properly financed. It should be able to promise increased usefulness.

Ability is indicated by past performances and present direction. The T. M. A. justly may take pride in its officers. Future achievements are foreshadowed by what is being done now.

The nation and the tobacco industry give credit and praise to the T. M. A.

PREFERRED HIS OLD RED CLAY

Even Victoria features in the history of tobacco.

It is said that she once sent a silver pipe to the King of Dahomey as a symbol of her favor and good will.

The savage ruler tried it. And much to the Queen's surprise, he sent it back with the cryptic message that his old red clay pipe was much better!

Proving, again, that a woman should be very careful when she picks a pipe for a man.

A PROBLEM FOR THE T. M. A.

Too many dealers and more than a few cigar manufacturers seem to proceed on the theory that most smokers don't know what they are buying.

"If the price isn't too high, if there is a big profit in it for us, we can sell any kind of a cigar that appeals to the eye."

"The boobs can't tell the difference between Havana and Pennsylvania."

"In a cigar store, the average customer hasn't any judgment."

Slickers and smart Alecks make such assertions. Cigar business is hurt by unscrupulous persons who deceive themselves by supposing that they can fool the public constantly.

Endeavoring to take advantage of the presumed ignorance of the consumer, they practice misrepresentation and resort to misbranding. Attempting to obtain excessive profits, they offer poor stuff and try, by fulsome commendation, to make it salable.

Though cigar trade history is crammed with proof that long-shotting doesn't pay, though again and again eager long-shotters have gone out of business ignominously, always there are some who will not be warned by the failure of others.

Persuaded by the thought that they can get away with it, they yield to a desire to acquire wealth quickly. They use unfair methods. They produce inferior goods. They rely on the gullibility of consumers.

They believe that, in buying, the ordinary smoker is influenced, principally, by "salesmanship."

To catch customers, the long-shotter depends on deceptive appearances, gaudy labels, pretentious claims and attractive prices. Instead of giving real information, in making a sale, bragging and exaggeration are brought into play.

For what it is and because of the harm it does, long-shotting receives condemnation, deservedly. But long-shotting isn't the only thing that operates to prevent the cigar industry from becoming more progressive and prosperous.

Let cigar manufacturers look around and see.

What's wrong?

Although smoking has increased greatly in the United States, cigar sales have not grown proportionately. Why?

More than a million new smokers come along, every year, in this country. But what has been done to broaden and develop the cigar market?

Contrasted with the achievements of manufacturers of cigarettes in recent year, the showing made by cigar manufacturers must seem meager. Where does the fault lie?

Employed by manufacturers today, methods of selling cigars are practically the same as they were many years ago. For the failure of cigar production to enlarge, is the retention of old tactics of partial explanation?

While cigarette manufacturers advertised intelligently, persistently and tremendously to induce people to use cigarettes, numerous cigar manufacturers refused to advertise at all. Others advertised, grudgingly, in a small way. Among cigar manufacturers, extensive and continuous advertisers have been comparatively few. Deprived of the publicity that would have been helpful in making them popular, unadvertised cigars had to compete how they could. Mostly, to the retailers was left the task of making sales for such. In small quantities usually, the friendless cigars went into a store. If they happened to sell, well and good; some more might be ordered. But a brand is unprofitable to handle unless it repeats. When there is no call for a brand, a dealer doesn't want it. By putting retailers to the labor and bother of introducing brands and securing a market for them, cigar manufacturers have retarded distribution. By neglecting to take the steps necessary to popularize their products, cigar manufacturers have restricted sales. They have created a situation where cigars have to carry the burdens of the retail tobacconist.

To enable the retailer to live and continue in business, cigars provide most of the profit that a store obtains. Though cigarettes may represent more than 50 per cent of the total sales of a cigar store, the retailer's profit on cigarettes generally is so small that dependence has to be placed on cigars to meet operating expenses.

The cigar smoker yields to the retailer a much larger profit than the cigarette smoker does.

The retailer compels cigars to make up for what he doesn't get on cigarettes.

To the manufacturer, advertising reduces the expense of selling. And sales are made easier.

Because of the continuous and extensive advertising of cigarettes to consumers, the retailer is forced to carry the cigarettes that are called for every day.

But, in buying cigars to sell again, the retailer picks and chooses brands that will give him the biggest profit.

By shrewd advertising, conspicuous almost everywhere, the smoker is encouraged to buy cigarettes. Information concerning brands, blends and processes of manufacture are given to the cigarette smoker. Cigarette advertisements are intended to enthuse. They win trade. They make new customers. By reading advertisements, the prospective buyer is induced to make up his mind before he enters the store. The cigarette smoker insists on getting what he asks for, usually. The retailer seldom tries to switch a cigarette smoker from one brand to another.

On cigar smokers, however, the retailer endeavors to use "salesmanship." Naturally he wishes the customer to take the cigar that gives the largest profit.

Because cigars are less advertised, the dealer has better chances to recommend or substitute.

Because many cigar manufacturers have not been indefatigible advertisers, cigar sales have been harder to make and the cigar market became what it is today.

Without causing greater loss and danger to the American cigar industry, things can not be allowed to drift the way they are going.

Many cigar manufacturers now are convinced that something must be done. At the T. M. A. Convention, at Washington, last week, it was suggested that a million dollars be raised, annually, to advertise the cigar industry. It was proposed that each manufacturer should contribute to the fund, in proportion to his output.

Ten cents per thousand, levied on all cigars manufactured and imported, would provide an advertising appropriation capable of bringing cigars much more favorably before the attention of smokers throughout the country.

The million dollar suggestion, made at the T. M. A. meeting, was referred to an appropriate committee, for consideration.

What action will be taken, eventually, remains to be seen.

A million dollars, however big that sum may seem to most of us, really is a small amount when compared with what is expended on cigarette advertising in the United States yearly.

Through its membership, the T. M. A. represents every division of the tobacco industry and practically all of the allied trades. As an association, the T. M. A. occupies the highest place in tobaccodom.

Properly, as an organization, the T. M. A. could not espouse the cause of cigars as opposed to cigarettes.

But the facilities of the T. M. A., enable cigar manufacturers, collectively, to take up and develop plans for the protection and advancement of their business.

If, put into shape by a T. M. A. committee the advertising proposition can be made acceptable to most cigar manufacturers, the result will be important.

If the recommendation becomes effective, manufacturers generally contribute ten cents for each thousand cigars contained in their output, advertising campaigns may be arranged to advantage.

The Philippine Government collects an inspection fee of 15 cents per thousand on all Manila

cigars exported to the United States. Derived from this source, the fund serves to defray the expense of reconditioning the damaged Manila cigars that come to this country. It furnishes the financial backing for the Philippine Government guarantee. It pays for careful inspection. It safeguards Manila business in the United States. Also, it provides an appropriation for a limited amount of Manila cigar advertising in the tobacco trade papers.

What has been done, with a fifteen cent per thousand collection on a few hundred million Manilas annually, at least will suggest possible achievement with a ten cent contribution obtained from each thousand of the approximately seven billion cigars made in the United States.

If a T. M. A. committee, with such advice and aid as may be got from the trade, can take hold of the proposal and make it workable, the American cigar industry soon could be put in a better position.

BUSINESS CONDITIONS

An expectation of good business throughout 1923 seems justified by conditions today. Executives responsible for business policies are proceeding with intelligent caution. They are making skilful use of improved facilities for learning the facts of the situation and are shaping their courses accordingly. As a result there is reason to believe that the danger of over-production and of inflation of prices and of wages by bidding for available supplies, is past for the time being. The prices of leading raw materials have receded somewhat and further declines in some commodities should occasion no surprise.

The expected check to building operations because of unduly high costs of labor and materials has occurred, and in the textile industries, in iron and steel and in manufactures generally a smaller volume of forward orders is being booked. Retail trade is excellent, with occasional local exceptions. There is little evidence of accumulation of stocks of finished goods at any point from the manufacturer to the consumer.

The check to production which has taken place is wholesome. In part it is seasonal. To a greater extent it is the result of widespread realization that a considerable part of the output of recent months has been absorbed in building up depleted stocks to a point where they bear a fair relation to the present rate of consumption in the United States. From this time output must be absorbed primarily by current requirements. Confidence in the outlook is justified, but business men generally recognize that their hopes can be realized not by propagation of a boom psychology, but by careful testing of the consuming markets and by skilful adjustment of output and of prices to demand.

The only ultimate safeguard to the business of the country is the consensus of judgment of producers, merchants and financiers. They have already proved that they are competent to remember the lessons of 1920, and they are prepared to guard against the excesses of rising prices and other inflationary tendencies, says the National Bank of Commerce in New York. Movements and utterances calculated to further warn against such tendencies are no longer needed and they might even so undermine confidence as to hamper sound business. Underlying conditions are sound and the outlook is promising.

Conditions in the money market have not changed materially in the last thirty days. The open market rate for prime commercial paper is 5 per cent, with names less well-known at 5¼ to 5½ per cent. Buying by country banks is not as active as a month ago, but there is a fair demand from city banks for the very limited supply of prime paper available.

Call money fluctuated considerably from April 16 to May 15.

BIG ADVERTISERS STARTED SMALL

"I haven't enough money to advertise" is one of the most common objections to which space salesmen have to listen. The objection is expressed in various ways, such as: "Advertising is a rich man's game," or "How can a little fellow like me compete with Wrigley, and Victor, and American Tobacco, and Goodrich, and all the other advertising giants?"

Of course, the answer to these objections is that it is not necessary to have a lot of money to advertise. If you have any opinion to the contrary, there is an article in the May *Printers' Ink Monthly* that should rid you of the notion. It appears under the title, "The Humble Beginnings of Our Great Advertisers." It marshals incident after incident proving beyond doubt that most of the outstanding advertisers of today started small, unbelievably small. In fact, the companies who launched their initial advertising campaigns on a pretentious scale are the exception rather than the rule. Many of them were initiated into advertising on a scale that even a corner retailer could easily attempt.

A large initial appropriation is, therefore, not an advertising necessity. Actually, thousands of advertisers never get out of the slender appropriation stage. Yet many of them use small space so effectively that they are fully entitled to be numbered among the country's successful advertisers. And those who do reach the large appropriation stage do not, as a rule, advance that far successfully until they have learned how to make small space pay.

In probably more cases than is commonly realized, advertisers earn their appropriations as they go along. Originally they put a few thousand dollars into advertising. It pays. They increase the amount and invest that in advertising also. Again it pays. Thus their advertising investment pyramids just as does any investment policy that is consistantly followed.—*Printers' Ink.*

Market Comment

The past month has been a fairly active one, most grades of tobacco being in demand, but the principal business done was in Kentucky leaf and strips of spinning character, with a good proportion of Bright cigarette leaf of the new and those remaining of the 1919 crops.

The particulars of the tobacco destroyed in the fire at the Royal Victoria Docks, London, on the evening of April 13 are now being given to the owners, and, whilst most of the about 4,500 casks involved were the property of the Imperial Tobacco Co., Ltd., the about 12,000 bales lost are, to a large extent, Nyasa Tobaccos, principally of grades which were not meeting with much favour by our manufacturers.

Tobacco Products to Have a Good Year

Based on reports for the first four months of this year and current outlook, interests in close touch with the affairs of Tobacco Products Corporation estimate that company this year should be able to show about $10 a share on the common stock after all charges and dividends on the preferred and Class "A" stock.

In line with previous estimates that earnings from operation, exclusive of dividends from other companies, were showing a 100 per cent increase over a year ago, statement for four months showed net operating earnings of $976,000, compared with $467,000 for corresponding period of a year ago. Dividends received up to April 30 of this year amounted to $1,067,000, bringing total earnings up to $2,043,000. This compares with total net earnings before allowance for Federal taxes of $5,587,519 shown in the 1922 annual report.

Tobacco Products in the annual reports does not segregate earnings from actual operations from those received in the form of dividends. Of the $5,587,519 earnings shown last year, it is believed that approximately $2,500,000 were exclusive of dividends received by reason of the equity in United Cigar Stores stock.

Based on current rate of earnings, it is estimated that the $2,500,000 earnings last year from operations can be bettered by more than $1,000,000 this year. While for the first four months they were $976,000, due to normal seasonal variation they are constantly improving. The early months of the year for practically all tobacco companies are usually the poorest. Earnings pick up rapidly during the warm weather and are greatest during the fall months.

The fact that United Retail Stores Co is to be liquidated is of importance to Tobacco Products. While exact figures are not available it is estimated that the latter owns about 85 per cent of total outstanding stock. In accordance with present plans, assets of the underlying companies of United Retail Stores will be distributed rather than certificates representing equity in the assets of the company. Retail Stores controls United Cigar Stores, whose earnings are expanding rapidly this year, United Retail Candy Stores and Gilmers, Inc.—*Daily Financial America.*

Box Sales

The standing of a cigar in popular favor is indicated by the number of smokers who buy a box at a time.

Blackstones in boxes of fifty and in pocket packs of ten and five move freely wherever the brand is established.

Long Havana filler, imported Sumatra wrapper. Forty years of high repute and consistent advertising have gained it recognition as a gentleman's cigar.

New Orleans Gets Into Contact with Live Wires

Tobacco Industry Shows Signs of Being "Electrified" in Various Ways, Despite the Fact That Some Have Fallen by the Way—Interesting Trade News from Crescent City.

NEW ORLEAN, La., May 19.—A couple of live wires blew into the city during the week and for the time being stirred things generally. Reference is made to Geo. R. Wilson, sales manager, and C. H. Schlichter, Southern representative of Wm. Demuth & Co., of New York, manufacturers of the Milano, Duro Bit, Turin and other high-grade quality pipes. They remained in the city for several days and report having found conditions very favorable and encouraging. This is Mr. Wilson's first trip through the Southern territory. He was well impressed with what he saw and thankful to the trade in general for appreciated courtesies extended to him during his stay here.

Operations Resumed

The Dolores Cigar Mfg. Co., in North Peters street, now again actively at work under a receiver, has appointed the Thompson Richie Grocery Co., of Alexandria, La., its distributor for that section of the State. The concern has eleven branches in Arkansas and Louisiana, two of which are supplied by the Dolores Cigar Co. The first shipment of 20,000 cigars went forward a few days ago.

Going After 'Em

Wallace Marine, general manager of the cigar company bearing his name in Gallatin street, after a brief stay in the city on his return from North Louisiana and Texas, departed by motor car for Baton Rouge and contiguous territory. The factory has appointed the Avoyelles Grocery Co., of Alexandria, La., with its five branches in the parish, distributors for the Marine Cigar Co.

M. S. Levy, of the New York Tampa Cigar Co., New York, paid a visit to his jobber, U. Koen & Co., during the week. He found his brand, Personality, going splendidly.

Believes in Big Conventions

George Mayer, president of Phil D. Mayer Sons, in Girod street, went to Washington, D. C., to attend the Tobacco Merchants' Convention. He likes to keep abreast of the times and is of the firm belief that these reunions, apart from their instructive value, make for greater co-operation and harmony. From Washington, Mr. Mayer goes to New York City and is to visit other business centers in the East. He has practically recovered his health which compelled him to absent himself from his business for a long period of time last year. The Phil D. Mayer Sons Co. also operate a branch factory at Donaldsonville, La.

Sam Flaxman, representing Barriman Bros., of Tampa, Fla., of the José Villa, La Sinceridad and Don Cosma brand of cigars, was in the city during the week, the guest of Mr. DeBen, of the Crescent Cigar & Tobacco Co.

Fact and Fair Play Can Win

A. L. Rau, president of the Crescent Cigar & Tobacco Co., has returned from an extended pleasure and business trip taken to New York City, and other northern points. He reports having found the cigarette situation very unsatisfactory at most of the places which he visited, some of the distributors exhibiting an indifference which, he thought, could only be overcome and corrected by the exercise of tact and fair play.

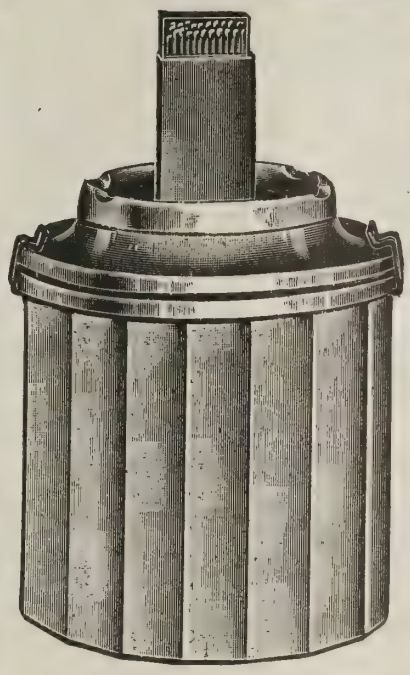
Anthony Cassino has been appointed traveling representative of the Estes Cigar Mfg. Co., Washington street, and left during the week for Northern Louisiana and Texas. Mr. Cassino was formerly a cigar manufacturer himself and hails from Milwaukee, Wis. He is to make a three weeks' trip through the territory to which he has been assigned.

Gone Into Liquidation

The Hernsheim Cigar Co., the last of the big cigar manufacturing establishments of this city, has gone into the discard. It was sold out, lock, stock and barrel recently, under receivership proceedings. The prices brought for the equipment, acquired mostly by local concerns, was only fair, while the amount realized from the sale of stock was practically negligible. H. W. Cobb, formerly president of the company, who instigated the legal proceedings for the recovery of $10,000, has gone into the leaf tobacco business, at Richmond, Va. He is a brother of J. B. Cobb, recently deceased, the multi-millionaire, formerly vice-president of the American Cigar Co. and vice-president of the American Tobacco Co. J. F. Malone, vice-president and general manager, who looked after leaf and the production end of the factory, is now considering two or three offers which have come to him, but is not in a position at present to speak definitely on the subject. He became an associate member of the firm in 1911, coming from the American Tobacco Co. He is an experienced man, having been formerly in charge of tobacco plants in Cuba, Tampa and Key West. J. B. Rogers, who was part of the official house-half of Hernsheim Co., is reported as being a good office man and a thorough credit and audit official. He was also formerly connected with the American Cigar Co. and American Tobacco Co. auditing department. In its halcyon days, the Hernsheim factory employed from 450 to 1,000 operators, but when misfortune overtook it, the force had been reduced to about 100 hands. It collapsed under the pressure of readjustment in prices and values, which followed the World War, in the wake of which were strewn so many industrial and business wrecks.

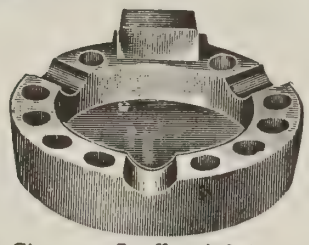
J. P. Hallinan, manager of the cigar cuttings department of P. Lorrilard Co. at Middletown, Ohio, was in the city during the week and a caller on the trade. This is Mr. Hallinan's first visit to New Orleans. He was numbered among the visitors on Phil D. Mayer Sons.

To Convert Perique Warehouses



President Martin, of the Louisiana Farm Bureau Perique Tobacco Growers' Co-operative Association, has received advices from Washington, D. C., that a representative of the Federal Government is coming to Louisiana to look after the required legal formalities to be observed so as to convert the buildings of the association, now being used as State bonded warehouses into U. S. bonded warehouses. All of the preliminaries required under the new federal law, in the formation of the Perique Tobacco Growers' Co-operative Association, have been approved by the Federal Government and with the formal establishment of the United States bonded warehouses, it will be possible for the Perique tobacco growers to borrow the money needed by them from the government for the cultivation and harvesting of the 1923-1924 crop of Perique which will be ready for marketing about February or March, 1924. The interest evinced abroad in the new association is shown in the increased exports of Perique from this port during the past fortnight. The steamship *Mombrassa* sailed from this port for Glasgow a few days ago with 105 barrels of Perique; the S. S. *Spaardam,* for Rotterdam, with one barrel of Perique and the S. S. *Actor,* for Liverpool, with five-half barrels of Perique.—CRESCENT.

Larger Acreage Indicated



WASHINGTON, D. C., May 23.—Tobacco plant beds are making good progress as a rule, though some have suffered injury from freezing and insects, according to a report of the Bureau of Agricultural Economics. The report states further that transplanting is in progress and is nearly finished in the most southerly regions. The supply of plants seems to be ample, as a rule, though reported short from a few points and increased acreage seems assured.

UNITED STATES GLASS CO.

TOBACCOLAND

By

CARL AVERY WERNER

EVERYTHING you need to know about tobacco and the tobacco business, is in this remarkable book. It covers the entire subject—History, Literature, Cultivation, Manufacturing, Merchandising, Taxation and Regulation.

Once you have it, you will wonder how you ever could have done business without it. Price $3 delivered, anywhere in the U. S. and Canada. Price to other countries, postpaid, $3.25.

No books sent C. O. D. or on approval

THE TOBACCO LEAF PUB. CO., 140 Front St., New York

Company Sues Stockholder

Galveston, Texas, May 12.—The Channey-Scott Cigar Co., through the law firm of Sizer, Chambliss & Chambliss, yesterday brought suit in the chancery court against F. P. Gleaves, formerly a stockholder in the company, for the recovery of $14,950 charged to have been illegally taken and withheld from the company's treasury.

The bill charges that Gleaves purchased a block of stock in the company, but failed to pay for it, and that he, being a member of the board of directors, drew sums aggregating $4,700 from the company's treasury. It further charges that Gleaves, acting as a director and in conjunction with other directors, foisted upon the company his stock and procured therefor a price of $5,000. The bill charges that it was illegal for the company to purchase its own stock and that Gleaves should be required to pay the $5,000, with other amounts due the company, back into the treasury.

Tuckett Tobacco Co. Profits

Hamilton, Ont., May 21.—Profits of the Tuckett Tobacco Co. for the year ended March 31 are comparatively little changed from the records of the two preceding years, standing at $250,313 as against $249,934 in 1922 and $255,753 in 1921. Including the credit balance brought forward of $630,968, there is available for dividends and other purposes, $881,178. Out of this sum dividends on preference shares and ordinary shares have been distributed to the amount of $240,000. The credit balance stands at $641,178.

Shown by Balance Sheet

The balance sheet shows further strengthening of the company's position. Inventories have been reduced from $1,213,053 to $999,531. Bills and accounts receivable at $234,470 compared with $298,065 in the previous year's report. Cash is higher at $335,668 as compared with $275,623 and investments are up from $569,150 to $790,606. Bills and accounts payable have been reduced to $106,704, as compared with $142,200. A reserve is provided for dividends payable April 14 last to the amount of $60,000, and a reserve for insurance $20,000.

Linker Cigar Co., Inc.

Louisville, Ky., May 12.—The Linker Cigar Manufacturing Co. has filed articles of incorporation in the office of the County Clerk, fixing the capital stock at $3,000 and a debt limit of $10,000. The incorporators are John A. Hemberger, C. B. Compton and Goodloe O'Neal.

Changing Quarters

Isadore Cohen, packer of Porto Rican tobacco, of 118 Maiden Lane, will remove on June 1 to larger quarters at 147 Water street, first floor, where he will continue to serve his clients to the best advantage. His telephone number, John 0174, will be unchanged.

Foreign Exchange Rates

In the subjoined table the quotation on sterling represents dollars and decimals of a dollar; all others represent cents and decimals of a cent. Quotations preceded by the decimal mark indicate a price measured in fractions of a cent. Parity of exchange is given as reported by the United States Mint, except in countries with a silver standard, where parity fluctuates with the price of silver.

G. M. FIEDLER MFG. COMPANY

332 EAST 47th STREET NEW YORK CITY

American Tobacco Co. B's Yield Attractive

American Tobacco B at 145½, the recent low, was selling 14½ points below s high for the year, though last year as the biggest in its history. Domestic igarette production this year is running 30 per cent ahead of 1922. American Tobacco is a large producer of cigarettes, and, consequently, is sharing in his increased business. Net income after axes and depreciation, but before interest, reached new high of $20,380,840 in 922, topping the 1921 record of $20,068,-74, in a year when there was pronounced depression in most industries, ays the *Wall Street Journal*. On the 12 dividend basis stock yields more than per cent.

Balance after charges and preferred ividends last year was equivalent to 17.49 a share on the $89,586,600 comined common and common B, compared ith $16.84 in 1921.

Percentage of profit last year was 12½ er cent on turnover, a new record compared with 11½ per cent in 1921. There was a slight falling off in dollar amount of sales, but in units and pounds they were the greatest in the company's history. Interest charges were lower, funded debt reduced, and economies effected in management.

Net working capital as of December 31 was $82,632,772, compared with $87,-107,293 in 1921. Although the company retired ahead of maturity $13,334,000 of its 7 per cent notes, leaving no funded debt except $1,600,000 bonds, thereby saving interest charges of $933,000 this year, working capital decreased only $4,474,521.

Current assets included inventories, $73,657,462; government securities, $4,536,638; cash, $7,987,686; bills and accounts receivable, $9,974,663; total, $96,156,449. Current liabilities were: Preferred dividend payable, $790,496; accrued interest, $242,277; accounts and bills payable, $6,925,307; reserve for taxes, etc., $5,565,597; total, $13,523,677.

Inventories were valued at $73,657,462 as of December 31, representing only about one-half annual turnover. As the price of leaf and other raw material used is advancing, inventory position is considered favorable.

Earning record for five years follows:

	Gross	*Net	Divs. paid	Surplus
1922	$143,901,445	$18,075,137	$13,912,515	$4,920,740
1921	155,963,752	18,117,236	13,910,715	4,343,949
1920	143,106,332	14,277,250	†12,558,778	2,592,377
1919	146,024,730	15,922,687	11,210,462	4,762,110
1913	69,517,000	14,490,000	11,220,000	3,270,000

*After expenses, charges and federal taxes.
†Does not include 75 per cent stock dividend.

Consolidated's Net Profits

The Consolidated Cigar Corporation or the first three months of 1923 reports et profits of $154,961 after all expenses nd charges, against $112,545 in the same eriod last year.

Dissolve by Mutual Consent

York, Pa., May 22.—The Kaltreider igar Co., of Red Lion, composed of Valter Kaltreider and C. M. Ehehalt, as by mutual consent dissolved. Mr. altreider will retain the present place business and continue the same firm ame. It has not been learned where Ir. Ehehalt will start in business.

The Cadet Airplane

The airplane of the Manchester Cigar o., Lieutenant Karl S. Ort, the local rman, in charge, left today for Lanster, Reading, Easton, Wilkes-Barre nd Scranton, in which cities he is conucting advertising campaigns for the avana Cadet, the popular 5 cent cigar made in York and Dallastown by the Manchester Co. On May 30 the airplane will go to the Memorial Day aviation meet to be held at Logan Field, Dundalk, near Baltimore, and at which 60 airplanes will fly and a crowd of 20,000 people is expected.

Small Sales at Richmond

Richmond, Va., May 19.—There was a small sale of tobacco at Butler's Warehouse yesterday. Some six or eight lots were disposed of. Prices ranged from 2 to 25 cents a pound. All came from Caroline, except one lot from Louisa. There were 5,105 pounds sold and the average was about 14 cents.

W. S. Hart, the only Louisa man represented, got 7¾ and 10¼ cents for his offering. Joe Beasley, of Caroline, got 12¾, 12, 18, 21 and 25; C. V. Pitts, from 10¼ to 20; Mrs. Carrie Howard, 9¾ to 12¾; C. R. Lewis, 8¼ to 17½ and Raymon Beasley, 10 to 22½.

San Francisco Feels Effects of "Early Spring"

Smokers Hitting Trail to Tall Timber Unusually Early—No Buying in Large Volume for Outing Trips—Unemployment a Discouraging Element—Early Improvement Expected—Trade News and Notes.

SAN FRANCISCO, Cal., May 15.—An unusually early spring has awakened the call of the trail in California much earlier than common. And while not a few buy their box of cigars to take along, there are more who risk going without so many smokes or who cut the cigar allowance to help pay the outing expense. Another thing affecting the cigar trade all over the state is either the voluntary or enforced idleness of more workers than for some time past. The change seems rather sudden, but the causes have been slowly gathering, and the quiet spell will not last.

Watching for Coming Events

One of the largest distributors with branches all over the state, reports that they find a temporary quiet in all sections, San Francisco trade being the best. It is partly perhaps, but the usual pre-summer retrenchment of the retailer, holding his breath as it were to see what will happen.

The strike among the cigar workers of the city has been seemingly settled. The workers of the Potri Cigar Co., have returned to work, after conference with the company. Some others are still out, but more because of slowness of orders, rather than from any strike troubles. The Industrial Relations Association has called a meeting of all the cigar producers, and is seeking to unite on some common basis for mutual protection and for the purpose of avoiding future troubles of the same sort.

Progressing with Production

The factory of Camina, Cortini & Co. has been running continuously, getting out local orders, and the proprietors have enough of their own brand made up, to begin making placements. The few they have made have begun to repeat. They have had no labor difficulties, as they have been paying for their best workers the Union scale, and have not asked whether a worker was Union or not. Being anxious to crowd a first-class article on the market, they are seeking to get the best of help.

Mr. Montgomery, who has been making the North-west for the Golden State Leaf House, reports that the tie-up of the lumber camps has given that country a hard blow, just as it w coming back to old time prosperit David Horn has just returned from t Sacramento and Nevada, and repor trade a little quiet through that territor The big advertised brands he says a proving too strong for the little produce

Blue Boar Getting Good Start

Sam Israel is one of the local jo bers who continues as busy as can b He has built a class of trade that mov right along, strike or no strike; hi prices or low, one season or anothe He reports candies going up. O brand, the Golden Pheasant has rais all along the line. And bulk candi have all been forced to raise. He h had good call for the Blue Boar ciga ette, which has but recently been i troduced. He reports also an advan to $1.53 of the 15-cent sizes of Tuxe 111.

H. L. Judell & Co. are looking qu at home in their new quarters. En Judell is at present making the trade the San Joaquin Valley.

I. Danziger, the representative of t Manila Commercial Co., passed away a local hospital, after a long illness.

The Lucky Strike sky-writing attract considerable curiosity. It was accom anied with much newspaper notice a publicity.

The Don Julian is being given a l advertising stunt in the local dailies.

A New Invention

M. Horn tells of a new invention t is being put over to some extent in city. It is an apparatus that can attached to a taxicab and hands you a cigarette already lighted whenever y want one. No time lost lighting cig ettes in the wind. All that is nee now is a patent smoker, and Dave H says he is going to bring one in to as a tobacco tester.

Anthony's Cigar Store reports a v satisfactory run on the J. M. Marti cigar. The beauty of these are, he s that they give us the margins that oth spend for advertising, so we can aff to push them. He is an advocate of retailer insisting on a part of the mo now spent in pushing brands, or refus to give space of effort to the selling any brand.

Tampa Tidings

TAMPA, Fla., May. 19.—Fernandez Brothers & Co., who have been temporarly located at the corner of Henderson and Tampa streets, have moved into permanent quarters northwest of 14th avenue and 17th street. When necessary remodeling is completed they will have one of the most commodious, up-to-date factory buildings in Tampa.

Morris Scadron, whose headquarters is in New York, notwithstanding our recent item locating him in Brooklyn, left this week for New York. He returns to Tampa in about two weeks to complete the settling of his factory in the new quarters.

M. J. Bloom of M. J. Bloom & Son, prominent leaf dealers of New York City, is making the rounds in Tampa with Frank Rodriquez who represents his firm locally. Mr. Bloom returns to New York this week.

Frank Rodriquez, well known leaf dealer, and local representative of M. J. Bloom & Son of New York, continues to maintain his offices at 2005 Mitchell street. This to correct our report that he had removed to Corner Henderson and Nebraska avenues.

The Pacific Coast continues to be kind to the Henrique Cigar Co., and Meyer Abraham keeps the orders coming across. Riese Bros., 611 Sansom street, San Francisco, has contracted for Caruso in tins. And Peter N. Jocoy, 3 Washington street, Spokane, Wash., is to distribute a full line of Don Casa and Unison. The Caruso is put up especially for Riese Bros.

Making Good Showing

Garcia & Vega are not suffering from the prevailing clear Havana trade depression. S. Humbird states that sales to date this year considerably exceeds the same period of 1922, and he believes the year will show a gain over any previous year.

Jorge Leon sailed last Sunday for Havana to pick out a supply of leaf. His absence will be brief. Secretary Rollins reports rapidly increasing sales "all over," and especially in Atlanta where they far exceed their previous expectation.

Geo. W. Shuey of the Tobacco Bug Exterminator Service, is in Cincinnati, called there through illness in his family. In the meantime Secretary Kindrell is looking after their Tampa Service. Salvadore V. M. Ybor, their representative in Cuba, is expected in Tampa soon.

The Miami Maid Cigar Co. is to apply for a charter shortly. The charter sought provides that they may not only manufacture, but buy, sell and trade in tobacco products and accessories. The authorized capital stock is fixed at $10,000. fully paid. The officers are to be W. C. Neal, President and Treasurer; A. W. Neal, Vice-President; A. Aurelio Torres, Secretary. These also to compose the Board of Directors. The principal office of this corporation is to be located in the city of Miami, Fla.

Hav-a-Tampa Cigars at Southern Products Dinner Today

Tampa's contribution to the "Southern Products," dinner to be served at the annual convention of the Southern Commercial Secretaries' Association to be held in Memphis next week, will be Hav-a-Tampa cigars, manufactured by the Hav-a-Tampa cigar factory here.

The dinner will be held on May 24, and Secretary L. P. Dickie of the local board of trade will attend.

That "Good Nickel Cigar"

WASHINGTON, D. C., May 16.—Laid end to end, the cigarettes manufactured in the United States during the first three months of this year would encircle the earth about twenty-six times, or 650,000 miles, the third national convention of the Tobacco Merchants' Association in session here was told today. Within the last decade the consumption of cigarettes has increased by 40,000,000,000. The annual cigar production is more than 7,000,000,000.

Former Vice-President Marshall's search for a "good nickel cigar" is soon to be rewarded, said Jesse A. Bloch, president of the association, provided the next Congress receives favorably the movement for a reduction in tobacco taxes. Before the war, it was stated, 60 per cent of the cigar sales were of the five-cent variety.

Rohlin's Pipe Cases Popular

Grosvenor, Nicholas & Co., Inc., are experiencing a great demand for Rohlin's Patent Pipe cases, and are now receiving regular shipments of this useful article, which they are able to supply in any size, shape, or quantity.

To Visit Quaker City

Herbert Holzman, of Strouse & Holzman, is planning a short trip to Philadelphia next week.

CIGAR MANUFACTURERS ASSOCIATION OF TAMPA

Comprises All of the Leading and Representative Cigar Manufacturers in Tampa, Uniting in the Three-Fold Effort of:—

1st—Benefiting our members.

2nd—Maintaining the high standard of "Tampa" workmanship by seeing that our labor is justly treated.

3rd—Protecting the *dealer* and the *consumer* against unscrupulous methods of others by issuing to our Members the following "Identification" stamp:—

This stamp, on each box, is your guarantee that the goods are manufactured in Tampa—of "Tampa" Quality and Workmanship.

DEMAND IT

CAUTION

THE LA ROSA DE PARIS CIGARS are not genuine unless our name (Starlight Bros.) is printed on the labels attached to the inside of the box. Every box bears our name in order to protect smokers against unscrupulous sellers who are trying to supplant the well-known LA ROSA DE PARIS CIGARS by inferior goods.

Key West Key Notes

KEY WEST, Fla., May 19.—The E. H. Gato Cigar Co. is working the same number of workmen as reported last week.

Mi Favorita experiences a shortage of high-class workmen. This might be also stated of several of the factories. The Cortez Cigar Co. continues to keep up with the orders received, and the concensus of opinion is that the tobacco trade will receive a new impetus within a month. Then it is expected that the orders will be larger in anticipation of the Fall trade.

The Manufacturers' Association met in the E. H. Gato Cigar Co.'s office recently to confer with the cigarmakers' regulating committee on the sizes of new cigars to be placed on the market in the near future. The matter was settled to the satisfaction of both the manufacturers and the cigarmakers' representatives.

Factories Keeping Busy

The Consolidated is another of our factories working the same number of men as when reported last. Thompson & Co. continue to make large shipments twice weekly. The R. Lopez Trujillo factory has been kept busy since the first of the year handling the orders received by the firm. The Havana American is another factory which keeps a number of high-class workmen constantly engaged.

The first anniversary of the John Wardlow factory was celebrated this week when the management served light refreshments to the force. This factory has kept a number of cigarmakers employed since the factory opened a year ago, and has steadily increased the force until there are at present employed about five times the original number of workmen.

For many years the greatest amount of revenue received by the Treasury Department from this port was that received from the importations of tobacco, but at present the greatest amount of revenue comes to the government from the pineapples received here from Cuba.

William Gandolfo, well known to the cigar trade, has been appointed by Chief of Police Gardner to succeed William Richardson as a policeman of this city.

The Peninsular and Occidental steamship company offered excursion rates to Cuba, for the celebration of Cuban liberty, May 20. Many Key Westers took advantage of the low rates and crossed the gulf.

Watson's British Quotations and Market Review

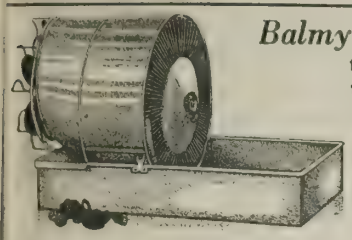
Market Review

As generally anticipated, no change was made in existing rates of duty.

A serious outbreak of fire at the London Tobacco warehouse tends to increase interest in all growths, and will no doubt have an effect when official details of losses are published.

Business during April has been transacted on fair sized parcels of Westerns and Virginias, and increased activity was noticed on Empire and Oriental growths.

Reports from U. S. A. indicate good conditions for planting, but a large crop is not anticipated owing to labour conditions and the high price ruling for cotton. The American markets continue strong and dealers are bare of old stocks.



Big Transaction Reported

Antonio Allones, the Havana cigar manufacturer, was recently in New York, and is reported to have transacted considerable business with local interests.

All "CHARLES DENBY" and "LA FENDRICH" cigars, strictly hand made, are manufactured in this ONE factory, under ONE management—under ONE supervision thus always insuring that ONE dependable quality.

H. FENDRICH (Incorporated)

The Irish Free State Customs Duties

The new Customs arrangement of the ish Free State are working smoothly. Manufacturers, traders, exporters and imorters have come to have such a knowlge of the requirements of the new situaon that matters are now easily managed. first there was uneasiness, anxiety confusion, but everyone now knows ere he stands. It is evident by now t the new duties will prejudice the itish trade and help the Irish trade. An Irish tobacco manufacturers' agent oks that the Customs duties should be means of giving increased employnt in the Free State. Of late years had become the habit, especially of men smokers, to send to English shopers for cigarettes and other goods. Vith the Customs tariff it would now ost more to buy in England than it ould to buy at home, as they would be liged to go to the inconvenience and ense of clearing the goods at the Customs port of entry and pay the regua clearing charge. There was no doubt t this practice would now largely be ontinued.

Effect of the New Duty

The immediate effect of the new duty s been a substantial increase in the and for Irish brands of cigarettes. J. Kelly, tobacconist, Dublin, thinks there great future in the Free State for sh-made cigarettes, if only the manufacturers avail themselves of the opportunity. The public (he said) were rather displussed by the increase being put on quickly on imported brands, but the remained that in circulars dated rch 31 manufacturers who were members of the Imperial Tobacco Company, notified retailers in the Free State he advance in prices, and intimated any order they had on hand would cancelled unless confirmed at the new es. He believed that within five s tobacco would be marketed from cured in Ireland, grown from the saved in this country, and that it ld be equal to the best imported ish or Virginian leaves.

Extra Workers Required

The managers of two Dublin firms of cco manufacturers have intimated they have arranged to increase their s and enlarge their plants to deal with the additional business which they anticipate. They point out that the business done by British firms run into something between £2,000,000 and £3,000,000 per annum. To hold their trade they would be obliged to build and equip factories in Ireland. Their presence here could scarcely place the home manufacturer in a less advantageous position than he holds at present. They assert that the new order will be a benefit to the industry, the worker employed in it, and to the smoking public. Increased skill must go hand in hand with increased production. The popular British cigarette now selling at 1s. will probably go up in price to 1s. 3d. or 1s. 4d., and competition with the 1s. production of equal quality in Ireland will be difficult, if not impossible. Four or five thousand extra workers will be required by tobacco manufacturers alone, while engineering firms, paper manufacturers and other industries would similarly benefit by increased trade.—*London Tobacco Trade Review.*

Optimo Cigar Popular

The B. Wasserman Co., of 77 Chambers street, distributors of Optimo cigars, manufactured by A. Santaella & Co., of Tampa, Florida, are experiencing a big demand for this popular high-grade brand.

Connecticut Notes

HARTFORD, Conn., May 19.—The tobacco plants are making very slow progress, although occasionally we hear of a lucky grower whose plants are nearly ready to transplant. Next week, some setting will likely be done, but setting in general will not start for another week or two.

Growers have been crowding their plowing, and in many cases the land is ready for fertilizing, so that when the plants do get big enough, the work of transplanting will not be held up. A few growers are still assorting, and this work seriously handicaps them.

The Connecticut Valley Tobacco Association is still receiving stray crops to pack, and this work will probably drag along for some time to come. They have practically cleaned up the sale of the Havana seed tobacco, and are now offering Broadleaf broken seconds to the trade, as this grade was put into the sweat rooms and a large portion of it is now ready for the market. Primed Havana seed and some shade is also ready. Notices have been sent out to members that the annual election of a Board of Directors for the Association will be completed in June, and an election committee consisting of N. D. Prince of Hartford; H. M. Alcorn of Suffield and E. C. Hills of Southwick, Mass., has sent out a list of all the members in each district to the members, as an official primary ballot, asking each member to make a proper return of this ballot, with the name of the member who is his choice for the office of director, to represent his district during the coming year. The names of the three candidates named in this primary, receiving the highest vote will be sent to the members to make the choice of one. E. E. King of East Hartford, has been asked to co-operate with the election committee, and the first ballots are to be returned to him by mail.

E. C. Meyers & Son of Broad Brook, Conn., are to grow about 90 acres this season for the American Sumatra Tobacco Co.. The type will be Broadleaf and setting will be started within the next few days.

E. Wever of West Suffield, will raise a large acreage of Broadleaf for Keiser & Boasberg, of Buffalo, N. Y.—X. Y. Z.

Big Cigar Stand Chain

It is reported, on reliable authority, that Faber, Coe & Gregg will, in the near future, control or operate approximately five hundred cigar stands. One of the most recent acquisitions to the chain is that of the cigar stand at the Wisconsin Club, Milwaukee. This up-to-date organization is also operating more than twenty National Drug Store cigar stands.

Salesmen Indorse Fair Trade League Work

The Tobacco Salesmen's Association of America, New York Branch, has officially gone on record as favoring fair trade practices. Leo Rieders, secretary, has just forwarded to the American Fair Trade League, the following note and accompanying resolutions:

"It might interest you to know that at the last meeting of the Tobacco Salesmen's Association of America, Inc., New York Branch, held at the Hotel Pennsylvania, May 11, 1923, the following resolution was unanimously adopted:

Resolution Concerning True Representation of Merchandise

"Whereas, it has been brought to the attention of the Tobacco Salesmen's Association of America, Inc., that the trade interpretation and the legal interpretation of trade terms, like mild Havana, differ; and

"Whereas, it is common knowledge that cigars have in many cases been either intentionally or otherwise improperly marked on the labels; and

"Whereas, the American Fair Trade League is rendering both a public service as well as helping clean this industry from abuses due to improper representation by its unerring effort toward compelling cigar manufacturers to properly label merchandise, be it, therefore

"Resolved, that the Tobacco Salesmen's Association of America, New York Branch, heartily endorse the splendid work being rendered by the American Fair Trade League in making the cigar industry truly represent merchandise, and also be it

"Resolved, that the members of this organization co-operate with the American Fair Trade League in helping disseminate the legal interpretation of trade terms and sell merchandise in accordance with this latter point in mind, and also be it further

"Resolved, that a copy of this resolution be sent to the American Fair Trade League."

A Change of Owners

HOWARD CITY, Mich., May 12.—James Sicklesteel has sold his cigar business, etc., to Anthony Krentz.

Dispose of Business

HILLSDALE, Mich., May. 12.—Woodruff Bros. have disposed of their cigar and restaurant business to George Day.

Virginia Tobacco Sales

LYNCHBURG, Va., May 19.—The 1922 tobacco crop brought Virginia growers approximately $42,000,000 according to the final report for the season of the Virginia Crop Reporting Service, which is based upon the warehouse reports to the Commissioner of Agriculture. The amount received for the 1922 tobacco has only been surpassed three times during the history of tobacco growing in the state, and these years came during and immediately following the recent war when prices were highest. The 1921 crop was valued at $19,000,000.

There were 52,118,564 pounds of bright and 27,017,453 pounds of dark tobacco sold on the open markets during the past season. The average price for the season was $29.31 per hundred for bright which compared with $20.14 for the 1921-22 season and $23.11 for the 1920-21 season. Dark tobacco average was $18.81 per hundred against $18.66 last year and $9.88 two years ago.

There were 43 warehouses operating during the past season compared with 82 during the previous season. The warehousemen estimated that the tobacco graded 36 per cent good, 36 per cent medium and 28 per cent common, while last year the grades were 22 per cent good, 35 per cent medium and 43 per cent common.

Sales in April were very light as only 327,624 pounds were sold, all of which was dark tobacco. All markets have closed except Richmond.

No accurate figures of tobacco sold through the Tobacco Growers Co-operative Association have yet become available, so far as the report shows.

First hand sales of dark tobacco, by warehouses, was as follows up to May 1 with average price for the season:

	Pounds	Aver.
Lynchburg	9,017,606	$20.87
Amelia	789,199	19.14
Bedford	2,243,003	21.18
Blackstone	2,202,235	16.39
Brookneal	136,454	19.02
Dillwyn	1,133,352	18.36
Drakes Branch	1,408,655	23.67
Farmville	3,662,545	19.59
Petersburg	1,706,494	14.80
Richmond	4,717,910	14.27
Total	27,017,453	$18.81

It will be seen from the above figures that Lynchburg sold more than a third of the dark crop handled by the open warehouses of the state. It will also be noted that the seasonal average price was only exceeded by two warehouses, Bedford and Drakes Branch. The average price paid here was above the seasonal average for the state. Richmond paid the lowest price.

Total sales and price averages for the bright crop follow:

	Pounds	Aver
Abingdon	1,322,440	$26.5
Brookneal	493,925	30.7
Chase City	3,636,195	27.5
Clarksville	1,192,531	26.8
Danville	22,305,647	31.8
Kendridge	2,190,044	27.2
Lawrenceville	900,488	26.9
Lynchburg	15,400	32.0
Martinsville	2,351,276	23.9
Petersburg	4,105,563	26.8
Rocky Mount	819,687	21.9
South Boston	7,351,723	30.5
South Hill	5,433,645	25.7
Total	52,118,564	$29.3

Resales of the dark crop totaled 1,010,656 pounds and of the bright crop 7,089,518 pounds.

Co-ops Win Jury Cases

RALEIGH, N. C., May 21.—The Tobacco Growers' Co-operative Association within a period of ten days recently won two important legal victories in its first cases before Virginia juries.

The first case of the tobacco co-operative to be tried before a jury resulted in a victory only second in importance to the recent decision of the North Carolina Supreme Court upholding the contract of the association. In this case before Judge Hundley at Charlotte C. H., the association was awarded liquidated damages at 5c per pound, attorneys' fees and court costs for tobacco grown by a non-member minor son of a member of the association which was delivered on the auction floors.

In holding a member of the association liable for tobacco grown by a non-member, the court, in this first jury trial this month, strengthened the position taken by association officials that every pound of tobacco grown upon a member's land, whether he has tenants or share croppers, or whether he makes his own crop in 1923, shall be delivered to the association.

A still more striking victory was won by the tobacco co-operative before a Virginia jury last week at Rustburg, Campbell County, Va., in its case against V. W. Martin, when Judge Barksdale ruled that the taking of the defendant tobacco by a sheriff on levy was no defense against his obligation to deliver

the association. Judge Barksdale also ruled that the defendant was liable for damages on tobacco grown by his wife and minor children when it was delivered outside the co-operative association, in violation of the contract. The jury rendered a verdict for the association of $70 in liquidated damages and $75 in counsels' fees.

Major W. T. Joyner, Assistant Counsel of the association, from Raleigh, N. C., represented it in both of these important cases, which give legal backing to the announcement made last year by directors of the tobacco co-operative that they would expect delivery to the association of all tobacco grown upon the lands of its members in 1923.

New Members in South Carolina

Many new members from South Carolina are joining the Tobacco Growers' Co-operative Association, according to E. C. Epps, director at large for that State and C. O. Dixon, manager of warehouses for the South Carolina belt. Over a hundred contracts were signed in Williamsburg and Horry Counties, alone during a recent membership drive.

Deliveries to the co-operative floors of more than half the crop from the Palmetto State are looked for in 1923 by association officials.

The case of the association against G. R. Bowen of Lake City is expected to come to trial in the Florence County Court this week. W. T. Joyner of Raleigh and F. M. Wilcox of Florence will represent the co-operative in this, its first case in a South Carolina Court.—S. D. RISSELL.

Season Practically Over

RICHMOND, Va., May 19.—Only one warehouse had a single sale this week; and that only one day, when 5,105 pounds were sold at average of $13.76 per hundred. We shall discontinue reports of weekly sales until next season, unless something of interest to the trade occurs.

A general comment on this crop of sun-cured tobacco might be summarized in saying that there has always been a steady demand for all grades of sound tobacco regardless of quality; and, although about one-third of the crop was damaged, the prices held up very well.

We do not know either the quantity or the grades of the tobacco held by The Farmer's Co-operative Association.—R. L. MORTON & Co.

Plant Shortage Still Acute

DANVILLE, Va., May 21.—The scarcity of tobacco plants continues to be complained of by the tobacco growers of this section and it is now apparent that the crop will be below anticipations and a good deal later than usual, owing to the prevalence of cold nights and high winds which have had a tendency to hunt the growth of the plants.

An incident which gives color to this reported plant shortage comes from the northern part of the county, a Baptist minister being authority for the story. A large landowner who has had better success in raising plants than some of his neighbors has been offered the sum of $1,000 cash by a group of farmers for one of his larger plantbeds. It has been invariably the custom for farmers blessed with abundance of plants to give them to farmers who suffered from a shortage, with never a thought to pecuniary recompense for them.

A large area of land has been prepared for planting but little has yet been done as the plants appear still to be too fragile, though warmer weather recently has helped them. Tobacco flies are reported to have done considerable damage.—TETLEY.

Reynolds Tobacco Stocks Holding Well

Action of R. J. Reynolds B shares, which hold within less than three points of their record high despite general reactionary tendency in the stock market, indicates they are discounting expectations of some favorable developments when the directors meet for dividend action within the next two weeks.

Business and earnings furnish the basis for such expectations. Reynolds is doing a tremendous business, and with production at peak, earning power shows even greater expansion. It is only natural that with volume operations earnings should show a relatively larger increase because with increased turnover there is no change in overhead. It is estimated current earnings are running well ahead of 1922, when net after taxes and charges amounted to $20,479,234, the largest shown by any domestic company in the history of the tobacco industry, which was equivalent after preferred dividends to $5.96 a share on the 3,200,000 shares of common and common B.

At present rate of $3 a share, common dividends call for the distribution of $9,600,000 annually. It has always been the policy of the Reynolds management to put back into property from earnings an amount equivalent to that distributed in common dividends. At the rate earnings are increasing, it is felt the management could be more generous with the holders of the junior shares without relinquishing this policy.

At current levels, the shares are selling to yield approximately 4½%, plainly indicating that the investment community expects that increased return to shareholders is not far distant. The strong financial position strengthens such expectation.

Net working capital, as of December 31, 1922, was $88,161,628, compared with $74,874,069 in 1921. Cash was $11,292,332. Investments in non-competitive companies of $2,311,701 and other accounts and notes receivable of $3,696,789 are excluded from current assets.—*Wall Street Journal.*

approximately $50,000,000, is pending. John W. Watson, Jr., vice-president of the International Agricultural Corporation, which, with the Davison Chemical Co. is expected to form the nucleus of the consolidation, said recently that plans for bringing other companies into the combine are being discussed in the belief that present conditions in the industry afford an excellent opportunity to bring them together under one management.

It was stated that neither the American Agricultural Chemical Co. nor the Virginia-Carolina Chemical will be included in the projected amalgamation. The independents named as likely to enter the merger along with International Agricultural and Davison Chemical are the Phosphate Mining Co., the Standard Acid Phosphate Co., of Baltimore; the Federal Chemical Co., Louisville, and the Reed interests, of that city. It also was reported in the financial district that the fertilizer department of Swift & Co. has been approached.

The purpose of the proposed merger, according to the promoters, is to stabilize the fertilizer industry, which, despite prosperity in other lines of business, is not operating on a profitable basis. This has been reflected in recent weakness of the securities of the fertilizer companies.

The International Agricultural Chemical Corporation owns extensive deposits of phosphate rock in Florida, while the Davison Chemical is an important producer of sulphuric acid. These are the two chief ingredients of artificial fertilizer.

The former company has outstanding $13,055,500 preferred stock and $7,260,000 common. Out of a total authorized capital of 235,000 shares, no par, Davison Chemical has 218,700 shares outstanding.

To Study Cultivation and Train Specialists

WASHINGTON, D. C., May 19.—The following report has been received by the Department of Commerce from Athens in connection with the proposal of American tobacco interests in Greece for the establishment of an industrial institute for the training of tobacco specialists:

"A group of American tobacco m chants, in conjunction with certain of tobacco producers' associations, has s mitted to the Ministry of Agricultu proposition regarding the establishm of an Industrial Institute for the st of tobacco cultivation and for the tr ing of tobacco specialists. The Am can group proposes to expend 3,000 drachmas on this venture, and requ that the government turn over to it stremmata (1 stremma equals .247 ac upon which the Institute may be structed. It proposes to locate the stitute at Drama in Macedonia, and devote its attention to the study of v ous grades and qualities of tobacco, m ods of imitating Macedonian tobacc the higher grade, the problem of incr ing Greek tobacco production, and training of experts in tobacco grow The tobacco trade, as well as var methods of manufacturing tobacco p ucts, will also be studied according the proposed project.

"The Ministry of Agriculture has yet given its consent to the proposal regard to the granting by the gov ment of 300 stremmata for the foun of the desired Institute, but has pressed its approval of the principle gested."—LAMM.

Leaf Tobacco Export

Annual exports of domestic leaf bacco for five years, 1918-1922, inclu have been 42 per cent of production. partment of Commerce says this exp tion can be increased, and less need through the hands of foreign i mediaries. Exporters have devel valuable direct connections in S dinavia, Czechoslovakia and Poland, the new Irish tariff is likely to c large exports of leaf directly to country instead of through En agents, as formerly. Tobacco comp 8 per cent of exports in recent y and is expected to show an increase.

Importation of cigarettes by C since prohibition of opium has beer creasing. American tobacco is very ular in South America, particularl

Paducah Prospects

PADUCAH, Ky., May 19.—There has been a steady movement of loose tobacco all the week to the association receiving houses, and while deliveries have not been as heavy as previously they have kept up well. Weather conditions being favorable has given farmers good opportunity to get their tobacco ready for delivery, and indications are that the greater part of the crop will be delivered by June 1. condition of the tobacco generally is g the greater part of it running on the side.

The sales on the loose floors and wa markets have amounted to very little, the auction sales will close after n week. This means that all the indepe ent stocks have been disposed of.

The association have been busy deliv ing on contracts also with prizing th

nsold stocks and getting them ready for ie hogshead market. They will be busy r sometime to come with this work, ft no doubt they will be through with is by mid-summer or earlier. Just what eir policies will be in selling their hogsad tobacco remains to be seen.

The weather for the past two weeks ls been unfavorable for doing farm ork, and farmers are very much behind. ery little tobacco land has been gotten ady for planting. Plants are growing pidly. No doubt with a few days of ying weather the greater part of the ound intended for tobacco will be prered and planted, but farmers are not rough with corn planting and will have e hay and wheat harvest on them all at ce, and make it difficult for them to tch up with all of their work. This ndition will have a tendency to curtail e tobacco acreage, but with favorable nditions from now on no doubt a full reage will be gotten out.—W. B. KENDY.

New Lovell-Buffington Corporation

COVINGTON, Ky., May 19.—Articles of corporation have been filed with the Kenton County Clerk, by the Lovell-Buffington Tobacco Co. A firm with this name was established in Covington in 1865. Although neither the Lovell or Buffington interests are connected with the new company, that company has decided to revive all their old brands of smoking tobacco.

The company is incorporated at $500,000, for which 5,000 shares of preferred stock at $100 a share have been issued.

The incorporators are: J. A. Bownard and B. F. Davidson of Covington, Walter J. Friedlander of Cincinnati and Charles E. Beury of Philadelphia. They and Attorney Herbert Jackson will form the Board of Directors.

The original Lovell-Buffington Company sold out to the Frischmuth Bros. Company last August for $600,000 and received stock in the new company. When the Frischmuth Company went into bankruptcy recently they sold out to the new company for $250,000.

Hopkinsville Sales Slacken

HOPKINSVILLE, Ky., May 20.—The loose floor tobacco market for the selling of unpooled tobacco, was very quiet the last week. Receipts have dwindled to a low point and will not show much improvement. Receipts by the Dark Tobacco Growers Co-operative association have also showed a big decline.

Sales on the loose floors for the past week were 68,030 pounds, which brought an average of $13.40, or 74c better than the preceding week. For the same week a year ago, the average was $11.96.

For the season to date, loose floor sales total 13,816,760 pounds, with the average $14.56. For the same period last year, sales were 19,892,845 pounds and the average was $14.60.

Prices for the week were easy at following range: Trash, $3 to $5. Lugs, common, $5 to $7; medium, $7 to $9; good, $9 to $12; fine, $12 to $16. Leaf, low, $10 to $12; common, $12 to $20; medium, $20 to $25. No good or fine leaf offered.

Transplanting Started

The pitching of the new crop has gotten under way and considerable planting has been done. Many farmers haven't yet been able to prepare their land fully, but wherever a field was ready and the plants were large enough, the farmers have taken full advantage of the recent favorable season for transplanting. At least one man reports he has his entire crop of eighteen acres now on the hill. The cool weather, with frequent showers, have made a fine planting season.

All sorts of urging has been done by dealers, warehousemen, the Dark Tobacco Growers Co-operative association and the state agricultural bureau and departments of markets in the effort to get the farmers to reduce their acreage this year, and certainly not to increase it. These arguments have presented to the farmer the absolute certainty that an increased acreage this year meant lower prices. Instead the growers are being besought to plant only what acreage they are sure they can adequately take care of, and to strive for quality and not quantity. It yet remains to be seen whether they heed this advice or not.—M. E. BACON.

Clarksville Average, $14.31

CLARKSVILLE, Tenn., May 19.—Sales on the Clarksville loose leaf tobacco market this week aggregated 127,100 pounds. Sales for the season total 8,647,735 pounds. Sales to same date last season, 12,328,735 pounds. Average price this week, $14.31. Average for this season, $14.58. Average price to same period last season, $15.88.—J. F. SMITH, Supervisor.

Women Show Considerable Enthusiasm

LEXINGTON, Ky., May 19.—Fifteen hundred women of the Burley tobacco district have joined with their husbands and brothers in community locals or have become members of the women's auxiliaries, with the purpose of promoting the strength of the Burley Tobacco Growers' Co-operative Associations and for the development of activities for community improvement, according to a statement made today by Miss Verna Elsinger, director of social service of the Burley co-operative.

As a result of the work of these women and their local meetings many new members of the burley association have been secured, after the men had failed to obtain their signatures to the association contract. Work of organizing the women so far has been confined to the counties of Carroll and Harrison, where community locals of both women and men, or women's auxiliaries alone, have been organized. Miss Elsinger declared that she was greatly pleased with the interest manifested by the women and their zeal for the continued success of the burley co-operative.

As an example of the interest manifested by the women 350 of them attended a meeting at Easterday, Carroll County, the past week and 150 were present at a meeting in Breckinridge, Harrison County.

Features of these meetings are entertainment and refreshments provided by the women of the community.

At a meeting at Carrollton today plans were made for a Fourth of July rally at which each of the country locals will put on a "stunt" and a prize will be given to the local which puts on the best stunt, in the opinion of the judges.

Carroll County also is to have a Baby Welfare Week, with baby clinics, for which the State Board of Health will furnish the physicians, co-operating with the women's locals, the week beginning June 4.

Harrison County men and women will stage a pageant July 5, in which the history and development of the tobacco plant and the tobacco industry will be depicted, from the times of the early colonists to the present day period, including the operations of the co-operative marketing.

Henry County women will begin their organization of women's auxiliaries Saturday, June 2, with a meeting at New Castle, which will be addressed by Miss Elsinger and Director H. K. Bourne. Henry County is one of the strongest association counties in the district and there are not to exceed a hundred growers outside the association in that county.

Every home in the burley district is to be visited by the women's organizers before the end of the campaign and officials of the burley co-operative expect the most valuable results from the work of the women. Each family made welcome at the local meetings and the county meetings to be held once a month or oftener are expected to maintain the interest at the topmost point throughout the year.

Hopkinsville Average, $13.4

HOPKINSVILLE, Ky., May 19.—To sales for the week, 68,030 pounds; average price per 100 pounds, $13.40. S to date of 1922 crop, 13,816,760 pound average price per 100 pounds, $14. Sold to same time last year, 19,892,8 pounds; average price per 100 poun $14.60. J. W. HANCOCK, President H kinsville Tobacco Board of Trade.

Sue More Burley Member

LEXINGTON, Ky., May 21.—Su against eight tobacco growers for a t of more than $2,000, besides expenses court costs were filed today by the B ley Tobacco Growers' Co-operative A

The petition of the co-operative sta in each case, that the defendant has vi ted his contract to market his crop w the association by selling it over lo leaf floors.

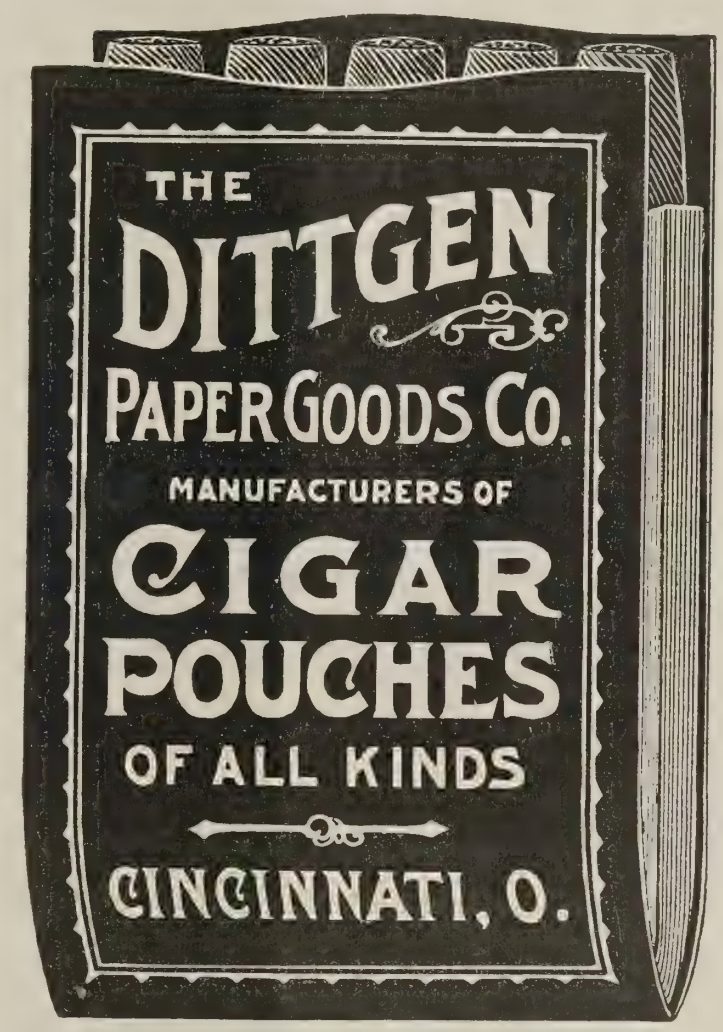
Ires. Wm. F. Bradshaw Reviews Co-operative

Bowling Green, Ky., May 15.— In aspeech at a "Pay Day" meeting here tlay, William F. Bradshaw, president n the Dark Tobacco Growers Co-opeutive Association of Kentucky and Innessee, said in part:

'The first and organization meeting o directors of the Dark Tobacco Grows' Co-operative Association was held a Hopkinsville, Ky., on the 22nd day of Nvember, 1922. The membership camgn and census of acreage disclosed t we had nearly 57,000 members; an eage of about 258,000 and an expected p at that time of approximately 200,-0,000 pounds, figuring an average of 0 pounds to the acre. As it was aldy late in the season it was necessary build up the organization with great ed in order to meet the spirit of imience that was already becoming evint among the members. It was nned to make an advance of from 40 50 per cent on the grade values of acco as received from members and order to do this it was necessary borrow money as the association no funds and no property except mbership contracts, under the terms of ich each member was to pay a $5 mbership fee to be deducted from his acco as and when delivered. In or- to carry on the preliminary work ing the period between the organizaih meeting and the beginning of reots of tobacco, it was necessary to e money to carry expenditures that to be paid at that time. A temporary nce committee had been appointed ore the organization meeting and this mmittee had corresponded with all ks within the tobacco district and l made numerous visits to banks Louisville and St. Louis outside district. A credit of about $2,-,000 had been obtained from country ks within the district; credit of over million dollars from banks in Louisle; $450,000 from banks in Nashville $500,000 from one bank in St. Louis, that the association had commitments about $4,250,000 direct credits and rtly after obtained from the War ance Corporation a credit of $7,500,- and arranged with various larger ks to re-discount association paper the country banks in the aggregate several million. All of these credits, ever, were to be extended upon to- as and when received; to meet the ense a number of banks agreed to an aggregate of about $250,000 in ll loans on the pledge of the membership contracts; this constituted the financial set-up accomplished during the period before the first receiving station was opened. In the meantime, a survey of warehouse properties disclosed the fact that the association would have to acquire by purchase or by rental 119 properties as receiving stations, hanging houses for air drying, steam re-drying plants, prizeries, storage warehouses and rehandling houses. This the Warehouse Division accomplished and had the first house ready for business on the 8th day of January, 1923; it was necessary for the Warehouse Division also to employ the personnel of the warehouses, including warehousemen, weighers and check-out men, as well as employ assistant warehousemen who are associated with the Warehouse Division in the management of the business of that division. All of this was done within the forty-six-day period stated.

Grading Division



"A Grading Division was created with the Chief Grader and an Associate Grader and it was necessary for them under the direction of the board to employ graders for each of the receiving stations in time for the receipt of the crop; this was done and every house was manned with as competent graders as could be procured.

The Division of Management which had charge of sales was created and assistant managers were employed to supervise the four sub-pools of the organization and assist in the selling of tobaccos.

"An Accounting Division was created, of which the secretary was the head of the division, with an assistant secretary, and it was the duty of that division to devise and install a system adequate for the requirements of the organization; to employ competent accountants and bookkeepers for the executive office in Hopkinsville and competent bookkeepers and accountants in the various stations and to procure supplies and stationery for the executive office and all of the receiving stations; the Accounting Division devised and installed its system, placed contracts with one of the largest printing houses in Kentucky and within three weeks from the time the Accounting Division started on its work had the first carload of forms shipped to the executive offices in Hopkinsville, and this was quickly followed by several other carloads of stationery and supplies, all delivered in time for opening of the warehouses. This large printing establishment turned practically its entire equipment for the expeditious supplying of the requirements of this association. It

Open Territory Assigned to Jobbers Only.

THE JOHN C. GUY CO., Inc., Lexington, Kentucky

PORTO RICAN

—the tobacco inevitable to a good Mild Cigar

Manufacturers who have been the most successful in "getting a run" on certain brands of cigars are those who have produced a cigar that is mild to the taste, free in its burning qualities and at the same time fragrant in aroma.

No tobacco in the world combines all these requisites *to a good mild cigar* in so marked a degree as Porto Rican. In fact, much of the popularity attained by the "Mild Havanas" is attributable to the ideal blending of Porto Rican Tobacco in the filler.

"A WORD TO THE WISE"

Cigar Manufacturer should be sufficient. If you are not using Porto Rican Tobacco at present, try it, and see if your customers are not better satisfied. But—

BE SURE YOU GET PORTO RICAN

There is no excuse for paying for something you do not get. By means of stamps of various colors the Government of Porto Rico CLASSIFIES all Tobacco exported from that Island either in the leaf or as cigars, as follows:

CIGARS:

WHITE—Manufactured in P. R. with Tobacco produced in P. R.

BLUE—Manufactured in P. R. with Porto Rican and other tobacco.

PINK—Manufactured in P. R. with tobacco not a product of P. R.

TOBACCO:

WHITE—Genuine Porto Rican growth.

BLUE—Mixture of tobacco grown in P. R. and other countries.

PINK—Tobacco of foreign growth.

Chicago Seeing "Signs" of Cigar Trade Activity

Smoke Emporiums and Drug Shops Covered With Alluring Announcements Setting Forth Merits of Various Brands—News Notes, Comings and Goings.

CHICAGO, May 12.—All the cigar and drug store fronts are covered with cigar signs these days. Under the bottom of all windows and across the top of the stores are signs featuring San Felice, Robert Bacon, La Palina, El Verso and Carles Denby cigars. Never were so many cigar signs shown as are on display here now. It seems as though the cigar manufacturers are spending all their money for signs. Space is hard to find now, so the dealers will get a rest for a while.

Eli Hammer has arrived for Coral-Modiska Co. He sure is booking some nice orders for Lucius, Bering, La Duse and other brands made by his house.

John Rockpany, of the Trans-Pacific Trading Co., 180 North Market street, stopped in to say that Don Julian cigars are great wherever they are placed. John Greer lets up and has placed the Don Julian kits that sell 4 for 25 cents on all the counters in the Loop.

Don Frame of Stephano Bros. has returned from the Twin Cities, where he had much success in booking orders for Meneses cigarettes.

Muriel Campaign

Haber, Coe & Gregg are about to start a large advertising campaign on the Muriel cigar. Newspapers, window displays and the billboards will be used. The campaign is to last for the balance of the year.

H. P. Oakes is back at Chicago headquarters after a trip to the Northwest for the E. H. Gato Cigar Co. He reports that business is showing considerable improvement.

John Ruskin cigars are in the limelight now more. Large newspaper ads of this "Best and Biggest" cigar are shown in all Chicago newspapers.

Makes Good Report

Frank M. Lopez came in from the Northwest and leaves in a few days for the East. He reports very good orders for the Garcia & Vega brands from all his customers.

General Manager Foley of F. Lozano, Cia & Co., of Tampa, was a business visitor to our city.

A Fendrich in the 10 cent, 2 for 25 cent and 15 cent sizes are proving good business getters for Ruhstrat-Christian to the Lake street jobbers.

Looping the Loop

Billy Waldmann is around the Loop airing Shrine cigars for Many-Blanc Co. Shrine is made in Tampa by the Referred Havana Tobacco Co. He has up the case of Nina E. Baker in the Webster Building with a full run of it.

George Grant, the "Greek" star of the H. J. Seidenberg Corp. sales force, is laid up with a broken wrist. George's large car kicked him the other day and now he can't write orders for Virginia Specialty cigars.

Doing Well with Havana Cadets

The trade is glad to know that Charles Garland is again back in the game. Charlie is now representing the Manchester Cigar Co., with headquarters in Minneapolis, and we hear he is doing well there with Havana Cadets.

Bob Ellis, representing E. P. Cordero Co., was here. C. C. McDonald, his salesman, continues to open accounts for Many-Blanc Co. on Mi Hogar brand. Large advertising campaign is shortly to be started here on Mi Hogar by E. Cordero & Co.

Velvet, "fine flavor aged in wood," sells Cigar all the time.

Melachrinos in Evidence

In the General Cigar Co.'s retail stores, full window displays of Melachrino cigarettes were shown a few days ago.

Clown Cut-Outs

Large new window cut-out signs of Clown cigarettes are seen in many windows. This union-made smoke of the Axton-Fisher Co. is repeating fine locally.

In the Vanguard

Clarence Hirschhorn Co., 217 West Randolph street, is very busy rushing out Mozart cigars to the trade. The demand grows larger each day, due to the heavy advertising campaign that is now on. Other big sellers with the house of Hirschhorn are Optimo, Detroit Hand Made and El Producto. Smokers are bound to find these brands on sale in every store that has a sizable cigar case.

The new Fatima cigarette billboards are very striking. A solid pink background, with the Fatima boy in bright green, can be seen all over the city now.

The summer amusement parks opened this week and White City and Riverview are now in full swing. As in past seasons, large cigar stands are spread throughout the parks, featuring all the popular brands of cigars and cigarettes.

H. L. Ruth is doing fine work here on the Emerson cigar for the Frank P. Lewis Cigar Co. of Peoria.

Sam Mosow, of the Sioux Tobacco Co., wholesale dealers of Sioux City, Ia., spent several days here this week.

Sol Bernstein, of Sol M. Bernstein & Co., has left for West Baden, where he will rest up for 10 days. Joseph Osthimer, the Bernstein manager, has returned from a pleasure trip to points in Indiana and Ohio.

There has been a change in the ownership of the Cowan Grocer Co.

Featuring Seidenberg Brands

Jack Brill is spending the week at the Chicago headquarters of the Wm. J. Seidenberg Corp. He is featuring Pancho-Arango, made in bond, and Virginia Lee, mild Havanas. Savin & Burge, La Salle street restaurant operators, feature a full line of Pancho Arango cigars, as do also the Bismarck Hotel and the Marigold Garden. Gus Le Bolt, jobber of Springfield, O., who recently took on the Frat cigar, has just closed to distribute the Virginia Lee brand in eight sizes from 10 cents to 3 for 50 cents. S. P. V. Havana Blunts, a 4½ inch all Havana smoke to sell at 5 cents, has just reached the trade. The Wm. J. Seidenberg Corp. controls the distribution.—H. L. H.

Match Imports

WASHINGTON, D. C., May 23.—There were 100,500 gross boxes of matches imported into the United States in February, valued at $57,742 according to figures compiled by the Department of Commerce. By far the largest quantity came from Sweden, with the second largest quantity coming from Japan and the third from Norway.—LAMM.

Georgetown Deliveries

GEORGETOWN, O., May 19.—Two and a quarter million pounds of tobacco were delivered to the co-operative warehouses here during the season recently closed. Tobacco pool officials advise growers to plant smaller crops this year and give them more attention.

Pennsylvania Tobacco Buying Slows Down Agai

Recent Drive on the Lancaster Market Has Come to a Practica Standstill—Only Scattering Purchases Being Made—Sma Quantity Left in Hands of Independent Packers.

LANCASTER, Pa., May 21.—The drive on the Lancaster market by the representatives of the large manufacturers has practically come to a standstill with only here and there a few belated sputterings of the pyrotechnical avalanche of buying which swept over Lancaster county this spring. The intensive campaign carried on by Bayuk Brothers, the General Cigar Co., and, it is rumored, several other concerns operating through representatives, which continued over the past two or three weeks, has left no more than a mere 10,000 cases of goods still in the hands of the independent packers. This is a bagatelle compared with what is needed in manufacturing circles and will, from present indications of coming prosperity in the cigar business, fall far short of next year's demands for seedleaf filler and binder tobacco.

A Curious Paradox

The apparent shortage in these types of cigar leaf, which seems to feature prominently in the unusual demand and early purchases of Lancaster grown tobacco, presents a curious paradox, or quite possibly, a fallacy—not so curious—born of the lack of any other visible moving force behind the rush on the local market. The paradox is this: While it is freely stated in tobacco circles that an appreciable surplus exists nowhere and while there is every appearance of actual fact to back these statements up, it is no less a fact that government statistics show a greater amount of tobacco on hand than has been stored for many years. Just wherein lies the answer to the inconsistency of these two presumably existing conditions, it is hard to say. Retrospect is an undeniable aid in accurately locating the key to such puzzles as this and the solution may be easier in 1924 or 1925.

Greater Damage Than Anticipated

The damage suffered by many packings of 1922 seedleaf is assuming grave proportions, as thorough examinations show the ravages of "black rot" in the case goods to be more serious than was at first thought. Several packers are refusing to sell their tobacco until after a complete survey to determine just where they stand. The added cost of labor to sort the damaged leaf, together with the loss involved in the tobacco itself are all going to make last year's crop a very expensive one for the packer and further jeopardizes his chances of listing the present packing with his good investments. The higher percentage of damage which is showing up was given by one packer today as the reason for the heavy purchases by the General Cigar Co. who, in the face of their own 29,000 case packing, went into the open market and bought between 10,000 and 15,000 cases additional.

Prices Practically Unchanged

All of the large packings have been bought and at prices which differed very little from those which were offered at the start of the buying activities. Phares W. Baker & Co., J. W. Eshleman & Co. and D. H. Landis & Co., are a trio of country packers who disposed of their holdings during the past week. At Lititz, a tobacco town in the northern end of the county, W. M. Amer. Charles Landis and D. W. Withers have sold their pacl ings, as have practically all of the sma country packers. The Seedleaf Tobac Growers' Co., managed by Charles He have sold their entire packing of 2,2 cases to the General Cigar Company. H. Nolt & Co., North Prince stre Lancaster, sold their packing a week ag Other packers are reported to have so their goods but no further sales cou be positively verified.

United Against the "Luxury" Tax B

The proposed tax on manufactur tobacco goods, which was included in bill recently before the Pennsylva State legislature provoked a veritat hurricane of protest from all corners the state, particularly from those sectio vitally interested in the tobacco indust and effectually swamped the measure b fore the first vote was taken by the low branch of the lawmaking body. Form resolutions of protest had been filed all of the various growers' and tra organizations at the first appearance the bill in the early days of the pres session of the legislature last wint seemingly to no effect. When matt came to a head, however, and the fi draft of the bill was drawn up and p sented at Harrisburg things began happen. Up in arms at the threate blow to the tobacco industry. Grow and tradesmen alike took immediate st to prevent the passage of the m sure. The four State representati from Lancaster county were lined solidly against the bill and together w the forces recruited from other toba centers of Pennsylvania, squelched tax measure before it even had a cha to threaten passage. Lancaster cou would have been especially hard hit any such action as nine-tenths of Penn vania's tobacco crop is grown in this trict.

Many to Attend N. C. T. A. Conv tion

Members of the Lancaster Leaf bacco Board of Trade are looking ward eagerly to the National Cigar L Tobacco Association convention whic to be held in New York, June 4 an Present indications point to about delegates from the local organiza journeying to Gotham in June to at what promises to be the biggest and "get-together" of tobacco men ever st by the N. C. L. T. A.—KEYSTONE.

Tobacco Varieties

DAYTON, O., May 19.—Two varieties of tobacco have been origin by the Ohio Agricultural Experi Station on its southwestern test farr Germantown.

The Montgomery seed leaf is a la late semi-erect type and yields heavily. The second variety has named "Tall Zimmer" because of its semblance to Zimmer Spanish, but taller than the old variety, has r leaves, and under average condit yields about 25 per cent more than parent variety.

These varieties are widely grow the Miami tobacco district and have introduced into other States, S Africa and the Philippines.

York County News

York, Pa., May 21.—The protest of the York County cigar men, who voiced before the Ways and Means Committee of the Pennsylvania Legislature at Harrisburg their objection to the "luxury" tax bill of Representative Alexander, of Delaware County, which as amended taxed only cigarettes, tobacco products and chewing gum, met with gratifying result. The bill was one of three measures designed to produce a revenue during the next two years of $19,000,000. Representative Alexander made a hard fight for the tobacco tax. His pleadings that the bill be put on the postponed calendar were ignored when Representative Robert Spangler of York, a former Speaker of the house, moved that the bill be dropped absolutely. Alexander was so incensed that he offered a resolution in the Ways and Means Committee that it adjourn *sine die*. Chairman Woner, however, ignored his motion. The tobacco interests of York, Lancaster and other counties, as well as the manufacturers and dealers, wholesale and retail, who protested the Alexander bill are jubilant over their victory.

Cigar Man on Bank Depositors' Committee

George L. Stallman, a wholesale cigar and tobacco dealer of York, was selected chairman of the depositors reorganization and protective committee of the City Bank, which was closed on April 24 as the result of a $1,000,000 defalcation of the cashier, Thomas Benton Baird, and the assistant cashier, William H. Boll.

W. C. Frutiger & Co., cigar manufacturers of Red Lion, report their shipments the past week to have been the heaviest of the year.

Back from T. M. A. Convention

J. Frank Strayer, Jacob C. Winter, Morton O. Meads, Thomas E. Brooks, Harry W. McGuigan and Whorley J. Neff, Red Lion; B. M. Hannigan, East Prospect; I. H. Rojahn, Dallastown, and William H. Snyder, of Windsor, who represented the York County Manufacturers' Association at the Tobacco Merchants' Association convention at Washington, D. C., May 16 and 17, have returned to their homes. Mr. McGuigan and Mr. Neff were accompanied on the trip by their wives.

Daniel A. Horn, of the Tampa Cigar Co., Red Lion, returned May 12 from a trip through Michigan and reports the business outlook for the cigar trade very good.

James T. Sentz has accepted a position with the Wolfe Brothers' cigar factory at Seon as foreman.

Grover C. Smith, foreman of the Tampa Cigar Co., Red Lion, has resigned his position.

A party was held May 10 for the benefit of the employees of the William Shy box factory at the home of the proprietor. There were about 250 persons present. The rooms were decorated in orange and gold. Music was furnished by an orchestra.

J. F. Burkholder, cigar manufacturer, Muddy Creek Forks, took all of his employees on Ascension day to Havre de Grace, Md., for an outing.

Cigar Men Discuss Dark and Light Wrappers

There was a long discussion at the meeting at Red Lion of the York County Cigar Manufacturers' Association regarding the recent step of the association to advertise the merits of a dark wrapper tobacco. Harvey A. Waughtel, Lemuel Deller and J. Frank Strayer contended that it was a mistake for the association to do this, as it was an advertisement for other manufacturers outside of the district. It was left to the next meeting to decide whether or not to spend a certain sum for the purpose. The meeting was held in joint session with the Red Lion Board of Trade, as a result of which a committee to take up with manufacturers of the district the question of making a fight for a reduction of the rate on coal hauled over the Maryland and Pennsylvania railroad was appointed. The present rate is based on an arbitrary rate of 98 cents above York. The committee is composed of Robert E. Glenn, Wallace M. Gemmill and Herman A. Elliott. B. M. Hannigan, president of the Cigar Manufacturers Association was in Harrisburg for the purpose of opposing Alexander's "luxury" tax bill, which proposed to place a tax on cigars and tobacco. C. S. La Motte, president of the First National Bank, Red Lion, presided at the joint meeting.

True to Name

The "Cigar Box" is the name which has been selected for the cigar, candy and news stand, which has been opened at 30 North George street, this city, by William H. Knaub. The entrance to the store is little more than an ordinary hallway, and the contracted quarters are well expressed in the name which has been selected. Its location in the heart of the city will no doubt make it a profitable stand.

James W. Kelly, manager of the P. & H. Cigar Co., Red Lion, has returned from a Western trip.

The El Francisco Cigar Co., Wrightsville, closed May 18 for a period of three weeks.

Made Real Flying Trip

Lieutenant Karl S. Ort, of this city, who made flights at the Tobacco Merchants' Association convention, Washington, D. C., advertising the Havana Cadet, made by the Manchester Co., of York, returned to his home by airplane on May 17, and is spending a few days with his parents, Mr. and Mrs. John Ort.

New Light on Smoking

Science and alleged morality again are in conflict. This is but another way of saying that chemistry has ascertained the fact that tobacco is not the wrecker of health it is asserted to be by latter-day reformers. These peculiar people, when they are seized with the impulse to assault a personal habit or indulgence, begin by declaring it to be immoral and opposed to religion. The use of tobacco is being treated after this method.

After exhaustive experiments a French chemist makes the announcement that moderate smoking, far from being unhealthful, should act beneficially on the health. From certain epidemics smokers rarely suffer, among them that of the baleful cerebro-spinal meningitis. The investigator found that from ten grams of ordinary tobacco he could get liquid nicotine that would kill a large dog. A similar amount, burned as it would be in a pipe, produced a liquid, not nicotine, which failed to kill a two-pound guinea pig and had no effect upon a grown dog.

Incineration had transformed the nicotine into other substances which are helpful to prevent the development of microbes that require oxygen to multiply. It will be observed that nothing is said of the deleterious effect of tobacco chewed or snuffed. These practices are never attacked by the reformers, who are centering their attacks upon cigarettes for the greater part, and cigars and pipes thereafter. If they must find immorality and irreligion in the tobacco habit it is suggested that they abandon their present tactics and, redressing their lines, whirl about and go after plug, scrap and snuff. Realities and not vain imaginings should guide them.—*Cincinnati Enquirer.*

MARSHALL FIELD

NO OTHER CIGAR IN AMERICA LIKE IT
IT IS DIFFERENT
THERE ARE REASONS FOR IT

The manufacturer has devoted his life in the science of tobacco curing, and the art of blending. The objectionable properties which tobacco contains are eliminated, such as Rosin Gum which makes tobacco strong, and the natural Ammonia which makes tobacco sharp and bitey. It is then ripened, mellowed, and blended.

All Marshall Field Cigars are

Very, Very Mild Regardless of Color

Philadelphia Plays Host to Convention Visitors

Cigar Manufacturers Return from T. M. A. Meeting in Washington, Accompanied by Distributors—Bring Glowing Accounts of Big National Gathering—Trade Topics.

PHILADELPHIA, May 22.—Echoes of the very successful T. M. A. convention in Washington were heard here at the close of the week when the big factors in the principal enterprises of Philadelphia, who were in attendance at the deliberations, came back with glowing accounts of accomplishment, and brought back with them many of their distributors, who were also in attendance there, for week-end entertainments here. The Congress Cigar Co. played host to many of its distributors, as did Bayuk Bros.; Otto Eisenlohr & Bros.; Bobrow Bros.; the G. H. P. Cigar Co., and the several other big fellows in the ranks. Trade interest, of course, largely was centered during the week outside the city, but there was quite enough to keep the stay-at-homes engaged, actively.

The week added a little to that of its predecessors in increasing the contrast between conditions in the factories of the big producers and the militant advertisers who thereby have worked up a national field of distribution and their smaller brethren whose market is a limited one. Of the latter those who happened to concentrate where selling is good, of course continued production uninterruptedly, but of this class many have restricted fields of outlet where the buying in recent weeks has fallen off decidedly, and, therefore, their business has declined to such an extent that production has been reduced—in one case of a manufacturer of fairly large proportion to almost fifty per cent. Some of the other producers on a limited scale have been compelled to close up-State factories and to concentrate production at central points. However, just as fast as hands thus have been liberated, the qualified ones have been taken up by the big producers in an effort to gain on their oversold production, or where this already had been accomplished, to work up stock against the time of a larger market, and which they believe is only a matter of a little waiting.

Leaf Market Reflection

The leaf market reflects the condition in the manufacturing end, and buying in this is only active where there are especially attractively priced job lots, because the big producers of course have laid up stock sufficient for a long time ahead and are not day to day buyers in the open market. In the round, while there has been a decided decline from the really exaggerated and abnormal activities engaged in during the early months of the year when production ordinarily declines, conditions are not yet by any means of such a character as to evoke complaint. The big concerns with abundant capital are continuously active, and those of smaller finances are proceeding conservatively and in a waiting attitude.

Congress Activities

Although there has been some delay in completing the new home of the Congress Cigar Co., at Third and Spruce streets, the firm is confident of being able to enter the new structure very early in June, and of beginning activities both in a manufacturing and in an administrative way in the largest structure in all Philadelphia devoted solely to the cigar manufacturing business. William S. Paley, of the firm, and Sales Manager Willis A. Andruss represented it at Washington, and were hosts to the Philadelphia visitors who came back with them. All the city sales activities are now centered in the old manufacturing plant at 247 South Third street, with Robert Donnelly as sales manager and Daniel Marks in charge of the office.

From Amsterdam to Washington

Samuel Bayuk, of Bayuk Bros., returned first of last week from the Sumatra inscriptions at Amsterdam, and, accompanied by his brother Meyer, Harvey L. Hirst and L. A. Kramer, journeyed to Washington to attend the convention.

William G. Kimber, credit manager of the firm, has just been appointed chairman of a committee on membership of the Philadelphia Association of Credit Men at the reunion of the association held in the Hotel Adelphia, and which it is proposed to bring up through a team drive to a membership of 1,250.

Convention Visitors

Among those visiting the convention in Washington during the week were Paul Brogan, of the Dusel-Goodloe Co.; Benjamin L. Loeb, of the Morris B. Newman Co.; Jacob L. Langsdorf, Leo Weiss, of Roig & Langsdorf, who represented the various companies with which they are connected.

All Optics Centered on New Enterprise

Production was begun during the week by that novel aggregation of old-timers in cigar production, all of whom have won their spurs by long services, some extending over twoscore of years, who have banded themselves together as the Associated Cigar Manufacturers, and have opened headquarters at 1037 Race street. Of this unique organization which the trade looks on as being possessed of great possibilities, Thomas H. Coll is president. He has been associated with the H. C. Nolan Co. for the last twenty three years and still retains his financial interest in that concern. The vice-president is G. F. M. Smith, of the Smith Cigar Manufacturing Co. of Reading, Pa., whose record of service is close on to forty years. The treasurer is George H. Watson, who previous to this new venture was for twenty-five years associated with Sig. C. Mayer Co., from which he brought to the new organization its leader, the old Rey Oma brand. The Smith contribution was the Deperdo brand, whose record equals or exceeds that of Rey Oma. The purpose of the combination was to produce under the exceptional possibilities existing the very highest grade of cigars featuring the Independo and the Rey Oma and through the combination making economical manufacture possible. In addition to the Philadelphia headquarters, it is on the program of the company to take over the Smith factory at Reading, and, in addition, to open a series of factories throughout the State with Hanover, Pa., and other points in Lancaster and other cigar manufacturing counties. The firm reports a large volume of advance orders and is busily engaged in bringing production up to the point of requirements.

Proprietor Max Lipshitz, of the Progressive Cigar Corporation, 12th and Race streets, whose leader is the Mad Butterfly, returned during the week from an extensive Western trip. Production is running at full capacity, the firm enjoying a particularly active market for the ten-cent size of Oriental and Blunt. Abe Blanc is completing a ten weeks' missionary campaign with the Potts Tobacco Co., and has developed a large outlet in that territory.

Production in the plant of the P. Fulweiler Co., at 927 Sansom street, on its leader Ivanhoe, is reported as being full, demand for this new brand having far exceeded anticipations. Large sales are reported from this city and particularly from the newly appointed Atlantic City distributor, W. S. Chew, 1311 Atlantic avenue.

Morris D. Neumann, of the Morris D. Neumann Co., spent the week in Reading featuring his leader, El Tello.

To Continue Atlantic City Demonstration

Growth of the sales of the Wanamaker Bond Blackstone brand in the Philadelphia territory has made rapid strides under the distribution activities of D. Goodloe & Co. The boardwalk demonstration in Atlantic City which has been conducted for the past year will be continued another season. A new booth, the Engagement, a two-for-fifteen-size, made by the Davis, Sherk & M

J. of Baltimore, has been added to the bing line of the Dusel-Goodloe Co. Son Dietz, sales manager for Girard, H leader of Roig & Langsdorf, visited h State territory during the week.

A big newspaper campaign is now oig featured by the Roig & Langsdorf on the Girard new size which is oig introduced as the "Needles." For ers this shape was one of the most ular cigars on the Pacific Coast, and s ntirely new to Philadelphia. It has same mild, mature Havana blend and inished workmanship of the other Gard sizes, and has taken instantly with iriminating smokers at two for a rter.

n celebration of its 22nd anniversary, h United chain stores on May 18 and offered special premiums to buyers.

Harry Huntley, who for many years connected with the sales force of h Piermont Cigar Co., has severed his nections with that firm and is now on h staff of the John Middleton Co., 2nd Walnut streets.

. C. Adair, cigar manufacturer of Lion, Pa., was a visitor to the local le during the week.

he L. P. Kimmig Co. leaf house, ch for many years occupied offices warehouses on Third street, is now nducting business at 1209 West Berks et. L. P. Kimmig and his son Wil- S. Kimmig are proprietors. Only offices and sample rooms are located this address, the warehouses being ated in Lancaster, Pa., where the 's stock of Pennsylvania leaf is ed.

Maryland Tobacco

ALTIMORE, Md., May 19.—"For years acco growers in Maryland have been ducing a finer leaf tobacco than is wn in Kentucky, and getting one-third much for the weed as the Kentucky wer receives for an inferior product." his is the opinion expressed by rge T. Barnes, director of the cam- n to enroll every tobacco grower in State as a member of the Maryland acco Growers' Association.

"There are about 5,500 growers of to- o in this State," he said. "By early e, when the campaign will close, we ect to have 85 per cent of the tobacco ners of Maryland in the organiza- ."

he plan of the association, according Mr. Barnes, is co-operative marketing, h eliminates the middle man and re- s to the producer almost three times much for his tobacco as he now re- es.

"At present," Mr. Barnes explained, acco growing in Maryland is not a ng proposition, due to the low prices red the producer. Most of the to- o raised in Southern Maryland is ped to Baltimore markets. Increased duction, which is bound to follow er prices, will make Baltimore an rtant tobacco market."

nder the plans of the Maryland To- o Growers' Association, the tobacco be graded into standard lots, which improve the quality. Marketing the cco then will be simpler than it is , it is claimed.

Copley Cigar Co., Inc.

OSTON, Mass., May 19.—The Copley ar Co. has been incorporated; capital, 000; incorporators, Joseph Nagel- k of Kendal Green, and Max Rubin, ph L. Frank and Louis Abrahans of bury.

Tidying Market Conditions

M. Dawson, of the Brandfass To- o Co., Wheeling, West Virginia, has studying conditions in the New c and Connecticut markets during the week.

Baltimore Market

BALTIMORE, Md., May 18.—Gieske & Niemann, leaf tobacco merchants, make report as follows:

MARYLAND—We have to report for the last week, receipts of 115 hogsheads, with sales of 86 hogsheads. The market is quiet.

OHIO—Receipts of 3 hogsheads. Sales of 212 hogsheads reported.

Ohio Growers to Co-operate

DAYTON, Ohio, May 19.—Contracts, constitution and by-laws were adopted yesterday by representatives of the Miami Valley Tobacco Growers' Co-operative Association, in session in the Y. M. C. A. auditorium.

These steps are preliminary to incorporation as an active concern, under the new state law, passed by the last legislature and which will become effective July 17.

It is planned to have the organization sufficiently established to apply for incorporation articles immediately after the law is effective. The local association will be the first in the state to take advantage of this law and incorporate.

The purpose of the organization is to establish the price of tobacco and to market it so the cost of production will be obtained plus a profit.

Representatives of six counties in the vicinity of Dayton met yesterday and accepted the contract for five years, the constitution and by-laws as drawn by Murray D. Lincoln, secretary of the state farm bureau federation, and H. S. Ballard, attorney for the bureau, both of Columbus.

The agreement will not be binding until 75 per cent of tobacco growers in the six counties accept it. No difficulty is expected to be experienced in obtaining sufficient growers to complete the organization.

1,454,236

A cigar moistener comprising an open ended moisture container through which air is intended to circulate, and a shield in which said container is arranged to prevent direct contact of the cigars with the container.

Leaf Tobacco Exports

(Continued from page 28)

Argentina and Uruguay and some parts of Brazil.

Cigarettes made in America in the first three months of this year total 15,000,000,000, compared with 10,000,000,000 in same period year ago. This 5 per cent increase in cigarette production is partly responsible for the fact that the greater part of the 1922 crop of Burley and Bright flue-cured tobacco has passed from the hands of growers at prices approximately 5 cents a pound greater than those that prevailed in the sale of the 1921 crop, despite increased production of both of these types of tobacco.

Better demand for American-made cigarettes abroad during the last three years is attributed to improved economic condition of Continental Europe and appreciation of the pound sterling. Destruction of vast stocks of tobacco during the Græco-Turkish war is reflected in our markets for these tobaccos as our imports of Turkish tobacco are much smaller than in former years, and will be replaced to a great extent by domestic tobacco. A 10 per cent increase in domestic tobacco production is predicted by crop experts.

Exports of cigarettes last year totaled 11,470,179,000, compared with 8,543,676,000 in 1921.—*Wall Street Journal.*

Chicago Cigar Dealers

(Continued from page 7)

was a visitor. He states he is no longer distributing the Perfecto Garcia brand, which has been placed with the Lewis-Leidersdorf Co.

A. Schulte, Inc., is opening a retail cigar store at the northeast corner of Clark and Lake streets.

Along with the merry crowd that left to watch the ponies run in the Louisville Derby was Al Spellman, of the San Telmo Cigar Manufacturing Co., Detroit. Al never passes up this classy event.

Leo Weiss was a recent visitor and spent quite some time with Iwan Ries & Co., the Chicago distributers of Girard cigars.

Succeed to Gowan Business

Keffer & Co. are the successors to the Gowan Grocery Co., 30 West Washington street. Edward Johnson, Hiram Bugg and Clayton Keffer are the members of the new firm. They operate a large restaurant and candy shop, cigar department and soda fountain. Clayton Keffer is widely known as a high grade cigar man. They feature brands from Garcia & Vega, Cuesta, Rey & Co., Perfecto Garcia, the Preferred Havana Tobacco Co. and Eduardo Gonzalez & Co., of Tampa.—H. L. H.

President Wm. F. Bradshaw Reviews Co-Operative

(Continued from page 33)

was necessary to obtain adequate headquarters in Hopkinsville and a large three-story building was bought for the sum of $55,000 that had cost approximately $20,000 more than the price paid for it and was ideally adapted to the necessities of the organization. After the first receiving station was opened, others were opened in rapid succession and within sixty days 108 receiving stations were in operation.

Necessary to Employ Experienced Men

"In procuring warehousemen, graders, assistant sales managers and others making up the personnel of the organization, it was necessary to employ men who had had previous experience and who were versed in the tobacco trade, and it was necessary to secure these men from other organizations with whom they were then connected. All of this was done and with only minor interruptions the functioning of the 108 houses started from the day they were opened and proceeded with an efficiency that surpassed the expectations of those responsible for th organization.

"Owing to the drought of the pa Summer it developed as tobacco was r ceived that the leaf was shorter in leng and lighter in body than the average f many years; that the crop as a whc was inferior in quality and that the a erage would run below 750 pounds the acre. It appears that the total cr would not exceed 165,000,000 pounds if reaches that figure. Up to May 9, 19 the association has received upwards 145,000,000 pounds, of which appro mately 110,000,000 pounds has been so

Closing of Receiving Stations

"Of the four sub-divisions the C Sucker District is the only one whi has closed all of its receiving stati and has sold approximately its ent crop, there being on hand only 317,(pounds of one sucker tobacco hanging air drying houses in one of the Tenness districts. The average price received t the 1921 crop of the upper Cumberla one sucker district was 6¼ cents a the average for the 1922 crop recei has been 14.16. In this district they ceived 2 cents more per pound this y than they received last year for a cr of better quality and half the size of one we have just sold. The 1921 cr was marketed last year for 11½ cer This crop brought 13½ cents. The m agement of the One Sucker District is be congratulated upon the efficiency w which the affairs of that district w handled throughout the season; in gr ing, in expeditious sale and delivery the crop and in the satisfaction w which it has served the members.

"Under the plan of financing it is practical to consider a second paym of as much as 40 per cent, the amo of the first advance, until at least 75 cent of the crop has been sold and livered to buyers. The percentage s and delivered to buyers in the other tricts has not quite reached this figu but deliveries seem to indicate that t minimum will be reached in the n future and that second payments can made during the course of the Summ It is the policy of the association make second payments as speedily possible and to wind up the year's w at the earliest date.

Field Service Division

"There is much more to the operative Association's work than mere receiving, handling and sale of bacco, one of the most useful phases its work will emanate from the F Service Division. This division is engaged in setting up locals through the district which will afford the m bers a medium of contact with each ot and with the executive organization will be the means through which educational work can be done, which embrace the selection of seed, the sta ardization of types of tobacco in various districts of the organization; campaign for the improvement of qua at the expense, if necessary, of quar and in general the raising of the stanc of tobacco culture. This work will continued throughout the Summer Fall, and as receiving stations and w houses are closed, employees will be tailed from work in other division temporary service in the Field Ser Division, so that the intensive and haps most efficient services to be dered by this division will be done a the pressure of the tobacco season removed and in time to reflect its res in the next crop."

TOBACCO

A WEEKLY TRADE REVIEW

ESTABLISHED 1886

Vol. LXXVI. No. 5 NEW YORK, MAY 31, 1923 Per Annum, $3.00 This Issue, Per Copy, 25 Cents

PENNSYLVANIA NUMBER

York County Holds the Premiership in the Production of Cigars

More Than One-Eighth of All Cigars Made in United States Fabricated in That County—"Plug, Pigtail, &c., &c., &c.," Advertised in 1796—Cigars and Tobacco Manufactured at Hanover in 1800—Government Cognizant of Industry in 1842.

By JAMES W. SHETTEL

YORK COUNTY holds the premiership in the production of cigars. More than one-eighth of all the cigars manufactured in the United States come from the factories of York county, Pennsylvania, whose owners pay in internal revenue taxes into the United States Treasury over $2,500,000 a year.

York county lies in the southeastern part of the Keystone state and is an irregular quadrangle in shape, with Mason and Dixon's line on the south for its base. It is separated from Lancaster and Dauphin counties on the east by the Susquehanna river, while its neighbors on the north are Cumberland and Dauphin counties, and on the west, Adams county. The county covers 921 square miles, most of it fertile farm land. Here cigar factories—almost 400 in number—give employment to nearly 8,000 men and women, representing an invested capital of $4,976,790, and produce annually a half billion cigars, valued at nearly $18,000,000.

Recognized for Great Diversity of Manufacture

Of the great diversity of manufacture for which the county is recognized, the manufacture of cigars ranks second in importance, being led only by metal and metal products.

Just how and when this industry originated in the county, it cannot be stated authoritatively. An advertisement, copied from the *Pennsylvania Herald and General Advertiser* of January 26, 1796, published at York, Pa., the county seat, shows the field already occupied by manufacturers of "plug, pigtail, etc., etc., etc.," and it would require no stretch of imagination to believe that the "etc., etc., etc.," included the making of the crude cigars which the earliest inhabitants were accustomed to smoke. The following is a copy of the advertisement alluded to:

Tobacco

"WHOLESALE and retail, manufactured and sold by the subscribers living opposite to the German Presbyterian Church, Main street, in the borough of York, such as Plug, Pigtail, etc., etc., etc. Those who will favor them with their custom may depend on their exertions to merit their favors.

"FORSYTH & EICHELBERGER."

Pioneers in the Business

The making of cigars and the manufacture of tobacco, which is a matter of historical record, started in Hanover as early as 1800. John Danner and John Emig were the pioneers in this business. George Young carried on a prosperous business there in making cigars and selling tobacco before 1830. During the year 1831 the manufacture of cigars in Newberrytown was introduced by Jacob B. Wolf. He came from Shrinestown and brought with him a number of workmen who had learned the trade. Later Christian Shelley, who married a daughter of Wolf, embarked in the business on an extensive scale.

The manufacture of cigars known as "tobies" and "commons" was begun in the town and neighborhood of Dallastown before the Civil War. They were a crude sort of cigar rolled and twisted by hand.

Old Timers

William Roth, of Hellam township, made cigars in 1841. He presented five of them to the late John E. Weitzel, Wrightsville, in 1879, in whose family they have been preserved and are now in possession of J. L. Weitzel, senior member of the firm of J. L. Weitzel & Co., Wrightsville. The cigars are in a good state of preservation, having been kept these many years in a glass case. In appearance, they are rough and bear a close resemblance to the present-day stogies.

It was not until 1840 that the government paid any attention to the cultivation of tobacco which was at first carried on in a small way by the farmers. The market for the product was small. There was no special license required to deal in the article. The levy of an internal revenue tax was unknown. The grower made up the tobacco into cigars for his own use and the surplus, if any, was sold to the local cigar dealers. The cigars were of two kinds, common and half Spanish. The former sold four for a cent and the latter, smoked by the better class of the community, retailed at two for a cent. The former sold at wholesale for 16 to 20 cents a hundred and the latter at twice as much.

"Shoe String Tobacco"

The tobacco raised at this early period of the county's history was of an inferior quality, familiarly known to the common populace as the "shoe string tobacco," a hybrid of the Kentucky seed. It was a heavy, black, gummy product and narrow in leaf, hence the origin of the nick-name given to it. The climate here did not seem to be suited to the growth of the pure Kentucky tobacco. The inferior tobacco, after being cured and sold at low figures ranging from one to three dollars a hundred pounds, was manufactured by unskilled workmen into cigars commonly called "tobies." They were sold at an average price of $1.25 a thousand. These were the "common" variety which sold at retail at four for one cent.

Old timers say that persons who indulged in the weed were usually accommodated with one of the "fragrant tobies" free of charge at many of the taverns, after partaking of a meal and paying for the same. It is amusing to hear old citizens tell how rudely constructed those cigars were. They contained a vast amount of nicotine, the stimulating element in tobacco, and were doubtless very injurious to the smoker.

First History of the Industry

The 1840 census gives the first real information regarding the cigar and tobacco industry in York county. According to Rupp's "History of York County," the value of tobacco manufactured that year was $22,400. The number of people then employed in the industry was 57. At that time York county was the greatest tobacco producing county in the state, the crop, according to the United States census, being

1—Digging and manuring tobacco seed beds. 2—Applying fertilizers to experimental plots. This work is usually watched by the farmers, who pr by the experience. 3—Chopping corn for the silo. 4—Hauling tobacco laths to the curing barn. 5—Topping Havana seed tobacco. 6—Filling the s with corn. The resulting feed is used to fatten the steers. 7—Cutting seedleaf tobacco. 8—Disc harrowing demonstration on experiment field. 9—Spe ing Havana seed tobacco. 10—Plants ready for transplanting. 11—View of Clinton county, where Havana seed tobacco, used for binder purposes, is gro on the sandy river bottoms. 12—Occasionally tobacco is placed on racks in the field, and left there for several days, so that it will wilt down, wh it may be spaced closer in the curing barn, thus saving space.

62,748 pounds in 1839. In 1849 there were 18,555 pounds of tobacco raised in the county. Lancaster county following with 378,050 pounds. Ten years later York county surrendered the supremacy in the raising of tobacco when Lancaster produced a crop of 2,001,547 pounds and York only 695,405.

York County's Cigar Output

The immense output of the York county factories goes all over the United States and to foreign countries as well. With very few exceptions the cigarmakers are native Pennsylvanians, descendants of the early German settlers. Men and women, boys and girls, do the stripping and rolling of the cigars. Practically all of the work is done by the piece.

Much of the tobacco is stripped in the homes by men and women who do not want to go to the factories to work. These women do the tobacco stripping at odd moments; never, however, neglecting their immaculate Dutch housekeeping. In the small town most of the cigar factories are found directly behind the home of the proprietor of the factory. Some of these factories so located employ but a single cigar maker, while other factories have as many as 200 men and women employed steadily throughout the year.

Everybody Works, Even Father

In the county so thriving has been the industry that each monthly report of the collector of internal revenue for the district, who has his office at York, contains the names of new factories which have been opened since the report of the previous month was made. In these towns in which cigarmaking is the principal industry, it is no unusual thing to find a whole family, constituting a father and mother, sons and daughters, toiling together for the financial advancement of the family.

Virtually all of the factories are built in the interest of the health of their operatives, a strong point being made of proper ventilation. The girls employed in them are a fine type of robust womanhood. Well fed, well housed and properly clothed as they are, these young women of the county, who make more cigars than any other women in the world, illustrate the benefits accruing from industrial content.

A Glowing Description

A description as given by a newspaper man of Red Lion 10 years ago applies as well today to the cigar industry in that thriving cigar center and in others of the county.

"Why, everybody in this town knows how to make cigars," said he. "You could comb this town with a fine-tooth comb and you wouldn't find in it an idle man or woman, boy or girl, able legally or physically to work. Comb the town again and you wouldn't be able to find a destitute family. Again go over it with a searchlight and you couldn't for the life of you find a working girl who can't afford to have fine clothes.

"Red Lion has the reputation of having the best dressed young women of any town in Pennsylvania and all the young women, save a very few, make the money for their fine clothes in the cigar factories. These young women not only make enough to clothe themselves in first class taste, but they have enough left over to accumulate substantial bank accounts. Moreover they make a point of having innocently good times in life. They run over to York to the theaters, often take long trips to the big cities and have their jolly clubs here at home. They are independent young working girls who are members of independent families and their life is to be envied by many girls struggling for living in larger places. Yes, the man who doesn't know cigarmaking in this town is rather proud of it.

"Cigar manufacturing has built up this place. Before 1878 there was a general store and two or three houses near it. We are now building new homes and more are to be started. The more cigar factories open up here the more houses we need. The cigar industry is permanent here and we build houses as fast as the factories start in order to properly house the operatives, many of whom come from the country districts to take up the congenial work. Stand at the highest point in the town and throw a stone in any direction and you'll hit a cigar factory. This town, without a doubt, is the greatest cigar town in the world. There is none other like it."

Apprentices Then and Now

Years ago in York county cigarmakers had a different method of "breaking in" apprentices than that which is in use today. Mrs. Nathaniel Neiman, of Red Lion, recalls how 50 years ago her husband taught apprentices to make cigars. In those days the apprentices paid the cigarmaker for the teaching instead of being paid for their work as learners as they are today. Then novices paid for their schooling in the industry and many were anxious to learn and they paid money for their instruction. There are many men now living who recall how in their boyhood days they saved their money to pay for a "course" in rolling "smokers." Five dollars was the average cost paid by the novice for the services of an instructor, who was usually the proprietor of the factory in which the novice was learning his trade.

Women Own and Operate Factories

In York county today are perhaps a score of cigar factories which are owned, operated and managed by women. Some of them are unusually prosperous and reflect favorably upon the ability of their fair proprietors as executives. Some of them were started by women who were not satisfied to work for others and who were ambitious to establish a business of their own. A number of them have already shown their capabilities as factory owners and operators. Other women at the head of local factories have inherited the factories from their parents or perhaps from their husbands and rather than sell out the institutions established by their relatives decided to operate them themselves.

Receipts from Cigar Stamps Sales

In 1922 receipts from cigar stamp sales in the York office of the Department of Internal Revenue totaled $2,506,448.13. Owing, it is said, to the depression in the industry during the early months of the year, these figures are not up to those of 1921, when the year's receipts totaled $2,553,688.02. About July cigar production seemed to once more assume its normal pace and with the closing quarter of the year had been so accelerated that October, November and December surpassed the corresponding months of 1921.

Cigar stamp sales during 1922 are shown by months as follows: January, $157,746.64; February, $170,423.09; March, $192,663.79; April, $157,635.35; May, $179,972.23; June, $218,905.86; July, $223,584.29; August, $229,593.16; September, $256,159.36; October, $265,716.86; November, 271,961.71; December, $182,354.89; total, $2,506,448.13.

According to statistics compiled by the state a total of 356 factories in York county in 1921 employed 7,881 men and women. The invested capital in that year, according to the statistics, was $4,976,790. Cigars produced numbered 475,501,312 and their total value was fixed by state statisticians at $17,474,370. In 1922, according to statistics from the same source, the value of the manufactured product was $18,698,700, an increase of more than a million dollars over the valuation of the previous 12 months.

Cigar Factory Statistics

The towns of the county in which there are cigar factories and the extent to which the cigar making industry is carried on in them, is shown by the list below, which was furnished to the writer by the Bureau of Statistics and Information, Industrial Division, of the Department of Internal Affairs of Pennsylvania, of which M. Hoke Gottschall is the efficient director:

BITTERSVILLE—Eleven factories; 64 employes; capital invested, $28,300; quantity produced, 4,641,885; value of product, $75,744.

CODORUS—Two factories; 43 employes; capital invested, $6,019; quantity produced, 2,291,450; value of product, $61,956.

CRALEY—Six factories; 103 employes; capital invested, $56,823; quantity produced, 8,055,500; value of product, $281,260.

CROSS ROADS—One factory; 15 employes; capital invested, $3,327; quantity produced, 1,001,200; value of product, $18,323.

DALLASTOWN—Twenty-eight factories; 723 employes; capital invested, $403,305; quantity produced, 41,168,060; value of product, $1,488,732.

DELTA—One factory; 20 employes; capital invested, $16,000; quantity produced, 500,000; value of product, $7,500.

DILLSBURG—One factory; 21 employes; capital invested, $10,000; quantity produced, 989,600; value of product, $29,640.

DOVER—Three factories; 33 employes; capital invested, $22,946; quantity produced, 1,241,350; value of product, $44,634.

EAST PROSPECT—Four factories; 190 employes; capital invested, $150,634; quantity produced, 16,200,200; value of product, $436,592.

FAWN GROVE—One factory; 22 employes; capital invested, $5,000; quantity produced, 1,582,500; value of product, $11,371.

FELTON—Thirteen factories; 168 employes; capital invested, $52,900; quantity produced, 9,582,850; value of product, $568,231.

FRANKLINTOWN—One factory; 12 employes; capital invested, $1,000; quantity produced, 350,000; value of product, $14,000.

GOLDSBORO—Two factories; 72 employes; capital invested, $138,688; quantity produced, 3,815,522; value of product, $200,236.

HANOVER—Twenty-one factories; 546 employes; capital invested, $322,286; quantity produced, 26,674,677; value of product, $1,573,677.

HIGH ROCK—One factory; seven employes; capital invested, $150; quantity produced, 243,300; value of product, $7,299.

HELLAM—Fifteen factories; 187 employes; capital invested, $81,924; quantity produced, 10,062,100; value of product, $304,645.

JACOBUS—Three factories; 44 employes; capital invested, $21,500; quantity produced, 2,271,150; value of product, $54,737.

LAUREL—One factory; 1 employe; capital invested, $100; quantity produced, 50,000; value of product, $2,500.

LEWISBERRY—One factory; 4 employes; capital invested, $1,500; quantity produced, 129,100; value of product, $3,357.

LOGANVILLE—One factory; 52 employes; capital invested, $15,474; quantity produced, 2,956,200; value of product, $50,319.

MANCHESTER—Three factories; 54 employes; capital invested, $27,281; quantity produced, 2,602,750; value of product, $89,416.

MT. WOLF—One factory; 21 employes; capital invested, $7,800; quantity produced, 1,561,750; value of product, $42,005.

MARTINVILLE—One factory; 5 employes; capital invested, $3,500; quantity produced, 400,000; value of product, $8,000.

NEWBERRYTOWN—Two factories; 49 employes; capital invested, $39,359; quantity produced, 1,332,900; value of product, $70,437.

PLEASUREVILLE—One factory; 13 employes; capital invested, $10,000; quantity produced, 753,600; value of product, $30,978.

RED LION—Ninety-nine factories; 1,402 employes; capital invested, $1,237,199; quantity produced, 100,564,755; value of product, $2,689,595.

SEVEN VALLEYS—One factory; 108 employes; capital invested, $30,820; quantity produced, 4,939,000; value of product, $275,249.

SPRING GROVE—Three factories; 95 em-

1—Hoeing tobacco plants. 2—Tobacco seed beds covered with muslin or glass. 3—Tobacco transplanting machine. 4—Rustica tobacco, containing 10% nicotine. This type has been bred at the experiment station for nicotine extraction. Nicotine is used increasingly as an insecticide. 5-6-7-8-Seedleaf tobacco fields in Lancaster county. 10—Preparing tobacco field for transplanting by means of a Ford tractor. 11—Experimental tobacco barn Ephrata station.

oyes; capital invested, $27,518; quantity pro-ced, 4,080,948; value of product, $203,177.

SPRINGVALE—Three factories; 38 employes; pital invested, $104,100; quantity produced, 34,430; value of product, $235,014.

SPRY—One factory; 19 employes; capital in-sted, $6,553; quantity produced, 540,000; lue of product, $25,246.

STEWARTSTOWN—One factory; 37 employes; pital invested, $76,112; quantity produced, 345,600; value of product, $94,320.

STONY BROOK—One factory; 1 employe; cap-al invested, $100; quantity produced, 50,000; lue of product, $2,500.

STRINESTOWN—Two factories; 89 employes; pital invested, $18,076; quantity produced, 4,-20,000; value of product, $163,793.

WINDSOR—Sixteen factories; 459 employes; pital invested, $204,800; quantity produced, 3,230,400; value of product, $1,002,895.

WINTERSTOWN—One factory; 11 employes; pital invested, $2,000; quantity produced, 1,-09,800; value of product, $17,200.

WRIGHTSVILLE—Seventeen factories; 345 em-oyes; capital invested, $205,547; quantity pro-ced, 15,916,745; value of product, $479,220.

YOCUMTOWN—One factory; 1 employe; capi-l invested, $100; quantity produced, 6,900; lue of product, $1,380.

YOE—Twenty-one factories; 281 employes; pital invested, $169,773; quantity produced, 19,962,125; value of product, $442,381.

YORK—Fifty-four factories; 2,304 employes; capital invested, $1,373,988; quantity produced, 130,528,450; value of product, $5,934,973.

YORKANA—Six factories; 162 employes; capital invested, $68,388; quantity produced, 10,-130,675; value of product, $381,190.

YORK NEW SALEM—Two factories; 20 employes; capital invested, $12,400; quantity produced, 430,140; value of product, $29,660.

YORK HAVEN—One factory; 33 employes; capital invested, $10,500; quantity produced, 828,000; value of product, $21,875.

ZION'S VIEW—One factory; 7 employes; capital invested, $3,000; quantity produced, 135,-700; value of product, $1,113.

Cigar Box Factories

The big cigar production of the county proves a feeder for another industry which furnishes employment for residents of the county. Where there are cigars there must be something to put them in. The increasing use of tin cans for use as containers has of course in a measure hurt the cigar box industry, but these factories are still an important business asset in many of the important cigar manufacturing centers of the county.

According to the Bureau of Statistics and Information, Industrial Division, of the Department of Internal Affairs of Pennsylvania, there are 13 box factories in York county, which turned out in 1921 a total of 9,183,821 boxes valued at $1,228,228. These factories have an invested capital of $651,327 and give employment to 493 persons.

The cigar box factories and the towns in which they are located follow:

DALLASTOWN—Two factories; 114 employes; capital invested, $90,007; quantity produced, 2,-006,328; value of product, $282,981.

FELTON—One factory; employes and capital invested not given; quantity produced, 132,053 boxes; value of product, $13,205.

HANOVER—Two factories; 114 employes; capital invested, $262,000; quantity produced, 2,804,767 boxes; value of product, $370,084.

HELLAM—One factory; 9 employes; capital invested, $1,800; quantity produced, 147,229; value of product, $14,000.

JACOBUS—One factory; 3 employes; capital invested, $1,000; quantity produced, 10,000 boxes; value of product, $1,200.

RED LION—Two factories; 61 employes; capital invested, $78,200; quantity produced, 1,-332,915 boxes; value of product, $135,974.

WINDSOR—One factory; 33 employes; capital invested, $20,000; quantity produced, 568,716; value of product, $88,022.

YORK—Three factories; 159 employes; capital invested, $198,320; quantity produced, 2,181,-813 boxes; value of product, $322,762.

The Great Economic Value of Tobacco Production in Pennsylvania

"Weed" Introduced Into Territory Now the Keystone State in 1689—Has Brought and Continues to Bring Employment and Wealth—In Pioneer Days Tobacco Was Grown in Nearly Every part of the State—Interesting Facts About the Industry.

By DAVID D. LONG

Soil Specialist, Soil Improvement Committee, Southern Fertilizer Association, Atlanta, Ga.

AFTER TREATING in a brotherly manner with the Indians and ceding all territorial rights to the people of his colony, "Billy" Penn, as he is so lovingly known, in 1683, blazed the chestnut, walnut and ash trees t mark the streets of what is now the city Philadelphia. Thus Penn laid the foun-tion of a city and state which was to be dowed with brother love, prosperity, ace and contentment for its inhabitants.

It was just six years later, in 1689, that bacco was introduced in that territory hich as a crop assisted the founder of the eystone State in the attainment of his en-rprise far more than he then realized or any of the citizens of the state at the pres-t time appreciate. Tobacco brought and ntinues to bring to its people employment d wealth; it has aided and continues to sist in the ease of mind, which, to taut rves, is so vital a necessity for that state being necessary for peace and the mani-station of brotherly love.

As in all the youthful colonies bordering e Atlantic in those early days, tobacco as crop was of economic importance. As the otch and Irish settlers proceeded westward rough the fertile valleys of the southeast-n part of the state and settled in the more mote portions of the Alleghanies, tobacco s carried with them until its production in er years reached practically every county the state. Then with the development of nsportation facilities, and for other eco-mic reasons, the production of tobacco in nnsylvania became more localized.

In those regions where tobacco today is duced to its greatest extent it is impos-ble to think alone of the wealth which mply the production of tobacco brings, as ere must be also considered the employ-nt which it offers to the people of this ction. Impressed as one might be with the beauty of the agricultural development of Southeastern Pennsylvania, particularly Lancaster and York Counties, the region which represents the highest type of agricultural development of the United States, one cannot help but be impressed with the allied branches of agriculture, particularly the many tobacco warehouses and cigar factories. A stranger traveling in any direction from the cities of York and Lancaster, and he may travel by railroad, trolley or fine macadam state highways, will see all along the way legalized factories manufacturing cigars. These places of tobacco industry may range from the upper story of an humble house to the most modern cigar factory. Not so many years ago it was possible to see children with their express wagons loaded with tobacco to be taken home to be stripped during the night, after their other labor had been done. To those thrifty "Pennsylvania Dutch" tobacco is not only a source of profit in production but in preparing the same as a finished product.

Characteristics of Pennsylvania Tobacco

The character of tobacco produced in Pennsylvania is dark and rather heavy which makes it particularly useful chiefly as a cigar filler. Dr. William Frear (now deceased) and Professor E. K. Hibshman, of Pennsylvania State College of Agriculture, made this statement: "When properly fertilized, matured, cured and sweated, Pennsylvania tobacco is characterized by the mild, agreeable aroma and freedom from bitter, resinous, metallic and rank flavors and it burns well, leaving in most cases a coherent white ash." Pennsylvania producing this character of tobacco so suited for the production of cigars, follows closely in the production of tobacco the consumption of cigars in the United States. In 1849 Pennsylvania produced 912,651 pounds of tobacco; in 1909, 46,164,800 pounds; in 1919, the production increased to 55,965,851 pounds.

In the same census year of 1919, 42,799 acres were devoted to the crop, while the value of tobacco produced on this acreage was $10,073,852. The number of farms contributing to this production was 10,961 or 5.4 per cent of the total number of farms of the state. According to the crop estimate of the Bureau of Agricultural Economics, the acreage and production in 1922 increased slightly while the total value of the crop decreased to a small extent. Plate 1 graphically shows the distribution of the acreage of the state. The concentration of acreage, first, in Lancaster County and, secondly, in York County is quite striking.

Table No. 1—Tobacco Acreage. Production and Yield Per Acre Leading Tobacco Counties of Pennsylvania

	Average		Production		Yield per acre	
County	*1919	**1922	*1919	**1922	*1919	**1922
Lancaster.	37,301	38,500	49,335,407	51,012,500	1,323	1,323
York	3,432	2,500	4,252,101	3,125,000	1,240	1,250
Chester ..	785	800	941,217	1,120,000	1,200	1,400
Lebanon ..	466	390	521,232	448,000	1,120	1,150
Berks ...	206	200	170,699	340,000	828	1,700
All other Countries	609	610	745,195	714,500	.....	.....
State	42,799	43,000	55,965,851	56,760,000	1,304	1,320

*From U. S. Census, 1920.
**From U. S. Department of Agriculture, Bureau of Agricultural Economics.

In Table No. 1 the acreage, production and yield per acre is given for the counties of the state which have over 200 acres of tobacco. These statistics are taken from the Census of 1920 and from the crop estimates, Bureau of Agricultural Economics for 1922. It will be observed from this table that in 1922 Lancaster County had 89.5 per cent of tobacco acreage of the state; that it pro-

1—Improved type of Havana seed tobacco. 2—Initial wildfire spots appearing on seedleaf tobacco. 3—Tobacco worm at work. 4—Plants large enoug to set out in the field. The plant on the left has good roots, but the plant on the right has a very inferior root system. 5—Pennsylvania seedleaf tobacc 6—A type of seedleaf which is used in breeding a strain of tobacco comparatively free from suckers. Suckers grow at the junction of leaf and stalk, ar appear as soon as the plant is topped. They must be removed, or the quality of the tobacco will be impaired. Suckers represent the efforts of the plant t propagate itself. 7-9-10-12—Different types of seedleaf tobacco, grown in Lancaster county. 8—On the right, sound seedleaf tobacco; in the center, blac rot, and on the left mouldy, musty seedleaf tobacco. 11—Johnson tobacco curing furnace, manufactured by the Southern Iron & Steel Corporation, Winston-Salem, N. C., used in experiments to prevent the loss from pole-burn of tobacco.

fluces 88.2 per cent of the total production of the state and that the value of the production in this county was 95.5 per cent of the total value of the tobacco crop for Pennsylvania. York County, the second county of importance in tobacco production, had 5.5 per cent of the acreage, 5.5 per cent of the production and 4.1 per cent of the value.

In yields per acre Lancaster County is first with an average yield of 1,323 pounds per acre according to the Census of 1920; York County, second, with a yield of 1,240 pounds per acre, and Chester County, third, with a yield of 1,200 pounds. Lebanon and Berks Counties follow in order, the former averaging 1.120 and the latter 828 pounds per acre. The average of the state at large for the census year of 1920 was 1,304 pounds per acre. The relative production for the different countries is shown in Plate II.

Tobacco occupies but .5 of 1 per cent of the crop acreage of the state and from this small per cent of acreage there is produced 2.8 per cent of the crop value of the cultivated acreage of the state. For every 1 per cent of acreage which tobacco occupies it brings to the state 5.6 per cent of the gross crop value of the state, exclusive of fruits, nuts and crops reported without acreage. Table No. 2 shows how the crop acreage is taken up by the different crops of the state and also the relative value which each crop produces. There is also shown the percentage of value of each per cent of acreage which each crop returns. Plate III represents the division of the crop acreage and the division of the value of these crops in a graphic form.

Table No. 2—Tobacco Relative Acreage and Value Compared With Other Crops of Pennsylvania, Census 1920

Crop	Per Cent of Acreage	Per Cent of Value	Per Cent of Value for 1% of Acreage

Tobacco Has High Producing Power

Just why tobacco in Pennsylvania on such a relatively small acreage can produce a relatively large per cent of value lies in the fact that tobacco has a high producing power per acre. Therein is its great economic value as a crop to the agriculture of the state. Plate IV graphically illustrates the relative wealth producing power of tobacco as compared to the other crops which make up the greater part of the agriculture of the state.

According to the Census of 1920, tobacco produced a value of $234 for each acre on which it was grown. This value decreased to $211 per acre for the crop year of 1922, as reported in the crop estimates of the Bureau of Agricultural Economics. This decrease from $234 to $211 per acre is but a relatively small decrease as compared to the decrease in value per acre of all other crops. Corn, for instance, decreased in 1919 from a value of $70.75 to $32 per acre in 1922. Similarly wheat decreased in acre value from $37 in 1919 to $20.35 in 1922. The relative value of other crops for 1919 and 1922 is shown in Table No. 3. It is a credit and honor to tobacco as a crop that in the face of decreasing crop values, this crop alone decreased to but a small extent.

Table No. 3—Tobacco Value Per Acre Compared With Other Crops of Pennsylvania

Crop	Value Per Acre 1919*	Value Per Acre 1922**	Acres Required to Equal the Value of 1 Acre of Tobacco 1919*	Acres Required to Equal the Value of 1 Acre of Tobacco 1922**

*Combiled from U. S. Census 1920.
**Compiled from Crop Estimate, 1922, U. S. Department of Agriculture, Bureau of Agricultural Economics.

Wealth Producing Power

The great wealth producing power of tobacco can best be observed by comparison to the other important crops of the state.

Basing the comparison on the crop statistics supplied by the Bureau of Agricultural Economics, the corn crop of Pennsylvania had an acreage value of $32 per acre in comparison to an average value of $211 per acre for tobacco. It would thus require 6.6 acres of corn to equal the value of one acre of to-

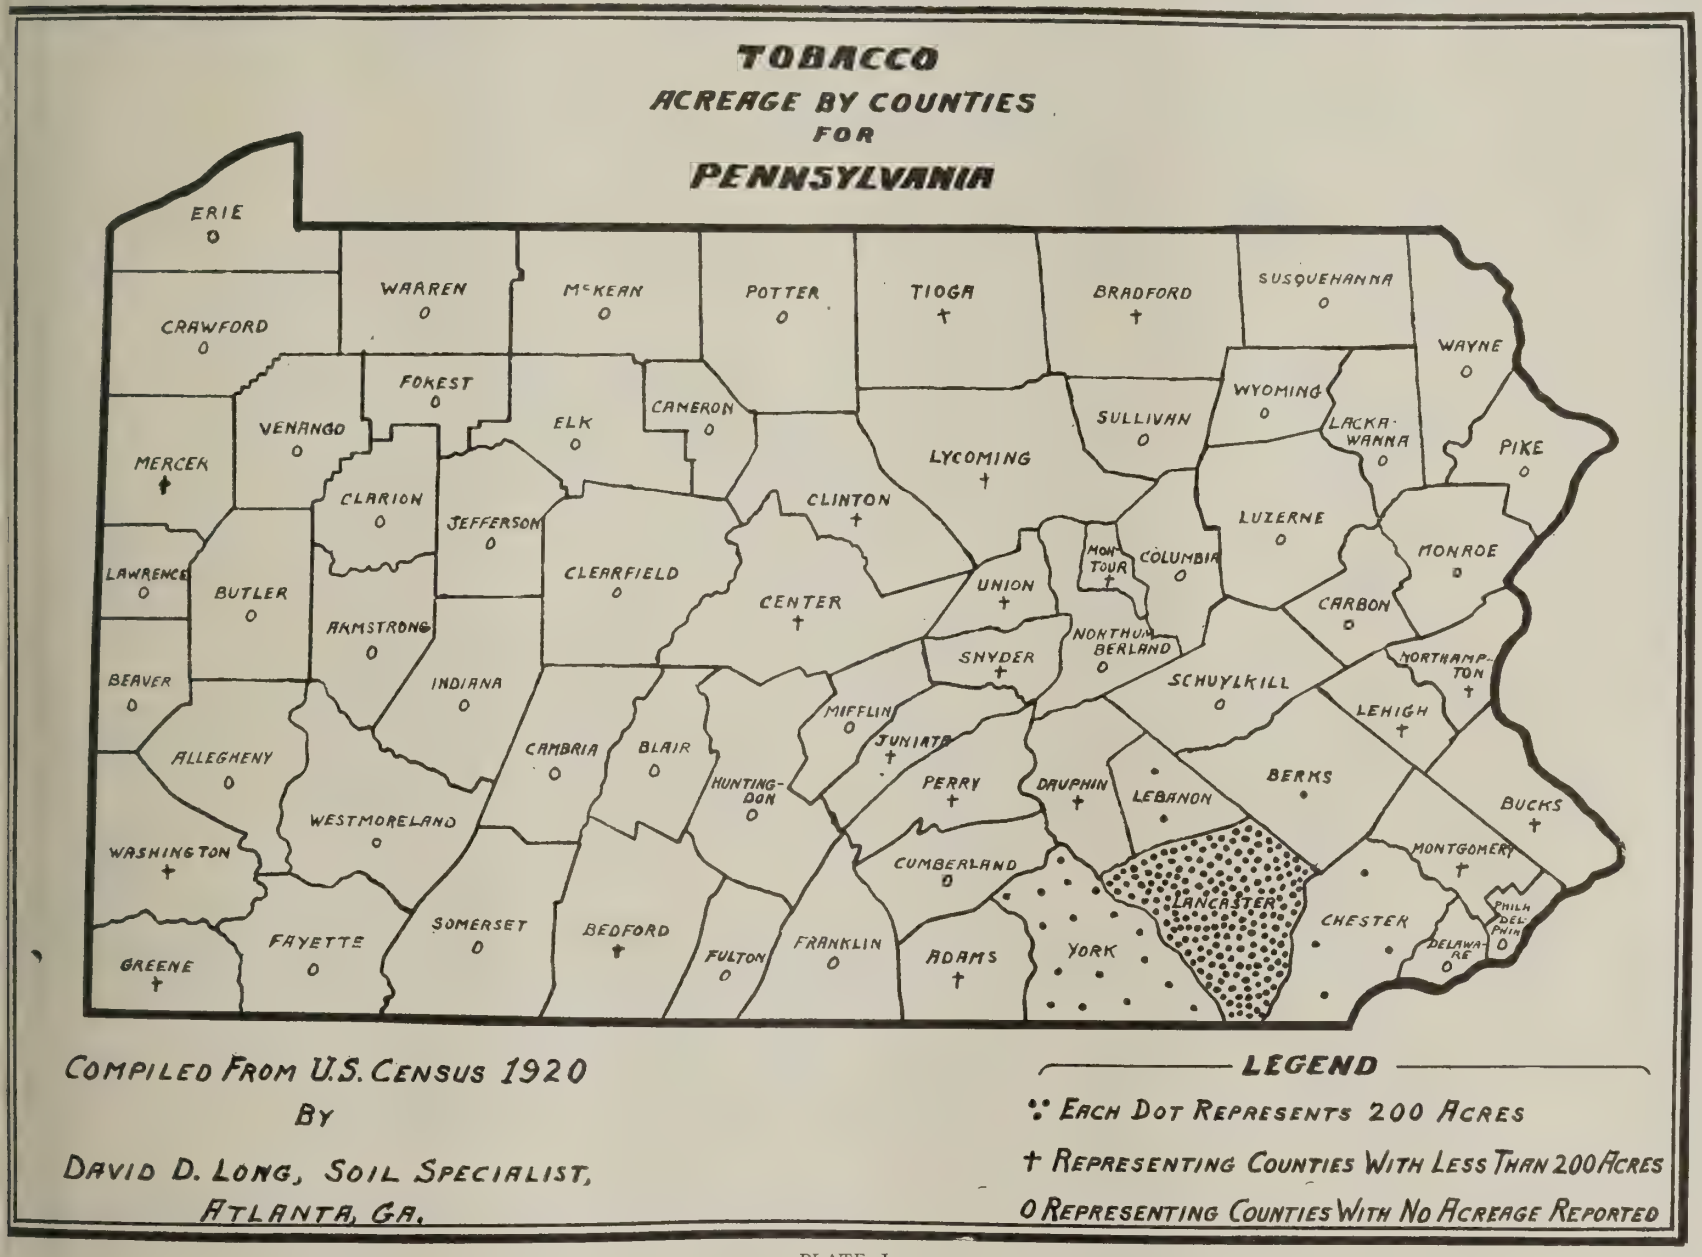

PLATE I

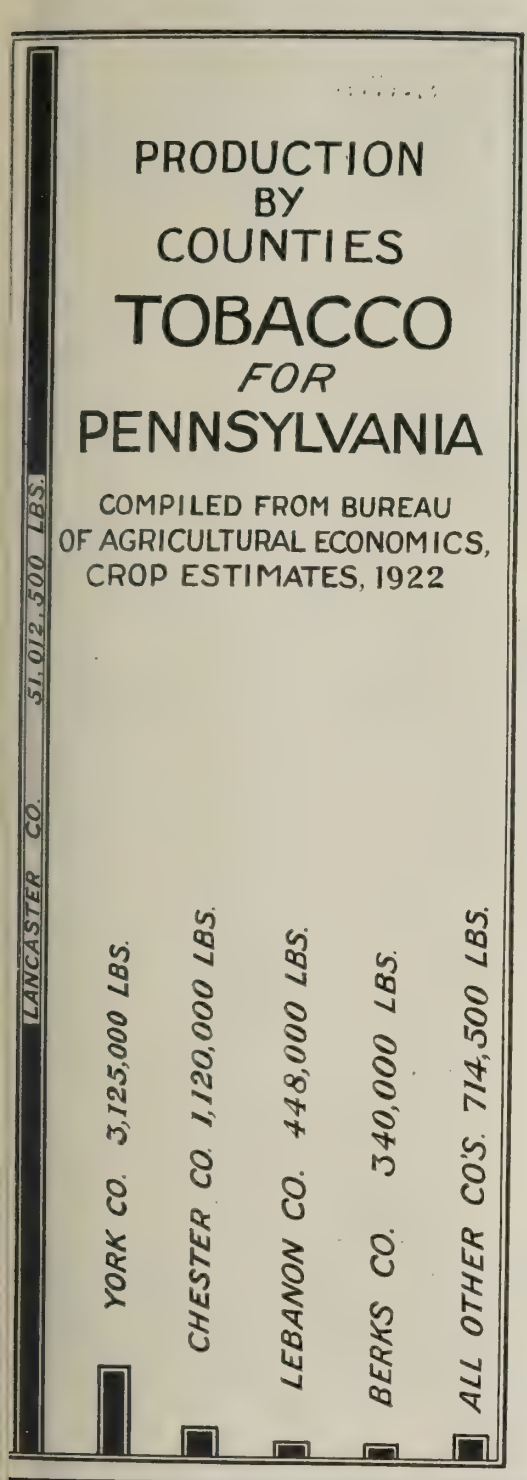
WARNING

To Cigar and Tobacco Manufacturers

It has come to our attention that a spurious imitation of the well known "ROSE OF LATAKIA" casing wine and flavor for cigars, cigarettes and smoking tobaccos, is being offered to the trade as "the same article at a cheaper price" by persons who falsely represent themselves as having been in our employ.

Genuine "ROSE OF LATAKIA" can be obtained only from us. For fifty-one years we have manufactured "ROSE OF LATAKIA" and are the sole proprietors and manufacturers of this flavor. The formula and process by which "ROSE OF LATAKIA" is made are both patented and secret, and cannot be imitated.



"ROSE OF LATAKIA" is a heavy fruit wine, mellowed and aged in the wood, and guaranteed to impart a lasting aroma to the tobacco, eliminating all harshness and "bite." Cheap imitations containing chemicals, synthetic flavors and fruit ethers are not only fraudulent but injurious to the tobacco, and the results which they produce quickly evaporate.

36 FRONT STREET

NEW YORK

bacco. For corn to produce an equal wealth as that produced by tobacco on 43,000 acres there would be required of corn an acreage of 273,500 acres.

The wheat crop of 1922 brought to the state an average value of $20.35 per acre. It would take 10.4 acres of wheat to produce a value equal to that which one acre of tobacco brought. It requires 445,500 acres of wheat to produce the wealth which tobacco produced on 43,000 acres.

The oat crop of Pennsylvania produced a value of only $16.30 for each acre planted in 1922. As 12.9 acres of oats are required to produce the money value equal to one acre of tobacco there would be required 556,000 acres of oats to produce the wealth which the small acreage of tobacco produced in 1922.

The rye crop for 1922 had a low producing power per acre. Consequently 14.2 acres are necessary to equal in value one acre of tobacco and it would require to produce the wealth equal to that obtained on 43,000 acres of tobacco, 614,200 acres of rye.

The value of all hay crops of the state was $23.20 per acre which necessitates 9.1 acres to equal the value of one acre of tobacco. There would, therefore, be required 391,800 acres of hay crops to produce the value which tobacco produced on 43,000 acres.

The potato crop is more highly specialized and consequently has a greater value per acre than the general farm crops. The value of the potato crop per acre in 1922 was $80.80 and 2.6 acres would be required to equal one of tobacco. At this average value 112,400 acres of potatoes would produce the same money value as was produced on 43,000 acres of tobacco during the same year.

The value of tobacco may be emphasized in another manner. In the tobacco growing region of Pennsylvania a common rotation consists of wheat, followed by a hay crop the second year. The third year the land is planted in corn, which in turn is followed by tobacco. Under average conditions for the state at large in such a rotation the value of the tobacco crop per acre would exceed the combined value of the other three crops by $135.45 an acre.

In a cost of production survey by Dr. William Frear and Professor E. K. Hibshman, of the Pennsylvania State College of Agriculture, it was found that the cost per acre of tobacco production ranged from $90.07 to $126.74 with an average of $112.42 per acre. This was in 1908. The cost included "the rental of the lands and buildings, the depreciation of equipment, the expense of preparing the land in its manured state, of planting, cultivating, harvesting, curing, stripping, preparing the crop for markets and of delivering it to the railroad."

Later information reveals equally striking facts in regard to the cost of producing tobacco. It was found by the Pennsylvania State College that for the crop year of 1921-22 on 43 farms producing tobacco in Lancaster County that the cost of production per acre was $143.29. It will be recalled that the value of tobacco in Pennsylvania for 1922 averaged $211 per acre. This leaves an average profit of $68.71. This $68.71 profit is just 6 cents more than the combined average acreage values of corn, oats and wheat. In other words, the profit of tobacco per acre, based on these average values, was just 6 cents more than the combined amount which corn, oats and wheat brought to each acre on which they were planted.

***Table No. 4—Tobacco Relative Acreage and Value Compared With Other Crops for Lancaster County Pennsylvania**

This Letter and Drawing Speaks for Itself

WAR DEPARTMENT
GETTYSBURG NATIONAL PARK [redacted]
GETTYSBURG, PA. April 30, 1923

C. E. Miller & Sons
Gentlemen:

On friday night last I took one of your "Pure Grit" Cigars and Smoked it up to less than ½ inch of the stub end.
It held the ash intact the whole length and burned evenly.
I made a sketch of it which I inclose it shows, what I consider are, proofs of a perfect Cigar.
I inclose my Check for $6 00/100 for which Send me by parcel post two boxes of Pure Grit Cigars, of 50 Cigars each.

Very respectfully
E. B. Cope
U.S. Public building
Gettysburg Pa.

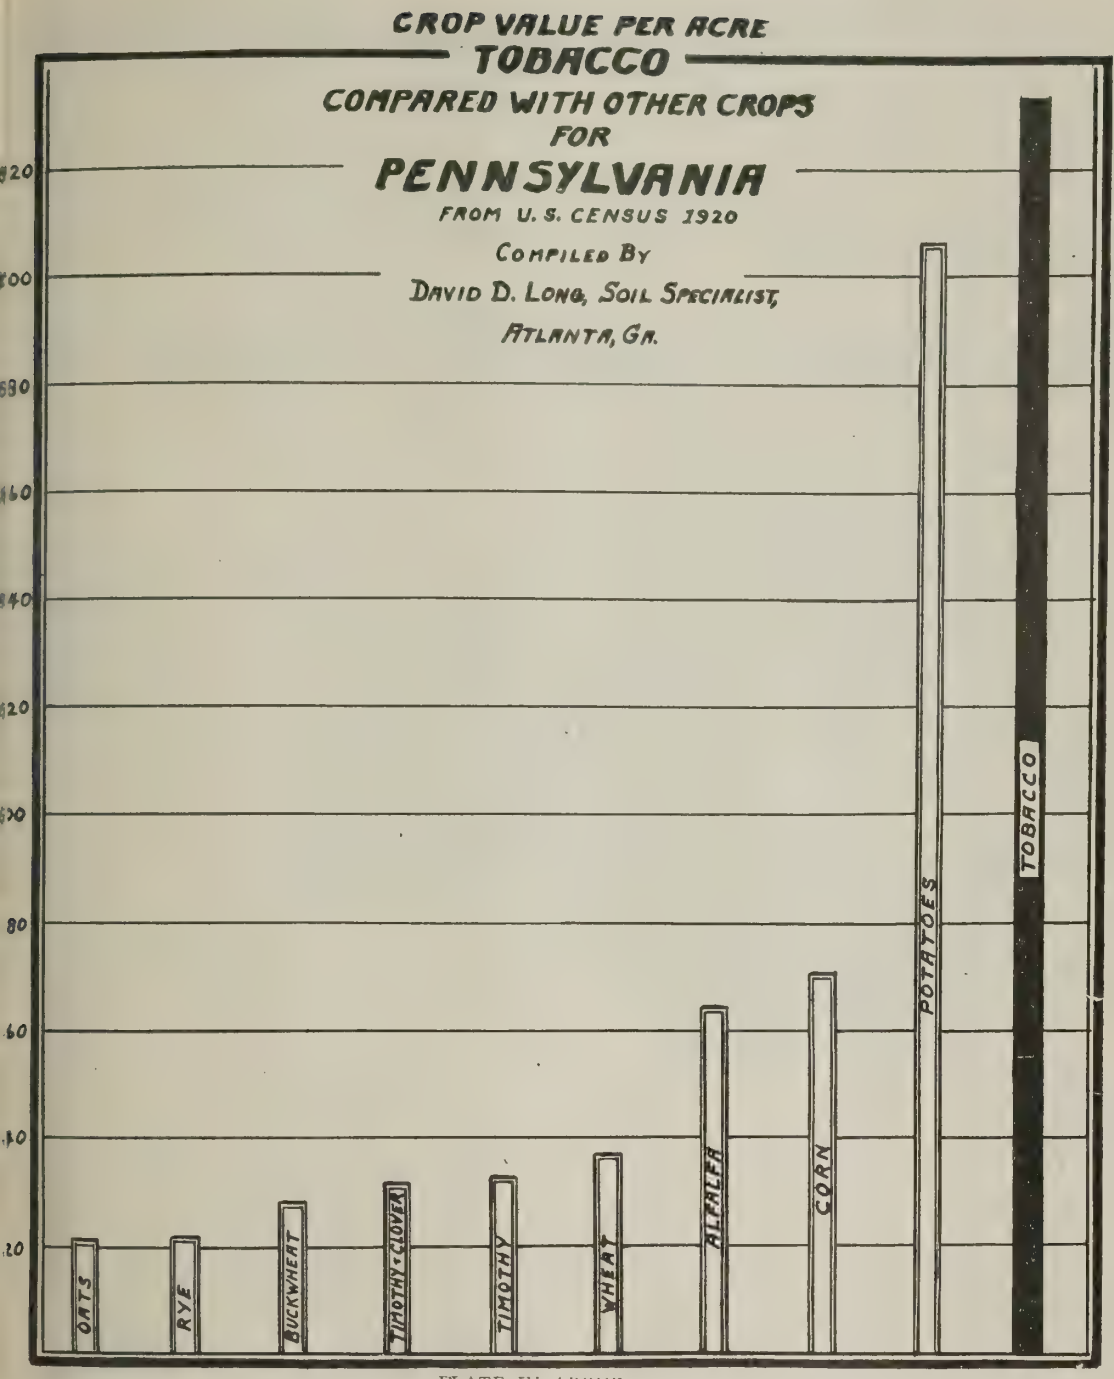

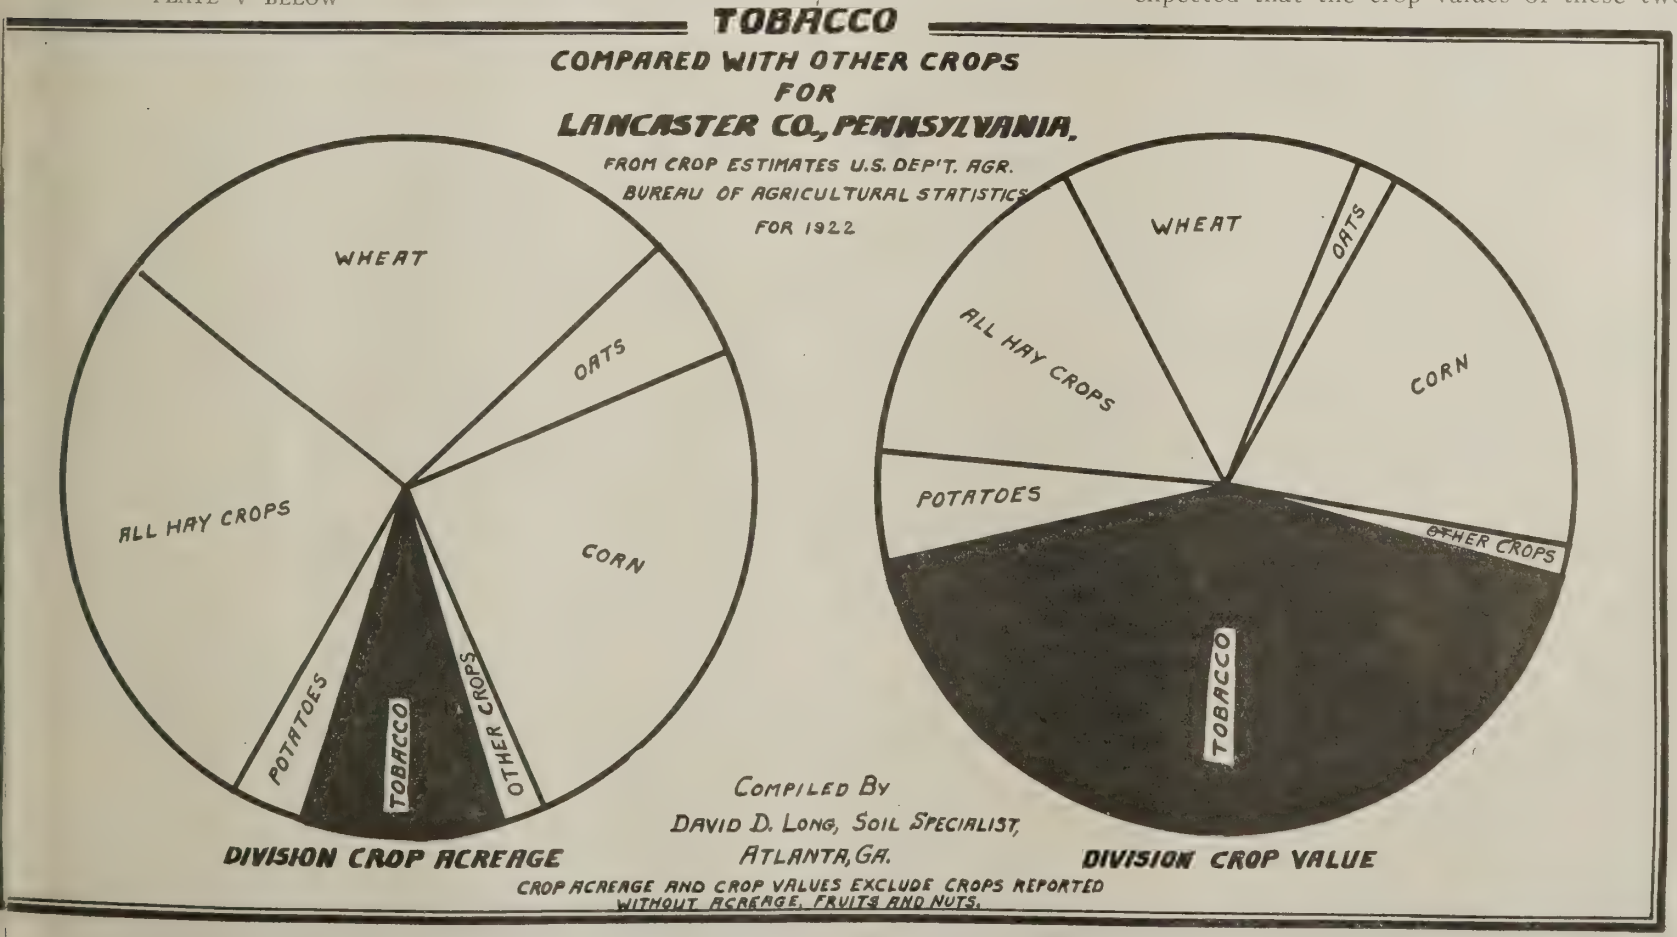

PLATE IV ABOVE

PLATE V BELOW

County produces the bulk of tobacco in the state of Pennsylvania, it may be well to glance at some of the economic points of tobacco production in this country. Table No. 4 shows how the crop acreage of the county is divided between the common cultivated crops of this county. It is found here that tobacco in Lancaster County occupies only 9.4 per cent of the crop acreage. It is also found that tobacco on this 9.4 per cent crop acreage brings in 42.7 per cent of the value which this acreage produces. Plate V graphically represents the division of the crop acreage, exclusive of fruits and nuts, and also the division of the total crop value produced from this acreage. The total acreage for Lancaster County in 1922 was 409,945 acres and the crops from this acreage had a value of $20,306,687. Tobacco was planted on 38,500 acres and produced a value of $8,672,125. This 38,500 acres produced 42.6 per cent of the total crop value harvested from 409,945 acres. This is possible because tobacco in Lancaster County in 1922 returned an average of $225 per acre.

The wealth producing power of tobacco at $225 per acre may be more vividly realized when compared to the value produced by other crops in this county. The same year corn produced an average value of $39.20; oats, $18.60; wheat, $23.90; hay crops, $28.62, and potatoes, $71.25 an acre. Tobacco, in fact, produced an excess of $43.43 per acre more than the combined acreage values of all of the above crops. No other farm crop of Pennsylvania has the producing power to compare with that of Pennsylvania's tobacco crop.

Great Economic Value

The great economic value of tobacco in the agricultural system in Pennsylvania, and particularly Lancaster County, becomes apparent when York and Lancaster Counties are compared from a productive standpoint. For the purpose of comparison eliminate tobacco for the time being, both from the acreage and value standpoint. Then according to the Bureau of Agricultural Economics the crop acreage of York County would be 352,305, while that of Lancaster County would be 371,445 acres. The acreage in both counties is comparatively close and likewise it can be expected that the crop values of these two

To the Retailers and Consumers of

New York Hand Made Quality 5c Cigars

New York Hand Made is registered at the U. S. Patent Office in Washington, D. C.

Retailers It is our aim to place on the market a 5c Cigar which will stand the test and bring customers into your stores for years to come. We realize that you must have a fair profit so that you can pay a just interest on your investment. New York Hand-Made is worth 5c straight of any man's money and you will please sell them at this price and when they desire cheaper cigars give them some other cheaper brand of less quality.

Consumers New York Hand-Made is manufactured in 10 New York Hand-Made Factories for the American Consumers under the supervision of the World's Greatest Experts in blending Tobaccos together; in fact it is impossible for the human brain combined with ample capital to make a better cigar to be sold at 5c straight. The filler of the New York Hand-Made is small pieces of tobacco purchased from manufacturers of high price cigars in Cuba, Porto Rico and America. Scientifically blended together by blenders who know their business and if the same tobaccos were long filler the New York Hand-Made would sell for 15 or 20c each (The New York Hand-Made will remain short filler indefinitely), all of the filler used in the New York Hand-Made is from 5 to 7 years old. Rich, aromatic, mild, pleasant and pleasing to the taste. The Binder is of the best burning domestic tobaccos, mild and fragrant, properly cured and resweated, in fact just the binder for the cigar. The wrapper is grown in Florida and is of the best quality, what they term as prime lights. We believe that based on Quality, Justice for the Growers, Workmen, Jobbers, Retailers, Consumers and a fair manufacturing profit that we are honestly giving to the smokers the best cigar in America for 5c straight.

We will be pleased to hear from any one who can criticize the cigar for 5c straight.

counties would be similarly close. True to expectations, the crop value of York County would be $10,849,057, compared to $11,634,562 for Lancaster County. Returning now to actual conditions, it is found that by adding the 2,500 acres of tobacco to York County's acreage and the 38,500 acres of tobacco to Lancaster County's crop acreage that conditions are vitally changed. The value of all crops of York County now becomes $11,224,057, while that of Lancaster County becomes $20,306,687. Through that large acreage of tobacco with a wealth producing power of $225 per acre, Lancaster County forges far ahead of York. It is the high acreage value of the crop which adds so materially to the wealth of the county.

The value of tobacco in Lancaster County may be again realized from a different viewpoint. The value of all crops of the county, exclusive of fruits and nuts and crops grown for seed, was $49.50 per acre of crop land in 1922. Substituting corn for tobacco the crop value of the county would be reduced by $7,162,925 and the average value of all crops per acre of crop land would drop from $49.50 to $32.50 an acre.

The Thorough and Extensive Tobacco Experiments in Pennsylvania

Very Few Farm Products Require so Much Rigid Control by Growers and Manufacturers Over so Many Conditions as Tobacco—Many Questions Present Themselves at Every Point—Some Excellent Results Obtained Through Experiments.

By OTTO OLSON

Assistant in Tobacco Investigations, Bureau of Plant Industry, United States Department of Agriculture, Branch at Ephrata, Pa.

EXPERIMENTAL work with tobacco in Pennsylvania is conducted on a most thorough and extensive scale. There are very few farm products that require so much rigid control by growers and manufacturers over so many conditions as tobacco, in proportion to the large values affected and the area under cultivation. Despite years of careful observation many questions present themselves at every point in the culture and manufacture of tobacco, and await for their solution the application of more fully controlled methods of experiment than the busy farmer or manufacturer has either training or time to employ. Similarly, few crops are so disastrously affected by unfavorable conditions of growth and by unskilled treatment, while on the other hand few offer such large rewards to intelligent care.

To Improve Yield and Quality

The objects of the experimental work in Pennsylvania are primarily to improve the yield and quality of the tobacco produced, by studying the many conditions affecting it in its various stages as a growing crop, and as a raw material under successive manufacturing operations. The work is conducted by the Pennsylvania State College Agricultural Experiment Stations in co-operation with the Office of Tobacco Investigations, Bureau of Plant Industry, U. S. Department of Agriculture, and the Tobacco Growers' Associations of Lancaster and Clinton Counties. At present work is under way in Lancaster, Clinton, Chester, Tioga and Bradford counties.

First Experiments in 1893

The first official tobacco experiments in Pennsylvania were begun in 1893 by Dr. Wm. Frear of State College, upon the request of the Lancaster County Tobacco Growers' Association, then newly formed. These experiments included fertilizer and curing work, and later variety and strain tests, of which the strain tests especially attracted much attention owing to the excellent results obtained. Shelter tent experiments with Sumatra tobacco were conducted from 1902 to 1908, and comprehensive studies of the cost of producing tobacco were made on a number of farms in Lancaster county during 1908 and 1909.

Bulk sweating of tobacco was introduced in Pennsylvania through experiments conducted during 1900 and 1901, and is now practiced by all progressive packers in the state.

Extensive tobacco seed bed experiments have been conducted including steam sterilization; fertilizer work; seed separation; rate of seeding; fumigation; spraying and poisoning; value of glass versus muslin covers, etc.

Fertilizer Experiments

Numerous fertilizer experiments have been made on different soil types in a number of tobacco producing sections of the State, producing results of considerable value by increasing the yield per acre and improving the quality. Leading fertilizer manufacturers have adopted formulas giving best results.

Cultural experiments of importance in tobacco production have developed proper planting distances and topping heights on different soil types; influence of time of topping upon distance between leaves on the stalk, and the necessity of systematic suckering.

Considerable work has been devoted to combating the destructive diseases affecting tobacco plants in Pennsylvania, such as root rot, mosaic or calico, and wildfire.

Establishing of Standard Types

Probably the most important work performed, however, is the establishing of standard types of seedleaf and Havana seed through strain tests, and the developing of high-yielding, disease-resisting types through seed breeding.

Other experiments include reduction of the nicotine content of cigar leaf tobacco; producing tobacco with high nicotine content for commercial extraction of nicotine, which is used as an insecticide; curing experiments, using artificial heat to prevent pole-burn, and testing the possibility of re-drying cigar leaf tobacco as a control for black rot. Farmers carefully attend to growing and handling their crops, and follow all developments in experimental work with keen attention.

All Interests Work in Harmony

The Lancaster County Tobacco Growers' Association and the Lancaster Leaf Tobacco Board of Trade have worked hand in hand for years to consistently improve the quality of the tobacco crop and the methods of producing it. The State and Federal Governments maintain experiment stations where problems affecting the grower and packer are studied, and if possible, remedied.

Successive Steps Taken

Tobacco culture in Pennsylvania requires a whole year for consummation, beginning with the preparing, steaming and seeding of seed beds in April; plowing and fertilizing in May; transplanting, cultivating, and poisoning to destroy insects and diseases, during June and July; topping and suckering in August; harvesting in September; curing during October and November; stripping, sorting and baling during December, January and February; and delivering to the buyer during January, February and March.

Expertness and Care Required

The most expert and painstaking labor is necessary during all these operations, as neglect in any one particular may cause great loss. As illustrating this statement it may be mentioned that neglect in properly spraying the young plants in the seed bed may result in the total destruction of the year's crop by Wildfire, or allowing too much moisture in the tobacco during stripping will cause that dreaded disease of packed and sweated tobacco, Black Rot.

Those interested in Pennsylvania tobacco should procure a copy of Bulletin No. 371, entitled "The Cigar Tobacco Industry in Pennsylvania," just published by the Pennsylvania Department of Agriculture, Harrisburg, Pa., for free distribution.

A. Roig & Langsdorf, Inc.

A 50,000,000 per year production and sale of an all hand-made cigar of high quality, the product of a half century old corporation with which has been identified, from its very foundation, experts of life-long training in manufacture and distribution of cigars, is the enviable record of the firm of A. Roig & Langsdorf, at present engaged in intensive national publicity campaigns in nationally known magazines to bring into the lips of every smoker their famed leader, the Girard.

The business, now grown to such proportions that it employs in nine factories, situated throughout Pennsylvania, over 600 of the most proficient hands available, was started in a modest way at 6th and Arch Streets, but a stone's throw from its present location at 315 N. 7th St., by Antonio Roig, a Cuban cigar maker and expert tobacco blender.

A decade later, there became associated with him Isidore Langsdorf, the firm's name then being established as A. Roig and Langsdorf. Mr. Roig looked after production and Mr. Langsdorf after distribution. In 1906, when Mr. Roig passed away, Jacob Loeb Langdorf was admitted into the firm, having taken over the Roig interests. In 1910, there was placed on the market the firm's present day leader, Girard, which is now marketed in ten sizes. In 1915, upon the death of the surviving partner, Isadore Langsdorf, the corporation was organized with Jacob Loeb Langsdorf as President and Treasurer; Jacob L. Krauss, Vice President and Fred C. Belson as Secretary.

In 1922, Edwin Wile, formerly with the General Cigar Co., and the Consolidated Cigar Corp., became associated with the corporation as manufacturer and director. With his twenty years of experience in the practical end of the business, he is able to give the firm exceptional guidance in production, recognition of which is evidenced by the patronage of discriminating workers for Girards.

The main factory and headquarters are in a five story structure which was acquired a quarter of century ago. The fourteen members of the sales organization look after distribution in all sections of the country, but the field is particularly cultivated in Pennsylvania, Ohio and the Middle West, throughout which territory there are 175 distributors. Jacob Loeb Langsdorf is now supervising sales, with the assistance of Simon Dietz.

The Growth and Importance of Pennsylvania Tobacco Industries

Keystone State Leads as Producer of Cigar Tobacco—Locally Grown Leaf Contributes to Success of One of the Greatest Cigar Making Centers in the World—Statistics Show Tobacco Industries of State To Be Remarkably Prosperous.

By Dr. ARTHUR SELWYN BROWN

PENNSYLVANIA stands pre-eminent among the United States as a producer of cigar tobacco. Only Wisconsin approaches, and sometimes has a larger production. The yields of these two states may be regarded as practically the same in poundage, but the economic value of the leaf produced in the Badger State is of far less importance to the state than that of Pennsylvania to the Keystone State on account of the fact that the locally grown leaf in Pennsylvania contributes to the success of one of the greatest cigar manufacturing centers in the world.

Pennsylvania is one of the richest states in the Union when viewed from the standpoint of natural wealth. Its forests, mines, quarries and fields are all great producers of wealth. Its transportation facilities are also particularly valuable. This has resulted in an enormous commercial and manufacturing development. The steel and engineering works of the state have had world-wide publicity, like the coal and oil resources. Their contributions to the wealth of the state, and to the national well-being, are well-known. Their development, indeed, may be taken as an index of the increase of national wealth and power.

Industrial developments on a large scale began in the early seventies. Comparative figures show that the value of the whole of the manufactures in Pennsylvania in 1870 amounted to $811,894,234. Last year they exceeded $11,000,000,000. The tobacco manufactures in 1873 produced products valued at $2,000,000. Their present annual value exceeds $144,500,000.

Tobacco Manufacturing Establishments

There are now more than two thousand establishments engaged in manufacturing tobacco within the state, having an aggregate capital of $57,500,000. The three outstanding producers in the state, in the order of their annual value, are metal and metal products, textiles and textile products and mines and quarries. The aggregate value of these is much greater than the value of the tobacco growing and tobacco manufacturing industries. Yet, there are other factors which increase the industrial value of the tobacco industries. One of these is the steadiness of operation.

Tobacco statistics indicate that the tobacco industries of the state are remarkably profitable, sound and prosperous. They show a continuous upward growth and this places them at the head of the state's harmonious industries. While the materially stronger industries are subjected to frequent industrial and financial changes and irregularities, the tobacco industries show a conservatively steady growth. This makes them socially strong and, combined with the publicity gained by the world-wide distribution of the state's manufactures of tobacco and tobacco products, the cumulative effects, judged as psychological propaganda materials, have high values set upon them. They greatly enhance the foreign views regarding the state's wealth, manufacturing capacities and resources. These are intangible economic factors of immense importance that are rarely clearly recognized. When we survey their steady upward growth from 1872, when the state began the publication of its annual statistics, until the present time, we are surprised to find the value of the publicity they have given the state and their direct and indirect effects upon the state's wealth and commercial status.

Tobacco Cultivated by Colonists

Pennsylvania was settled at an early date and, although exact dates have not been determined, there are evidences that tobacco was cultivated on the farms of the first colonists. Both Spanish and Indian tobacco was grown. William Penn exported tobacco from Pennsylvania to England in 1689. It is probable that all of this, which was forwarded as part of the cargo of fourteen ships, was collected from the Colony's farms. In 1840, the total production was only 325,018 pounds. There was a marked increase in all the tobacco industries of the state in 1869, and the statistics of tobacco, cigars, cigarette, snuff and other products were high. There was another period of great activity in 1880, and since then all the statistics have grown annually by leaps and bounds. Today we find Pennsylvania not only a great tobacco growing state, but also an active center of cigar, tobacco, cigarette and tobacco products' industries. The cigar production exceeds 3,000,000,000 cigars per annum. There is also a production of 2,000,000,000 cigarettes, and about 5,000,000 pounds of smoking and chewing tobacco.

Largest Cigar Producing States

The revenue statistics show that Pennsylvania has the largest manufactures of cigars among the states, and ranks second in the manufacture of little cigars, and about fifth in the manufacture of cigarettes. This is a showing which is not approached by any other state and shows the value of the tobacco industries of the great Keystone State.

Tobacco of Distinctive Quality

The tobacco grown in Pennsylvania is a special type of large leaf which has been locally developed as the result of select breeding since 1837. The original seeds were secured in Cuba. Traces of the original stock, however, have now been obliterated and the leaf has its own distinctive characteristics. Yet, seed-growers, many of the tobacco-growers' associations, and experts of the State and U. S. Departments of Agriculture are still making strong efforts to raise the standard of the tobacco crops. Seed-breeding by the most scientific methods is carried on in numerous magnificent experiment stations which are furnished with everything necessary to study plant fertilization and hybridization

The Banner County

Tobacco is grown in a majority of the counties of the state. There is one county, however, which is of more importance than the others as a tobacco producer. Lancaster county is the source of the leaf from which a large proportion of the cigars in the United States are at least partly manufactured. This eminence of the county is due to numerous factors, the chief of which are the character of the soil, the climatic influences and the economic returns secured by farmers from their tobacco crops. York county is next after Lancaster in production of leaf tobacco. The Lancaster-York soils contain large quantities of limestone. They produce large crops of dark, heavy leaf very suitable as a filler for cigars. This leaf, when properly cured, possesses a mild, agreeable aroma, and burns freely. It is remarkably free of resinous substances and has a low nicotine content. Growers are now striving to reduce the nicotine contents still further, while retaining the aroma and fine-burning qualities of the leaf.

Numerous Cigar Factories

Cigar factories are prominent features in the tobacco growing counties. York county has the largest production. The Revenue returns show that receipts for cigar stamp sales amounts to about $2,500,000 to $3,000,000 per annum. The output of the factories of this county run from one half to a billion of large cigars yearly. This county produced 860,000,000 cigars in 1920.

Manufacturers of cigars, like the growers of leaf tobacco, strive to increase the commercial status of their counties by improving the quality and appearance of their products. There are numerous co-operative associations and other organizations doing effective work in raising the quality and fame of the cigars and tobacco products manufactured in Pennsylvania.

This explains how it has come about that Pennsylvania is not only a great leaf-growing state but is also one of the greatest of tobacco and cigar manufacturing states.

Cigar Smoking More Prevalent

The cigar has always been considered a smoke de Luxe and Americans have long being connoiseurs of cigars. Today, cigar smoking is more prevalent, and the cigar industries are more prosperous than elsewhere. The latest statistics show that wholesale tobacco sales by American manufacturers and importers are averaging about 650,000,000 per month and comparative returns indicate that cigar consumption is steadily increasing.

State Always Noted for Cigars

Pennsylvania has always been noted for its cigars. Many of the early settlers were Dutch and German immigrants who were fond of smoking special types of cigars. In the course of time stogie factories were established in the larger towns and about 1850 Philadelphia became the leading center for the manufacture of cigars and stogies from locally grown leaf. Several of the largest manufacturing firms in that city today were founded in the "Fifties" and "Sixties." The amount of tobacco grown in the state in 1850 was about 1,000,000 pounds. In 1860 it was three times as large; while today it amounts to nearly 60,000,000 pounds. The state-wide progress in tobacco culture and cigar manufacturing has shown marked stages of advancement. There was a three-fold increase in the "forties"; and a similar one in the "fifties." The Civil War, and the subsequent business depression adversely affected progress for a time, but in the "seventies" there was an eleven-fold increase over the "sixties."

A Source of Fame

The Pittsburgh and Pennsylvania stogies, which have made the state famous, derived their name from the Conestoga River, in Lancaster county, where they were first made by German and Dutch farmers. Pittsburgh, Philadelphia and Wheeling, W. Va., have now the leading factories for these long cigars and there are also many made in Lancaster county.

The state's factories, now numbering about 2,000, manufacture all types of large and small cigars. At the end of 1918, statistics showed the state production for the year of 2,000,000,000 cigars. The returns for the present year promise to greatly exceed those astonishing figures.

Most of the Pennsylvania cigars contain seed-leaf tobacco fillers, though it may be blended with Havana, Java, Zimmer Spanish, Little Dutch, Gebhart and other varieties of leaf. The local leaf, however, possesses every quality

CANS

Leading manufacturers of Cigars have found that our Lithographed Cans help to stimulate sales of their Cigars; hence pack their products in LIBERTY CANS.

The Cigar Manufacturer, producing a worthwhile smoke, cannot jeopardize his rapid turn-over by the use of an unattractive container.

An EVERLASTING advertising medium, even after the contents have been used.

If you desire Quality and Dependable Service, send your labels and specifications. Estimates cheerfully furnished. We can reproduce the most elaborate design on tin at a very resonable price.

LIBERTY CAN & SIGN COMPANY INC.

LANCASTER, PA.

hich distinguishes a good filler, including easy urning, freedom from coaling and charring, nd the coherency of ash.

Pennsylvania stogies, like many other types t cigars, are chiefly wrapped in Havana wrap-rs. Pennsylvania leaf is too heavy for wrap-ng purposes.

Cigar Fashions Change

There are fashions in smoking and in cigars, s in everything else. Changes in fashion, of ourse, affect all industries. There have been any fashions in cigars in the United States. hen Philadelphia was the chief commercial ty, *bon vivants* assured us that "Mexican ci-rs are the choicest." Preference at that time as shown for cigars imported from Mexico.

About 1803, cigars made in New Orleans ere considered the best and brought the high-t prices.

Some years later, tobacco known as Yarra, hich was grown in the Eastern part of Cuba, as greatly esteemed. About 1830, Yarra prin-pes, which were often flavored with rum and nnamon were the most expensive cigars that ould be purchased.

About 1853, cigars imported from Germany came popular; for some years subsequently illions of German cigars were imported into ew York and Baltimore. The better kinds of ese German-made cigars contained tobacco own in Paraguay and Brazil.

Manilas Were Favorites

In the period immediately preceding the Civil ar, the fashion among smokers favored Ma-la cigars. The choicest brands were more stly than the best Cuban cigars. According the account of a banquet held in Cincinnati in 65, some "Manila especials" were described being the most "beautiful, tasty and expen-ve cigars ever imported into America."

When Hayes was President, newspaper re-rters, thought that a fat, black cigar was sug-stive of opulence. Novelists of the period scribed envied rich men in the act of smoking g, black cigars. In fact and fiction, high-ced cigars were dark. The demand for the rker colors was so pronounced that, failing get enough natural oscuros and maduros out the tobacco they bought, some manufacturers ve cigar wrappers an artificial inky hue by plications of prune juice.

There was a period when slightly spotted or scolored tobacco of a certain crop obtained vor. "Speckled" cigar wrappers were much sired. The spots were supposed to indicate superior quality of tobacco. Manufacturers sisted on getting spotted leaf. To supply the mand, which persisted for several years, emicals were used to cause spots to appear on tobacco. Some of the tobacco was spotted ile growing in the field. Other leaf was eated specially" in cigar factories.

Porto Ricans Had the Call

After the Spanish-American War, Porto can tobacco came to the front. Cigars made irely, or partly, of Porto Rican tobacco had great vogue. In a popular novel by Bronson ward, the hero, a demonstrator of all the re-ement that should distinguish a gentleman o belonged to the most exclusive clubs, ex-plified to a nicety the satisfaction derived m smoking a "slender Porto Rican panetela." d forthwith, in clubdom and elsewhere, there s an immediate demand for "long and thin" ars from Porto Rico. In some circles, this hion still persists.

Changing Again

The manufacturing returns of the Pennsyl-ia tobacco factories indicate that cigar hions are now changing again towards do-tic cigars and it will not be surprising to find in the near future that Pennsylvania cigars in ruling favor in America and poets may tempted to sing their praises as Friedrich rc did in the following poem:

To a Pennsylvania Stogie

The warmth of thy glow
  Oh! Penna cigar
Makes happy thoughts flow
And sends sorrow afar.

When the strong wind blow,
  The brighter thou burnest!
And life's dreary woe
  Less gloomy thou turnest.

When I feel on my lip
  Thy generous kiss,
Like they flame-illum'd tip,
  All is rosy-hued bliss.

No longer can sorrow
  Encumber my heart;
And all fears of tomorrow,
  In smoke-dreams depart.

Dear hunter of sadness!
  Life's best happy star!
I greet thee with gladness
  My Penna cigar.

Lytton's Misfortune

Bulwer Lytton was a famous smoker and we can imagine how he would have enjoyed a good Pennsylvania cigar, had he been able to secure one in his time. From this statement taken from his writings: "He who doth not smoke hath either known no great griefs, or refuseth himself the softest consolation next to that which comes from heaven. 'What, sweeter than woman?' whispers the young reader. Young man, woman teases as well as consoles. Woman makes half the sorrows which she boasts the privilege to soothe. Woman consoles us, it is true, while we are young and handsome; when we are old and ugly, woman snubs and scolds us. On the whole, then, woman in this scale, tobacco in that; Jupiter hang out thy balance, and weigh them both; and if thou give the preference to women, all I can say is, the next time Juno ruffles thee—O Jupiter, try tobacco!"

That is what all the poets say. And their entrancing songs amaze the enemies of tobacco as the reciting of these words by James Whitcomb Riley by a child at a public function in New York, led to resignations from the International Art Society of members who opposed smoking:

An Old Sweetheart of Mine

An old sweetheart of mine!—Is this her presence here with me.
Or but a vain creation of a lover's memory?
A fair illusive vision that would vanish into air
Dared I even touch the silence with the whisper of a prayer?

This ever-restless sense of home, though shouts ring in the hall—
The easy chair—the old book-shelves and prints along the wall;
The rare Habanas in their box, or gaunt church-warden-stem,
That often wags, above the jar, derisively at them.

The lamplight seems to glimmer with a flicker of surprise,
As I turn it low—to rest me of the dazzle in my eyes,
And light my pipe in silence, save a sign that seems to yoke
Its fate with my tobacco and to vanish with the smoke.

'Tis a fragrant retrospection—for the loving thoughts that start
Into being are like perfume from the blossom of the heart;
And to dream the old dreams over in a luxury devine—
When my truant fancies wander with that old sweetheart of mine.

A face of lily-beauty, with a form of airy grace,
Floats out of my tobacco as the Genii from the vase;
And I thrill beneath the glances of a pair of azure eyes
As glowing as the summer and as tender as the skies

I can see the pink sunbonnet and the little checkered dress
She wore when I first kissed her and she answered the caress
With the written declaration that "as surely as the vine
Grew 'round the stump," she loved me—that old sweetheart of mine.

But, ah! my dream is broken by a step upon the stair,
And the door is opened softly—my wife is standing there;
Yet with eargerness and rapture all my visions I resign
To greet the living presence of that old sweetheart of mine.

"Why did you object to the recitation of Riley's poem?" a rebel was asked.

"Because it mentions tobacco four times distinctly and it is supposed to be the dream of a smoker."

"Why did you declare the recitation to be seductive?" this objector was asked.

"Well, the little girl who recited the poem threw her arms over her head and there was an expression of infinite bliss upon her face when she spoke of the delights of tobacco. No wonder women are becoming degraded when they are allowed to witness children praising smoking in such an excellent way."

Fortunately, like all anti-tobacconists, those who opposed the artistic recital of Riley's poem simply received ridicule from their friends. Like all opponents of tobacco, they harmed themselves much more than they injured the sentiments of the smoking fraternity. There have been strong-hearted smokers since the early days of the human race and there always will be. It is just as foolish to attempt to reverse the running of a river's tide as to prevent smoking.

Side Lights on Cigar Industry and Cigar Boxes

The solidity of tobacco and cigar making industries is shown by the steady increase noted in the production of leaf and the consumption of cigars. Early in the "nineties" an English writer, commenting on the stability of the cigar-making industries said: "In spite of all the disquietude, the financial and political unrest of today, it is satisfactory to know from recorded facts and figures that the tobacco trades pursue the even tenor of their ways and are unaffected by surrounding economic depressions. Our cigar manufacturers seem determined not to let the grass grow under their feet. I remember the time when the British cigar was made only in one shape, and that was called Trabucos, a long, straight cigar, and the ingredients invariably, consisted of seed filler, German bunch with an outside Sumatra wrapper. This is a striking contrast to what manufacturers are doing today. Not long ago I was looking at a sort of map or chart hanging up in a manufacturer's office. Upon examining it more closely, I found it showed facsimile drawings of 300 different shapes and sizes in mould-made cigars, ranging from the clumsy-looking Manila shape to the very latest idea, namely, that known in the trade as the 'Torpedo' cigar, the ends of which are drawn to a point as fine as a Frenchman's moustache. Probably no one manufacturer uses half so many different shapes, but I believe they are all of them used by one or other of our manufacturers. One of the most important departures in British cigar-making was the introduction of the 'Press' cigar with its drop-lid box. The man who brought that

u evidently knew something. I believe the er first brand introduced to the public in this ne was called 'The Wreath of Gold.' It had remendous run for a time, a greater run, I elve, than any British cigar has ever had be- or since.

'n the matter of cigar-boxes, too, of late rs, new ideas have been introduced which old have quite startled the old-fashioned con- rative men of a past generation. I dare say ct of my readers have heard of and heard musical cigar-box, which is fitted up with f se bottom, beneath which a somewhat primi- musical-box is concealed. On pressing a on, or something of that sort, some non- right melody of the 'Willie, we have missed ' or 'The first rose of winter.' This idea, rever, is partly played out, and probably to make room for a still later innovation. mepiece cigar-box is being brought under notice of the trade, so that if you want to the time there will be no need to ask the proverbial policeman, provided your clockwork cigar-box is lying about handy. In this case a cheap timepiece is fitted so as to form the end of the cigar-box, the clock face, of course, being neatly fitted into the woodwork of the box.

"A more elaborate arrangement still is the octagon-shaped cigar-box. This has a handle in the center at the top of the box, on turning which eight little doors open outwards disclosing to view a choice collection of cigars while at the same time a musical-box fixed inside grinds out 'Linger Longer, Lou.' These are some of the actualities of the present. What the possibilities of the future are it would be difficult to say. It has been suggested, however, that a cigar-box might be constructed so that when you press the knob the lid opens, you take a cigar out, and the phonograph gives out 'Gladstone's last speech in the House of Lords.'"

While the elaboration of cigar boxes has not been carried to the extent described by the British author quoted above, progress, even in cigar-box making has been strongly in evidence in the United States in recent years, and today American cigars are packed and displayed in a manner worthy of the care taken in their manufacture.

Pennsylvania Cigar Making Sound and Progressive

The recorded facts and figures show that the cigar making industries of Pennsylvania are sound and progressive; that the Keystone state's large and little cigars and stogies have earned a gratifying world-wide reputation; their consumption is increasing, and they are everywhere winning new friends. The quality of the cigars now has an established reputation. All that is needed to sustain activity in the trade is active distribution efforts. These are being made and it may be confidently predicted that great as the success of Pennsylvania tobacco growers and manufacturers has been, it will be eclipsed by that of the near future.

A Brief Survey of Lancaster County's Tobacco Marketing Methods

System Has Had Slow Growth, Resulting in the Development of Smoothly Working Machinery Which Now Guides Enormous Cigar Leaf Output Into Factories — Skill and Care Necessary in Preparing Tobacco for Market—Interesting Data.

By LOWELL F. HALLIGAN

LANCASTER County's tobacco industry, from its infant stages in the early nineteenth century to its present gigantic proportions, has had a slow growth, but with it has come the development of the nothly working marketing machinery h:h now guides the enormous output of gr leaf from the grower's curing shed into epacker's warehouse, and from there into e manufacturer's hands. Not a pleasant rcess in all of its stages, this marketing elopment, and often was the heavy toll nisjudgment taken by that stern master, xerience, who taxed alike the unwise rver and the unwary packer.

Lancaster County is the premier tobacco rving section of the United States and as all other counties in the country in its of production and acres under culti- on. It tops its closest rival, Hartford nty, Connecticut, by a clean margin of ly 14,000,000 pounds of tobacco annually surpasses this same county in the matter production by close to 15,000 acres.

From Field to Factory

Guiding the tremendous production of re than 50,000,000 pounds of cigar leaf m the grower's field into cigar factories in parts of the country, is no small task and ast marketing network has grown up h practically blankets the county, touch- g every producer of tobacco from the akyard" grower to the largest producer. Although fairly well standardized, the ethods of handling and buying the crop are rned by so many varying and shifting itions that they differ considerably and present a variety of aspects in a single on. Quality and quantity of yield, prices, her conditions, export demand, trans- rtation facilities and financial accommoda- n may all become factors in the move- t of the tobacco crop and, therefore, in e means employed to effect this movement.

Prices Show Upward Trend

A comparison of the prices paid for the over a number of years discloses an up- rd trend which is, however, by no means nsistent, the price rising and falling in ecutive years. A table showing com- rtive prices and yields follows:

Year	Production Pounds	Price Cts. per lb.
1908	36,000,000	12.2
1909	36,892,869	11.0
1910	51,630,120	11.0
1911	52,909,200	11.1
1912	52,535,800	10.0
1913	38,734,400	8.3
1914	40,315,800	9.6
1915	36,031,500	11.2
1916	42,222,560	15.8
1917	49,747,000	22.0
1918	56,981,760	15.2
1919	49,335,407	19.0
1920	57,787,700	14.1
1921	55,188,000	15.0
1922	51,084,000	17.0

The effect of the war on tobacco prices may be seen in the tabulation above as well as the fact that the increase in prices has by no means kept pace with the advance in other commodities. It will also be noted that good prices one year have caused an oversupply of tobacco the following year with a subsequent reduction in the price. This has not always been true, due to the fact that so many other factors exert an influence on the price and may counteract the effect of a shortage or a period of overproduction.

Private Packing Plants

The steadily increasing demand for Pennsylvania tobacco during the past several years has led to most of the buying being done in the grower's shed or even while the crop is growing in the field. The buyers for those large manufacturers who maintain their own packing plants visit the grower and make their offers for his product after examining it on the premises. Independent packers follow the same method and, except for a few of the larger concerns, individually make all of their purchases. Seldom is a crop bought on recommendation, or without being seen, or at least sampled, by the purchaser himself.

Swarms of Buyers

This method of interviewing each grower individually and making a personal examination of his crop would seem to foster a tendency of purchasing the crops strictly on points of merit, but such, unfortunately, is not the case. The large corporations, when ready to lay in their supply of tobacco, send out swarms of buyers with instructions to buy "everything in sight," regardless of the quality of the goods. This occasions, in most cases, all of the tobacco in one section being sold at a uniform price except for the grower who has disposed of his crop to some small independent packer who must resell his wares on a basis of quality only. While this practice of paying no heed to the quality of the leaf purchased may have had, at times, a detrimental effect upon the care and attention given by the farmer to his tobacco and made him feel that it did not pay to raise a good quality of seedleaf; still it may reasonably be supposed that the "dyed in the wool" tobacco grower will continue to strive toward higher quality and the production of the type of tobacco that has made Pennsylvania famous. It is a fact, although probably not generally recognized, that the careful grower who takes the proper pains in handling his crop receives a premium for his tobacco in higher yields and less trashy, low grade stuff. And, most important of all, he helps to maintain the good reputation of Pennsylvania tobacco.

Conditions Specified

Tobacco is contracted for at the grower's shed on a basis of a certain price for wrappers, fillers and scrap; delivery of the crop in good condition usually being specified. The terms, "wrappers, fillers and scrap," do not indicate the uses to which the seedleaf is to be put, but are merely terms employed to differentiate between the various grades and quality of the crop. Practically all of the Lancaster grown tobacco is used as cigar filler with a small percentage of the finer quality going as cigar binders. The grower's use of the words, "wrappers and fillers," mean only his two grades of cigar fillers which are sold at widely varying prices, depending upon the quality of the goods and the condition of the market.

Packing and "Sweating"

After the tobacco has been cured in the large drying sheds, common on Lancaster County farms, stripped and baled in the grower's "tobacco cellar," and delivered to the packing warehouse, the next step is the fermentation or "sweating" of the leaf. Most of the tobacco is sweated by the packer,

THE-PRE-WAR

FIVE CENT CIGAR is Here at Last!

An article the smoker is constantly asking for and expecting but has not been getting. Pre-War not only in name but also in quality, price, workmanship and sizes. Made of a combination of High Grade imported and Domestic tobaccos in large and attractive shapes from five inches and up. I am able to take on some more accounts in various sections of the country and invite inspection of this wonderful value from reputable jobbers. Samples will be sent gratis to any house interested enough to look the "Pre-War" over.

EUGENE P. GILLESPIE, York, Pa.

Specialist in the Manufacture of Five Cent Cigars

hough in rare cases the grower will sweat s crop in the case or employ some packer do the work for him at a fixed price of a v cents per pound. Tobacco is packed and eated by the grower usually for the purse of holding it until the most favorable arket presents itself. This system is selm resorted to, however, no matter how or the market, because tobacco loses from to 15 per cent of its weight after going rough the sweating process. And in addin to this fact, the dependence of the ower upon an immediate cash return on his bacco crop will not permit him to wait the g period of time necessary to realize on product when he packs it himself. Tocco is generally regarded by Lancaster unty farmers as their "cash crop" and is ked to to tide them over until the other m crops are sold.

There are two methods employed in sweatg the tobacco. Case sweating, practiced in s county from the beginning of the tocco industry until the bulk sweating pross was introduced a score of years ago, and is still in vogue to a certain degree, alough its uncertainty and costliness in damng the crop have eliminated it to a large ent. Custom claims its followers, hower, and there are still some growers and kers who adhere to the practices of half century ago. It is claimed by the "case eat" faction that the old method is cheaper hough actual fact shows that it is not, beise of the higher amount of damage when s system is followed.

Introduction of Bulk Sweating

Bulk sweating was introduced to the Lanter County industry about twenty years o by federal tobacco experts and experinters who started active work along the s of improving Pennsylvania seedleaf at t time. The bulk sweat has been demonted to be a sure, safe and quick way accomplishing the sweat, or fermentation cess, which is essential to all cigar leaf acco. It allows the packer to determine exact condition of the tobacco at any e during the process and to apply the essary remedies if danger of damage to leaf threatens.

The bulk sweating of the cigar leaf follows delivery of the tobacco to the packer er the grower has stripped and baled it. e bales are opened and each "hand" taken and handled separately. The hands are ken vigorously so that each leaf is fully ned and any loose dirt which might re- n is removed. Before being placed in the at, the hands are sorted according to and each length assigned to a different .

The bulk, as employed by Lancaster nty packers, consists of a platform built a slight distance above the floor level. platform is from ten to twelve feet long about six feet wide with "head boards" ach end which are about five feet high are designed to hold the tobacco in place to keep it from slipping. After being ered with a layer of paper, the platform eady to receive the tobacco.

The hands are laid in the bulk as closely ether as possible with the butts facing ward. Four rows are laid over the entire th of the platform with each succeeding interlapping. The work is done by two working on opposite sides of the platn and the hands piled up evenly to a ht of about five feet. Due to the intering of the rows, the bulk, when comed, is slightly higher in the middle and overed over with rubber sheets.

Artificial Heat Frequently Used

The bulks are generally located in the cel- of the warehouses and often artificial is used to maintain an even temperature. hin a few days after placing the tobacco in the bulk, the temperature of the cigar leaf begins to rise. It is at this point of the process that the great advantage of the bulk sweat over the old system of case sweating is evident. The exact temperature should be known at all times by the packer and he can easily determine this by means of a thermometer in the middle of the bulk which has been previously placed there in a tube. The thermometer is very seldom used, however, as the packers become so expert in determining the correct heat of the bulk that they can judge it accurately with the tips of their fingers.

The sweat is allowed to continue until the temperature of the bulk reaches about 140 degrees. At this point it is torn down and the tobacco removed from the platform, a hand at a time. Each hand is again shaken vigorously and then pressed into cases to undergo the ageing process. The cases ordinarily are stored until the following season when they are sampled and sold to the manufacturing or the jobbing trade. At times, however, when there is an extraordinary demand for Pennsylvania cigar leaf, the tobacco is sampled immediately after it comes from the bulk and is allowed to age after it has been sold.

Some packers who particularly desire to secure a good, uniform sweat continue the bulk sweat by tearing up and rebuilding the bulk. To do this, the top and bottom layers are put in the center of the new bulk and the inside layers are used to form the top and bottom. A reversal of the lateral arrangement of the hands is also followed and the inside layers are used to build up the outside in making the new bulk. This may be done several times, the bulk heating up more slowly after each turning.

Despite the obvious advantages of the bulk sweating method in fermenting the tobacco, the old case sweat system has by no means been abandoned, although far more uncertain in results and productive of a much larger percentage of damage. Case sweating requires less labor and is, consequently, somewhat cheaper in first cost.

Casing Tobacco

When the case sweat is to be employed, the tobacco is packed, after delivery to the warehouse by the grower, in large and very substantially built cases, holding from 350 to 400 pounds of the leaf. The cases are built with inch spaces between the end boards so as to permit excess moisture in the damp leaf to escape. The inside of these packing cases is covered with paper and the seedleaf packed tightly into the case with the butt ends toward the slatted sides of the case. The spongy tobacco is pressed compactly into place by a frame which fits into the case. Additional pressure is exerted by a large press which brings great force to bear on the leaf. After the case is filled, the top is nailed into place and the case numbered. The gross weight is also placed on the outside together with the weight of the case. Due to the fact of the 10 to 15 per cent shrinkage which occurs in the tobacco during the sweat, this is known as the marked weight and differs considerably from the actual weight after the fermentation and ageing processes have taken place.

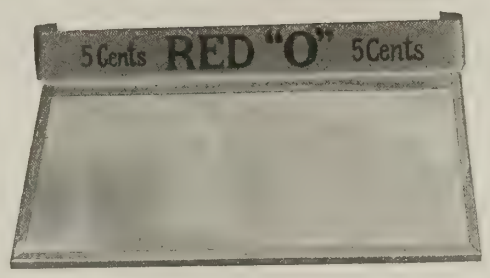
Damage Often Develops

After the cases have been filled, they are stored in the packer's warehouse, three or four rows high, and begin to sweat. Artificial heat is employed by some packers although the "natural sweat" method is generally followed and consists simply of allowing the tobacco to heat over the warm summer months with no forcing whatever. The forced sweating through artificial heat is often productive of additional damage. It may be clearly seen that this method of sweating is very much more haphazard than sweating in the bulk. It is impossible for the packer to determine how the sweat is progressing inside of the case, and if damage threatens, he is unaware of the fact and is, therefore, unable to employ any preventive measures. On sampling his cases when ready to sell his tobacco, the packer quite frequently finds that "black rot," "mush rot" or "green mould" have attacked his goods and effected considerable damage. Although these infections are also present in tobacco which has been bulk sweated, particularly when the tobacco comes to the warehouses in poor condition and contains a large amount of moisture, it is almost entirely eliminated. The inauguration of the bulk sweat method has greatly raised the standard of Pennsylvania tobacco.

Selling by Sample

When their goods are ready for marketing among the jobbing and manufacturing trade, the packers sell almost exclusively by sample. The samples are supposed to represent the condition of the entire packing and are taken from each case that is to be sold. They are obtained by removing the lid, turning the case upside down and gently raising it from the tightly packed mass of tobacco. Samples are then taken from several places in the case and numbered corresponding to the number of the case. The case is then slid back on the tobacco and the lid nailed on to await delivery.

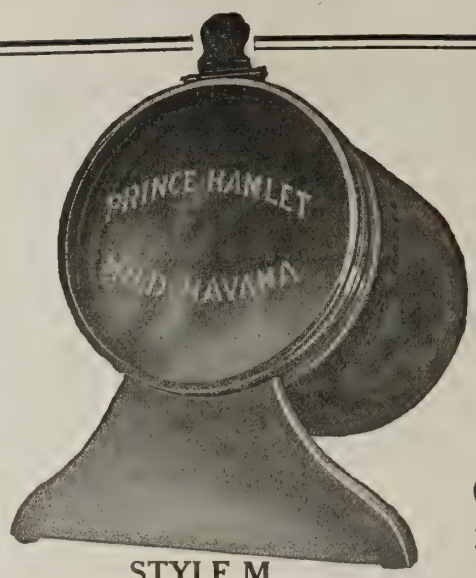
The sampling is done in some cases by sworn samplers who guarantee that the sample represents the exact condition of the case from which it was taken. The case is sealed after the samples have been removed.



Co-operative Packing

Smoothly running and efficient as the marketing methods in use today are, within the past several years a ripple has appeared on the surface which may, at some distant date, break into a turbulence that will swamp the system now employed in Lancaster County, as it has done in many other tobacco growing sections of the country. The co-operative packing movement is the insistently disturbing factor which has arisen in the Lancaster market and which, while not an overwhelmingly important element in the crop movement at the present time, has drawn considerable attention and comment—favorable and otherwise—although not, as yet, much action.

Four co-operative packing organizations were in action in the county over the last two marketing seasons and three of them survived the early, high priced buying of this season and packed considerable cigar leaf last fall. The total packings of the three companies will aggregate about 2,500 cases,—hardly enough to affect the market, and yet quite sufficient to show that interest in the movement among the growers has not lagged. Born of the low prices which prevailed in this section after the boom war period and the general interest in co-operative movements of all kinds, the packing companies were organized in 1919 and have been operating at a distinct advantage.



The co-operative plant at Mt. Joy, Lancaster county, was the pioneer in this movement and the similar organizations started at Ephrata, Mountville and Lititz were modeled along the same lines. The grower, upon delivering his crop to the co-operative warehouse, contracts to pay two cents per pound packing charges and to cover insurance on his crop. All of the consignments are kept separate and a U. S. Warehouse receipt is given him which may be used as security for a bank loan. The crop is the property of the grower at all times and is sold only upon his approval of the price offered. When sold, the co-operative organization deducts the handling charges, and the net receipts are turned over to the farmer.

Early Stages and Development of Tobacco Culture in Pennsylvania

Production Did Not Assume Great Importance Until Comparatively Late Date — William Penn Shipped Fourteen Cargoes in 1689 — Serious Efforts at Growing Cigar Leaf Near Ephrata in 1828 — Two Types Now Raised in Keystone State.

By OTTO OLSON

Assistant in Tobacco Investigations, Bureau of Plant Industry, United States Department of Agriculture, Branch at Ephrata, Pa.

TOBACCO has long been produced in Pennsylvania, though its culture never assumed any importance until at a comparatively late date. The colonists brought over by William Penn shipped fourteen cargoes of tobacco in 89, but it is not known just when its culture s begun in the State nor what type of tobacco s used in those early days.

The earliest known attempt to grow cigar f tobacco in the State was made by several mers living near Ephrata in 1828. The cen- of 1839 states that 48,860 pounds of tobacco re grown that year in Lancaster county, ile 10 other counties reported yields ranging m 15 to 46,000 pounds, the total production that year amounting to 325,018 pounds.

The 1919 Tobacco Production

The census of 1919 reports the tobacco pro- tion in Pennsylvania as being 55,884,791 nds, of which Lancaster county produced rly 90 per cent, the remaining 10 per cent ning from York, Chester, Lebanon, Clinton, coming, Tioga, Bradford and Berks counties. Two types of cigar leaf tobacco are now culti- ed in Pennsylvania, Seedleaf, or Broadleaf, Havana seed, but by far the greatest part the tobacco produced is of the seedleaf type, ich is used mainly for cigar fillers, because of aroma, taste and burn. Seedleaf tobacco tures from twelve to sixteen leaves, 12 to 16 nes wide, and 20 to 36 inches long. The ns on the leaves are drawn toward the tip branch out from the midrib at an acute le, which means that when the leaf is finally ched in the cigar the small veins run length- e and do not interfere with the burn. The ed leaf is chestnut brown on its face, with a e olive green shade on the back. The yield acre ranges from 1,500 to 2,500 pounds per

Havana seed tobacco is grown on the sandy r bottoms, from fourteen to eighteen leaves the stalk, and yields from 1,200 to 1,800 nds per acre. This type of tobacco is used nly for binders and stogie wrappers.

Has Unique Place in Tobaccodom

Pennsylvania Seedleaf tobacco has a place in tobacco trade which cannot successfully be d by any other type. It is the great cigar r tobacco, and is recognized everywhere as n, because of its mild aroma, pleasant taste good burning qualities. It forms the basis nearly all the popular brands of medium ed cigars, and its popularity is largely due ts relatively low nicotine content, which in- s a mild smoke, free from any after effects.

The Banner Tobacco County

ancaster county, which produces nearly 90 cent of the tobacco grown in Pennsylvania, tuated in the southeastern part of the State. soil is largely a deep rich limestone forma- of the Hagerstown and Conestoga types, is kept in a high state of productivity by nite farming systems, or crop rotation. In r words, after the tobacco has been har- ed from a field, it is seeded to wheat, clover, lfa and timothy. The following year after wheat is harvested the grass is allowed to w until the third year, when the field is again ted in tobacco. This is called a three-year tion, but most farmers add corn, making it ur-year rotation. The farms are divided three or four fields, which are planted ac- cording to the rotation method followed, with tobacco, wheat, corn and grass.

The Feeding of Steers

The feeding of steers during the winter is a part of this farming system. All of the hay, corn and the straw is utilized on the farm where grown, and great quantities of concentrates purchased in addition. From 65,000 to 80,000 head of steers, or an average of eight head per farm are fed annually in Lancaster county.

This system of farming conserves the fertility of the soil, using over and over again the plant food material of the crops grown on the farm. Commercial fertilizers are used to an increasing extent, in addition to the manure produced on the farms.

The Thrifty People

The thrifty, industrious people are chiefly of German and Swiss extraction, and the numerous religious sects, with their quaint, distinctive garb, give an old world setting to the well kept, neat communities.

Though exceptionally conservative, the farmers are not slow in taking advantage of farming practices developed by experimental work. They are very helpful to one another, and when a new tobacco barn is to be erected all the neighbors within a radius of several miles come to assist, the men with the building work and the women with the cooking.

Certain Monthly Routine

Tobacco culture in Pennsylvania is closely interwoven with other farm practices and lasts practically the whole year. Thus, tobacco seed beds are prepared, sterilized and seeded in April, and the steers cared for; during May the tobacco and corn fields are plowed and prepared for planting, the tobacco seed beds cared for, and the corn planted; tobacco transplanting and cultivation begins in June, also corn cultivation and hay making; the wheat harvest is begun in July, followed by tobacco and corn cultivation, and poisoning of tobacco to destroy insects; tobacco cultivation, topping and suckering take up the whole of August; tobacco harvesting begins in September, and is ended early in October, when wheat seeding and tobacco curing take up the farmer's time, together with the harvest of corn, In November tobacco curing, corn husking and steer feeding are the order of the day, while in December, January and February steer feeding and the stripping of tobacco occupy the busy farmer's hands until March, when the tobacco usually is delivered to the warehouses, though these deliveries frequently begin as early as January.

Standards are Necessary

The great necessity of producing standard varieties or strains of cigar leaf tobacco in Pennsylvania has long been recognized by the more progressive farmers and packers, because the wide divergence of types led to considerable confusion. Much work has been done along this line by experimental agencies, and the results show quite an improvement over former conditions. The trade requirements, however, vary to some extent, and in addition, different soil types and cultural habits make this work extremely difficut.

Work for the Good of All

The Lancaster County Tobacco Growers' Association and the Lancaster Leaf Tobacco Board of Trade are working hand in hand to consistently improve the quality of the crop and the methods of producing it, and the fruit of this work lies in the fact that the average yield per acre of Pennsylvania tobacco is steadily increasing.

East Prospect Cigar Co.

The East Prospect Cigar Co. is one of the most important cigar manufacturing concerns in Pennsylvania, making cigars that sell. The headquarters are at East Prospect. The company specializes in Imported Sumatra and Connecticut Shade Grown wrapper cigars. B. M. Hannigan is the president of this concern, and is also president of the York County Cigar Manufacturers Association. The Airdale, one of the leaders of the company, is a 4⅞-inch Club Perfecto, made of high grade shredded short filler, resweated binder and genuine Sumatra wrapper, which retails at five cents. This progressive establishments also makes the Epco, and the Epco Havana Fives, all of high quality materials, and retail at five cents.

New Lancaster Warehouse

Sam Weinberg, of 121 North Third street, Philadelphia, has recently opened an office and warehouse at 134-136 North Christian streets, Lancaster, Pa., in order to take better care of the Pennsylvania trade. The usual strong lines of Pennsylvania tobaccos are being featured, along with choice Florida and Georgia wrappers. Desirable selections of Havana and Porto Rican tobaccos are also stocked, and cigar manufacturers will find it well worth their while to inspect these excellent offerings. The Liberty warehouse contains a large packing of 1922 tobacco, including merchandise for wrappers and fillers of unusual quality.

G. A. Kohler & Co.

G. A. Kohler & Co., of Yoe, are pioneer cigar manufacturers in that section of Pennsylvania. Besides the Yoe factory, they own four others. Kohler's Handmade and Tobacco Girl are their principal brands. G. A. Kohler & Co. have been established for over 38 years and during that time their cigars have become well established in various sections of the United States. The principals of the concern are S. W. Kohler, C. A. Kohler and J. H. Kohler. Brands made by this house are a guarantee that results will be satisfactory.

Purchases Well Known Brands

The G. & I. Cigar Co. has purchased the Little Trooper and Worthington brands from the Pennsylvania Cigar Co., and are now manufacturing these cigars in their plant at Windsor, Pa. The officers of the G. & I. Cigar Co. are F. K. Galebach and E. Spurgeon Inkrote. The Little Trooper cigar, as manufactured by the G. & I. Cigar Co., is far superior to the old product, as can be attested to by the many jobbers handling this brand. The Worthington cigar is an exceptionally good cigar for the low price of five cents. To produce high grade products, and to give value, is the policy of the G. & I. Cigar Co., and jobbers handling their goods are practically assured of repeat orders.

My Boy

u smile and you smoke your cigar, my boy;
You walk with a languid swing;
u tinkle and tune your guitar, my boy,
And lift up your voice and sing;
e midnight moon is a friend of yours,
And a serenade your joy—
d it's only an age like mine that cures
A trouble like yours, my boy!

—James Whitcomb Riley.

D. C. Kaltreider & Sons

D. C. Kaltreider & Sons, who have been in iness almost ever since the weed was first covered in Virginia, make C. & S Bouquet Lord Northcliff cigars in Red Lion. These ars retail at five cents, and are well liked erever placed. The members of the concern D. C. Kaltreider, D. W. Kaltreider and C. Kaltreider.

Moves to Larger Quarters

Associated with Edward S. Brill, of the old blished firm of Wm. S. Brill & Son, is his Maurice Brill. This firm recently secured e spacious quarters at 147 Water street, w York, and will continue to specialize in nsylvania and Wisconsin tobaccos. The ehouse of Wm. S. Brill & Son is equipped for entire manipulation of any kind which these tobaccos require. Constant study on their part of the different crops which are grown from year to year enables this concern to take good care of the manufacturers' needs, and has built up the high reputation which it has so long enjoyed.

C. E. Miller & Sons

C. E. Miller & Sons of McSherrystown manufacture Pure Grit cigars, made to sell at 2 for 15 cents. This cigar is made in four shapes, Panatelas, Londres, Perfecto and Perfecto Grande. The wrapper is genuine Sumatra, and the choicest old blended tobaccos are used as filler. The cigar has wonderfully good burning qualities. Jobbers would do well to get in touch with the manufacturers of Pure Grit, and obtain territorial rights.

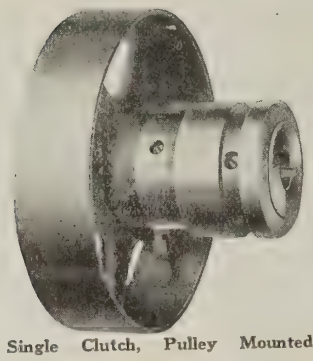
T. C. Smith

T. C. Smith of Red Lion, Pa., started his factory in Red Lion about two and a half years ago and since that time has been increasing his business constantly. He makes the Magnet and Sleepy Eye brands, both packed in 50's. The labels are attractive and immediately catch the eye when placed in a show case. Mr. Smith desires some representative jobbers and would be pleased to quote on private brands.

W. U. Blessing & Co.

The cigar factory of W. U. Blessing & Co. is situated at Hellam, Pa. The firm is composed of W. U. Blessing and M. S. Gohn. They are manufacturers of the Ford cigar. The slogans on the box are as follows: "The Smoker's Joy and A Peaceful Smoke." In every part of the world can be found the famous car and the cigar should therefore be an attractive proposition for the jobber. Get it for your territory.

Merchants Cigar Co.



The Merchant Cigar Co., of York, makes the New York Hand Made advertised as a 10 cent quality for 5 cent straight. New York Hand Made is registered in the U. S. Patent Office in Washington, D. C. Particular care is taken in its manufacture. Jobbers can secure this live brand for their territory.

Jacob C. Kling

Jacob C. Kling is a manufacturer of Hanover, Pa. His brand is Lomanco made in three shapes, Perfecto, Invincibles and Corona, selling to the consumer at 10 cents straight. The cigar is mild and aromatic and bound to please the smoker. Jobbers requiring a good 10 cent cigar should get in touch with Mr. Kling.

THE JOHNSON FRICTION CLUTCH

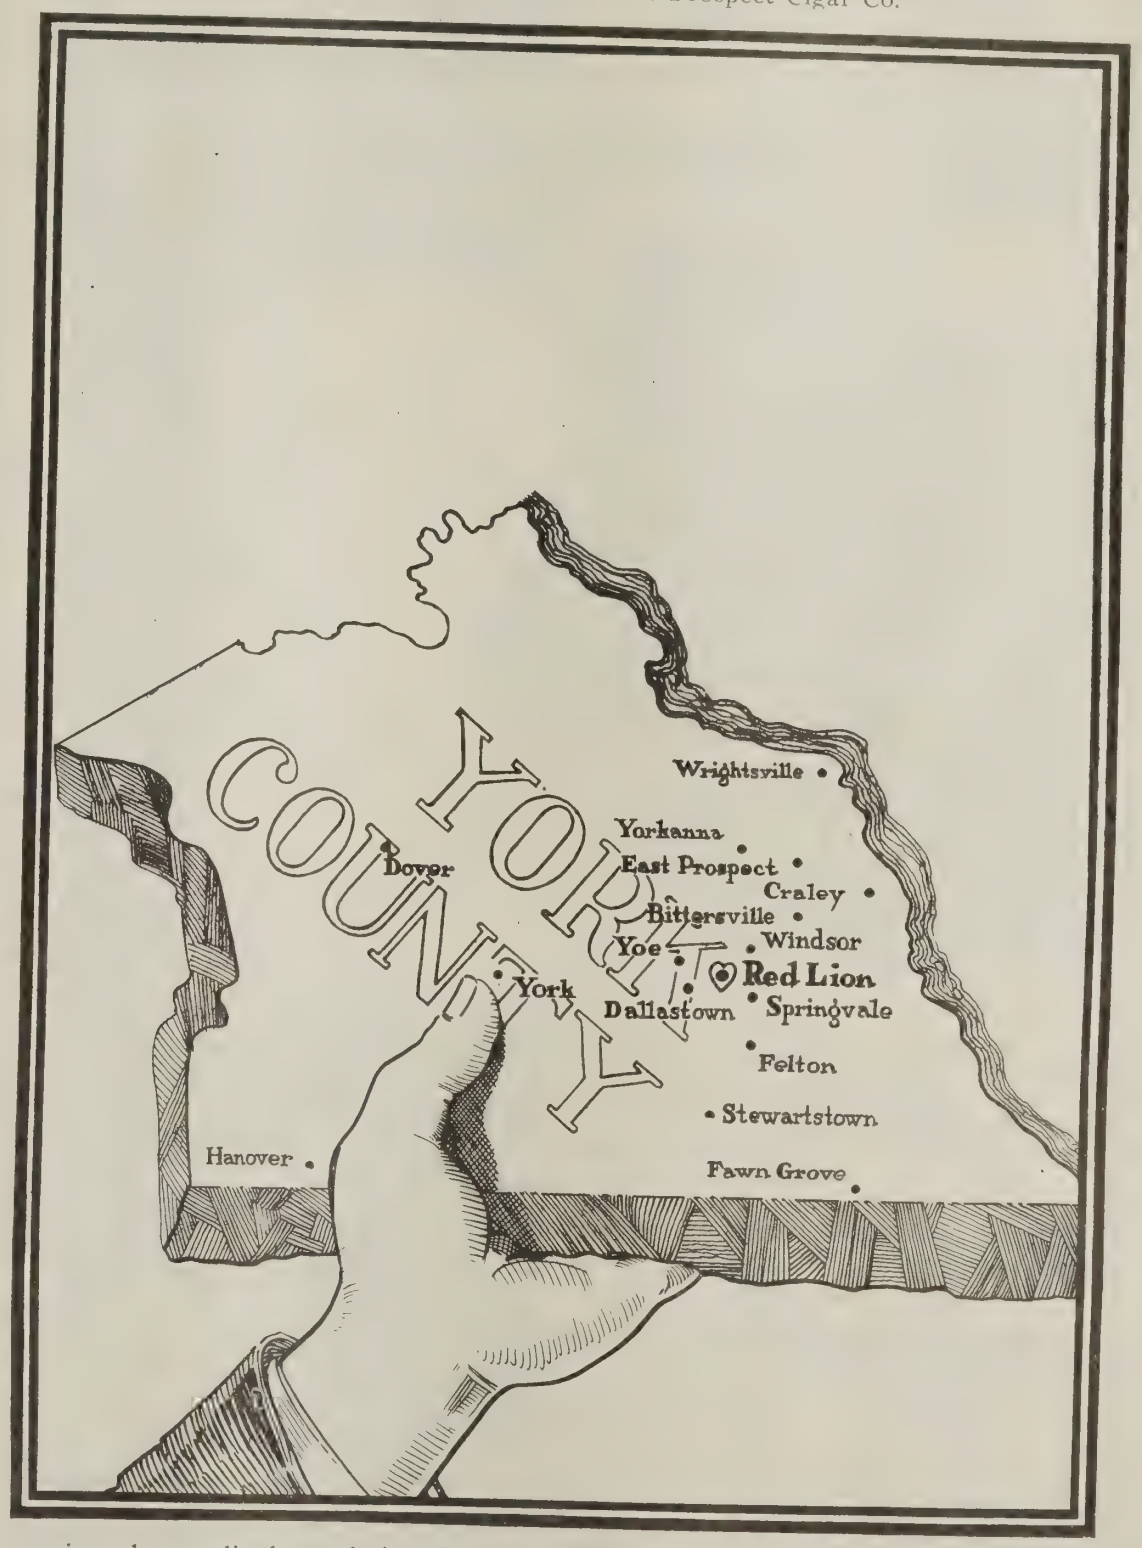
Progress of the York County Cigar Manufacturers' Association

Statistics Show That York County, Pennsylvania, Has Over 700 Cigar Factories Employing Thousands of People—Association Has Been Big Benefit to Both the Manufacturers and Employees—Various Phases of the Industry Briefly Noted



By ROUNDER

SINCE the publication of the previous Pennsylvania number of TOBACCO, a year ago, the York County Cigar Manufacturers' Association has been working diligently for the betterment of the industry. ch progress has been made. The Asso- ion has grown in membership and its stige is felt throughout the entire United es. The jobbers, retailers and the smokers w of this wonderful organization which is ng as their prohibition officer to prohibit the of unfit tobacco in the manufacture of York nty cigars; to uphold fair trade practices to give quality throughout.

he York County Cigar Manufacturers ociation has not only brought about the ding of a quality cigar, but has made the ufacturing more pleasant for the busi- man. Very few people, other than those ed in the handling and selling of cigars tobacco, realize the red tape they must through with the government. Last ember the revenue department decided establish a rule compelling the cigar ufacturer to have all of his tobacco med on his premises. In order to do he would be required to take out a r's bond, and partition off part of his ory for this purpose, as it is against the to get any other than leaf tobacco in a ed place of this kind. This ruling was st an impossibility for the majority of manufacturers in York county. While have large factories, every available is taken up in the manufacturing of s, which is not difficult to see when you mber that one-eighth of the nation's production is manufactured in York ty. It had been the custom before to this tobacco stemmed at private homes ged men, women and children; thereby g them a chance to earn a livelihood this ruling gone through, it would have the manufacturers more money for . It would have closed many smaller ries and made considerably more red The secretary of the York County Manufacturers Association immedi- called the board of governors for a ing and the legislative committee was ucted to take immediate action. It was a short time after the association got e job that the matter was dropped and anufacturers continued with their busi- as before.

The Proposed Sales Tax

other instance of their activity was n very recently when the Alexander bill, r known as House Bill No. 521, which, de a law would have required a 5 per retail tax on all cigars manufactured nnsylvania and sold in this state. To with, York county pays the United s government an annual tax of approxi- y $9,000,000, and to add a State Tax p of this amount would have affected anufacturers seriously, and in more ways one. In the first place, it would have an unfair tax, as it would have been nly by those who used cigars and to- When this bill was proposed very was thought of it, as it appeared lous and seemingly stood no chance of made a law; but the seriousness was ealized when the majority of the other were defeated. It was then that the County Cigar Manufacturers Associa- tion began to act. The president, B. M. Hannigan, with his legislative committee began the fight at the State Capitol; the secretary kept the wires humming with telegrams to the many manufacturers throughout the State, insisting that they instruct their State representatives to work and vote against this bill. Assurances came back that instructions were issued accordingly, and the night the bill was up for its acceptance or rejection, the House of Representatives was flooded with telegrams protesting against the bill. The father of the bill, Mr. Alexander, made a hard fight, but the odds were against him and it was voted to have the bill stricken off the list. The president, Mr. Hannigan, and the legislative committee returned home late that night with another victory for the York County Cigar Manufacturers' Association.

The Association holds its regular meeting the second Monday night of each month, at its headquarters in Red Lion, and a very effective program has been laid out for this year's work.

Officers of the Association

The officers of the Association are:

President, B. M. Hannigan of East Prospect. Mr. Hannigan is also president of the East Prospect Cigar Co.

Vice-president, P. A. Tschop, of Windsor. Mr. Tschop is connected with the Central Cigar Co. of Windsor.

Secretary, Chas. C. Meads of Red Lion. Mr. Meads is secretary of the Meads Tobacco Co. and vice-president of the Inter-State Tobacco Co., of Red Lion.

Treasurer, A. S. Ziegler, of Red Lion. Mr. Ziegler is president of A. S. Ziegler & Co.

It goes without saying, of course, that the

icers and Board of Governors work together in perfect harmony. This latter body composed of the following members:

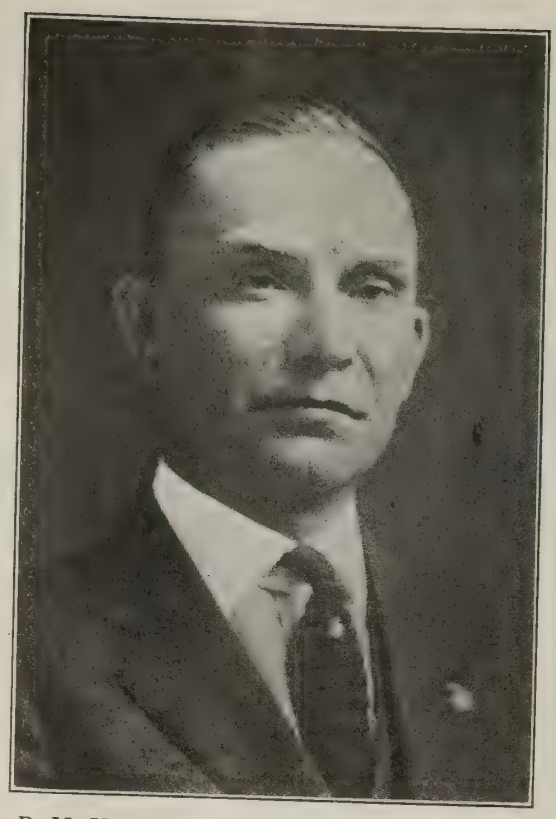
Board of Governors

T. E. Brooks, chairman, president of T. E. ooks & Co., manufacturers of Old Abe ;ars.
C. M. Ehehalt, factory representative for ality cigars.
W. H. Snyder, president of W. H. Snyder Sons of Windsor.
L. E. Sentz, president of the L. E. Sentz ., at Felton.
. H. Rojahn, a member of A. F. Fix & , of Dallastown.

Legislative Committee

. F. Strayer, chairman; T. E. Brooks, M. Ehehalt, C. S. LaMotte, I. H. Rojahn, M. Hannigan and Chas. C. Meads.
The legislative is composed of very efent men. Mr. Brooks is a former assemman and quite familiar with legislative ics. C. S. LaMotte is president of the d Lion First National Bank. Mr. Strayer former vice-president of the Association, Mr. Rojahn is a former president of the ociation. They are all versed in the inacies of the cigar industry, and are ever

S. Zeigler, treasurer of the Association and esident of Arthur S. Zeigler Company of Red Lion



y to see that the members are given fair slation.

Cigar Production

ennsylvania produces nearly one third of he cigars manufactured in the United es, and of this quantity, York county uces more than any other locality. e than one-eighth of the entire output he factories in the United States are ufactured in this county. Five cent s are by far in the majority, although e are also Class B, C and D cigars manured here.

Improvements

in any other business, many improves have been made from time to time, ny one visiting factories ten years ago now, in York county, would not only rprised at the rapid strides that have made, but would hardly recognize them e same concerns, with their added imements. Red Lion alone has 125 cigar ries, all of them up-to-date, sanitary illed with cigar makers. There are also rge number of leaf concerns, manurers of tobacco and brokerage houses.

B. M. Hannigan, president of the York County Assn. and president of the East Prospect Cigar Co.

Labor and Capital Slogan

The slogan had been "quality," now this is changed to "quality and workmanship." To get quality, workmanship must be considered, no matter how well cured the tobacco or how blended, without proper workmanship you will not have quality. The workman here is well paid for his services and strives to make each cigar better. Labor and capital here are very friendly, for labor is satisfied that the manufacturer is fair and honest and pays a very liberal wage. The conveniences of the cigarmaker is always considered and there is no other result than satisfied labor.

York County Association Membership

The following is a list of the membership of the York County Cigar Manufacturers Association:

Emenheiser Cigar Co.

The Emenheiser Cigar Co. is situated at Red ion, Pa., R. F. D. No. 1. They manufacture e famous Judge Taft cigar. This cigar is a iversal favorite and is a cigar of merit selling the consumer at 5 cents. The Emenheiser gar Co. have a very attractive proposition for bbers and dealers.

Eugene P. Gillespie

Eugene P. Gillespie of York, Pa., makes the Pre-War cigar. This cigar is the kind Vice-President Marshall said was required. It is a good nickel cigar, with quality and workmanship Jobbers will find this brand well worth while investigating.

Yorkana Cigar Co.

The Yorkana Cigar Co. is established at Yorkana, Pa. They manufacture the El Tutor brand a superior high quality five cent cigar. They offer to send samples to reliable jobbers and dealers and feel confident that they will duplicate.

Herbert M. Smith Co.

The Herbert M. Smith Co., located in Red Lion, Pa., makes as its leader the General Topic cigar. This cigar is a sure five repeater with every jobber handling this fine nickel proposition. It is good value. Some territory open to live jobbers.

American Cigar Co.

The American Cigar Co. of Red Lion makes the Boleyn, an old time quality 5-cent cigar. It is Connecticut Shade wrapped. Samples submitted to reliable jobbers.

A. F. Burg

A. F. Burg is a manufacturer at East Prospect, Pa. His principal brand is La Flor de Buenito. This cigar is a five center. Jobbers and dealers are offered a first class proposition to get behind this cigar.

J. F. Peeler & Son

J. F. Peeler & Son of Dallastown, Pa., are the manufacturers of the Robert Peel cigar, a good five center. Good workmanship and attractive colors. This cigar is a good duplicator wherever placed. Jobbers accounts solicited.

D. A. Horn & Co.

D. A. Horn & Co., of Red Lion, Pa., are the manufacturers of the Prudential brand. The cigar is a quality one, and a sure repeater. The firm is composed of C. H. Horn, S. P. Flinchbaugh and T. M. Glatfelter, all experienced men, who know how to make a good cigar.

E. B. Strickler

E. B. Strickler of Yorkana, Pa., is a manufacturer of high grade cigars. This establishment is known as the "House of Quality." His principal brand is Politano, a particularly good cigar and a certain repeater.

Richmond Cigar Co.

The Richmond Cigar Co. is situated at Bittersville, Pa. They manufacture the Henry Miller, an exceptionally good five cent cigar. The quality of this cigar cannot be improved upon for the money, and smokers come back for it when they have given it a trial. Your territory should have this brand.

Chas. Sprenkle

Chas. Sprenkle of Red Lion, Pa., manufactures cigars exclusively for jobbers. Jobbers who require private brands for their trade will find Mr. Sprenkle able to fill their wants.

Horace J. Throne

Horace J. Throne, whose principal factory is located on R. F. D. No. 3, York, manufactures the White Spot and Chief Baron brands. These are excellent and attractive brands for jobbers. High class nickel cigars that repeat.

The Quality Cigar Co.

The Quality Cigar Co. has recently established a factory in Dallastown making only quality nickel cigars. Earl A. Rost is the owner and is a young man of experience. The principal brand is Rob. Manning.

Otto Eisenlohr & Bros., Inc.

In Philadelphia, home city of the famous Otto Eisenlohr & Bros., and of its leaders, Cinco, of national reputation, and Henrietta, only a little behind, that concern is spoken of not merely as a great business enterprise, but as an institution indigenous to, and breathing the atmosphere of, the City of Brotherly Love.

Established in Philadelphia in the humblest way, just a little less than three quarters of a century ago, the business developed until it became the first concern to achieve and to hold a production of 200,000,000 cigars a year. During all that time, the firm is admitted, even by its keenest competitors, to have been pre-eminent in the standardization of values, and of prices.

During those long years, it is known that in the ranks of its employees there has never been a contention amounting to the seriousness of a strike. A big and expensive Market Street location was maintained for years as a manufacturing plant solely to keep in self-maintaining occupation workmen who had long served the firm and who could not be employed, by reason of location, in any of the many branch factories throughout the state, but who could continue to serve in the home office and who preferred to do so rather than to be placed in the category of pensioners.

The Eisenlohr factory is really conspicuous among the world's great produceries. It is the result of the growth through merit of a little business which William Eisenlohr established in 1850 at 137 S. 10th Street, in a little one room shop. He knew how to make a good cigar, and he determined never to make other than a standard smoke. It is the rigid adherence to this policy of the founder which has developed the magnificent building of today.

From that little one room shop, still standing, and now used as a stationery establishment, there came the development which enabled the Girard Trust Co., in an early issue of its house organ, *The Girard Letter*, published just two years ago, to describe its 14 tobacco warehouses, 16 stripping factories, and its twenty-two cigar factories, sheltering an employment force of over 5,000 hands, and to say that "Cinco is the largest selling cigar in the United States, having been offered to 55 per cent of the population.

"Here is an example of manufacturing principles which is full of interest to all other lines of industry. Making one or two things so well that the public each year buys a larger and larger quantity of them seems simple enough, but, where many have failed, the Eisenlohrs succeeded, because they always refused to digress in the smallest degree from the standard of their original product. Eisenlohrs use about one-quarter of the Wisconsin crop, nearly one-third of the Lancaster crop, and are the third largest importers of Sumatra tobacco." *The Girard Letter* told at that time an interesting story of wide appeal to all in the tobacco industry everywhere, as follows:—

"A unique personal quantity in the large Market Street wareroom of Eisenlohrs is

heir veteran professional smoker, Mr. Burke. For more than 50 years it has been is daily business to smoke cigars for his rm. He is the official tester who picks out amples from the boxes sent in by the vari- us factories, and who sees that standard uality of tobacco, and the correct manner f rolling them, are strictly adhered to. He as smoked from 10 to thirty cigars a day or over half a century and now when fast n seventy is one of the healthiest specimens f men you could hope to see anywhere. And e smilingly observes. 'On Sundays and venings I smoke pretty much all the time r pleasure.'"

It was a significant fact that during 1921, e worst year of business depression that e present generation has experienced, Otto senlohr & Bros. (now incorporated), sold ore Cinco cigars than in any previous year its history. This fact is largely attributed the rigidity with which the firm adheres to e one standard of production.

To make Cinco cigars uniform, the firm lds each crop from two to three years, ellowing and curing until each leaf has ached perfection, and it has at all times any million dollars worth of tobacco on nd; furthermore, every case of tobacco inspected and reinspected, warehouses are uated at points where the world's finest baccos are grown, one of these being the orld's largest warehouse.

This warehouse is devoted exclusively to e long and expert process of curing Cinco gar leaf. In spite of increased shipping st, the corporation has placed all the fac- ies within a radius of a few miles, where ey are directed by a single head and where e employed the most skillful cigar makers. Cinco advertising is nation wide. It is sed on the proposition that there are in e United States about 18,000,000 white nilies. It is customary to figure half this al, or 9,000,000, as the number to whom ality goods are regularly sold. A fair esti- te of cigar smokers allots an average of e to each family. Cinco's advertising is es- ated to reach a total circulation of 4,500,-), and it is therefore believed that the tement that Cinco advertising reaches one of every two cigar smokers in the United tes, is ultra conservative. Following the th of Louis Eisenlohr, the corporation s reorganized, and its personnel now con- s of President Charles J. Eisenlohr, na- ally known through his activities in the M. A.; Vice President, Benjamin R. hty; Treasurer, Harry Dietsch, and Sec- ary, R. G. Cunningham.

Smoking Out Reformers

he president of the Tobacco Merchants' As- ation of the United States told the four hun- dred members in Washington that intensive drives against all forms of tobacco have been inaugurated in the country "with the avowed object of burying tobacco in the same grave with John Barleycorn." Gosh, if these reform- ers are to continue, we'll all have to go to bed when the sun sets and change the name of the country to Sparta.

A Noble Society

But for the work which these tobaccoless re- formers would perpetrate upon a nation of smokers, there flows a compensation. In At- lanta, Ga., there is a chartered organization called the Pipe Smokers' Association, a noble society whose purpose is to save the pipe of our forefathers from being obliterated by the ciga- rette and the cigar.

This organization is being bombarded by peti- tions from all over the country for membership in its folds—by women's clubs. If men are go- ing to smoke pipes, so are women, and future generations will not be surprised to see their women puffing enjoyably upon a meerschaum or a T. D.

The point, however, that is desired to be made is that if smoking among women has in- creased to such a degree that they no longer care to be confined to the delicate cigarette, but want the masculine pipe, then, it might be asked, what chance has the reformer to put tobacco in the grave with John Barleycorn?

Serious Social Consequences

Moreover, while it may be granted that seri- ous social consequences followed in the wake of liquor, it is a rarity to find a man beating his wife or putting his children out into the snow after he has finished a cigarette or exhausted the contents of a pipe. Instead, no family picture of domestic happiness and contentment is com- plete without the husband sitting by a fire and calmly smoking his pipe. Now that his wife is going to join him, the picture will be doubly effective and should be the strongest argument in the world against the abolition of tobacco. Let the women have their pipe and the drive against tobacco will dissipate itself.—*Providence (R. I.) Tribune.*

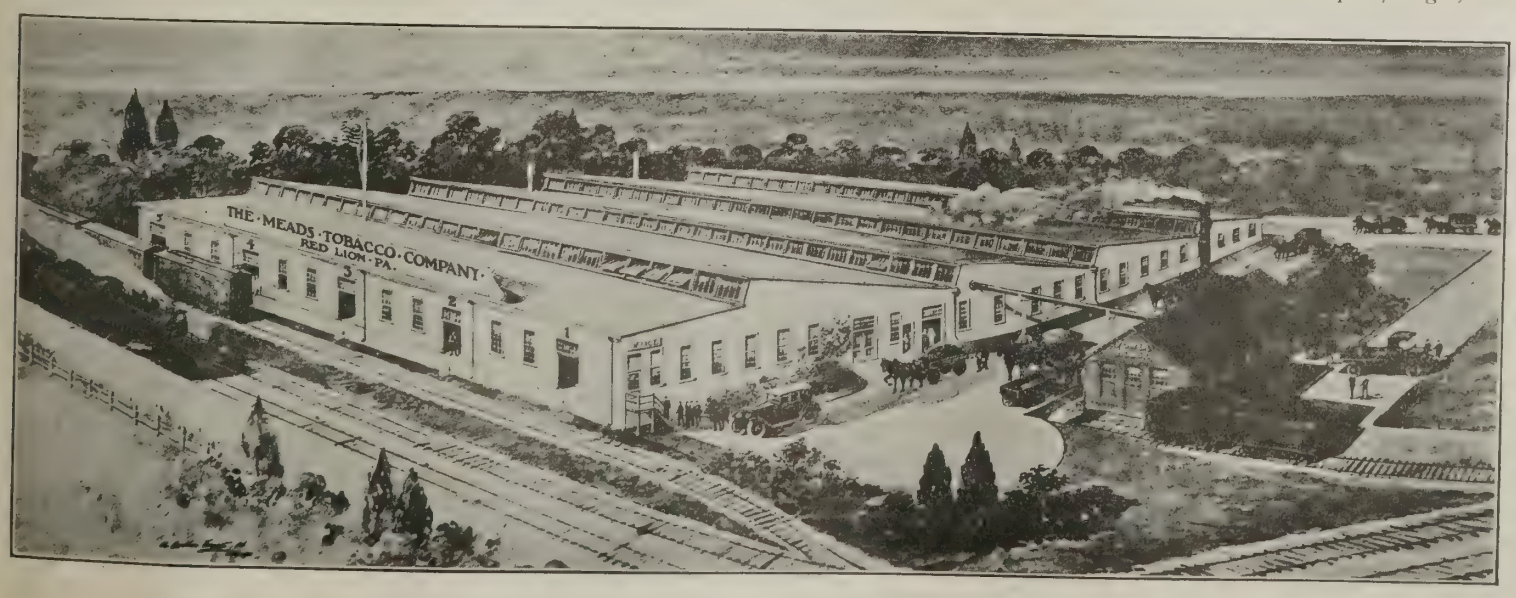
Meads Tobacco Co.

The Meads Tobacco Co., of Red Lion, Pa., are among the largest leaf dealers, manufacturers, and exporters, in the East. They handle millions of pounds of tobacco annually, and export to practically every country where tobacco is used. The Meads Tobacco Co. are also distributors for high-grade shorts and scraps. C. O. Meads, president of the company, also holds the office of president of the Inter-State Tobacco Co. The plants of the Meads Tobacco Co are equipped with the latest improved machinery, and two large Proctor Dryers, and cover several acres of ground.

According to Census Years

Considering the State of Pennsylvania as a whole, tobacco production during the Census years has shown a remarkable growth since its inception on a commercial scale.

Year	Pounds of cured leaf
1839	325,018
1849	912,651
1859	3,181,586
1869	3,467,539
1879	36,943,273
1889	28,956,247
1899	41,502,620
1909	46,164,800
1919	55,984,791



That is, the production in 1919 was over one hundred and seventy times as great as in 1839, when it was just beginning to assume commer- cial proportions.

During the period of this development, Blair is the only county for which no tobacco product is reported for any census year. In many local- ities, however, the culture has never assumed commercial importance. For the counties of Carbon, Clarion, Clearfield, Forest, Lacka- wanna, McKean, Monroe, Pike, Somerset, Ve- nango, Warren and Wayne, no census year shows a production of 1,000 pounds. That is, in one-fifth of the counties the production never rose to commercial proportions.

The State-wide progress has shown several marked stages of advancement. The produc- tion multiplied three-fold in the 40's; and again three-fold in the 50's. During and after the Civil War, in the 60's, little gain appeared; but in the 70's production increased to nearly eleven times the volume of the 60's. Since then, the advance has been more gradual, with a distinct falling off in 1889, followed by fairly steady gains until 1919, when the product was about one-half more than in 1879.

The distribution in the production in the sev- eral counties of the Commonwealth has, how- ever, shown quite remarkable shifts. In 1839, York County produced one-half of the crop re- ported for the State; with Lancaster, Dauphin and Northumberland following far behind, but next in importance. Westmoreland, Fayette, Union, Lehigh and Philadelphia reported from 1,000 to 20,000 pounds each.

By 1879, the culture had reached its widest expansion. In that year, Blair and Carbon were the only counties reporting no crop and from all but twelve other counties, yields of more than 1,000 pounds were returned. The follow- ing counties each reported the production of 150,000 pounds or more, stated in their relative order of production. Lancaster County, which now produces about nine-tenths of the entire State yield, has led the progress in actual yield and in proportion of the entire production for Pennsylvania.—*Pa. THE JOHN C. GUY CO., Inc., Lexington, Kentucky

Wisconsin Market Featured by Stemming Sales

Independent Farmers Who Have Been Holding for Binder Prices Seeing Things in Different Light—A 1921 Packing Purchased—Some Disagreement as to Weights.

EDGARTON, Wis., May 28.—The market for independent stemming continues to furnish some movement. The independent farmers who have dickered along with crops "betwixt and between" with the hope of getting binder prices for their crops, began to change their minds as soon as their product started to warm up and shrink in the sheds. They are deciding to let it go while it weighs well.

The General Cigar Co. is understood to have purchased some more binders from the pool in the bundle. While not a large buy, it was a very welcome sale for the co-op. Every crop that goes saves some work for their scanty assorting crews.

Old Goods Sold

The market for old continues healthy as usual. Carle & Co. purchased the Equity 1921 packing at Cottage Grove. It consisted of 400 cases. While perhaps not a sale to a manufacturer, this last sale a few days ago confirms several weeks sustained movement of old tobacco in cases. There has been a lot of binders absorbed for this time of the year by this steady movement, too.

Poolers Are Busy with Spring Work

The interesting by-play of the pool and its members has distinctly lulled the past two or three weeks, since deliveries have waned, and the growers have stayed on the farms attending to the Spring rush of work. There is no more of the excited curbstone oratory, and vitriolic heckling going on now as the members are scattered around on the farms, with no opportunity of meeting and hashing things over. A little spark flies occasionally at the few deliveries, but it is not enough to have much significance. Some disputes have arisen when crops recently weighed in the sheds by the pool as in the assorting grades, have been called in as stemming. Some farmers are still refusing the pool officials permission to weigh up their tobacco in the shed as in the grade it is marked at.

Disagree on Weights

The pool officials have attempted to have the buyers of the stemming grades take in the crops weighed up in the sheds as binders, and then delivered as stemming, at the weights in the shed when weighed. This has been refused them, however, and it has been taken in in the usual manner. It has shrunk four or five per cent in the interim. If the pool sticks to the shed weighing agreement with the growers, it will have to stand the difference. It will amount to a quarter to a half-cent per pound.

Seed Beds in Fine Shape

The weather the past week has been excellent growing weather. The corn is just peeping through the ground, and the seed beds are coming along in fine shape. It looks as though the government's estimate of a 12 per cent increase for the 1923 tobacco crop of Wisconsin is about right. If anything, perhaps, it is a little high.

W. Dickenson & Son have just opened their fourth warehouse in the state. This one is at Soldiers Grove.

A. B. Shannon, F. A. Greenhut, and Tom Burns, all of the General Cigar Co., were in the market here last week.

A. J. Ross, of Dayton, Ohio, representing H. Fendrich & Co., was with us the past week.—BADGER.

H. S. Cullman Accepts Vice-Chairmanship

Announcement has just been made by Franklin Simon, chairman of the Trades Committee of the Arbitration Society of America, that Howard S. Cullman has accepted the post of vice-chairman and will co-operate with Mr. Simon in his work of enlisting the support of all the trades and industries in Greater New York for the educational program of the society.

Mr. Cullman is a member of the firm of Cullman Bros., tobacco merchants at 161 Front street, New York City, and is one of the best-known men in the tobacco trade. He has long been an effective, if unostentatious, worker in social and philanthropic movements and is a cordial believer in the principle of arbitration in settling disputes. He has expressed hearty sympathy with the effort of the Arbitration Society to further the use of this money-, time- and friendship-saving method of adjudicating controversies, and in a letter to Mr. Simon has assured him of all possible co-operation when called upon.

Revenue Collections

WASHINGTON, D. C., May 28.—Taxes collected on tobacco products in April amounted to $23,991,680.45, according to the Bureau of Internal Revenue, as compared with $19,440,615.79 for April of last year. The taxes collected on large cigars were $3,565,581.06 in April this year as compared with $3,279,534.05 in April last year. On small cigars they amounted to $61,731.30 in April this year as compared with $74,580.01 in April last year. On large cigarettes the taxes collected were $10,773.04 as compared with $8,503.49 and on small cigarettes they were $14,132,076.17 as compared with $10,359,199.95. On snuff of all descriptions the taxes collected in April, 1923, were $593,305.23 as compared with $506,126.32 in April, 1922. On chewing and smoking tobacco the taxes amounted to $5,536,693.28 as compared with $5,141,651.02 and on cigarette papers and tubes they amounted to $89,284.44 as compared with $68,942.20. Special taxes collected in April this year from manufacturers of cigars, cigarettes and tobacco amounted to $555.14 as compared with $1,139.09 in April last year and miscellaneous collections under repealed laws relating to tobacco were $1,680.79 in April this year as compared with $939.66 in April last year.—LAMM.

Many Cuban Seed Beds Reported Ruined

HAVANA, Cuba, May 23.—Reports reaching Havana state that nearly all the tobacco seed beds which had been prepared for this year's supply of tobacco plants in the Vuelta Abajo district of Pinar del Rio province had been beaten down or washed out by the recent heavy rains that have fallen. This will not only entail considerable financial loss, but will necessitate another preparation of the beds for the next year's crop. The rainy season seems to have started much earlier this season than it did last, and it caught the tobacco growers unprepared for the emergency.

In the Quaker City

Meredith Kohlberg, of E. L. Kohlberg & Son, is looking up the Philadelphia trade this week and making many new friends in the City of Brotherly Love.

Program of N. C. L. T. A. Convention

The forthcoming two-day convention to celebrate the 25th anniversary of the National Cigar Leaf Tobacco Association, June 4 and 5, promises to be a most notable event in the history of the cigar leaf tobacco trade.

The official program, briefly stated, is as follows:

Monday, June 4, 10 a. m. First session, meeting called at the rooms of the Merchants' Association, ninth floor, Woolworth Building.

Afternoon free to your friends.

"The only way to have a friend is to be one."

Evening, 8.15 p. m. Music Box Revue, Music Box Theater, West 45th street.

After theater, supper at Luchow's, 110 East 14th street.

Tuesday, June 5, 10 a. m. Second session. Meeting called at rooms of the Merchants' Association, ninth floor, Woolworth Building.

Afternoon free to renew acquaintances.

Evening, 7 p. m. Banquet at Waldorf-Astoria Hotel.

Entertainment Committee

The Entertainment Committee is composed of John H. Duys, of H. Duys & Co., chairman; Chas. W. Duignan, of Stern-Mendelsohn Co.; Harry S. Rothschild, of Cullman Bros.

Associate Committee

Henry Fisher, William Levison, Jack Marqusee, John L. Fielding, Jerome Kohlberg, Sanford Goldberg.

North Carolina Auction Men Criticise Co-ops

Tobacco Warehousemen, Bankers and Lawyers Assail New Marketing Plans and Methods of Securing Contracts—Indulge in Genuine North Carolina Barbecue.

WILSON, N. C., May 26.—Yesterday was a red letter day in the history of the North Carolina Auction Tobacco Warehouse Association. Its fifth annual convention was held at beautiful Silver Lake Park, five miles from Wilson. Every train arriving in Wilson yesterday morning brought warehousemen, bankers and business men to see what kind of a stunt was going to be pulled off, and when the meeting formally opened at 11 o'clock more than 400 warehousemen and others were present. They came not alone from North Carolina, but from Virginia, from South Carolina and a few from Kentucky. Among the prominent bankers present was R. H. Boswell, president of the Farmers Bank of Wilson, probably the first banker in eastern Carolina to raise his eloquent voice in the Chamber of Commerce in Wilson, in Greenville, in Rocky Mount and in other places last season in defense of the auction method of selling tobacco.

Comradeship in Evidence

It was a gathering where good fellowship prevailed. Nothing was done behind closed doors—all present were cordially invited to hear and see what was said and done. They listened with rapt attention to the eloquent, polished and finely equipped lawyer, W. A. Lucas, and to the nestor, not in age, but in wisdom, of the courtly and distinguished Bruton. Several from South Carolina and Virginia declared in open meeting that with men like these two upon the stump the chains would soon fall from those who had been entrapped into signing the co-operative contract.

J. F. Brinkley, who has so capably served the association for two years as president, and B. B. Sugg, the best secretary and treasurer any organization ever had, were both at their posts.

At eleven o'clock President Brinkley, in a few well-timed remarks, opened the convention and called upon Robert W. McFarland, editor of the *Tobacco Farmer*, to welcome the convention to Wilson on behalf of the press. Mr. McFarland paid a glowing tribute to Wilson's two live daily papers, stating that they had always endeavored to convey to their readers the truth regarding the tobacco situation. That living as they did in the largest to-

A few of those attending the Fifth Annual Convention of the North Carolina Auction Tobacco Warehousemen, at Silverlake Park, near Wilson, N. C., May 25, 1923

bacco market in the world and, therefore, coming in daily contact with farmers from every section, they were probably more interested in tobacco than others which had frequently gotten garbled reports of conditions, not warranted by facts. He criticised the warehousemen for not furnishing to the press of the country news of the tobacco world, for, said he, "I am greatly indebted to many papers for giving space to many of my feeble attempts." At the conclusion of his address, which was punctured with witty things, carrying no stings and with bare reference to his papers, he introduced to the audience the Honorable William A. Lucas, of Wilson, one of North Carolina's most brilliant lawyers and one of Wilson's foremost citizens.

Discusses Supreme Court Decision

Mr. Lucas said in part:

"The Supreme Court of North Carolina, in the much heralded and discussed cases of the Co-operative Association against Jones and the same plaintiff against Harrell gave to the Association only the right to live in that it held as constitutional the act under which the association was organized. It held as constitutional also the provision of the act that the association was entitled to injunctive relief for the breach or threatened breach of the contract. This decision was no surprise to the overwhelming majority of people who had given the question any consideration, and was a disappointment only to the most sanguine and optimistic.

"It must be remembered that these cases were not heard upon the facts underlying the execution of the contract by the defendants. A question fraught with much more danger to the Co-operative Association will be presented when these same cases are heard by a jury charged with the duty of determining whether the execution of the contracts was induced by fraud or misrepresentation. It is common knowledge among even the most ignorant of laymen that a contract induced by fraud is not binding on one on whom the deception has been practiced. The general doctrine of fraud as applicable to these cases resolves itself into four elements: (a) a false representation of a material fact; (b) made with knowledge of its falsity or in reckless disregard of its truth or falsity; (c) made for the purpose of deceiving and (d) which does in fact deceive.

"Hundreds, even thousands, of farmers have stated to those with whom they advise that they were induced to sign the Co-operative Marketing agreement upon the statement made to them by representatives of the association that the open tobacco market had gone out of business and that the only opportunity the farmer had of disposing of his crop was through the Co-operative Association. The statement that the open market had gone out of business was a false statement, made either with knowledge of its falsity, or in reckless disregard of its truth or falsity, certainly made for the purpose of deceiving, and in thousands of cases did actually deceive those to whom the statement was made.

"The act under which the association was organized did not authorize the organization of the Co-operative Association until its organizers so designated in the Act should secure contracts of tobacco producers of a sufficient number to control fifty-one per cent of the crop, based upon the pounds of 1921. Until this condition was complied with, this child could not be born legitimately. The condition has never been complied with and the Co-operative Marketing Association has never had alegitimate birth. The fact that its organizers passed a resolution, which was false, declaring that contracts sufficient in number and amount had been executed to control fifty-one per cent of the tobacco crop, based upon the pounds raised in 1921, could not by any practice of magic convert falsity into truth. If these organizers knew of the falsity of the resolution adopted by them, the least that can be said is that they acted in bad faith with the State of North Carolina, whose Legislature passed the law with this provision written in it. If they did not know the truth they acted with a recklessness in regard to the truth that must meet the intelligent condemnation of all people. Is it not true that a farmer who

Cleveland's Tobacco Trade Going in Fair Shape

Progress Noted in the Buying, Selling and Distributing Channels—Standard Advertised Brands Maintaining Steady Clip—Quality and Co-operation Win Success.

CLEVELAND, Ohio, May 26.—The business of buying and selling tobacco in all its varied forms, and through the many different distributing mediums, is progressing in very fair shape. We are not seeing any phenomenal spurts or rises in business, but then we cannot expect anything on that order. We are, however, on a road that leads to a good, substantial and steady business, and that, after all, is about all we dare wish for. Standard, advertised brands are maintaining a steady clip. New brands are meeting with a varied degree of success, depending upon the brand and how it is put across; or, perhaps I should say, the endeavors made to put it across. It takes more than just an announcement that such and such a brand will appear, to make it a success. It takes real backing and plugging, advertising, and, above all, teamwork, co-operation between manufacturer and distributor, distributor and retailer. Then, too, the brand must have the quality. It must be a cigar offering to the smoker a value for his money. The smoking public is no longer fooled. To be anything like a success, a cigar must give smokers something worth while for their money. To satisfy the smoker is now, and should always be, the aim of everyone in this grand old game.

Manila Cigars

We were very glad to receive, this week, Horace R. Kelly, who called on the trade with his well-known line of high-grade Manila cigars. Cleveland is a very good market for Manila products, and Kelly always manages to land lots of good orders for his brands from dealers here.

Pleased with Distribution

Ed N. Adams, representing the José Escalante Co., Tampa manufacturers, called on the Fifth City trade this week. Adams was indeed happy to see how many of his brands are placed through this way by the Pyle & Allen Co., which distributes the Escalante products in this territory.

Crowds at Races

The Fifth City hotels were crowded last week with the many visitors who came for the big Maple Heights racing meet. Retail stores all report a slight increase and the hotel stands a large increase in business as a direct result. Followers of the turf are also followers of a good cigar, and the ones that pick the winners can usually pick the best in the smoke line.

For Dry Slitz

I. Zamore came here this week in the interests of the fast-selling 4 for 15c. stogie, Dry Slitz. This stogie is amazing the populace with a continued and steady good sale that is making for a good figure on the right side of the important ledger at the Baer-Wolf Co., which distributes Dry Slitz stogies in this neighborhood.

A Visitor

Ed Marlin spent a few days in this territory during the week working on the good La Mega cigar. No dealer in town would think of being without a goodly supply of every size of this brand.

At T. M. A. Convention

A. D. Goodman, head of the big jobbing concern bearing his name, left us the other day, bound for Washington to attend the big Tobacco Merchants' Association convention. Mr. Goodman was a very representative delegate from this city, as no one knows the ins and outs of the cigar game here better than he does.

A Fine Business

Met Dave Rosenblum, the owner of the fine store at Superior and E. 105th streets, the other day. His answer to my query as to how business was came in just the way one would expect. "Just great" was the reply, and he went on to tell me that every day sees more and more customers lined up on his side, and when once there they stick—this according to Dave.

For Falk Tobacco Co.

A. Berkowitz, of the Falk Tobacco Co., was a very welcome caller this week, escorted by popular Harry Burrows, of the same concern. It certainly made Berky feel good to see Tareyton and Serene in all the best locations in town, with no good store failing to sell many of both.

For Kaywoodie Pipes

A. Hanauer spent a few days "in our midst" this week in the interests of the fast-selling products of the Kaufmann Bros. & Bondy Co. The Kaywoodie pipes are certainly fine articles, and Hanauer manages to bring back with him many orders for just this brand alone.

Congratulations

Congratulations are forthcoming to J. C. Sholes, city salesman for the Samuel Mechalovitz Co., who recently quit the ranks of the livers of a single life to join the ranks of the Benedicts. The boys all extend to J. C. their best wishes for a completely happy marital life.—HERB.

Vega del Reys Go Both Ways

That good cigars will sell all over the world has been demonstrated by S. H. Furgatch & Co., of 501 East Seventy-fifth street, New York. Last week that progressive cigar manufacturing establishment made an import shipment of Vega del Rey cigars to London, England, and another worth while lot in the opposite direction, to Honolulu, Hawaii. The Vega del Rey is one of the Furgatch leaders.

April Cigar Production Makes Fair Averages

WASHINGTON, D. C., May 26.—The following comparative data of tax-paid products indicated by monthly sales of stamps are obtained from the statement of Internal Revenue collections for the month of April, 1923, as compared with April, 1922. (Figures for April, 1923, are subject to revision until published in the annual report):

Chicago Retail Business Going at Regular Gait

The Call for Nationally Known Brands Increases Each Day—Advertising Creates the Demand—Retailers Devote Large Portion of Display Cases to Popular Sellers.

CHICAGO, May 30.—A canvass of the city trade, finds retail business for the early summer going along at its usual gait. The call for nationally known brands increases each day, due it is stated to the advertising being done here. Retail dealers who formerly featured private brands now devote a large portion of their show cases to popular brands.

Very few factory salesmen from out of town have been here this week.

Wm. A. Vorhauer & Co. are featuring in the newspapers Heineman's Lord Baltimore, 10 cent Waldorf size. Another big seller with this progressive house is Marshall Field.

Progressive Selling Campaign

Calling at Many-Blanc & Co., I found sales manager William Waldman very busy. They have just finished a selling campaign on the north side and placed in 1,872 stores Shrine, Henry the Fourth and Poppers Ace. A fleet of seven auto trucks loaded with cigars and two salesmen to a truck are now covering the South side, and a box of all three brands are left with each dealer called on. Billy says this is a quick way to get distribution as the north side dealers have already begun to repeat. On the sales force is Gus Licouris, a cousin of the King of Greece. Gus has a large Greek following here and sells thousands of cigars each day.

Credit Association Meetings

The Chicago Association of Credit Men will meet hereafter at the Hamilton Club, 20 South Dearborn street. Meetings are as usual every other Thursday and supper is served at 6:00 P. M. sharp. Twenty-six local wholesale houses and cigar manufacturers are members of the cigar division. P. J. Gilberstoof, credit manager of the General Cigar Co., Inc., is the Division chairman. Important credit matters are discussed at each meeting.

To Feature Pay Day

The Superior Cigar Co. of Red Lion, Pa., through its local agent, Peter J. Bauer, has placed with Iwan Ries & Co., 104 North Wells street, the new 5 cent Pay Day cigar. Just as soon as the opening shipment arrives, a large selling campaign is to be started by the entire sales force of Iwan Ries & Co.

La Estrella

E. P. Oakes has returned from Louisville and announces that La Estrella, the first Java wrapped cigar to be made in Key West, will shortly be on sale in the Chicago stores. The E. H. Gato Cigar Co. will wage a large window display campaign on La Estrilla, which will be in 5 sizes, selling from 10 cents to 3 for 50 cents. The Parker-Gordon Cigar Co. which distributes La Estrilla in its various territories, is sending in heavy duplicate orders.

Duplicating Constantly

Big chief Miller, of the Frank P. Lewis Cigar Co., was a visitor here this week calling on Iwan Ries & Co. who distribute the Emerson cigar so success-

A Superior Cigarette

New Crop Sumatra Tobacco

Do you realize that 95 per cent of the time of our principals, representatives and employees, is occupied in the buying, selling and handling of Sumatra and Java tobaccos?

This makes a business of 15,000 to 18,000 bales per annum, possible, a record that has never been surpassed by any one firm at any time.

H. DUYS & CO., Inc.

142 WATER STREET NEW YORK

American Headquarters for Sumatra and Java Tobaccos

fully in the Chicago market. Miller stated that in all territories where Emerson, Java wrapped cigars, are placed the duplicate orders come in each mail. The Frank P. Lewis Cigar Co. have their factories at Peoria and are the largest cigar manufacturers in Central Illinois.

The Taste Is Mild But a Strong Seller

Leo Weiss of the Antonio Roig & Langsdorf, Philadelphia, was a recent visitor. He states he will again take over the State of Illinois. Bob McCusker, who has been taking care of Chicago, has been transferred to Ohio and Indiana. A large new window cutout featuring Girard cigars has just been received by Iwan Ries & Co., who are now busy placing them in the dealers' windows. Girard for mildness has always been a ready seller here and is on sale in all the better stores.

Planco cigars are placed with many dealers.

To Take European Rest Cure

Ludwig Lasker, sales star de luxe for Perfecto Garcia & Bro. has sailed for Europe where he will take a much needed rest.

Theo Selle, the West North avenue restaurant man, features Pancho-Arango made in bond in the 25 cent and 3 for $1 sizes.

Having Good Trade

Ran into Eddie Klein of the Cortez Cigar Co., on his recent visit. Eddie says the summer trade is good and his orders for Cortez are rather heavy these days.

Busy Booking Orders

Ernest McKenzie of the I. Lewis Cigar Mfg. Co., is kept very busy these days. With such leaders as Cobs, John Rustin, Flor de Melba and S. Seidenberg After Dinner cigars Mac is kept on the jump with his sales crew booking the orders.

Herbert Tareyton in Evidence

Have not seen Robert Brunston the Falk Tobacco Co.'s sales manager here, for some time. But Bob must be around as the show windows are full of the "Monocle Man," the new life-size figure sign which features Herbert Tareyton cigarettes.

Out of Dry Dock

George Grant, who recently suffered a serious auto accident, is again around booking orders for the Wm. J. Seidenberg Corp.

Closes Import Deal

Perfecto Garcia & Bro. report the closing of a very important deal in Milwaukee with the Lewis-Leidersdorf Co., which will feature in all of its retail stores and throughout the territory it covers Perfecto Garcia, clear Havana cigars. This brand for some time past had been in the hands of the Buxbaum Cigar Co.

Queen City Star on Job

Phil Jacobs, president of the Cincinnati Cigar Co., was a recent visitor. While here he called on the trade with his representative, Pete Bauer, and with the combined efforts of this pair of stars Camel cigars were placed with the following sub-jobbers: Crocker-Asher Cigar Co.; Cass Bros.; Thomas Slader, South Shore Tobacco Co., and White Bros., of Joliet. Camels come packed in 10s and are listed at $35.

Boosting Blackstones

Wilkie Collins, representing Waitt & Bond, is here doing special work pushing the Blackstone cigar for Ettlinger Bros., local jobbers. Blackstones are on sale in all the better stores.

Turning in Many Orders

Ben Herzberg is now covering the South side in a brand new auto for Iwan Ries & Co. A. F. Nold who works the suburban towns is turning in many orders for Girard Emerson and Pancho Arango. General Manager Iwan Ries and Sales Manager William Tobias, take care of the club, hotel and loop trade and their three leading brands are stocked by all the dealers.

Over the Top

Clarence Hirschhorn, who is chairman of the cigar division of the United Drive for $2,500,000 is a busy man these days. Ably assisted by several leading members of the trade and due to his untiring efforts the allotment for the cigar trade has gone over the top. Busy managing one of the largest cigar jobbing houses here, Clarence Hirschhorn devotes much time to charity. His firm is sole distributor for Harvester, Mozart, El Producto, Detroit hand made and other brands of reputation. At present a Harvester bill-board campaign is being waged and the new posters are very, striking.

Becomes Sole Owner

Jose Perez is now the sole owner of Perez & Oakes, local cigar manufacturers at 24 West Washington street. They manufacture De Perez and Adorato, two brands that are on sale in a number of loop stores.

Good May Business

May business is very good at both the Loop stores of Fred L. Wells. As usual Optimo and Ravisloe Club, from A. Santella & Co., are having the big call.

Edward Wodiska arrived this week and is busy showing the trade the cigars of Gongalez & Mendez, Inc., of Tampa.

Chas. Rubey of P. J. Rubey & Co., South Chicago jobbers, has returned from the T. M. A. convention.

For Displaying Blue Bars

Mr. Fletscher is here for the American Tobacco Co., giving the dealers a fine new crisp one dollar bill where he finds Blue Boar cigarettes displayed on the show cases. I saw him hand Gus Strange, manager for Fred L. Wells an "Iron Man."

Sandy Stuart passed through on his way home. Sandy was taken seriously ill in Kansas City and had to give up his trip.

Mrs. Maud Callaghan of Cass Bros. is back from Washington where she attended the T. M. A. convention.—H. L. H.

Halpern Assets at Auction

PHILADELPHIA, Pa., May 26.—The following official notice has been made public:

"In the District Court of the United States, for the Eastern District of Pennsylvania.

"No. 8296. In bankruptcy. In the matter of Halpern Cigar Manufacturing Company, bankrupt.

"To the creditors of the said bankrupt:

"Notice is hereby given that on the 4th day of May, A. D. 1923, the said Halpern Cigar Manufacturing Company was duly adjudicated bankrupt; and that the first meeting of creditors will be held at my office, Rooms 601-04 Stephen Girard Building, Philadelphia, on Monday, the 4th day of June, A. D. 1923, at 11.30 o'clock in the forenoon, at which time the said creditors may attend, prove their claims, appoint a trustee, examine the bankrupt and transact such other business as may properly come before said meeting. All proofs of debt must be filed with the referee within one year from date of adjudication.—WALTER C. DOUGLAS, JR., Referee in Bankruptcy.

Buys in Local Market

Adolph Loeb, of K. Straus & Co., the Philadelphia cigar manufacturers, was welcomed to the New York leaf market last week. Mr. Loeb made considerable purchases of fancy tobacco for his organization.

Keystone State Revival

I. M. Jacoby, of Meyer & Mendelsohn, has returned from Pennsylvania. Mr. Jacoby is confident of the future prosperity of the Keystone State, and notices a decided improvement in business conditions there.

Off to Hartford

Ira Strouse and Leopold Holzman, of Strouse & Holzman, leaf dealers, are paying a flying trip to Hartford this week to inspect the shade-grown crop.

Co-operation and Other Trade Topics Discussed

F. A. de Pilis Sets Forth Views On Various Important Features of the Tobacco Industry, in a Letter to Charles Dushkind, Managing Director of the T. M. A.

In a letter to Charles Dushkind, managing director of the T. M. A., F. A. de Pilis, vice-president of Patterson Bros. Tobacco Corporation, of Richmond, Va., and New York, sets forth his views on various important features of the tobacco industry, as follows:

CHARLES DUSHKIND,
Tobacco Merchants' Association,
5 Beekman street, New York City.

Dear Mr. Dushkind:—The advanced hour at which I first had the opportunity of addressing the convention of the Tobacco Merchants' Association forced me to be brief, and therefore, I take this opportunity to repeat my thoughts and explain them more in detail.

I said frankly at the New Willard Hotel that I felt during the two days of the convention in Washington that it is extremely unjust to you to let you carry the whole burden of the work of the organization without your getting the proper support from all the three branches of the industry, the leaf growers, the manufacturers and the distributing organizations, and I explained in a few short words why I put the tobacco growers in the first place.

I am extremely gratified that Secretary Hoover came personally to address the convention and that he tok that opportunity to point out the importance of the tobacco industry from the point of view of national interest, but I would like to add that, while tobacco is the third most important export industry of the United States of America, and while 10 per cent of the entire export business from America to foreign countries is represented in leaf tobacco and products, the most important side of the tobacco industry lies in the fact that tobacco growing is the second most important industry in the Southeast of the United States.

Tobacco Planting

Secretary Hoover pointed out that the farmer in the United States will have to fight bravely the situation which will develop from the fact that the European countries are slowly recovering in the Southeast and east of Europe, and, instead of importing agricultural products, will soon be again able to export. The situation, however, can be greatly improved if a co-operative association system is built up for the benefit of farmer and consumer, exterminating the middle men.

The farmer has so far been deprived of the benefit of his work. He has received low prices and marketing has been arranged in such a way that he has had to accept the offered prices for all his products, and leaf tobacco in particular. The United States Government is interested in the prosperity of the farmer for more than one reason. The importance of the production of food became clear during the war. In fact, the final outcome of the war was based upon the strongest supplies of agricultural prime materials, and not upon the results of the conflicts of arms. The farmer is the owner of a piece of land, which he loves more than any other tradesman his shop, and this piece of land is a part of the United States of America. So the prosperity of the country and its destiny is closer to his heart than to any other citizen.

I have pointed out quite frequently that I am not afraid of the possibility of national tobacco prohibition, but I share with you the opinion that the enemies of personal freedom are waiting for any opportunity to force their narrow-minded legislation upon us, and if this is not possible in the form of Federal laws, they will try to do so in some of the individual states. While the tobacco industry is the third most important industry in the United States, it is the regard which exists for the tobacco planter which protects us from any foolish attempt of curtailing the tobacco industry more than the regard for the huge manufacturing concerns. The tobacco crop for the southern planter himself is practically the only "cash crop" he has. From the earnings of his tobacco, the planter buys clothes for his family and pays his school and tax bills.

I am in favor and have been for many years of organizing the tobacco planters into co-operative associations, and I am following with the greatest enthusiasm the work of Oliver Sands and others in this respect. The co-operative organizations in the United States are just at the beginning of their development and are of very little importance in comparison to the Raifeisen organizations in Europe. In Europe the members of the co-operative associations are responsible, with every cent of their fortunes and with every chair in their houses, for the welfare of the organizations, and, therefore, the power and credit of the same is unlimited. The management of the co-operative associations supplies the farmer in Europe with seed, tools, any kind of agricultural machinery and with credit on the basis of the expected harvest as the crop grows. The management of the co-operative associations direct their members how much and what kind of crops they should plant.

The development of the organization of the tobacco planters' associations shows that with the growing importance of the same, bigger men are selected to head the organizations. With every day's greater experience, the tobacco planters will realize more and more the advantages they have in belonging to such organizations and in the same proportion the influence of the leading men will grow. They will have the confidence of the tobacco planters which the latter never had in agents, and the buyers of the large manufacturing concerns, and in the leaf tobacco merchants.

Our tobacco manufacturers may ask what interest will they have in seeing the tobacco planters organized in such a way instead of trying to get leaf tobacco as cheaply as possible, and I would like to answer such a possible question. Several years before the beginning of the war, tobacco planting was so unsatisfactory that even in many districts of Virginia people dropped the same. In the years 1918 and 1919 the demand grew so rapidly that the prices for tobacco reached tremendous heights and embarrassed the industry. Then, when, after the experiences of 1918 and 1919, the tobacco planter, encouraged with his good results, put larger acreage in tobacco and spent his savings in the purchase of fertilizer, we saw a most fantastic drop in the prices of leaf, which not only ruined thousands of tobacco planters but the greater part of the smaller independent tobacco and cigarette manufacturers in the United States. Even the largest companies had to face tremendous losses in leaf tobacco in comparison with the purchases they had made in the years 1918 and 1919.

We do not want to have too low prices, in order to keep the planter interested in cultivating the valuable weed. We do not want to have too high prices so that our industry will be able to meet international competition on the world market, and our tobacco planters will be able to export the surplus of their production. We want to avoid great fluctuations in prices, which are harmful for the planter, as well as for the manufacturer, and, therefore, the co-operative planters' associations will be beneficial for the whole industry, and we may expect that its leading men will be able to judge how they can set their prices without harming the export of leaf and tobacco products and the home industry.

At this occasion, I want to come back to the prediction which I made in the early weeks of 1920, when I visited the city of Havana. The price of sugar at that time was 32c. per pound. I said in an interview at that time that the exaggeration in speculation of sugar prices would deprive Cuba of the great advantage the island had at that time of recovering the world market which she had gained in the World War, and which she had lost in the three decades previous. Sugar production in Belgium, Saxony and Bohemia had ceased, and Cuba had, from 1919 until 1920, a kind of monopoly

in that commodity. The unwise abuse of the situation, however, encouraged the countries with similar climatic conditions to plant sugarcane wherever possible, and in other districts, where it was impossible to plant sugarcane, the sugar beet was introduced. This will spread more and more, and I personally consider the districts of Nebraska and North and South Dakota especially fit for the introduction of sugar beet. If Cuba had recognized the situation and raised the price only from eight to twelve cents per pound, she could have defended her position. So my prediction came true, and Cuba lost forever her chances of dominating the world market in sugar. Unwise abuse of a situation in whatever direction it may be, forces reaction.

I have pointed out in the Dixie number of the trade paper TOBACCO that in many European countries tobacco planting has been taken up, and especially in some of the African colonies, the French and British governments are encouraging tobacco planting. Inasmuch as our prices are justified by the difference in quality of our goods, those experiments will never become a serious menace to us, but if our prices of leaf tobacco are too high, strong efforts will be made to encourage tobacco planting in other countries and will finally bring about similar results as those in the sugar industry in Cuba.

Therefore, again I am gratified to see that men thinking in terms of national economy, and not considering their private interests only, are now in a position of taking the lead in tobacco planting.

Tobacco Industry

It is not necessary to point out that no other branch of the American industry enjoys similar prosperity as that of the tobacco industry. It is not generally known, however, that some of the greatest fortunes in the United States have been made in connection with the tobacco industry, which affords greater chances for unusual profits and does not have equal speculative risks as do oil or steel or cotton. With great regret I observe the price-cutting movement by the manufacturers, as well as by the retailers. This is especially foolish at the present time and nothing can be achieved by it. In fact I do not understand how the management of some of the large companies can justify, at this particular time of prosperity in tobacco manufacturing, any kind of reduction of prices which means nothing else than a waste of the property of their shareholders. I can say this frankly, as we are not affected and do not intend to follow any such policy, and I believe that we have a stronger position with the public when we come out in the open and declare that the quality of our prime materials, as well as our wrapping material, makes it impossible for us to join in such a movement. Further, I believe that the main body of consumers in the United States fully realize that *price-cutting cannot be carried on without a reduction in the quality* of the products. I believe that some of the finest brands in the United States in the last few weeks have been discredited and ruined by this movement, and I come back, therefore, to the statement I made at the New Willard Hotel; that in selecting representatives of our industry in a body such as the Tobacco Merchants' Association we should not take into consideration the capital of the company represented, but the men themselves who are delegated.

I have said repeatedly that some big men look smaller when approached, and I do not hesitate to say in this letter what I pointed out in my statement in Washington: that it is much easier to pay dividends in a company of $100,000,000 or $150,000,000, where the interest is produced even in spite of mistakes, than in smaller concerns.

It is not necessary to speak about the prosperity of our cigarette industry, but I only want to repeat again and again that a $3 tax upon cigarettes is unjust and that the increase in production of cigarette consumption must be considered a plebiscite against any restriction of the use of cigarettes.

The pipe, which foolishly has been considered for some time a form of smoking not fit for the best homes and in the drawing-room, has become, during the last few years, more popular. This movement has come to us by way of England, and in this connection I want to say a few words about another extraordinary phenomenon in our industry.

There are certain products in the world which all countries import directly from the land of their origin, like astrakhan, caviar, claret from Bordeaux, champagne from Rheims, and Epernay and Hoch and Moselle from the Rhineland. Virginian tobacco is the most popular tobacco in the English-speaking countries, and it is only natural that Virginian cigarettes and Virginian smoking tobaccos are exported to all countries; and in fact, the British-American Tobacco Co. and others are selling American-made tobacco products to all countries of the world. But we see that there is another movement on foot to reimport to the United States of America, British-made goods manufactured from Virginian and other American leaf. We even see that some concerns are making arrangements to manufacture in America smoking tobaccos and cigarettes made of American-grown tobacco under the labels of British concerns. To illustrate how extraordinary this phenomenon is, we can realize it if we think what impression would be made if firms in Tampa and Key West manufactured Havana cigars and reimported them to Cuba; or, if manufacturers in Havana of Havana leaf cigars did so under the labels of Tampa and Key West. Can we find any better proof of showing a lack of good judgment and an absolute lack of consideration of the interests of the home industries and national economy?

The cigar industry came to the convention with complaints about unfair trade methods. A few of the speakers, misjudging the situation, wanted to get their own way and protect cigar smoking at the expense of the cigarette. As we are more interested in the manufacture of pipe tobacco than cigarettes, we could feel the same way, but I consider every move of that kind very foolish. We must follow a policy similar to that of the agrarian organizations before the war in Europe. We must present one front from the tobacco grower to the tobacco distributor, including all branches of the industry. Just as the agrarians in Europe fought as one man for the interests of the smallest and least important branches of their industry, so we *must present one front and fight wherever there is danger to any one belonging to us.*

The cigar industry, however, must understand that some of the reasons for the lack of increase of cigar smoking cannot be removed, and I clearly see that, to a certain extent, the same applies to pipe smoking. We are living in a time of great hurry. To light a cigar means to smoke it for fifteen or twenty minutes and we do not always have sufficient time for that. We can light a cigarette between the acts of a play and before entering a drawing-room; and while it takes longer and greater preparation to smoke a pipe than to smoke a cigarette, we can empty a pipe before finishing it, but we must throw away a cigar. The cigar however, of good quality represents an amount of money equal to a package of cigarettes, and that is a fact which must be faced. Many other handicaps to the industry, however, can be removed. The main reason for the lack of increase in cigar production lies in the fact that the cigar industry is dependent to a greater extent on manual labor than are the industries of smoking tobacco and cigarettes. Just think of the difficulties which the Porto-Rican concerns have had in the last few years with the employees' labor.

Another handicap to the industry is the lack of a central organization, and the selfishness of the distributing concerns which are furthering only a few of their own brands. *If the cigar manufacturer would organize a committee, I would most unselfishly assist them to improve their situation and advise them to undertake many things which I do not want to mention in this letter.*

Distributing Organizations

I had the opportunity in Washington of expressing my opinion about the distributing organizations to representatives of many trade and daily papers, and pointed out to them, as I did at the meeting of the convention, that the dictatorial and patronizing ways of some of the distributing concerns are becoming unbearable. If our manufacturers—big and

small—would come to the conclusion that their strength lies in co-operation, we could meet the situation effectively. Chain organizations are nothing else but united dealers. Where they are dealers only, there is no objection to their organization growing. *Where the chain organization is acting as the agent of a manufacturing concern, the individual stores should bear the name of the latter;* so, as I have explained before, the consumer will be aware and will know that he is not buying his goods from an independent store, but from the retail department of a manufacturing concern whose paramount aim is selling its own goods. If we manufacturers would stick together and say that we do not want to have our goods distributed through such organizations, we would soon have very good results.

Of course, in every situation I believe that a friendly understanding is preferable to any use of power or influence, and I am a very great advocate of bringing tobacco growers, manufacturers and distributing organizations together around one table to discuss and defend their mutual interests; and I want to close this letter by repeating my appeal which I made in the convention: "We independent manufacturers have no reason for being afraid of the $100,000,000 and $150,000,000 concerns, but the men heading those large concerns should be big enough to see that the rapid increase in tobacco consumption gives the possibility to all of us, not only to exist but to enlarge our business without any harm to them. *The United States Government should see to that where there is no justifiable reason for price cutting, with the sure consequence of ruin to the economically weaker elements, the same should be stopped."*

Exports

The export of tobacco products is increasing, and will increase to a greater extent, if men with experience and knowledge of conditions in foreign countries will advise and co-operate with the United States Government. Many countries today are depending upon the financial assistance of the United States, and influence can be used, as it has been done successfully in one case, to ask for easier conditions for the import of American leaf and tobacco products.

If you, my dear Mr. Dushkin, are willing to help me along these lines, you may be assured of my co-operation, and I sign this letter with expressions of my highest esteem.

Very truly yours,

(Signed) F. A. DE PILIS, Vice-president.

Cigarettes Regain Four States

For five years we have been hearing frantic warnings about what was to follow in the wake of liquor prohibition. The loudest of these warnings ran to this effect: "They'll take away tobacco from us next, cigarettes first," writes Charles Phelps Cushing in the New York *Times*.

Today, if we try to take an inventory, what shall we find indicating the state of public opinion concerning these threatened prohibitions and consorships?

To begin, then, with tobacco, of which it was so freely prophesied five years ago that this was the next of our "personal liberties" after alcohol that was to be snatched away, Mr. Cushing continues. The first target of this "second prohibition campaign" was to be the insidious cigarette. Since 1918 what actually has been accomplished in the way of legislation forbidding the sales of cigarettes to adult consumers?

Losing Anti-Cigarette Campaign

As the most reliable commercial source of information on the subject the reporter turned to the Tobacco Merchants' Association of the United States and there interviewed Charles Dushkind, the association's attorney.

With the stub of a black cigar clenched firmly between his teeth, Mr. Dushkind tilts back in a swivel chair and speaks tersely:

"Five years ago? Six States then had laws entirely prohibiting the sale of cigarettes within their areas. They were Arkansas and Tennessee, North Dakota, Kansas, Nebraska and Iowa. Before that in seven other States such legislation had been tried and had failed. Washington, Minnesota and Wisconsin, Indiana and Oklahoma passed laws and later repealed them. South Dakota had passed an anti-cigarette law which the courts declared unconstitutional except in so far as it applied to minors. Two years ago Utah legislated a cigarette prohibition. But there the reformers made a strategic error this year by attempting to enforce the law while the Legislature was in session. In most instances our opponents show better judgment than that. As a result, on March 10 last, the governor of Utah signed a bill again permitting the sale of cigarettes. So today there are only two States left in the Union which continue to carry on their statute books laws forbidding the sale of cigarettes to adults. They are North Dakota and Kansas. The South Carolina Legislature at its latest session imposed a heavy tax on cigarettes—among several other commodities so taxed—but this is a measure affecting price, not a prohibition. So, on the whole, we can't complain."

Two local officials of the W. C. T. U. were called upon next to check up Mr. Dushkind's statement if they cared to do so. The replied that they had no information on the national situation.

They added that they desired to deny the rumor that the W. C. T. U. was engaged in any effort to influence legislation, either in New York State or in the nation, against the sales of cigarettes to adult consumers.

The reporter then questioned Dr. Charles G. Pease, president of the Non-Smokers' Protective League of America, one of tobacco's best known foes and an enemy of the cigarette in particular, because he regards it as the most "insidious" of smokes. Was the information supplied by the Tobacco Merchants' Association correct? Had the anti-cigarette agitation lost or gained ground in legislation in the various States in the past five years?

Dr. Pease replied that he had no up-to-date statistical information at hand; "the status was so constantly changing"; he had not followed it closely for two years. But he showed no disposition to evade the issue when the reporter suggested:

"Let me state it another way. Your opponents declare that you have lost in area by States. In general, is that true?"

"Absolutely. And also in the amount of tobacco consumed. I would not attempt to deny that, either."

"How do you account for it?"

"Such things as this clipping." He produced a cable message from Paris under the heading, "Smoking Beneficial, Says Paris Doctor; Nicotine Forms Anti-Microbe Chemicals." Dr. Pease explained at length the "fallacies and evasions," as he saw them, in the Parisian scientist's argument, and ended: "Now, where does that place this man?"

Dr. Pease said it was plain misrepresentation, "printed by a subsidized press."

Anti-cigarette legislation has lost ground in the last five years everywhere but in Kansas and North Dakota which States have a combined population less than that of Brooklyn and Queens. For the present, it would appear, the liberties of the cigarette smoker in the United States are comparatively safe.

Middle West Trade Good

Harry Lloyd, of D. Dreux, Inc., is meeting with encouraging success in the Middle West. Mr. Lloyd is covering the State of Ohio this week, where optimism always prevails.

Experimenting With Tobacco

Huck Finn objected to the vehemence with which the old maid who adopted him denounced tobacco. His point was that as she neither smoked nor chawed she knew nothing about it. Her objection was sectarian. Since King James' "Counterblaste to Tobacco" most controversy has had a religious trend, says Joseph Gould, in reviewing Prof. M. V. O'Shea book, *Tobacco and Mental Efficiency,* for the New York *Herald*. Among the Indians the weed played an important part in ceremonials. Dr. Spurgeon said that every night he smoked a good cigar to the glory of God. On the other hand; many sects and religions are much opposed to tobacco.

There is now a "committee to study the tobacco problem." It includes eminent scientists, some of whom smoke and others who are non-smokers. So much money goes up in smoke that it is an economic problem. "We are now estimated to spend over $1,600,000,000 a year on this one commodity, not counting accessories, such as matches, pipes, etc., or the fire loss of which smoking is now recognized to be the leading cause."

Naturally, the investigation of such a subject meets with difficulty. Mr. O'Shea says: "This committee, like all groups who aim to ascertain the truth on a controversial subject, is pretty sure to be criticized by partisans on both sides. One group will probably claim that it is really an anti-tobacco society. To others it may seem to be favoring the tobacco habit."

Prof. O'Shea found that his experiments at the University of Wisconsin were misunderstood. He says: "An ambitious newspaper reporter, who had never visited the University of Wisconsin as far as the writer knows, concocted a story and circulated it widely that girl students in the university were being paid by me to chew and smoke tobacco in order that the effects upon their minds might be studied. Some parents having daughters attending the university became apprehensive lest they should be lured into undesirable practices. This story was wholly a pipe dream. No investigation was made of chewing tobacco, and women were not employed in the experiments."

The first part of the book is a study of biography. Men of eminence in all fields have been smokers. On the other hand, Thomas Hobbes, the philosopher, was brought to an untimely grave at the age of 92 because of his smoking thirteen

NEW YORK, THURSDAY, MAY 31, 1923

COMING EVENTS

Convention of the National Cigar Leaf Tobacco Association, in the assembly room of the Merchants Association of New York, in the Woolworth Building, Monday and Tuesday, June 4 and 5,

* * *

Annual convention of the Tobacco Association of the United States, at the Grove Park Inn, Asheville, N. C., June 28, 29 and 30.

AT THE LEAF MEN'S CONVENTION

Not a purveyor alone, nor merely a shrewd merchant, the successful leaf dealer often must be counsellor, friend and banker for clients. When desirable tobacco becomes difficult to obtain, or prices continue to be altitudinous, the accredited leaf dealer has to consider the welfare of his customers as well as himself. However resourceful and strong financially he may be, there are limits to what he can do. Times come when he hesitates to recommend what course to pursue. On occasions, it is hard to advise. Circumstances may multiply perplexities. Troubles of other people add to the dealer's anxiety. His profits frequently are the least things a leaf merchant thinks about.

Conditions prevailing on many leaf markets form more than a background for the annual convention of the National Cigar Leaf Tobacco Association which will be held in the Woolworth Building, New York, on Monday and Tuesday, June 4 and 5.

Crop reports from Cuba, Porto Rico, Santo Domingo, Sumatra, Java and the Philippines are not encouraging to cigar manufacturers who have been hoping to obtain supplies at lower prices. The predicaments of manufacturers increase the worries of the leaf dealers. Undeniably, desirable cigar leaf tobacco will be high and not plentiful. Crops and prices may not have conspicuous places in the routine proceedings of the convention. But thoughts pertaining to the unfavorable effect of a continuance of high prices will be uppermost in the minds of dealers attending the meeting.

Aside from crop conditions abroad, over which of course the Association is not a controlling factor, the convention is assured of satisfactory reports. The Association serves many useful purposes. Its membership is close and harmonious. The representative of the Association at Washington, W. L. Crounse, is one who always does his work carefully and well. In looking after the interests of the Association, he is indefatigable. On tariff matters, and on national legislation relating in any way to tobacco, the capable attorney for the National Cigar Leaf Tobacco Association probably is the best posted man in the country.

Whatever the Association, as a body or through committees, might do for the good of the cigar leaf business has been done, properly.

In any emergency that may develop, the Association will live up to its reputation and be right on the job, safeguarding and promoting the industry. That's understood. Also it is known that members of the Association all are good fellows who are keen to extract proper enjoyment as opportunity presents.

The convention, consequently, is sure to be successful and pleasant.

AS EXPOUNDED IN PENNSYLVANIA

"Hats off" to those who refuse to be discouraged. Honor the men who are determined to succeed. Applaud the perseverance of Pennsylvania cigar manufacturers. They went ahead, though confronted by many difficulties. Give them credit for what they did during the past year.

They achieved big things, despite numerous disadvantages. They kept plugging away, they displayed judgment, they showed grit, they had faith, they exhibited ability, they put forth their best efforts, they proved what they could do, they carried their burdens, they defended the industry, they continued to struggle against odds, they progressed, they increased production and they won, by efficiency and economy, whatever rewards they got.

Yet Pennsylvania cigar manufacturers today are not on Easy Street. Though obtained, immensity of output doesn't guarantee proportionate prosperity to the cigar industry of the Keystone State.

In most cases, under existing conditions, the manufacturer's profit, on Class A cigars, is so slight that a tiny addition to the cost of production will cause the factory to operate at a loss. When high prices of leaf tobacco make steeper, narrower and more perilous his path to success, only the nickel cigar manufacturer who knows his business, thoroughly, can get by and go along. If he has resources, if he utilizes every opportunity, if he exercises the utmost care, he may be able to proceed, uninjured.

If he allows the expense of production to mount above the danger line, he may lose heavily. If, to restrict expenditures, he lowers the standard of his product, he forfeits patronage, immediately.

The present cost of leaf tobacco makes it hard to produce and distribute cigars of approved workmanship and quality at prices dealers will pay for Class A goods.

To continue in business, to keep up production, to maintain standards and remain solvent, what should Pennsylvania cigar manufacturers do?

Each, according to his ability and inclination, may try to solve the problems presented. To prevent ruin, and to obtain prosperity, everyone must study and plan how to work things out.

Many, naturally, will seek, by efficiency in manufacturing and economy in management, to offset, as far as possible, any increased expense and difficulty in getting the leaf tobacco desired. Some may shrewdly endeavor, by collective or individual advertising, to facilitate selling and so reduce the cost and uncertainty of distribution.

On established brands are fixed the best hopes of cigar manufacturers. Advertised cigars that consumers insist on getting, goods that dealers have to carry because of the public demand, of course are the easiest to sell. And the manufacturer is helped and protected in a crisis if his cigars have special salability due to the fact that his brands are favorably known.

Men having the energy, knowledge, experience, capability, prudence and thrift accredited to most Pennsylvania cigar manufacturers, will realize how urgently desirable it is now to feature and safeguard brands.

Production attested by quantity alone, and sales obtained only by the appeal of low prices, are unprofitable at present and will be so in future.

Prospects, on the leaf tobacco markets, everywhere, are such as to induce cigar manufacturers to capitalize brand values. It will pay them.

As the leader in cigar production, having an output of more than two billion cigars annually, Pennsylvania justly should be conspicuous in building up enduring brands, active in creating greater popularity for cigars and zealous in developing the cigar industry.

Though millions of fine cigars, of higher classification, are made every week in the Keystone State, Pennsylvania's cigar production, principally, is composed of Classes A and B.

For the entire country the latest internal revenue statistics now available refer to April, 1923. Outputs in April, 1923, compared with production obtained in April, 1922, are set forth as follows:

	1923	1922
Class A	194,631,225	190,182,215
Class B	122,604,657	119,676,193

To the extent that a gain is exhibited for each class, the showing is satisfactory. Class A production in April was 4,449,010 cigars more than the output obtained during the same month of the previous year. Class B, in the same comparison, shows an increase of 2,998,464 cigars. However, a different aspect is given to the situation when the achievements of competing Class A cigars are shown.

Class A cigars, brought to the United States from the Philippines and from Porto Rico in April, 1923 and April, 1922, are compared thus:

	1923	1922
Manila	16,979,768	7,934,860
Porto Rico	8,746,525	4,502,095

Philippine goods, in Class A, recorded a gain of 9,044,900 cigars for April, 1923, over April, 1922, an increase of nearly 114 per cent. In this connection, too, it should be noted that the United States imported 28,128,148 Class A Manila cigars in March, 1923.

Compared with importations in April, 1922, Class A Porto Ricans, in April, 1923, made a gain of 4,244,430 cigars, increasing more than 94 per cent.

So far as they go, such figures indicate a trend of trade. Though Class A Manilas, imported during April, 1923, actually did not amount to nine per cent of the Class A cigars made in the United States that month, Manilas nevertheless must be recognized as competitors.

Cigars that dealers sometimes call "the big sticks" are still included in shipments coming from Manila. But such cigars, associating size and cheapness, are not so popular as they were. The call for them is diminishing. Manila manufacturers have discovered that it pays to establish and advertise their brands in the United States. Alert importers are more desirous of obtaining steady business. They prefer dependability to bulk. Their purpose is to build up Manila brands in this country. They don't want to increase imports extensively and immediately in a way that would put Manilas on a job lot basis again. Knowing importers are concentrating their attention on strictly hand-made, all long filler Manilas that will retail at a nickel each and yield a fair profit to everyone who handle the cigars.

Suitable for use in cigar manufacturing, good tobacco can be grown in the Philippines more cheaply than anywhere else in the world, simply because Filipino tobacco growers never buy fertilizers. The Cagayan River renews and enriches the tobacco fields annually. Not having to pay so much for the tobacco they utilize, Manila cigar manufacturers are able to put on the American market cigars that force competition.

For some years to come, however, it may be calculated that, in all classes, Manila sales in the United States will not much exceed 250,000,000 cigars annually. In fact, if importers adhere to the brand building policy now in favor, the probabilities are that Manila imports will be about 200,000,000 cigars annually, or less, perhaps.

Such a quantity, while representing competition, really wouldn't be equal to a quarter of the

yearly cigar production in one county in Pennsylvania.

Pennsylvanians, chiefly, have built up the so-called nickel cigar industry of the United States. The safety and welfare of the industry is more important to Pennsylvania than to any other State. It is to Pennsylvania that the trade looks now for light and guidance.

Because of their knowledge of cigar manufacturing, because of their shrewdness, diligence and carefulness, because of the ability they show in making economies effective, and because of aptitude displayed in getting results, operators of Pennsylvania cigar factories are expected to succeed, if success is possible.

Despite adverse conditions, there is a chance to increase and strengthen the cigar industry. Big or little, every manufacturer has opportunities to make more friends for his brands. To the extent of his ability, so far as his influence reaches, he should meet competition, not by price cutting, but by causing his products to be differentiated and appreciated.

Having proven his ability to produce acceptable cigars, a manufacturer's next duty is to make his brands popular. Every consumer who knows a brand and develops a liking for it is a source of income for the cigar manufacturer.

Included in Pennsylvania's immense cigar production there are many brands not well known although they have merit. The modest violet should not set an example for the cigar manufacturer who wants to prosper.

Deprived of all publicity, good cigars made to be sold at a moderate price may remain in obscurity and never be discovered by many smokers. Because they fail to see how helpful and necessary advertising is, numerous cigar manufacturers are unlucky, often they are forced out of business. Most smokers are distrustful of brands of which they haven't heard. It is hard to persuade them to buy an unknown cigar.

Give the immense cigar output of Pennsylvania proportionate publicity and see how much more prosperous Pennsylvania cigar manufacturers would be.

SMOKING

The Tobacco Merchants' Association at its Washington convention discussed a number of interesting things, including cigars. It is fair to include cigars among interesting things, for it is said that a cigar may be interesting if made up of tobacco and put together so that it will draw. Some cigars are made this way, and it is said that some are not. A committee of cigar manufacturers in the convention brought out some facts which show that many Americans are being weaned from the cigar. Americans are not smoking as many cigars per capita as they used to. There are no figures showing that the tobacco habit is loosening its grip on men, and here are figures which show that a larger percentage of citizens and citizenesses are smoking, and that the per capita use of tobacco is increasing in the country.

The cigar manufacturers pointed out the difficulties which beset them and they told what everybody knows, that from a nation of tobacco chewers, snuff-takers and pipe and cigar smokers we have become a nation of cigarette smokers. The manufacture of cigarettes is rapidly increasing. Cigars are just holding their own, and perhaps they are not even doing that. The cigar has become a relatively expensive smoke, and that fact operates against it. The manufacturers admit the high price of cigars, but find it hard to make them cheaper. The taxes on tobacco and cigars, the increase in the price of tobacco fit for use in making cigars, the higher wages of cigar makers and the fact that a smokeable cigar must be made by hand are the reasons for the disappearance of the widely used cigar that sold a few years ago at six and seven for a quarter. With the increased cost of cigars many cigar smokers have turned to cigarettes, but perhaps most of them have bought a pipe, use pipe tobacco as a regular thing and buy a pocketful of cigars now and then.

The convention adopted a resolution "indorsing a continued campaign against the attacks upon the tobacco industry or propaganda against any use of tobacco." There is a campaign against the use of tobacco in any form, and while it is not formidable now, and seems to be of no particular menace to the tobacco-growing and manufacturing industries at this time, yet no one dare make a prophecy that this scattered and smouldering hostility to tobacco may not at some time blaze up and become a paramount, or a near-paramount, national question. A ban has been put by law on cigarette smoking in certain parts of the country. How much the ban reduces cigarette smoking cannot be known, but it is significant of a powerful and growing hostility to the habit.—*Washington (D. C.) Star.*

THE CONSOLING PIPE

The delightfully human letter of personal thanks which President Harding indited recently to Senator Harrison contains one expression which will endear him to pipe lovers the country over. Referring to the senator's many attacks on the administration, the President says:

"In your capacity of chief trouble maker in the Senate you have said some things which made me lay my newspaper down and turn to a fresh pipe of tobacco for consolation."

Only those who are themselves devotees of the pipe will fully appreciate the force of the presidential dictum regarding its powers as a worry dispeller and comfort giver, but they assuredly will heartily and emphatically indorse the commendation. For about the smoking of a pipe of tobacco there is of a certainty an indescribable charm which induces something akin to the feeling that, for the time being at least, one has reached the stage at which all cares are routed and the wicked cease from troubling and the weary are at rest.

Poets have sung in various keys the praises of "My Lady Nicotine" and prose writers have swelled the chorus of approval. None, perhaps, has touched the subject more deftly than did Isaac Hawkins Browne in the series of parodies, to which he gave the title "A Pipe of Tobacco." There we learn that

> When summer sun grows red with heat,
> Tobacco tempers Phoebus' ire;
> When wintry storms around us beat,
> Tobacco cheers with gentle fire.

He also speaks of the "blest leaf," which is

> Rest to the weary, to the hungry food,
> The last kind refuge of the wise and good.

The pipe itself is apostrophized as

> Little tube of mighty power,
> Charmer of an idle hour,
> Object of my warm desire,
> Lip of wax and eye of fire.

The many virtues which Browne found in pipe smoking in the first half of the eighteenth century have evidently lost none of their potency in the nearly 200 years that have elapsed since the publication of his clever imitations of then living poets.—*Washington (D. C.) Post.*

A PROGRESSIVE MANIA

We may expect that presently the anti-tobacco symptom of the prohibition mania will make its appearance again.

President Bloch, of the Tobacco Merchants' Association of the United States, on Wednesday told 400 members of that organization, assembled in convention at Washington, that intensive drives against all forms of tobacco have been started in all parts of the country, "with the avowed object of burying tobacco in the same grave with John Barleycorn."

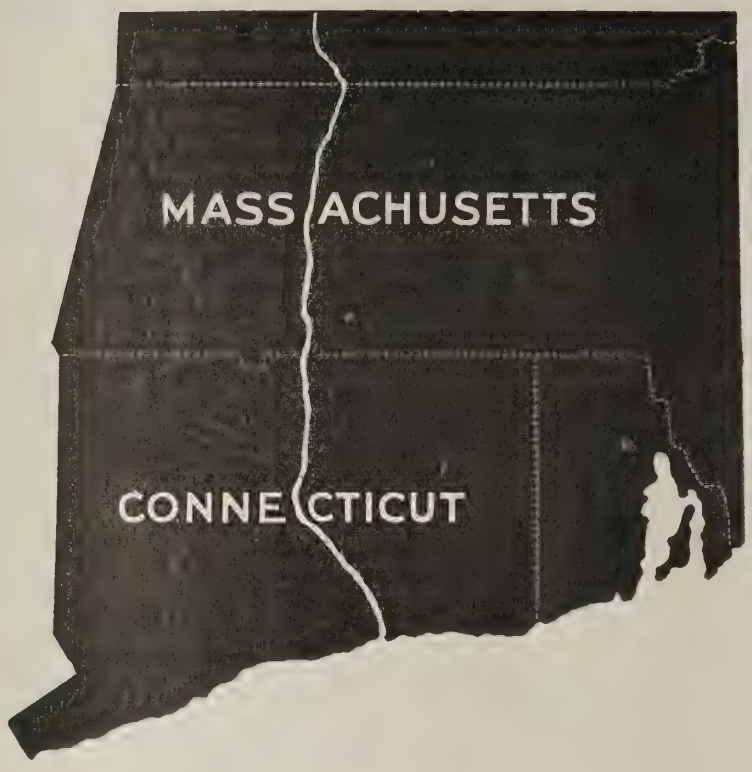
He said that such activities are persistent, although scientific authorities testify to the comparative harmlessness of tobacco. The menace of them will remain, he said, "as long as professional agitators are able to pass their hats and collect the coin."

Doubtless it will, for the mania which produces fierce desire to prohibit something is chronic and progressive with those whom it afflicts. The anti-tobacco agitators will strive for the adoption of a twentieth amendment to the constitution prohibiting to Americans the production, manufacture, sale and use of tobacco in any form. Then, if they should be successful, there would be another enforcement act, another prohibition bureau, another army of enforcement agents, more illicit traffic in something "verboten," and aggravated public resentment of restraint upon personal liberty.

One is inclined to believe that the anti-tobacco agitators cannot succeed, but one remembers the time when the same belief prevailed as to the possibility of adoption of a beverage prohibition amendment. Therefore there cannot be prediction of failure in this case, especially if the public remains inclined to hold in contempt this new attack upon its liberties.

If the agitators should accomplish this purpose, their desire for further exercise of their power would be intensified, and in the course of time there would be left to this nation, of food, wearing apparel, reading matter, entertainment, sports, and other necessaries, luxuries, pleasures and diversions, only those upon which the prohibition maniacs had not placed the ban of law. —*Albany (N. Y.) Journal.*

THE CRUSADE ON TOBACCO



Both fact and common sense were illustrated in the address which Jesse A. Bloch, president of the Tobacco Merchants' Association of the United States, delivered in Washington Wednesday at the opening of the annual convention of the association. Our Washington correspondent stated that Mr. Bloch fully recognizes that a formidable crusade to prohibit the use of tobacco already is under way and he foresees danger that it will assume serious proportions.

We have been under this impression for several years. We have observed that a number of professional reformers have in recent years become more or less prominently identified with anti-tobacco organizations. In some States these individuals have been leaders of fights to secure the enactment of legislation prohibiting the use of tobacco in certain forms. Such laws, invariably, we believe, have killed themselves by enforcement, but this does not mean that the reformers have been forced out of business. Reform has become a regular business with a considerable number of people, chiefly men and women unable or unwilling to earn livelihoods in other fields. Of course, such professionals, paid good salaries to agitate, always secure a following of honest men and women who get nothing out of the crusade save the satisfaction of feeling that they are engaged in a work which they have been led to believe is in the interest of health or morality or both. And so many men and women are disposed by nature and habit of thought to regard as evil anything which contributes to the pleasure of mankind. When the Roundheads gained control of the government of England they put an end to bear-baiting by act of parliament, "not," says Macaulay, "because the sport gave pain to the bear, but because it gave pleasure to the people."

The pleasure derived from the pipe and cigar by smokers is positive torture to many who do not and mayhap cannot indulge. This class, under the leadership of professional crusading reformers, is threatening one of the most important industries in America. Nothing is to be gained by shutting our eyes to a situation which is serious—more so than the majority of people realize.—*Petersburg (Va.) Progress.*

Philadelphia Cigar Trade Conditions Are Fair

Federal Reserve Bank Reports on Business Status—Prices Firm, Stocks Moderate, Labor Sufficient and Wages Unchanged —May Leaf Tobacco Purchases Generally Light.

PHILADELPHIA, May 30.—The cigar and tobacco business is reported in rather good condition, with prices firm and finished stocks moderate, in the review of business conditions in the Third Federal Reserve District just published by the Philadelphia bank. The synopsis of conditions compiled as of May 23 says that labor is sufficient and wages unchanged. Collections have been fair.

"On the whole," says the report, "the demand for cigars is fairly good and shows little change from that of April. Usually the month of May is the beginning of the active season in the cigar industry, but nearly all manufacturers report that buying this month, although somewhat heavier than it was a year ago, has not been up to expectations. Many makers are inclined to believe that retailers are rather heavily stocked up, and for this reason have deferred purchasing until their shelves become depleted.

Cigar Demand Good

"The large manufacturers of the better grades of cigars, which retail at from 1⅓ cents to 15 cents each, find the demand to be good and are operating at close to capacity. The call for Class B and Class A cigars, however, is only fair, and both large and small manufacturers report that it is little if any greater than it was a year ago. The factories making these classes are running at an average of 80 per cent of capacity. Practically all of the orders booked are for prompt shipment, less that 5 per cent being for delivery beyond sixty days.

"Manufacturers of Turkish cigarettes report that the demand is fair and much the same as in previous months of this year, but it is considerably better than it was a year ago. Production of Turkish cigarettes is at about 60 per cent of capacity.

"The call for American cigarettes continues to be good and production is well above 85 per cent of capacity. Severe price cutting in retail stores is on the decline. Manufacturers of scrap and chewing tobaccos report that the demand is only fair, and some even characterize it as poor. Production in the tobacco factories varies from 30 to 90 per cent of capacity.

"In the closing days of April one of the largest manufacturers of cigars announced an increase of $1 per thousand on their Class B brands, but the other cigar makers in this district have not followed this example. In general, prices of cigars are firm and unchanged. Cigarette prices, too, are firm. Tobacco leaf prices are exceedingly steady, and as each new crop comes into the market, it is quickly bought up at prices well above those of a year ago.

Stocks Moderate

"At the majority of factories, the stocks of cigars are moderate and are again increasing, but a few manufacturers report that their finished stocks are light. Some cigar makers are operating on order only and are thus keeping finished stocks low. Supplies of tobacco leaf at most factories are moderate and are increasing, as many packings of both foreign and domestic leaf are now being bought by manufacturers.

"The supply of skilled operatives at most plants is sufficient, but a scarcity of unskilled workers is noted. In general, wage scales for skilled workers are unchanged, but several manufacturers have advanced their rates of pay for unskilled labor from 10 to 20 per cent.

"To some points in New England, manufacturers are still resorting to express shipments, because of embargoes on cigars via freight; but the general transportation condition is improving. Collections are slower than they were a month ago, and the majority of firms report that they are only fair.

"With the exception of Sumatra leaf and the pool-controlled Wisconsin and Connecticut tobaccos, purchases of tobacco leaf have been light during this month. The Lancaster market has been very inactive, but packers report that this is to be expected at this time of the year, as the 1921 crop has practically disappeared from the market, and 1922 packings are not yet completed. Several large factors made some purchases of 1922 Pennsylvania packed wrappers at from 28 to 30 cents per pound in the middle of the month. The 1922 Pennsylvania fillers in the bundle have been practically absorbed at prices ranging from 5½ to 8 cents per pound.

Good Binders Scarce

"Dealers report that there is a scarcity of good Wisconsin and Connecticut binders because of the short crop in those States last year, but they believe that there will be enough to go around. Ohio,

American Can 5s in Strong Position

Financial position and earning power of American Can Co. justify a high rating among industrial issues for its 5% debenture bonds, due February 1, 1928. Selling at 98½ over the counter they yield about 5.34% to maturity.

American Can Co. 5s are a direct obligation, but not secured by a mortgage. Company has no mortgage or funded debt other than this issue, and it is the only charge against plants and property. Sinking fund provision requires company to pay trustee $500,000 annually to retire bonds at not exceeding 102½ and interest, and if bonds are not purchasable at that price an amount sufficient to exhaust sinking fund payment is to be called by lot at 102½. In 1922, company purchased $2,767,000 of debentures in the market at a cost of $2,732,189, says the *Wall Street Journal*. These with bonds previously obtained nearly provide for remaining sinking fund requirements leaving outstanding $6,372,500 callable on 60 days' notice on any interest date.

Company owns and operates 48 plants in the United States and Canada.

Report for year ended December 31, 1922, showed surplus of $10,433,350, after charges and federal taxes, equivalent, after deduction of preferred dividends, to $18.30 a share on $41,233,300 common stock against surplus of $4,027,861, or $2.76 a share on common in previous year. In November, 1922, common stock was placed on $5 annual dividend basis. Operating income in 1922 was largest in its history with exception of 1916 and 1917 and net income was second only to peak war year, 1917. At end of 1922 current assets were $46,230,379, of which $19,926,445 was in cash and government securities. Current liabilities were $9,160,587, leaving net working capital of $35,069,792, compared with $29,736,047 in 1921 and $22,625,568 in 1916.

There has been an increasing demand for canned goods in the past few years and American Can Co. so far this year is reported to have had heavier sales than for corresponding period of 1922.

Following table shows annual interest requirements and times earned on outstanding debenture 5s from 1918 to 1922:

Year	Bond interest	Times earned
1922	$465,575	23.40
1921	492,400	9.18
1920	520,928	10.65
1919	548,533	10.44
1918	575,508	11.42

Bayuk Brothers Preferred

Question—I have purchased from a friend of mine 20 shares of Bayuk Bros., Inc., 7 per cent preferred stock at $100. I wish to ask you if you consider this a good business man's investment and oblige. —F. E.

Answer—Bayuk Bros., Inc., was incorporated in Maryland in 1920 to manufacture, sell and deal in cigars, smoking materials, tobacco and the like. The company took over a Pennsylvania corporation of the same name established by the Bayuk brothers in 1897. Property owned and leased is located in Pennsylvania and New Jersey. Plant and equipment were valued at the end of 1922 at $535,392, and inventory amounted to $3,455,000. Net working capital amounted to $2,817,0. Capitalization, as a result of changes made in February, consists of $2,000,000 7 per cent cumulative preferred, $1,280,500 second preferred (each $100 par) and 63,[illegible] shares of no par value common, carried on the balance sheet together with surplus of $1,362,813. Net tangible assets applicable to the common stock, excluding $209,[illegible] intangible assets amounted to $1,153,[illegible] at the end of the year, or $18.05 a share. Net income last year amounted to $1,12[illegible] 926 against $494,342 in 1921, and surplus after dividends was $930,206 against $3[illegible] 222. The first preferred is entitled to preferred assets and dividends at the rate of 7 per cent; the second preferred to 7 per cent non-cumulative dividends after the first preferred have been provided for. Payments have been made regularly on the preferred stocks, but no dividends have been paid on the common of the new company. On the old company common dividends ranged from 16 to 20 per cent. Range of prices: high 65 in 1922; low 27 in 1921. The first preferred is a reasonably good investment.—*New York Tribune.*

Imperial Stock Dividend

LONDON, May 24.—The management of the Imperial Tobacco Co., at a special meeting, adopted a resolution to capitalize the reserve and create 7,490,000 ordinary shares of £1 each, to be distributed to shareholders registered June 19.

Fanciful Ideas Accredited to the French

WASHINGTON, D. C., May 30.—French legal authorities who have been considering the Supreme Court decision holding that foreign ships may not enter American three-mile limit with liquor aboard, have suggested that France may properly act in reprisal against the ruling by barring American ships carrying tobacco or permitting its use abroad French waters. The legal basis of [illegible] it is pointed out, would be somewhat parallel to the American basis, in that tobacco is a Government monopoly under control of the French Government.

Such a step scarcely is likely to be taken but its suggestion furnishes an interesting indication of the manner in which the American ruling has been received.—LAMM.

Australian Tobacco

WASHINGTON, D. C., May 29.—There is growing much interest manifested by the people of Victoria in the matter of tobacco production, according to a dispatch received by the Department of Commerce from American Consul Sammons regarding Australian tobacco production. For many years attempts have been made to increase the production and to improve the quality of domestic tobacco, in order to reduce the tobacco imports into Australia; but on account of the growers being unfamiliar with the proper methods of culture and curing the leaf, their efforts have been unsuccessful.

The state of Victoria has commissioned Temple Smith to proceed to the United States for the purpose of inducing at least twelve American tobacco growers to emigrate to Australia to demonstrate to Australian farmers the proper methods of cultivation and curing tobacco.

Importation of American tobacco into Australia for the fiscal year ending June 30, 1922, amounted to about $10,264,137.

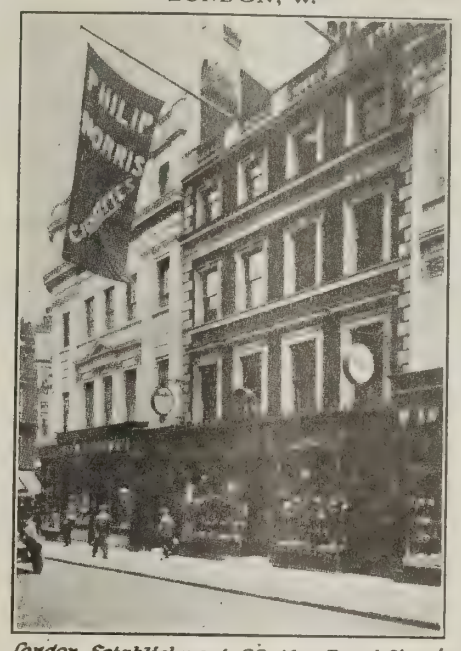
Joseph Winnick Heads Cigar Mfrs. Board

The Cigar Manufacturers' Board of Trade makes the following announcement:

"Please note that at the last regular meeting of the Cigar Manufacturers' Board of Trade the following officers and directors were elected for the ensuing year: Joseph Winnick, of the G. H. P. Cigar Co., president; Samuel Wasserman, of the B. Wasserman Co., vice-president; Arthur Werner, of Goodman & Werner, secretary and treasurer. The board of directors consists of the following: Asa Lemlein, of Gans Bros.; Leo G. Steiner, of E. P. Cordero & Co.; I. J. Block of the Inter-Borough Cigar Co.; Julius Blum, of Harry Blum, and Albert Reichert, of Carl Upmann, Inc.

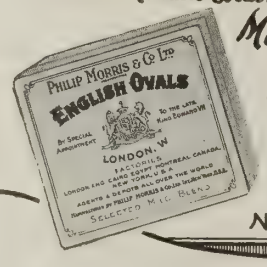
"The Cigar Manufacturers' Board of Trade primarily was formed for the purpose of forming a link between the cigar manufacturers, jobbers and retailers. The need for such a link must be apparent to everyone. In almost all industries the Boards of Trade are becoming more useful to both their members and to all those interested in their particular industry as time goes on.

"Comment was passed at the last meeting of the Board, held at the Hotel McAlpin last month, by some of those present, that our organization at this time is not only bigger but contains more representative firms and is accomplishing more than it ever did in its existence. It may be of interest to retailers to know that they are cordially invited to consult with the secretary of our organization, Arthur Werner, at 51 Chambers street, New York, at any time concerning matters of interest to the retailer. This applies to financial matters, as well as other questions that the retailer desires to solve. The Board of Trade is always willing and anxious to give a helping hand to retailers."



Cedar Products Changes Hands

The business conducted by William H. Thatcher, P. L. Sillman and C. E. Hildebrandt, under the name of the Cedar Products Co., at 76 Main street, Long Island City, N. Y., has been sold to Philip L. Hans, of Long Island City, who will continue to manufacture the same high-class cedar can linings for the cigar trade.



Returns from Inscriptions

Lother Herzog, of Herzog & Sarluy, who has been attending the inscriptions at Amsterdam, returned to New York on the Cunard liner *Mauretania,* arriving last Friday. Mr. Herzog succeeded in buying a good quantity of fancy Sumatra tobacco for his organization.

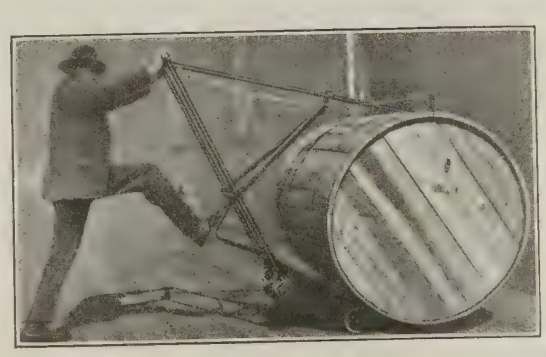
It Gives A Care-free Service

One convenient feature of the JOHNSON TOBACCO CURING FURNACE is that users are relieved of an annual repairing or overhauling.

Once properly installed, the Johnson Furnace is guaranteed to give five years care-free service.



Old barns give excellent cures, once equipped with a Johnson—the curing quality is improved—the fuel expenses are lessened—the time necessary is diminished.

Albany Biziness in Line With Elk Purple-Whi

Manufacturers and Jobbers Bizzy!—So Are Oppressed I tailers!—Man Wanted: Must Be Union Workman!—Wh Gato No More—Country Gentleman?—Nix!—Fifty-sev All Set!—Advertising Gets the Gold!—Tobacco Page r Sports, Which?

NEW YORK STATE CAPITOL DISTRICT, Elk Week, 1923.—"Town looks pretty pretty!" commented Jim Stubb, removing his purple-and-white banded straw lid and swinging it upon the proper nail in the wholesale warerooms o' Stubb & Ash, Inc., tobacconists to the tourists. "Never saw Albany put on so much swish, did you, Sam?"

"Huh! Yuh should now mebbe believe it some business will also be done!" sighed Sam, laying down the last sheet o' Elk crepe paper in the window. "What day, y'unnerstan, should the rush be so heavy as to sag this here floor, hey?"

"Tomorrow," announced Jim Stubb, drawing up a seat in the Hot Chair Club, and, at the same time, avoiding the wrinkles possible to his blue serge coat and white pants. "Tomorrow is the big day for the parade. But, Sam, business has been fine anyway this week, hasn't it?"

Was, Is, and Shall Be!

"This week?" shouted Sam Ash, putting in the window some purple-and-white cigarette tubes, with a card, "For Elks Only." "Why this week has been r-r-r-rh-otten! Outside of that one order we should ship to Catskill, yet, I bet yer——"

"Well, I got that, didn't I?" Jim Stubb claimed, calling together the Committee on Good Business. "And Schulte got Dearstyne's old corner of South Pearl and Division streets, too, you'll notice!

"Took over just the tip o' the corner, I hear. There they will open in about eight weeks, perhaps for the Fourth o' July. Good stand for cigars that, Sam. Dearstyne's sold a lot of stuff there, and it's been a cigar store so long that I guess it always will be!"

What About Abe Lerner?

"Uh-huh, but what about Abe Lerner?" yelled Sam Ash, from his spot in the sun o' the show window. "Should he give up that there see-gar privilege on the opposite corner o' South Pearl and Division streets, unnerstan', just on account Schulte should say so?"

"No, no, Sam, you got that wrong," corrected Jim Stubb, opening up the daily sessions by lighting a favorita. "You see, Sam, Lerner got that store lease as a sub from the Schulte folks. You ought to remember when the United had that shot, which they disposed of indirectly to the Schulte people.

"Then it was sub-let again to a concern which recently turned it over to Abe Lerner as a haberdashery. While Abe, when he saw the possibilities for cigars after Dearstyne's moved to Broadway and Steuben, got ready to put in a full line o' smokes. This the Schulte firm forbid. And there the matter rests, with Schulte sitting pretty?"

Get Back of the C. of C., Urg George

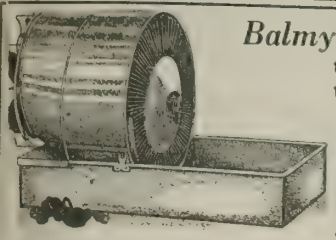
"Sittin' pretty ain't always a business, y' unnerstan," objected Ash, adding to his window-trim ano box o' foil wrapped Resagos for vis Elks. "That's exactly what George Slyke told that there Chamber o' C merce when he got to be president, nerstan me?

"Oh, yes, that's so, George Van S is the boss there now, isn't he?" no Jim Stubb, knocking the ash off favorita in Sam's plush hat. "So I pose he'll put the Peter Schuyler c pepperino in the ninety-cents-per- luncheons, too."

"Sure, already he has done so," Ash retorted, getting into George's ner with a box o' Schuyler perfectos the window display. "For he adver the Chamber o' Commerce in a mem ship drive this month in a way to at attention of even them there City o' portunity people across the river t in Rensselaer.

"Letters and radiograms from President Harding, Charlie Hughes all that class o' boys was read a luncheons, not knocking the camp y' unnerstan. An' the Expansion ended up with almost so many members for the Chamber as G. Van Slyke & Horton had orders Peter Schuyler cigars at this here bany factory, unnerstan."

Wanted: Another Union Work



"Factory orders are what's ke us very busy!" reluctantly admitted Faust, filling his bruyere with more Union Workman for the ac o' Scotten-Dillon Tobacco Com "And we want another good missi man here in the Capitol District.

"He needn't be a graduate sale of any correspondence school. But works all day for Scotten-Dillon h expect a fair deal. Our business is enormous. All brands and lines are ing in excellent shape, and we loo a big Summer."

From the South Comes Potpo

"So do we," chimed in J. E. Fox ing down his ace for the J. S. P sohn Cigar Company, Savannah and where. "Because our Potpourri bra smoking mixture is now intro pretty much all over the northern tory, and the repeat business is ning to pour in.

"One of our first representatives was Aaron Pareira, of South Pear State Streets. He sold Potpourri the demand was small, and he has increased it materially. Shipment made direct to you, as we do not o through any jobber here."

Balmy Moist Atmosphere

l Set Now at Fifty-Seven

re we," affirmed Bruce Macdon- of the Bruce Macdonald Com- 7 Maiden Lane. "And our new here is now almost complete ny discouraging delays with carpenters, steamfitters, painters, and the like.

"But newspaper advertising is bringing the business around to the Maiden Lane address alright, even though the former State Street site was more conspicuous. And when the new theater opens in our rear during September, we'll also have a retail stand here on this side of the lobby."

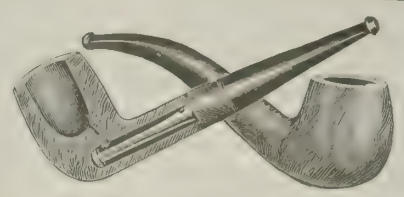
All Gold That Glitters Here

"Well, our recent movement is now completed, too," observed Earl Goodrich, sales-boss o' the Dearstyne Brothers Tobacco Company. "All business is being done from our new building at Broadway and Steuben street. And if you haven't seen the beautiful gold signs for Ottina cigars and Kaywoodie pipes at the door of our retail store you have certainly missed some works of art!

"Then, too, our perpetual newspaper advertising in large space has attracted lots of attention. Besides urging our old customers to patronize the new retail store, we are always advertising Blackstones, Ottina, and Popper's Eight-Center in the papers."

Where's That Sport Page, Hey?

"Also La Palina, Cinco, and others," commented Jim Stubb, arising from the Hot Chair Club for a good stretch and yawn before running over to the Elks' Club to see who's who. "All on the sport page, you know, so there's hardly space to mention the box scores.



"And, to crowd 'em off entirely, along comes big copy for the Chesterfield cigaret, and that other chesterfieldian gentleman, Herbert Tareyton. And some people wonder why there are so many newspaper pages o' sport!"—THE SMOKER.

A Prominent Engagement

Mr. and Mrs. Bernard Mayer, of 41 East 72nd street, New York, announce the engagement of their daughter, Miss Theresa Mayer, to Milton I. Durlach, of Durlach Bros., the well-known Water street leaf dealers. Mrs. Mayer is giving a reception and dance on June 6, at the Ritz-Carlton Hotel.

The Pipe That Cleans Itself

MADE IN LONDON

It not only traps the nicotine, moisture, etc., but actually extracts it from the pipe by the simple operation of removing the mouthpiece.

"Underboar" pipes are guaranteed. A new pipe will be given instantly should any fault be found or should the pipe crack or burn.

Underboar

"Underboar" pipes are made from the finest old Bruyere Root, hand made Vulcanite mouthpieces; in all desirable shapes.

Tampa Tidings

AMPA, Fla., May 26.—A. C. West-, of the Tampa Cigar Co., Inc., re-s that this month's net business vs some gain over that of last th, which was a little off the aver-to date. He predicts continued gains ne industry at large and holding con-ably later into the Summer than l. Increasing prosperity in the ding trades in the north is one sav-factor. The fact that unfavorable her conditions has held up outside ations in the trades much later this ng than usual will tend to cause eased activity holding through the l slack summer period, linking it up the customary fall revival—in the r business. He also reports a slack-up in sales of class "A" cigars, and attering gain in class "C." Alto-er the prospects are much better a year ago for a big year.

Predicts Good Year

ctor Diaz, president of Arturo Fuen-Co., Inc., and of Salvador Rico & Inc., left yesterday for a protracted to Memphis and Chicago and in-ediate points. He has a full sample of Fuentes' Garcia Boquet, and & Co., Usa-Cuba. From Chicago ill turn east and take in the Shrin-convention in Washington, D. C., on 5, 6 and 7 and from there work his southward to Tampa. Notwith-ding the high price of leaf and the for light wrappers (which, by the he has been able to supply), he pre-a big gain over last year's sales and asing demand for better quality s. Salvador Rico & Co. are push-Usacuba in Mississippi. Stev-and Thomas, of Birmingham, for-with W. G. Patterson, are the onaries, and can be depended upon ake themselves heard.

Cigars Advertise Tampa

e cigar industry as Tampa's great-dvertising agency as well as its est industrial activity, was graphi-described to the Rotary Club at Hillsboro hotel this week, by Angel uesta, Jr. The part that tobacco in the industry was ably discussed enry M. Lott. The two speakers ted considerable information that hearers had not hitherto acquired. Cuesta who, on this, his maiden as a Rotary speaker, acquitted himself with much credit, despite the fact that he had not prepared a speech, told Rotarians that 375,000,000 of the cigars sent out from Tampa last year had bands carrying the name of Tampa; that the 10,000,000 boxes sent out with these cigars had the name Tampa "smeared all over them"; and that all the larger cigar manufacturers of Tampa use national advertising, in all of which the name Tampa is featured.

He said that to hundreds of thousands of American citizens who had never seen Tampa, the name had become familiar because of the fact that they smoked Tampa cigars, just as the whole country is familiar with the name of Detroit because of the general use of its greatest product, automobiles.

Mr. Cuesta described the "manufactured in bond" law as guaranteeing to the smoker that the cigar so labeled is made of all Havana tobacco by the Spanish hand method, and declared it the greatest protection to the smoker ever put upon the statute books. He described the manufacture of cigars, using a cigarmaker's block, knife and gauge in illustration.

Outlines History of Tobacco

Mr. Lott, who is engaged in the tobacco brokerage business, recited the history of tobacco, from the first discovery and use of the weed to the present time. He described minutely the processes of cultivation and curing and the different grades as grown in this and other countries. He spoke particularly of the Connecticut and Florida tobaccos. Mr. Lott's paper showed much study and was full of important facts.

All Well in Cuesta Party

A. L. Cuesta, Sr., sailed from New York on the 22d for his summer home in Spain. Before returning to the States he will rejoin Isaac Meyer, who sailed with him, and tour Continental Europe. In August Karl Cuesta and wife of Havana will join him. A. L. Cuesta, Jr., has received wireless from his father, stating that all in the Cuesta party are well.

Jorge Leon of San Martin & Leon Co., has returned from a rush trip to Cuba, where he went to secure more of that good leaf for Hoyo de Cuba and San Martin Leon cigars.

José Escalanta has gone to Havana in quest of leaf for "La Corina" cigars.

José Gonzalez of Gonzalez & Mendez is on a leaf purchasing trip to Havana.

"Pancho" Gonzalez, of the Garcia & Vega cigar factory, is visiting New York.

nnecticut Growers Start Their Transplanting

ildfire Reports Come from Some Sections Where No Precautionary Measures Were Attempted—Changes in The Association Directorate Thought Probable.

RTFORD, Conn., May 26.—A few to- growers started to transplant this but it will probably be two weeks fore transplanting becomes general.

ome sections of the Valley it is re- that "wildfire" has gotten into beds and has caused much damage. any the damage was sustained by growers who were not "alarmed" "wildfire" and who did not try any tive measures, which they were ad- o do.

re has already been some complaint "rotting" in seed beds, but this has hecked. It was mostly in beds the plants were too thick and over- d during the cold weather a few go.

y considerable 1922 tobacco was ed to a warehouse, where it will rted and packed.

handling of the 1922 crop has been gest drawn out affair ever in the One thing has been in favor of lated growers. During the con- cool weather but very little tobacco "warmed up" in the bundle.

credit is due to General Man- red B. Griffin, of Connecticut Val- bacco Association, for the able in which he arranged to handle acco expeditiously when it was or the cases. The work has been along without serious delays, and cco put into the case in excellent n, notwithstanding the handicaps eatened earlier in the season. It ured that a lot of tobacco would med up in the bundle.

sampling out of the sweat rooms g pushed along rapidly, and the are showing a much smaller per- of damaged than was expected at when the tobacco was put into es. The reputation of the 1922 s not been regarded as a banner t the Association had the tobacco carefully and under trained ors who were equal to their id this accounts largely for the ss of the crop coming through the nd there is a much larger per- of fine tobacco in the cases than red on earlier in the season.

ver, some of the growers are not with the way that the tobacco rted, and are making much ado work, but time will tell whether wer with little experience in tobacco, or the men who have g experience with tobacco, in its stages during the sweating pe- ll prove to be the better judges. ssociation is grouping the sweat s fast as they come in; pools are ording to the tobacco, and the are now ready to offer for in- "Brokes" from the Broadleaf, as ome primed Havana and shade. still some seed Havana on hand. rk of electing a new Board of for the Association is now in and rumors are that there will be some changes in the Directorate for the coming year. Some of the growers think that the salaries paid to the various heads of the Association are altogether too high and out of proportion, and that too many "plums" have been handed out. But were each of these growers to actually figure up what his "chip in" on the cost of the running of the Association is, he would find that he had not been "robbed" to such an extent as he may be dreaming that he is. The salaries of President Alsop is $30,000; General Manager Griffin, $30,000, and Assistant General Manager Fuller, $15,000 per annum. The managers have already demonstrated that they are getting more for the grower than he could have gotten for his tobacco had he continued to be his own salesman. Some of the prices received on actual sales shows a material increase over last year's. A year ago farmers were selling some of their grades for practically one-half of what the Association has sold the same grades at this season already, and of the Broadleaf, only very little has been sold as yet. If the other grades sell in the same proportion then the management has done what it proposed to do. But why criticize now? Why not wait until they have actually made sales?

The next few days will decide whether or not the growers will go into the hail insurance proposition, a plan which the Association has worked out, offering a decidedly lower rate of premium and on a basis of $300 per acre.

Close Warehouse for Season

Meyer & Mendelsohn have closed down their warehouse for the season on the 1922 crop. They have had a long run. They employed around 200 workers and have put up several thousand cases, and are now ready to show to their customers samples of some of Connecticut's "finest," not only in Havana seed, but also Shade and Broadleaf.

Irving Katz has disposed of his warehouse in the city and will move to State street, better known as "Tobacco Row." Mr. Katz secured a large packing of tobacco and has had his shop running most of the Winter.

To Close Warehouse Shortly

Brewer Bros., who have employed about 100 workers practically all Winter, will close down their warehouse within a few days. In addition to the handling of their own crop, which exceeds 450,000 pounds of Havana prime, they handled over 500,000 pounds of shade, round tip and primed for the Association. They have started setting out the 1923 crop. They are raising shade and have over 30 acres of cloth up and ready.—X. Y. Z.

To Move June 1

William S. Brill & Son, dealers in Wisconsin and Pennsylvania tobaccos, are removing on June 1 from their present address to 147 Water street, where they will occupy larger quarters.

ROCKY MOUNT, NORTH CAROLINA, U. S. A.

Leaf Production to Be Decreased

RALEIGH, N. C., May 28.—A very considerable decrease in the production of tobacco in the Old Belt of Virginia and North Carolina seems certain for 1923, according to crop reports sent in from 782 local units of the Tobacco Growers' Co-operative Association to its Raleigh headquarters last week.

A very heavy cut in the tobacco crop of Virginia for 1923 is indicated by the fact that the figures from the signed statements of hundreds of local association secretaries show that 7 per cent of the total Virginia acreage is already abandoned. The Virginia crop is already cut 25,000,000 pounds short of the 1920 total and unless plant and weather conditions improve materially it may be short 50,000,000 pounds in weight compared with 1922.

The Old Belt of North Carolina, according to the locals of the tobacco co-operative, reports decrease in acreage of 3.6 per cent over last year. From Raleigh west and north farmers report the most serious plant conditions they have ever known. Eastern North Carolina and the South Carolina Belt report a slight increase in acreage but uncertain weather conditions. The unprecedented shortage in farm labor and the continuous migration of negro tenants to the north will probably further decrease the production of tobacco in these counties for the coming year.

More than 90,000 tobacco farmers are now members of the Tobacco Growers' Co-operative Association, according to a count of contracts made last week at Raleigh headquarters and the association continues to hold its position as the largest of the American commodity co-operatives. Several new customers are buying the redried tobaccos of the association, which are finding a steady market at association prices.—S. D. FRISSELL.

Smaller Acreage Indicated

OXFORD, N. C., May 26.—Due to the labor shortage, a general complaint as to lack of plants and to the fact that a larger acreage of cotton is being planted in the southern part of this county and the two adjoining counties, we estimate there will be fully 10 per cent less acreage planted than last year.—W. A. ADAMS CO.

Plant Shortage Acute

DANVILLE, Va., May 28.—The advent of warm weather has been a Godsend to the farmers in this section which have had virtually no opportunity of planting out the crop. For the past week the farmers and their helpers have concentrated every effort in getting the tobacco on the hill. There is still great complaint of plant shortage. Some Pittsylvania growers have sent to South Carolina for plants and only a few days ago it was reported here that the Pe burg (Va.) Chamber of Commerce sent an appeal to the Commercial sociation at Warrenton, N. C., as for plants for the growers in that trict.

While in years past the plant shor cry has been raised very often wit real justification, this year the shor is not only real but acute.—TETLEY.

Returning from Europe

WILSON, N. C., May 26.—W. J. head of the Wilson Tobacco Co. and ident of the Wilson Tobacco Boar Trade, who has been in Europe for eral weeks, is now en route home.

W. T. Clark, head of the W. T. Co., Wilson, N. C., and vice-pre United States Tobacco Association, has been abroad for several weeks, sail for New York June 2. Mr. while in London had a mild attack flu, but his many friends will be to know he has recovered.—MCFAR

Renewing Membership D in Dark Tobacco Distri

HOPKINSVILLE, Ky., May 28.—Th opening of the membership books f Dark Tobacco Growers' Co-ope Association of Kentucky and Ten since the organization campaign last November, came the past we the One Sucker district. This ha as yet been marked by the int methods, such as big speakings b tionally prominent leaders in th operative movement, barbecues and things which were largely used las during the organization, but is bein ducted more by personal solicitation each county left largely to devise it plans.

And the early reports indicate th is to be highly successful, for mor a hundred new contracts have a been sent in. There were some One Sucker counties, especially th ing far out on the edges of the d which never were worked last y closely as was desired. This was the strenuous campaign which wa ducted then and the inability to g into those sections. This time the is to be centered largely in those co for it is desired to get them sign Sentiment in all of them is repor being very favorable and first coming from them indicate a sign up.

On Thursday, May 31, all the chants and professional men of ville will unite with the asso workers in a thorough canvass of County. Practically every merch town has signed a resolution en the association and are urging the ers to sign up 100 per cent in that

On June 2 a similar drive wil from the courthouse at Carthage,

will extend into Smith and surrounding counties.

The membership books in the One Sucker district will close finally on the 31 crop, July 31. This has been decided by the board of directors and no members will be accepted after the last day of July. This has been widely advertised and it is expected it will be the case of many farmers coming in at once, instead of holding back to the end of the campaign.

After the One Sucker campaign is completed, then similar drives will be started in the Green River and Stemming districts and these will be followed in due time by a drive in the Dark Fired district. It is expected to complete these drives covering the entire Black Patch before the new crop is anything like ready to move next winter.

The crop delivery to association warehouses has been speeded up by the urging that the tobacco be brought in, the agreement that all receiving houses would be closed just as early as possible and the farmers being told that the making of a second distribution to the growers of the Green River, Stemming and Dark Fired districts depended upon the completion of the deliveries and the sale of the tobacco. It has been positively announced that distributions cannot be made in these districts until three-fourths of the tobacco has been delivered, sold and paid for. In other words, the association cannot make a distribution until it has disposed of the tobacco and has the money in hand. The only district that has so far received a second payment is the One Sucker. Naturally the growers of the other three districts are anxious to get another payment on their crops and they are putting forth special efforts now to get the tobacco in.

The campaign to organize the members in several counties into school district organizations of "Locals," is gaining speed all through the district. Everywhere the members are taking hold of the proposition with real enthusiasm, and not only are the school district locals being formed, but the county organizations as well. And the reports from the meetings that are being held are most inspiring and indicate a fine spirit among the growers. Also the crop reports and other proceedings are of much value to the association officials in the conduct of the business.

A marked incentive to the work was the issuing of orders by C. A. Mahan, state leader of the county farm agents in Kentucky, instructing all county agents to co-operate actively with the association in the organization of these locals. Pursuant to these instructions, and their natural inclinations, the county agents everywhere in Kentucky are rendering a splendid service.

County agents are government officers and work under direct orders, and as every activity of farming life is to be advanced, the agricultural department has put it on the agents to give every assistance in their power.

Another thing which has broadened the scope and interest of these locals is that they are not to be confined to members of the association but are also open to non-members. Of course this is expected to bring into the organization many farmers who possibly would not be reached otherwise, but at the same time it opens these community clubs to every farmer. And it is proposed that the locals shall not confine themselves by any means to association affairs but take up any other matters pertaining to their community or to their problems that they may desire and consider of sufficient importance.—M. E. Bacon.

Featuring Havana Cadets

Greensboro, N. C., May 26.—The Callum Tobacco Company is introducing a new cigar named Havana Cadets, which is a full, corona-shaped five-cent seller. This is the first step towards an advertising campaign which will prove to be the largest ever put on locally on a single brand, according to Bill Callum. Newspaper space plus aeroplane stunts will bear the brunt of the advertising. The aeroplane will make trips over the city dropping the cigars in miniature bombs and wherever this has been tried out it has always created a sensation. This campaign is expected to start within the next two weeks.

The Havana Cadets are manufactured by the Manchester Cigar Co., of York, Pennsylvania.

N. C. Auction Warehousemen Criticise Co-ops

(*Continued from page* 46)

was induced to sign the agreement in the face of this provision of the Act, when in truth and fact the conditions of the Act had not been complied with, has the right to go into the court of his county and ask that he be relieved of the obligations of the contract which was not to become binding until conditions were complied with which cannot be complied with.

"But the question is asked: Do the farmers want to be relieved of their contract? And for the answer to this question, one only has to talk with the farmers who have signed the agreement.

"The association as it is now constituted cannot hope to survive its five-year period. No organization, certainly one based on co-operative effort or co-operative action, can be successful when the overwhelming majority of the members of the association were induced to become members by representations which have proven to be false. The resentful, determined humor of the farmers I do not call disloyalty. They feel that they have been tricked into making a contract which is inimical to their best interest. They are resentful of that trickery and are determined that the benefits of their labor expended in the cultivation of tobacco crops shall not be taken from them by an association not of their own making and against which they entertain feelings of enmity and hatred. They realize that it is not and never has been a farmers' organization. They do not so regard it nor can they be made to accept it as such.

"This thing has proven to be no benefit to the farmers. On the contrary it has meant a very great loss to those who delivered to this association their crops. Hundreds are unable to pay their taxes for the lack of funds which should came to them from the association. Mortgages are being foreclosed or forebearance sought in thousands of instances, while the neighbors of these deceived people, who would not sign the contract or who did not deliver their tobacco even if they did sign the contract, are meeting their obligations and have an optimistic outlook on life. If the Co-operative Association has deceived itself into believing that the farmers of North and South Carolina and Virginia will further permit the result of their labor to be dissipated in a manner unknown to the farmers, and if it has deceived itself into believing that by applying to the courts for a decree of performance to compel the delivery of tobacco to it, the contracts for which were induced by fraud, it is destined to have a rude awakening, for as the temper of the overwhelming majority of these people is read, it argues no meek submission to an injustice which to them seems robbery."

Upholds Auction System

Colonel John F. Bruton, president of the First National Bank and the Wilson Trust & Savings Bank; director of t Federal Reserve Bank of Richmond, w has always stood for the best things the country and who is familiar with bo the auction system and the co-operati system, was next called upon by Preside Brinkley. Following great applause t distinguished banker and prominent la yer rose and said, in effect:

"Mr. Chairman and Gentlemen: If judged my audience by the type of m who are at the head of the auction war house business, it is a great honor speak to you, for they represent t highest type of citizenship, many of th having put their lives into their busin and expended millions of dollars. T business in which these gentlemen ha engaged has been recognized by the Sta and good laws sufficient to regulate have been made. We are bound to ad that the auction plan of selling tobacco proven to be legitimate, regular and f and, comparing it with the co-operat plan of last season, it is much to be p ferred by the farmer. Having ming with the farmers, I feel that I am ab lutely safe in saying that not five per c of those identified with the co-operat plan would continue in that organizat if set free from the iniquitious contr they were deceived into signing.

"But I am not here today, gentlem said Col. Bruton, "representing prima the auction warehouses' interest, par me for saying. I am afraid some of warehouse people are regarding the n ter as strictly a personal one. We burn up your warehouses, pension owners and still live, but this country ours cannot exist without good citizens made up of men who, conscious of t responsibility as citizens, must, as i viduals bear that responsibility. The operative plan of marketing tobacco not and will not prove successful, for one reason alone, if none other, that it stroys the individual initiative of citizen. It destroys the individuality our citizens and renders a republ form of government an impossibility.

"Legitimate business has adjusted i to the auction plan of marketing c and to upset that plan will work o demoralization destructive of faith credit, evinced in a small degree by fact that members of the co-opera plan of marketing tobacco have admitt lost their standing and credit with merchant and with the banker and crop liens are being recorded in our ern territory than for past several y

"Do not understand that I am clai to represent the teachers of morals of political economy, but there are cl I am intensely interested in—men women, who, by reason of their ig ance, false statements made to them, guided, have committed themselves t co-operative plan and who are now su ing for the necessities of life on ac of their inability to realize on their year's crop.

"A widow lady came into my off

few weeks ago, and, while not ignorant or poverty stricken, she is, on account of having a family of seven or eight little children, dependent upon the rents and profits accruing from her farm. She told me she had been waited upon and solicited to sign the co-operative contract; that it was represented to her that if she did not join she would have no place to sell her crop; that her husband, having recently died, she turned to her neighbor who was an intimate friend of the family, seeking advice. It was the most natural thing in the world to do. She knew nothing as to contracts drawn by shrewd attorneys. In consequence of her neighbor's advice, she signed and became a member of the co-operative plan; that she had received scarcely anything for her tobacco and was in actual need. The purpose of her visit to me was to get release and be acquitted of her obligation as a member of the co-operative association. It was painful for me to have to tell her that I saw no relief for her; that I knew her well enough to know she would not seek to do anything wrong to avoid her obligations. It was an unhappy day to me. She left my office crying.

"There are hundreds of other instances that can be cited as painful as the foregoing, you know all about them. It would be carrying coals to Newcastle to enumerate them.

"Well Established Failure"

"Now this is my message to you,—in our fight against this well established failure, the co-operative plan of marketing tobacco, I beg you to forget yourselves, if you will, and *remember the widow*, the ignorant man who is about to be deprived of his citizenship, who is realizing that he has no voice in his own affairs, that he has a master, a guardian, who is not even required to file an account of his stewardship.

"We want good citizenship. We must have good citizenship in order to have a good government and good government is worth more to us than anything in the world with conditions as they are and forces at work seeking the dethronement of virtue and honor.

"May I beg you, gentlemen, to *remember the widow.*"

Officers Elected

Following Colonel Bruton's eloquent address, the election of officers next took place. The following were elected as officers:

W. E. Fenner, of Rocky Mount, president.

Geo. P. Fleming, of Kinston, first vice-president.

J. C. Eagles, of Wilson, second vice-president.

B. B. Sugg, of Greenville, secretary-treasurer.

Board of Directors

The officers, together with the following constitute the Board of Directors:

P. C. Vestal, of Rocky Mount.
S. H. Anderson, of Wilson.
. F. Brinkley, of Greenville.
. P. Tapp, of Kinston.
. Y. Monk, of Farmville.

It has been the custom of the association in the past to alternate the officers every year, or two years at the most, as this is a non-paying organization, but B. B. Sugg, by a rising vote, was requested to continue as secretary-treasurer.

Following this was the announcement that the lunch hour had arrived and the meeting was adjourned until after lunch. And, my, my, what a lunch. Ye gods and little fishes. Genuine North Carolina barbecue, cooked over live coals, with all the trimmings that go with this delightful Southern feast. Managers Flemming and Petway, of Silverlake, simply outdid themselves.

The Barbecue

The convention again met at one o'clock, and President Fenner, the newly elected president, was inducted into office. Mr. Fenner, always a graceful presiding officer, the first president, by the way, that the association ever had, was at his best on this occasion. His address, though short, was a gem. He called on others for talks, and among those responding were W. H. Daniels, president of the South Carolina Tobacco Auction Warehouse Association; R. D. Cothran, of Manning, S. C.; G. R. Bowen, of Lake City, S. C.; Mr. Woolard, a banker of Greenville; T. T. Martin, E. T. McMillan, and H. B. Smith, bankers of South Carolina. Loud cries were made for Wilson, of Danville, and Robertson, of Lynchburg, and both of these distinguished Virginia citizens and well-known auction warehousemen gracefully responded with terse and timely remarks.

The convention adjourned to meet again next year, probably at Winston-Salem, but so many invitations having been received for the next annual meeting, this was left to the Board of Directors and this announcement will be made later.

Thus closed one of the greatest conventions of auction warehousemen ever held in North Carolina—probably ever held in any State.—McFarland.

A Pooler's Prayer

Tobacco has received the following from a subscriber in Paducah, Ky.:

"Will you please forward this letter to your correspondent who signs himself "Badger" at Edgerton, Wis.?"

"Badger:

"Reading your very interesting articles in Tobacco regarding the pool in Wisconsin, thought maybe you would like to hear about the pool in old Kentucky. One of our negro farmers delivered his first load to the association and received his papers. That night, as he prepared to get into his bed, he got on his knees and said the following prayer:

"'Now Ah lays me down to sleep;
All I'se got is a warehouse receipt.
If'en I should die, before I wake,
I'se got two more loads they's gwine to take.'"

Harvesting the Florida Shade Grown

Madison, Fla., May 26.—Gathering of this year's crop of shade tobacco is now the one absorbing topic to be heard here.

The county over can boast of the best crop as a whole in its history, and the growers are determined to save it judging by the large truck loads of workers being hauled around mornings and afternoons.

Active gathering was commenced on two of the Hardee Tobacco Co.'s farm on the 17th, of this month, and since that date some of the finest middles have been taken into the barns.

There is about five hundred acres planted tobacco in this county this year and it is all under shade, most of it being combination and from present outlook the next few weeks will bring many buyers as the county is fast coming to the front when it comes to high grade light wrapper tobacco.

John L. Fielding who looks after the Florida interests of Cullman Bros., of New York, was here this week, and expressed great surprise at the size and quality of this year's crop. Cullman Bros. purchased through Mr. Fielding last year several hundred bales, amounting to more than $100,000 of last year's Madison County tobacco, and from present outlook he says he sees no reason why they should not buy even more out of this year's crop.

Albert Fraleigh, Jr., owner of Florida Leaf Tobacco Co., is making a trip out through the Middle West this week and reports business good with his firm.

Sol Friedman was a visitor in Quincy this week, and reports everything in the tobacco line as on a boom in Gadsden County. Sol was one of the members of the board of appraisers to help adjust a big fire loss which occurred there of some months ago.

A Forthcoming Wedding

Mrs. Mary Nash Maloney announces that the wedding of her daughter, Miss Marion Louraine Maloney, to Francisco Fonseca, Jr., will take place at the Church of the Blessed Sacrament, New York, next Saturday. Mr. Fonseca, Jr., is a member of the firm of F. E. Fonseca & Co., cigar manufacturers. Here's wishing the lucky couple a long and happy married life.

The Hopkinsville Market Nearing Close

HOPKINSVILLE, Ky., May 28.—The local tobacco market is rapidly drawing to its close for the present season. Receipts are small, and growing smaller, and the rehandling houses that have been running at maximum capacity for months, are now working to close for the Summer just as soon as possible.

The Dark Tobacco Growers Co-operative association is also trying to wind up its receiving season as quickly now as it can be done, and its repeated urgings to the members to bring in their crops has had substantial results. Receipts for the season now approximate 165,000,000 pounds and may run to 175,000,000 pounds. This is considerably in excess of the estimates. Receipts at Hopkinsville for the past week were 300,000 pounds. The association reports prices asked by the association.

Prices for the week on the loose floor markets, ranged, Trash, $3 to $5. Lugs, common, $5 to $7; medium, $7 to $9; good, $9 to $12; fine, $12 to $16. Leaf, low, $10 to $12; common, $12 to $20; medium, $20 to $30; good, $30 to No fine leaf offered.

Rains at the close of the week g the farmers another fine transplan season, and they have made the most it. Tobacco setting has been the o of the day and all hands available v put on the job. Most of the land been prepared and if the wet spell tinues a few days longer it means setting of the bulk of the crop. S of the reports indicate that the m feared excess planting may not m rialize, but it is too early yet to tell a this with certainty.—M. E. BACON.

Clarksville Average, $14.7

CLARKSVILLE, Tenn., May 26.—The bacco sales on the Clarksville L Leaf Market for the week ending 25 amounted to 139,765 pounds. for the season, 8,787,500 pounds. to same period last season, 12,427 pounds. Average price this week, $14 average for the season, $14.58. Ave to same date last season, $15.86.—J SMITH, Supervisor of Sales.

Paducah Prospects

ADUCAH, Ky., May 26.—The move-t of loose tobacco was heavy during early part of the week and has con-ed fairly good throughout the week. ever, the favorable weather for doing work has checked deliveries to a iderable extent. The association agers have been kept busy with re-ing and making deliveries and have been handicapped on account of the er deliveries. They are making good ress in every way, receiving sufficient cco to fill contracts that they have e, and have been busy with classing prizing on stock that they have in .

he greater part of the tobacco that is ng has been in bulk and shows good ition, but where it has been left ing in the barn it is showing more or deterioration, and it is hoped that ers who have not taken their tobacco will do so at once to preserve it.

is hard to estimate the quantity that ll in the hands of farmers, and still er at this time to estimate the yield e 1922 crop. Our estimate last Fall he Western District was about 90,-00 pounds, and I think we have ly overestimated the yield, which not be over 85,000,000 pounds. Fig-it at 85,000,000, I would say that is still in the district to be delivered hing like 12,000,000 to 15,000,000 ls.

mers have made more progress in ring their lands and planting during st week than during any other period eason. They are now preparing and ng and quite a good per cent of the has been planted. With favorable ier conditions by the end of next the crop will be planted, as farm-re devoting their entire energies in g their crop of tobacco planted conditions are favorable. Plants lentiful and are generally large h to plant and the next few weeks e the busiest time with farmers that will have, for other crops are crowd-em and no doubt the tobacco acre-will be reduced somewhat on this nt.—W. B. KENNEDY.

Make Second Payment to Burley Members

INGTON, Ky., May 26.—Announce-was made here yesterday that the Tobacco Growers' Co-operative ation is preparing to pay to its rs fifteen million dollars as a sec-ayment on their 1922 crops deliv-o the association, which is about per cent of what was advanced to owers when they delivered their .

tobacco delivered to the associa-as all been sold or re-dried, that sold, which has been re-dried and in the association's storage houses, ing principally of the better

Has Not Borrowed Money

association has not borrowed it was stated, to make the second nt, and does not owe a cent to any bank or person on the 1922 crop, it was said.

The amount of money represented in the checks being sent to the growers in the second payment is five and a half million dollars in excess of the amount paid them at the corresponding period last year, and the total paid to growers so far on their 1922 crop is more than $33,000,000, or $14,000,000 more than the total paid to the growers up to this time last year.

In a statement in connection with the second distribution President and General Manager James C. Stone, of the Burley co-operative, said that the checks probably will be in the hands of the growers within the next two weeks.

A Patient Membership

"Our members have been patient and loyal," Mr. Stone said, "and have backed their officers in all that has been done by them in selling their crops. We hope they will continue to keep in mind the fact that this association is their own, that it belongs to them, and that whatever injures it injures them.

"The purpose of this association is to get for the growers a fair price for their Burley tobacco. I think that no fair-minded, unprejudiced man will deny that we have succeeded in that purpose for the past two years."

Secretary H. Lee Earley and his office staff are at work on the checks for the second payment, which will be mailed to the growers as soon as all are written, Mr. Earley said.

Vice-president Bush W. Allin, of Harrodsburg, is assisting Mr. Earley in the signing of the 132,000 checks necessary to make the second distribution to the growers.

"We are unable to say just what day the checks will be mailed," said Mr. Earley, "but the growers can depend upon it that we shall get them in the mails at the earliest possible moment. We ask them to have patience, as they have had in the past. At this time, I would judge that we shall be able to get the checks in the mails within the next two weeks, if no unforeseen contingency arises to prevent it."—PORTER.

Owensboro Outlook

OWENSBORO, Ky., May 26.—The weather has continued very cool for some time with an occasional warm day intervening. Consequently, I have to report rather moderate growth in tobacco plants. However, planting has begun in a small way and as prevalent weather is favorable we can expect considerable planting during next week.—J. S. PHELON, Tobacco Broker.

Hopkinsville Average, $12.03

HOPKINSVILLE, Ky., May 26.—Total sales for the week, 125,405 pounds; average price per 100 pounds, $12.03. Sold to date of 1922 crop, 13,942,165 pounds; average price per 100 pounds, $14.53. Sold to same time last year, 19,993,195 pounds; average price per 100 pounds, $14.58.—J. W. HANCOCK, President Hopkinsville Tobacco Board of Trade.

Experimenting With Tobacco

(*Continued from page* 53)

pipes every evening. The best anecdote is that of Mazzini and his would-be assassins. He kept no guards, but when they entered the room to slay him he said: "Take cigars, gentlemen." Smoking and chat followed until he exclaimed, "But you do not proceed to business, gentlemen. I believe your intention is to kill me." The conspirators were abashed and fled from his presence.

The testimony of living celebrities was rather inconclusive. "Most of the women in the literary group smoke. It was a surprise to the writer to learn that 55 per cent of the Congressmen who responded were non-smokers, since there is a popular belief that all persons engaged in political life use tobacco. It was a surprise, too, to learn that 60 per cent of school superintendents indulge in tobacco, and a still larger per cent of university presidents and deans gain comfort from it."

As studied in high schools, tobacco is shown to have an evil effect on the growing boy. Mr. O'Shea is very fair in this respect and tries to show that other factors may account for the low status of the youth who smokes. However, his evidence shows conclusively that smoking is a bad habit for adolescents.

The third part of the book is devoted to the author's own experiments. He devised very ingenious tests for smokers and non-smokers, in accuracy, memory and other mental tests. He found that men who were accustomed to smoke did rather better work after smoking, and that the contrary was true of the non-smoker. Evidence seemed to show that tobacco slowed down mental processes. However, that might not be wholly evil. He says: "Even though psychological tests show as they do that tobacco as a drug actually slows down intellectual processes to some extent, nevertheless there may be compensating factors which offset its disadvantages and which may make it a beneficial agent for some persons. A man who derives pleasure from a pipe or a cigarette may be able to accomplish more intellectually despite a certain amount of dulling of his intellectual processes, than if he were deprived of this pleasure."

The testimony which Mr. O'Shea gathers tells us more about human nature than about tobacco. Man has a happy faculty of believing what he wants to believe. Hence the habit of smoking has fanatic defendants and assailants.

A psychologist says: "It is my general impression that both the alleged enjoyments and the alleged deleterious effects of tobacco have been largely exaggerated." His cautious statement seems to fit the facts as Mr. O'Shea finds them. Mr. O'Shea says: "So far as the records show, men who have used tobacco have achieved as much in every field of activity as the men who do not use it. Some employers of men for intellectual tasks maintain that tobacco promotes efficiency, but there is at least an equal number of employers who maintain that tobacco lessens efficiency."

Southern Business Improves

W. P. Miller, of the American Sumatra Tobacco Co., has returned to New York after an extensive Southern trip, in which he visited New Orleans, Tampa and Key West. Mr. Miller noted a decided improvement in Southern business conditions.

Returns from Porto Rico

Milton I. Durlach, of Durlach Bros., who has been in charge of the Durlach interests in Porto Rico for several months, arrived in New York last Monday on the steamer *Ponce*.

Cigar Industry Improves

Ray C. Clark is interviewing his clients in the Pennsylvania territory, in the interests of D. Dreux, Inc. He reports a considerable improvement in cigar manufacturing activity.

How Successful Retailers Get More Business

By FRANK H. WILLIAMS

How are some of the more successful tobacco retailers going about the task of getting more business? Wouldn't it help other retailers in doing the same thing to learn about the methods adopted by these particularly successful retailers?

With the thought in mind that it would be of real help to various tobacco dealers to hear about the methods employed by other dealers in going out after more business and in getting more business, the writer recently interviewed a number of store owners and from them secured some very interesting and worth while information.

This information is as follows:

Local Sports Pictures Help

"We have found," said one of the tobacconists, "that if we make the interior of our store more interesting we will get more customers into the store and so will be able to sell more goods and make more money. And we have found from experience that a large percentage of all the men coming into our store are interested in pictures and particularly in local sports pictures.

"It seems as though all regular men, whether young or old, take a delight in knowing about the athletes who are doing big things in the athletic world and they like to look at pictures of these men. They are particularly interested in such pictures, too, when the photos are of local athletes as this gives the customers a chance to see whether or not they personally know the athletes and so on.

"In view of all this we have recently started making quite a play for new trade with this stunt of having a gallery of local sports pictures. We get these pictures from the local newspapers and from the athletic instructors at the local gymnasiums and from the local sports lovers who come into our store. With each picture we use a typed caption gi the names of all the athletes in the ture and telling something about they have done and are going to do.

"We use these photos in two We put some of them in a string a our main show window like some n paper offices do with the pictures the in their regular picture services. An other pictures we put inside the store place where they will be plainly v to all the people coming into the s In this way we accomplish two t with the pictures—we attract attenti the store and get people to stop and at our store and we get more interest the interior of the store.

"And all this is proving to be a help to us in our business."

Asking Customers to Buy He Business

"Not so very long ago," said an particularly successful tobacco owner, "we determined to put on a paign at our establishment for the pose of getting more business. Bu quite a while we couldn't figure ou what sort of a campaign this shou We had been engaging in various of promotion work for some time looked, at first, as though we had about exhausted all the best form methods of promoting the business.

"Then, after considering the matt some time, we came to the conclusio our very best opportunity for incr our business lay in the simple propo of asking the customers to buy goods. And right away we put proposition into effect.

"Now unless there is a big rush store when it keeps all of our sales on the job to wait on the trade, salesman when waiting on a cus

San Francisco Outlook Grows More Encouraging

General Conditions Vastly Improved—Predicted That Tobacco Industry Will Enjoy Good Business During Balance of Year—Retailers Buying More Frequently.

San Francisco, Calif., May 22.—Although the tobacco business on the Pacific Coast showed a slight decline for part of May, the outlook is now much better than it has been for some time. General conditions are extremely favorable and it is predicted that the tobacco industry will enjoy good business for the balance of the year.

San Francisco in particular looks for a fine summer. Ordinarily this is a period when building is less active than the winter months, but according to the San Francisco Forward Association, building will show a continual increase during the summer months. The reason for this is that there has been a real shortage of labor the past year or two in the building lines. During the long strike and lockout over the open shop question, much of the skilled labor in the bay region migrated to other points where they were welcomed. Consequently it has been necessary to import labor from other places, but this plan has not been successful. The real relief from the situation has come from the establishment of trade schools which have been filling the requirements more and more and so aiding building. As a result of this, there has been a great deal of building held back which will be started this summer. Then too, there is quite a group of prospective builders who have been holding off for lower prices of building materials and now are becoming willing to build as they have given up hope of lower prices for a long time to come.

Stimulating to Trade

This should aid to make business in the tobacco trades of San Francisco very good. Other business enterprises are also thriving and the port is being taxed to its capacity by shipping. Shipping is, in fact, at a higher point in San Francisco than at any time in the history of the port. This is not including the big advances made by the other ports located in San Francisco Bay and as much a part of the harbor as Brooklyn is part of New York.

The out-of-town conditions should also be good. There is not to be any real boom in agriculture this year from indications, but crops will be good and prices such that they will yield reasonable profits to the farmers in all fields. Consequently the wholesale tobacco trade of San Francisco should be very good.

Skywriting

Captain Cyril Turner, the well-known British Ace, who has been traveling over the country for the Lucky Strike cigarettes, has just completed a stay of ten days in San Francisco, Oakland and vicinity. Perhaps it would be more correct to say that he spent a week over San Francisco and vicinity, for he lost little time in spending his reputed $1,000 a day in San Francisco. It is said that there are more stiff necks in San Francisco than have ever been noted before. A good deal of newspaper publicity was given, including photographs and interviews with Captain Turner.

Activities of a Youngster

H. L. Judell, a youngster of 79, spent two weeks at the Grand Army Encampment at Modesto. Mr. Judell is considered to be one of the youngest at the encampment, though he has more years to his credit than most men in the tobacco trade. He has finished 50 years in this line and has just moved his business, H. L. Judell & Co., into a new building which bespeaks his activity and prosperity.

Visiting Branch Establishments

Louis Cahn, secretary of the Consolidated Cigar Corporation, visited the branches of Glaser Bros. in the San Joaquin Valley. Mr. Cahn is on the coast for a short visit.

To Introduce Blue Boar Dollar Award

The plan of the American Tobacco Co. to increase the popularity of Blue Boar cigarettes by awarding a dollar bill to every merchant who is found to have a carton on the counter of his store is to be introduced on the Pacific Coast. Circulars have been sent to all jobbers of the American Tobacco Co. on the Coast and other circulars for distribution by the jobber to his retail trade are soon to be supplied. The plan will be in operation until October 31, of this year.

San Felice Repeating Well

Placement on San Felice is being very thorough according to the Jos. Rinaldo Cigar Co., Inc. This brand has only been recently introduced on the Pacific Coast and repeats are coming in very well, showing that it will be as popular here as elsewhere.

Large orders are being sent in by S. S. Goldberg of Goldberg & Lehnhardt, San Francisco leaf house. Indications are that the cigar business in Southern California, where Mr. Goldberg is now traveling, is on the up-grade. All lines are now moving in the South, he says.

Business More Healthy

Conditions appear to be more healthy than has been thought according to J. H. Judell. While retailers are buying in smaller quantities at the present time, they are buying more frequently so that the gross volume of business is about the same. Mr. Judell says he is now receiving over a million manila cigars a month.

Pennsylvania Tobacco Market Has a Dull Period

Recent Brief Buying Rush Is Followed by Inactivity—Regular and Co-op Warehouses Are Busy—Wildfire Appears in Various Seed Beds—Many to Attend N. C. L. T. Convention.

LANCASTER, Pa., May 28.—The lull following the rush of buying on the Lancaster market, which continued for but a few brief weeks, has become a dead calm. At the present time the apparent apathy on the part of buyers has thrown activities into a state of coma. Despite the fact that approximately 10,000 cases of cigar leaf remain unsold, not one purchase was recorded for last week. Those still holding their packings do not feel any alarm at the sudden cessation of buying, as there is every prospect of plenty of buyers for the small amount of tobacco on hand. The almost feverish scramble for Lancaster grown tobacco did not include a number of manufacturers who are annually customers of local packers and it is these concerns who are looked to to buy up the remainder of the seedleaf on hand.

Warehouses Still Busy

The warehouses, even at this late date, still present scenes of activity. Several packers have some leaf yet in the bulk sweat and are busy getting it in shape for packing. Resweating is also being done in several warehouses and all of the leaf that has been put through this process seems to be coming through in excellent shape. Casing and sampling are going forward and the greater part of the 40,000,000 pound crop is stored for the "natural sweat" over the summer months and to undergo the ageing process.

Securing Samples from Co-ops

The work by the co-operative packing companies is keeping pace with the operations by other packers, although none of the "co-ops" have as yet sold their packings. Growers who packed with these concerns are very optimistic, however, as the goods are reported to be coming through in very good condition. Several buyers last week visited the three co-operative companies who packed this year, and procured samples. On the whole, it seems as though the growers who consigned their crops to the co-operative concerns this year are in a fair way to secure an appreciable advance on their tobacco over their neighbors who sold at the early prices which averaged about 17 cents. Allowing a sufficient margin to cover shrinkage, cost of handling and insurance on the crop, there will still be a premium for the co-operatives if the packings bring a price comparable to those which prevailed in the early buying rush this year. Additional goods received late in the season by the co-operatives will bring the total amount handled by the three companies to about 2,500 cases.

Transplanting Starts

Several weeks of warm sunshine and balmy weather have forced the tobacco plants along to a point where the work of transplanting has just begun. Although held back by the series of successive cold snaps which from time to time threatened complete annihilation of the young plants, the recent favorable weather conditions have effected their "convalesence," and prospects for a normal crop are good as far as delayed growth is concerned. The tobacco fields have been plowed and lying ready for the oncoming crop for some time, and as the plants are removed from the beds to the fields, the 25,000 acre crop of 1923 seedleaf is taking on actual proportions.

Wildfire Shows Up in Seed Beds

Many seed beds, now that the plants have reached the full growth necessary to transplant, are showing decided symptoms of wildfire. In quite a number of cases, practically all of the plants ar affected. Although many growers fol lowed the recommendations issued by th Lancaster County Farm Bureau for th control of this dreaded disease, thei work may come to naught if the easil communicated disease is allowed to ga headway. An extremely dry growin season in 1921 and 1922 checked th wildfire in its most virulent state an saved the farmers of the county man thousands of dollars. Whether the san dependence may be put upon the weath man during the coming season is ver doubtful, and should the growing perio be featured by wet weather, the Lan caster County crop will probably be short one.

Farmers Show Much Concern

Dozens of calls at the Farm Bure office every day indicate the tardy a preciation of the grower of the serio character of this disease and the inform tion broadcasted from these headquarter if applied, may still do much to elimina the chances for damage which now loo Save for the presence of this one infe tion, the Lancaster County tobacco cr has every prospect of being the heavi and finest that has been produced for number of years.

Big Delegation to N. C. L. T. Co vention

The chief business—besides golf which is occupying the attention of t packing fraternity at the present time the convention of National Cigar L Tobacco men who are to meet in N York, June 4 and 5. The largest de gation that has ever gone from Lancast will travel to the "Big City" next we and there indulge in a two-day "ja boree" which is expected to overshad any previous event of the kind in annals of tobacco. The Lancaster L Tobacco Board of Trade will attend i body and 100 per cent representation predicted. Those who will make trip are as follows: A. W. Gehman, W. Brenneman, Herbert B. Weaver, I. H. Weaver & Co.; L. H. Nolt, Herb P. Taylor, of Long and Taylor; C. Smith, C. H. Nolt, E. H. Swope, J. Minkoff, T. D. Shertzer, Milton Ranck, F. S. Harnish, W. G. Fi Joseph Goldberg, E. L. wart S. Shindler, manager for the Foreman Cigar Co., Red Lion, has ned from a Western trip.

The Aristocrat Cigar Car

ovel scheme of C. E. Bair & Sons, sburg, to advertise the Aristocrat attracted much attention last week streets of this city. It consisted arge model of a cigar on two sup-on an auto truck. The cigar is five feet in length. It is painted aped to represent the well-known of this company. By means of a y devised mechanism, the exhaust he fachine produces the effect of issuing from the ash end of the Three cities have contributed to struction of this unique advertising The three-fourths ton truck was y the Dodge Co., Detroit, Mich., ar was designed in New York city nished in Baltimore, Md. While ad office of C. E. Bair and Sons ted in Harrisburg, the firm has ories in the Pennsylvania capital. re all located in York county and in number. One of the factories is located at Goldsboro, another at Strinestown, one at Craley, a fourth at Wrightsville, a fifth at East Prospect and the sixth at Yorkana. All the factories are busy turning out the product of this firm, which is in popular demand. The Aristocrat retails at 10 cents. The advertising truck came to this city from Williamsport and Wilkes-Barre on May 22, where it was used in an extensive campaign of publicity. Clark Bair is in charge of the truck. It left here for Columbia, where it is working this week. S. L. Etter and Son are the distributors of the Aristocrat for York and Adams counties.

Doubling Capacity

Expansions are being made which will double the floor space of the cigar factory of W. H. Falker & Son, Mackenzie street, near Cottage place, this city. At the present time workmen are engaged in building a three-story addition in the rear of the building and, as soon as this is completed, changes will be made to the present factory by putting in a new front and adding another story. The building will be of brick construction. The contract for the work is held by W. A. Thompson, of Red Lion.

The firm has about 40 employees on its payroll at the present time and as soon as the work on the building is finished, which is expected to be about August 1, employment will be given to an additional number. The factory will have dimensions of 60 feet front on Mackenzie street and a depth of approximately 59 feet. The floor space of the factory will be virtually doubled.

Employes at the Falklet factory are working on full time, although the cigar business, from the standpoint of a manufacturer, at the present time, might be better. It was stated by a member of the firm that there has been a lull in the trade for the past 90 days or more, and prospects for the immediate future are not exceptionally encouraging as the usual inactive season is in July and August. The firm makes 5 and 10 cent brands of cigars and it was said that the demand for both grades has dropped to a noticeable degree. This condition was said by him to be general throughout the trade.

To Re-Open Factory

S. F. Kreider, who operates a cigar factory in this city, is planning to reopen his factory at Spry, which has been closed for some time.

K. W. Jacobs, of the firm of Jacobs & Holtzinger, cigar manufacturers, Windsor, is on a business trip through the western part of Pennsylvania.

Sails for Europe

Isaac Meyer, of Isaac Meyer & Co., tobacco growers, packers and dealers, accompanied by Mrs. Meyer, sailed for Europe on the Cunard liner *Mauretania* last Tuesday.

Back from Amsterdam

Max Maier returned from Amsterdam last week on the White Star steamer *Homeric*. While in Holland Mr. Maier bought a quantity of choice Sumatra and Java leaf.

An entirely new standard of cigar value—the new

Flor de Melba was born with our determination to surpass every previous effort at value-giving.

We determined to offer a cigar of such quality—at such a price—that equal value could not be found in any other cigar in the world.

Through changing conditions we have stood by our resolve and now, with the return to normalcy, we are able to offer the new Flor de Melba, increased in quality and size—all Havana filler — delightfully mild — with the taste and aroma found only in imported cigars.

Display the Flor de Melba—and watch 'em sell!

Philadelphia Business Progressing On Up Grad

"Comeback" in Orders Measuring Up to Fullest Expectation —Largest Proportionate Gain Comes from South and Atlantic Seaboard—Healthful Indications Noted.

PHILADELPHIA, May 29.—On their return from the great convention at Washington with renewed optimism for the future of the business in both a purely commercial and organization way, the representative Philadelphia cigar manufacturers, who so largely and conspicuously were in attendance at the national gathering in the capital, found sufficient in the experiences of the stay-at-homes to carry on their enthusiasm. Although there had been no real quietness in the business of the big producers, there was experiences, before the convention days, as told in these columns, a slight lull attributed more to a reaction from the exceptional activities of the ordinarily dull opening months of the year than to real commercial depression. But practically co-incident with the national meeting this temporary quiet was dispelled and the comebacks from Washington found a "comeback" in orders measuring up to their fullest expectations.

Business from the Middle and Far West had been good all along, but it grew better. The largest proportionate gain, however, came from the South and the Atlantic Seaboard, previously quite spotty. There was not, and is not yet, anything approaching a boom in these sections, but there is a sound and entirely healthful activity, and of a character which suggests, indeed, confirms to many, continuance of good times as far as vision can reach. Philadelphia business still lags a little behind expectations, but it, too, is on the upward move, and best opinion is that it is only a matter of time and, hopefully a very short time, before trading again will be in the active swing it assumed earlier in the year.

The lot of the smaller manufacturers who, not having national distribution, and most directly affected by local conditions, was fair, bad or, in rare instances, good, depending solely upon the conditions existing at the points of their chief outlet.

Throughout the State sales more readily were made than at home or nearby. The leaf trade experienced rather than suffered a rather quiet week, but there is nothing approaching despair in its ranks.

Even cut-raters who, after a very brief period of quiet, broke out again in warfare to the knife, returned to a condition approaching innocuous desuetude. Jobbers complain that the city business is only of a hand-to-mouth character, and that collections are very backward. State buying, however, is very satisfactory, especially throughout the hard coal regions and in the western industrial counties.

Distribution of Della Casa, the leader of the El Predomino Cigar Co., of which L. M. Cohen is head, and which is located at 110 North 2nd street, is rapidly increasing. The newest distributor on the growing list is Samuel Gottlob, 1120 Euclid avenue, Cleveland, who is to cover the territory of Ohio and Indiana. The leader is made in eight sizes, retailing at 10 cents to 3 for 50 cents, and is becoming a particular favorite in the coal regions, where it is a popular smoke among the populace of Wilkes-Barre, Scranton and Carbondale.

The business of the Halpern Cigar Mfg. Co., 37 North 2nd street, is now being liquidated, and the stock of labels and equipment will be disposed of by auction sale to take place in the early days of next month.

Increasing demand for the brands of the Hyperion Cigar Co. of New Haven, Conn., has impelled it to expand its Philadelphia factory by the addition of another floor in the building which it took over just a little over a year ago, at 37 Nort 2nd street. It will not be the tenant the third and fourth floors of these pren ises under the management of Gustave Plomgren, who supervises the productio of Hyperion.

Returning in motor car from the T. M A. Convention in Washington, Vice-pre dent William S. Paley, and Sales Ma ager Willis F. Andruss, of the Congre Cigar Co., paid a visit to the Neudeck Tobacco Co., of Baltimore, and thence the Congress branch factory in Wilmin ton, Del. Charles Bock, of the Bo Staufer Co., Pittsburgh, and George Scrambling, of the George B. Scrambli Co., Cleveland, accompanied them on t journey from the Capitol City. A visit of the week to the firm's headquart was B. H. Billman, of the National Ra ways News Co., which has taken on La Palina for its wide distribution o Great Lake boats, and Atlantic Ocean mestic lines. Miss Gertrude Lenhart, fice manager, who was recently injured an automobile accident, is recuperating Sunset Hall, Wernersville, Pa., for t weeks.

President Paul L. Brogan, Vice-pre dent Harry Shetlein, Jr., as well as the city salesmen and those connec with Atlantic City Branch of the Du Goodloe Co., enrolled during the w in a newspaper insurance campa which, by a nominal payment, protect to the extent of $1,000 is secured. firm is featuring the Blackstone, leader of Waitt & Bond, of New N. J. W. F. Lakin, factory represen tive, is in the city in connection with drive and publicity campaign which being conducted throughout the One hundred colored posters, measu 11 feet high and 25 feet long, form of the campaign.

Charles M. Hipple, head of Hi Brothers, 151 North 3rd street, who been sojourning for the past three mo on the other side of the Atlantic, retu to his Quaker City home, after an joyable pleasure and business trip. W in Europe he attended the Sumatra scriptions at Amsterdam, where he tured 200 bales of choice wrappers. his tour of the Continent he stopped in Paris, Rotterdam and Plymouth, land, on sight-seeing diversions.

Newlyweds

Wedding bells chimed during the for the junior member of the firm Valenchik Bros., 134 North 3rd s when Harold Valenchik, son of Sa Valenchik, head of the concern, and Frances Gittelman were united at Synagogue Beth El, Fifty-eighth Walnut streets, in the presence of se hundred relatives and friends. Follo the ceremony, at which Rabbi Free officiated, an elaborate reception given the young couple at the b home, 6119 Washington avenue. S the daughter of Mr. and Mrs. Be Gittelman, a prominent Arch street ness man. After a two weeks' h moon in the South the newlyweds reside temporarily at the home o groom's father, 715 South Sixtieth pending completion of their own which is now in course of construct Highland Park, near Philadelphia.

e family has six children, eighteen ndchildren and sixteen great grand-ldren, all of whom attended the serv-s.

Hyman Velenchik, member of the firm Velenchik Brothers, 134 North Third eet, spent the week in Lancaster, where was engaged in the work of packing 1922 crop of Lancaster leaf in the n's four-story warehouse, which it pur-sed a year ago, and which is located Plum and Walnut streets. There is g stocked 70,000 pounds of the leaf.

abe Schloss, of the leaf house of loss Brothers, 153 North Third street, ing the past week was covering the le in Lancaster county. He is now in w York to call on the centralized nufacturers.

harles H. Krull, 55 North Second-et, is placing on the market a new of the firm's special 5-cent leader, Krull in the Invincible shape, long r, Sumatra wrapped. There is also g demand for Muriels, for which the ll interests are distributors, covering city trade.

nerican Tobacco Firms Help Greece

ASHINGTON, D. C., May 26.—During past month there has been a steady in the Greek drachma, according to rts to the Department of Commerce Acting Commercial Attaché Hall, ns, and other sources. On April 14, as quoted at $0.011561, and on May t $0.018122. It is reported that this is partly due to the heavy drachma hases by American tobacco buyers. revenue of the custom house of us during January amounted to over 0,000 drachmas, an increase of over 0,000 drachmas, as compared with This increase is partly, if not ly due to the depreciation of the cur-. The revenue for the first half of uary exceeded the total revenue of uary, 1922.

e Greek authorities have practically shed the control of foreign exchange nnection with the export of tobacco. s place an export tax payable in ng exchange is imposed. According ress reports a group of American hants are endeavoring to establish dustrial institute at Drama, Mace-, for the study of tobacco cultiva-and for the training of tobacco spe-ts.

ring floods in Macedonia and west-Thrace have caused heavy damage to Communications have been n and railway service has been dis-d.

perty holders in Greece will be seri-affected by the decree, which be-effective on April 1, imposing a tax on unearned increment. This pplies to property owned in Greece reigners or foreign corporations, and perty in foreign countries owned by s. Estates not exceeding 50,000 mas are exempt. On other estates, x progresses from 2 to 20 per cent. ayment of this once-for-all tax will l over five years in semi-annual in-lents.

agreement relating to the establish-ment of a free zone at Saloniki has been reached between the governments of Greece and Yugoslavia. This will give Yugoslavia an outlet on the Ægean Sea, and should be beneficial to the trade relations between the two countries.

Baltimore Market

BALTIMORE, Md., May 24.—Gieske & Niemann, leaf tobacco merchants, make report as follows:

MARYLAND:—The receipts for the last week were again small, totaling 145 hogsheads with sales of 54 hogsheads. Prices ruling firm.

OHIO:—No receipts, while sales of 39 hogsheads were reported.

Association Data

The Leaf Tobacco Association of Baltimore City issues these statistics for the week ending, May 23:

Receipts, Including Reinspections

	This Week	Previously	Total	Net to Date 1922	Same 1922
Maryland	457	2,719	3,176	2,256	2,100
Ohio		271	271	225	82
Total	457	2,990	3,447	2,481	2,182

Reinspections this week: Maryland 312, Ohio 0; to date, Maryland 920, Ohio 46.

How Successful Retailers Get More Business

(*Continued from page 74*)

asks that customer to buy something else in addition to the goods he is purchasing. If the customer is buying cigarettes, then the salesman asks him to buy magazines or candy or cigars. If he is buying magazines the salespeople ask him to patronize our soda fountain or to buy some other goods.

"This thing of asking the customers to buy more goods doesn't take very much effort on the part of the salespeople and it 'sure' does get the results. Since inaugurating this plan our sales have increased fifteen per cent over the amount we could normally expect them to be during this period. Consequently we are going to continue this plan for some time to come at least."

Special Week-end Offerings Help Business

"In our town," said still another successful tobacco merchant, "there is a great amount of travel out of the city during the Spring and Summer months to the nearby lakes and Summer resorts. And in many of the resorts which are patronized by our local people there are no cigar stands or stores and, consequently, it is necessary for the people spending the week-ends at such resorts to stock up on smokes and other articles before leaving the city.

"For some time we had been noticing that we were doing quite an extensive business on Fridays and Saturdays in the selling of whole cartons of cigarettes and in the selling of whole boxes of cigars, boxed candies, magazines, and so on. Upon analyzing the reasons for this business we discovered that we were selling these goods to the week-end excursionists. And so the idea naturally came to us that by going after more of this business strongly we could get a lot more of it and could increase our volume of business materially and make more money.

"Now we make a special drive for this week-end business every week and we do so by means of making special combination offers of goods at prices which are lower than when the goods are purchased separately and by means of advertising our offers by placards in the show windows and by means of attracting the attention of week-end excursionists to our store through the use of pictures of nearby resorts in the show windows.

"This plan has brought us a substantial increase in business and I am sure that the same plan could be used with equally good results by other tobacconists who are situated much like we are."

Repainting the Store Brings Trade

"How do we go after more business?" repeated another successful tobacco merchant when this question was put to him. "We get more business by constantly keeping our store in a spic and span condition. Whenever we feel that we ought to make a drive for new business we have our store repainted, inside and out—new signs put on the windows and new decorations inside. Invariably this sort of thing makes the customers do a lot of commenting and former customers who haven't been patronizing us recently come back to the store to see what the new decorations look like and new customers are attracted to the store by reason of the nifty appearance of the establishment.

"The repainting of our store has never failed yet to bring in a lot of business which, otherwise, we probably wouldn't have gotten."

Gasoline Curb Pump Brings Trade

"We have inaugurated a rather unique stunt for a tobacco store in going after more business," said a leading tobacconist in a middle western city of about 60,000. "This stunt consisted in putting in a gasoline curb pump in front of our store and thus doing something which makes the motorists stop in front of our establishment.

"We had a particularly good opportunity for doing this because there isn't another gasoline pump for a distance of half a mile in every direction from our store and because there are always a large number of motorists passing our store. And we figured that by putting in the pump we would not only make money on the gasoline we sold but we would also get a lot of the motorists into the store and sell them goods and in this way make more money out of them.

"That's exactly what has happened, too. Our pump is in use a large portion of every day and we tell the motorists who buy gas from us about the goods we are selling inside the store and about one out of every two of the motorists who get gas from us come into the store and buy other goods.

"This simple little thing of putting in this gasoline pump has brought us a lot more business and has made us quite considerable money and I know of no better way for a tobacco store which is situated like our's to go after more business."

Legal Lore

When You Can Collect Interest on Overdue Accounts

I have two inquiries this week from widely separated correspondents (one in Youngstown, Ohio, and the other in Garnerville, Nev.), asking when interest can be charged on overdue accounts. From this it would appear that there is sufficient interest in the subject to warrant the writing of this article.

The Nevada correspondent says, "We print on our billheads that '1 per cent interest will be charged on all overdue accounts.' Can this amount be collected when the legal rate of interest in this State is 7 per cent? Does the fact that the goods are accepted under the terms printed on our billhead make it an accepted agreement by the purchaser under the law?"

The Ohio correspondent submits the following:

"A purchases from B in January, 1919, a bill of jewelry goods and subsequently several other bills and which account on January, 1922, showed a balance due B of, let us say, $3,000. Between the aforementioned dates the various datings had been allowed to fall considerably overdue, because of the economic depression, and in keeping with special requests from A, extensions of time were granted by B upon several of the bills.

"On January 1, 1922, B requested notes from A to cover unpaid balance of $3,000. On June 1st A received a statement indicating balance due $3,000, whereupon B suggested settlement of the account as rendered. A immediately sent four notes of thirty, sixty, ninety and one hundred and twenty days, respectively, to balance the statement as rendered. Please note that during no period of business relations between A and B up to this time had the question of interest been mentioned, nor was there any exception to this when the notes were given, which also did not specify interest.

"Following receipts of notes, B submitted an itemized statement of account of A covering all debits and credits plus interest at the rate of 6 per cent., based upon average overdue accounts. Legal opinions differ as to this interest charge, it being contended that the requesting of the notes virtually became a definite contract between A and B, and only for the amounts represented by the notes in question, the sum total of which equalled the balance due on January 1, 1922, and the last date of purchase by A, up to June 1st.

"The notes have been paid and no interest charged, but B is now claiming an interest charge based on the average overdue account, and it is my contention that I do not owe such interest, inasmuch as had this been legally due, I am unable to understand why B did not include such interest charge in the statement and require notes to cover the principal plus interest."

First, let me say something about when interest can be collected on overdue accounts. Fundamentally, an account bears interest, or could bear interest, from the date when it should have been, but was not, paid.

By Way of Illustration

For instance, goods are sold on terms 2 per cent in ten days, net thirty. Under these terms the bill is due in thirty days, and if not paid in thirty days it represents money owed, overdue and unpaid. Under all the theories of interest, it bears interest from its due date and there would be no doubt about the right of the creditor to collect interest, if it wasn't for one thing.

That one thing is the custom of business men generally not to charge interest. There are exceptions to this, of course, but I suppose everybody will admit that at least 95 per cent of all merchants, wholesale and retail, carry their delinquent accounts along for months and sometimes for years, without any thought of interest.

As a fundamental principle, overdue accounts should bear interest, and can bear interest, and the only thing you as a seller have to do in order to collect interest on them, is to get rid of the custom, not to charge it. Getting rid of that, from a practical standpoint, is easy. All that is needed is to tell your customers you will charge interest after a certain date. You can tell them by sending each one notice to that effect and by printing it on your billheads. Don't put it in the smallest type your printer has, but print it in a good black line, clear across the bottom of the sheet: "Legal interest charged on accounts not paid in thirty days." Note I say "legal interest"; of course you can't charge more than that, for that would be usury—a penalty for tardy payment, in other words, instead of mere compensation for the use of the money, which interest is supposed to be. Even the acceptance of goods by a buyer who knew perfectly well that you would try to charge him 12 per cent a year on unpaid balances would not make the usurious provision binding on him. You can charge the legal interest of your state and no more.

A Self-Answer

The interest problem which the Ohio correspondent submits, pretty nearly answers itself. Owing to the widespread custom not to charge interest on overdue accounts, I have explained that you can't collect interest until you tell your customer you are going to do so. And, of course, it follows that you must tell him *before* you do it. You can't settle an account as B did in the submitted case, and take notes for it, and *then* demand interest, not on the notes, but on the account. Perhaps if under the custom of that trade, or the understanding between the parties, that account had been bearing interest right along, the m failure to include interest in the nc wouldn't have amounted to anything, as I understand the case, that was so. I should say that A could not charged interest in this case.—*Copyri 1923, by Elton J. Buckley.*

Wrappers for Canada

Andrew Wilson, of Alexander Wil & Co., cigar manufacturers, of Toro Canada, inspected the local leaf mar recently, and purchased a good stock fancy wrappers for Canadian consu tion.

A Good Buyer

Bernard Schwarz, the Detroit ci manufacturer, was a heavy purchase the local leaf market early this w Mr. Schwarz also ran over to Hartf to obtain first-hand information of shade-grown crop.

Philadelphia

(*Continued from page 57*)

Wisconsin and Connecticut tobaccos fully 25 per cent higher in price than were a year ago, and, although pool trol of the Wisconsin and Connect crops may have caused some of the crease, a general short crop last yea chiefly responsible.

"Manufacturers have made large chases of Sumatra from New York d ers and brokers during the month record prices. The fancy grades of matra wrapper are commanding pr ranging from $8 to $13 per pound. quality of this year's Sumatra tobac reported by dealers to be as good as of any crop ever imported.

"American packers and dealers l been active buyers in Porto Rico, growers on the island are quickly dis ing of their crop. Those districts wh last year were selling their tobacco from 28 to 30 cents per pound are year receiving 35 to 36 cents, and pr show no tendency to soften. The out for Porto Rican tobacco growers brighter than ever before, and alr forecasts of a bigger acreage of the crop are being made."

San Francisco

Following the decoration of delegates and alternates, President Mendelsohn introduced Jerome Waller, president of the New York Leaf Tobacco Board of Trade, who in a few felicitous remarks eulogized the National Association for the splendid results it has accomplished during the past twenty-five years, carrying on for the good and steadfast maintenance of all good principles of the industry.

It had achieved, he said, greater things than its founders ever anticipated or hoped for. He called attention to the many good men who had gone to the Great Beyond, and urged the young men of the trade to become active members

of the association, that they might help to perpetuate the good work.

He said it was during the World War that the National Association had been the guests of the New York Board, but the war clouds have passed, and now peace reigns, good cheer, good fellowship and brotherhood are supreme.

Mr. Waller said the Mayor of New

York was evidently too busy and too occupied with other matters to offer them the Keys of the City, but that he, as president of the New York Leaf Tobacco Board of Trade offered them the freedom of their homes and their offices, and requested them to enjoy their hospitality.

He welcomed all present most heartily, and stated that the Entertainment Committee had arranged a splendid entertainment during their sojourn in the city.

President Mendelsohn replied, thanking him in the name of the National Association.

The reading of the minutes of the last meeting being dispensed with, President Mendelsohn read his address, which was as follows:

Annual Report of President Joseph Mendelsohn

To The Members of the National Cigar Leaf Tobacco Association:

I congratulate you one and all upon the assembling of the 25th annual convention of the National Cigar Leaf Tobacco Association. Following the call issued in the spring of 1898 by the Leaf Tobacco Board of Trade of the City of New York there soon rallied for the formation of a national organization the strong men of the trade from Boston, Hartford, Philadelphia, Lancaster, Cincinnati, Dayton, Chicago, St. Louis, and other cigar leaf centers. To the substantial achievements of the Association during the past quarter of a century the few charter members who today are still active in the organization may well point with pardonable pride.

In another section of our annual reports to this convention you will find a condensed retrospect of the activities of our Association which should both enlighten and convince the most skeptical in our trade of the mutual benefits of co-operation and especially of the value of such an organization as ours for protection against every form of adverse influence.

It is becoming more than ever apparent in these days of individual concentration and spirited competition that it is absolutely necessary for merchants to unite for a free exchange of views and to devise all legitimate means of protecting common interests. The function of the national trade association has recently come to be fully recognized and endorsed by the highest officials of our Government who at this moment are tendering us their hearty co-operation in a very important field that can only be reached by the long arm of the executive departments in Washington.

But there is a human side to the national association. We come together not only for our material benefit but to become better acquainted with each other, for the furthering of good fellowship and that our natures may respond to the personal touch. Our conventions should provide not only an opportunity for our business deliberations but in the leisure hours they afford they should provide a playground for the boys, old and young, where the sterner realities of business life, with their cares and responsibilities, may be laid aside for the purpose of meeting old acquaintances, renewing old friendships, and making new ones. If we approach our annual gatherings in this fine spirit of mutual regard and esteem our conventions can not fail to be as enjoyable as they are profitable.

Revision of the Tariff Law

When we met at Atlantic City a year ago we were in the throes of a momentous campaign against unreasonable and unnecessary increases in our tariff schedule. Certain interests were seeking an advance of one dollar per pound in the duty on wrapper leaf tobacco while the Ways and Means Committee of the House of Representatives, moved by a false hope of securing a substantial increase in the revenue, planned an increase in the duty on filler from 35 to 45 cents per pound and in the rate on scrap tobacco from 35 to 55 cents per pound.

In no previous campaign have our members worked together in a finer spirit of co-operation for the welfare of our entire industry. Our Legislative Committee especially, attacked its task with great vigor and repeated journeys were made to Washington upon the call of our representative to lay the salient facts in our problem before the members of the House and Senate. In this serious undertaking we were fortunate in having the hearty co-operation of influential men in both Houses, and I make no invidious distinctions when I record here our deep appreciation of the efforts made in our behalf by Senator George Wharton Pepper, of Pennsylvania, Senator Frank B. Willis, of Ohio, and Representative W. W. Griest, of Pennsylvania.

The outcome of our campaign was eminently satisfactory. The tariff bill as finally enacted added but 25 cents per pound to the duty on wrapper tobacco, which, if unstemmed, was fixed at $2.10 per pound, or if stemmed, at $2.75 per pound. The rates of the previous law on filler, namely, 35 cents per pound on unstemmed and 50 cents per pound where stemmed, were retained as was also the 35-cent rate on scrap tobacco. The new tariff law also recast the bonded manufacturing warehouse provisions of Section 311 as applied to tobacco products in such a manner as to continue the existing law. Further details of this interesting and important episode in our activities during the past year will be found in the legislative report which will be presented to you by our Washington representative, Mr. Crounse.

I have deemed it wise to make an innovation in the method of presenting our annual reports to the convention. Reserving to myself a summary of our activities, together with such observations and suggestions as it seems to me should be urged upon your attention by your presiding officer, I have asked Mr. Crounse to prepare and present the review of our legislative work. I have done this not only because I believe it to be the logical method of placing these matters before you, but also as a personal tribute to Mr. Crounse, who has just completed his twenty-third year of service to this Association at the National Capital. His work during the long period in which he has labored in our behalf speaks for itself, and I take pleasure in heartily recommending the further retention of his services.

Cooperation of Federal Government

It is exceedingly refreshing to be able to announce to you that the Federal Government, which for so many years has seemed to look upon us as a step-child to be considered only in financial emergencies and at all times to be subjected to the most rigid regulation, has tendered us the fullest measure of its co-operation in a broad field, the importance of which is constantly increasing. The Department of Commerce, presided over by Secretary Hoover, whose genius in the solution of business problems and whose magnetism is drawing to himself for aid the ablest figures in the world of commerce and industry, has not only created a special trade bureau to further our interests in an extensive field of which our foreign trade is the chief factor, but has appointed an executive committee representing the leading tobacco trade associations of the country, with our Washington representative as its chairman, the functions of which will be to co-ordinate our work with that of the Government and to suggest to the accomplished head of the new bureau, Mr. T. L. Hughes, the special directions in which the Federal Government with its broad powers and unlimited facilities may be of aid not only to the members of our Association but to the entire domestic tobacco trade from growers to manufacturers, dealers and distributors.

There can be no doubt of the value of this co-operation which Secretary Hoover now so generously tenders us. The ability of the Government to obtain reliable information of trade movements in all the countries of the world is, of course, unquestioned. With a thousand trade representatives scattered over the globe it will be possible for the new bureau to gather and assemble facts of highest importance to our industry and with the appropriation at the department's command this information can be forwarded to Washington by cable and distributed to the interested trade with such speed and timeliness as to greatly increase the importance and actual monetary value of the data thus obtained.

The chief of the new tobacco bureau modestly disclaims any hard and fast program of activities. So far as the cigar leaf industry is concerned he will look to us for suggestions and I bespeak your very careful consideration, prompt action and hearty co-operation in placing before the new bureau suggestions as to how its usefulness may be increased and how best it can serve our trade.

There can be no doubt of the tremendous potential value of this important new division of the Department of Commerce. Its success, however, must depend upon the spirit and energy with

which we grasp the hand Secretary Hoover holds out to us. I know I am not going too far when I say that our response will certainly demonstrate how deep is our appreciation of the consideration shown us.

The Cigar Leaf Tobacco Pools

The widely heralded tobacco pools in the cigar leaf field have taken concrete

on in Connecticut and Wisconsin, asing no little anxiety among our acers and jobbers. Dark, indeed, is the ure pictured by many in our trade I feel that the avenues of successful ness have thus been barricaded. moment's sober reflection, however, uld allay such fears. The history of ze and industry the world over has onstrated that the middleman must

A shot from life at Jerry Waller holding 'em down

s exist as an indispensable figure en the controlling interests of a odity which is so manifold in its s and which must be distributed to y large number of manufacturers, of whom can not in the nature of avail themselves of the specific and conditions exacted by the pool. well known fact that many manu- ers can use only limited quantities tain grades of leaf. Such operators eed the jobber who, by his experi- nd knowledge of distribution, can le a service of such importance that he most conservative manufacturer e only too glad to pay a fair re- ation for the assistance rendered.

consideration should be given us fact that packers, who before the zation of these elements were l to assume all the risks connected packing and curing, are now re- of these burdens and therefore can heir undivided attention to their ses with the advantage of know- exact quantities, grades, and qual- hich are offered under a supervi- hich, as in Connecticut, controls 0 per cent of the production.

y trade is temporarily staggered if mned by each new and important ssive development in methods of ndising. It is not surprising, there- at our trade today seems to stand less while it attempts to appraise luence of these new conditions. I sfied, however, that it will hesitate ng enough to call into service all ulties at its command. In the evo- of new trade channels and policies s will be found that will amply our sturdy men of business who o often proven their mettle and ave weathered many storms of severity. The skillful sailor de- to go west, notwithstanding the inds blowing strongly against him, ned that by manipulating his tiller reach his goal in the face of the ubborn obstacles.

e Dark Wrapper Problem

ore serious problem today con- our industry, involving growers, turers, and packers alike, than the for devising some practicable method to stem the ever increasing demand for light wrapped cigars. The grave aspect of this problem is reflected in the activity of the trade press, which at present is busily engaged in devising an effective slogan to increase the sale of cigars and another designed to induce the smoker to abandon his time honored prejudice and turn to the dark wrapped cigar. This movement of the press is undeniably of great assistance, but it will hardly gather sufficient force to change a custom maintained for many years, advocated and sustained by careless advertisements and, therefore, today a fixed habit.

Not only does the smoker from long habit demand a light cigar, but the man behind the counter, by the very form of the inquiry with which he greets his customer, in asking whether he wants a "light, medium, or dark cigar," leads the buyer to call for light colors when in reality his desire is merely for a mild cigar regardless as to whether it is light, medium, or dark in color as long as it suits his palate.

How many millions of dollars are sacrificed yearly in the universal effort to secure the small percentage of light wrappers available, be it of foreign or domestic leaf? Every man in the trade knows only too well that dark wrappers form the major percentage of most crops and because of the senseless prejudice against them are disposed of at ridiculously low figures. What a relief it would be to every one, from grower to manufacturer, if these dark wrappers could come into their own! If they could but find their just and proper use the cost of wrapping cigars would be materially reduced to the benefit of the smoker as well as to the advantage of the entire cigar and leaf trades.

The conviction is forced upon me that a broad and far reaching campaign of education in this field is indeed a necessity and that no matter how elaborate and costly such propaganda might be the results would justify every penny of the investment. Right here, indeed, is a chance for grower, packer, importer, and manufacturer to join hands in fighting a common evil and furthering a common cause.

Do you realize that we have nearly 500,000 licensed cigar dealers in the United States? Of these it is safe to state that over 400,000 are operating retail stores, the proprietors of which would be the direct beneficiaries of the movement to give the dark wrapper its proper place in the production of acceptable cigars. Consider for a moment what it would mean to launch a campaign that would enlist this great army of enterprising retail merchants, each of whom would be an active apostle of the new doctrine able to point to a conspicuous sign hanging on the walls of his shop, visible to all who entered, reading something like this:

"Dark Wrappers are Ripe Wrappers and Make Sweet Cigars. Try One and be Convinced."

Such a sign, authenticated by the official seal of the National Cigar Leaf Tobacco Association, would have a telling effect. To speed the good work let the man behind the case abandon his shop-worn phrases and ask his customer to decide between "heavy, medium, or mild" cigars, at the same time enlightening him upon the fallacy of asking for light colors in order to secure a mild smoke. With these methods vigorously pursued in every city, town, and hamlet throughout the country the trade would soon notice a fundamental change in the arrangement of its color scheme.

I am confident there would be no trouble in forming a joint committee to co-operate in this work that would include representatives of the growers of wrapper tobacco in Connecticut and Florida, the importers of Havana, Sumatra, and Java wrappers and the manufacturers of cigars. Such a committee would have little difficulty in obtaining all the necessary funds to launch this most essential campaign of enlightenment.

In your behalf I offer the pledge that the National Cigar Leaf Tobacco Association will do all in its power to assist.

Tobacco Products Credit Association

It is with a deep feeling of the responsibility resting upon me that I bring to your attention a matter which to my mind is of paramount importance. I refer to the necessity of eliminating so far as possible the credit risks in our business which have so demoralized it during the past two years and which in my opinion can be reduced to a negligible minimum if we will give adequate support to the Tobacco Products Credit Association. The success of any such organization must necessarily depend upon the confidence reposed in it by those whom it would serve. To secure a maximum of benefit, therefore, it is highly important that as many of our members as possible shall join this credit association to the end that the information it distributes shall be authoritative, reliable and impartial.

tial fundamentals have been disregarded in heedlessly extending lines far beyond reasonable limits with the natural result that those who decided to do business without regard to their discretion have learned to their sorrow that such methods maintained in violation of the soundest principles of merchandising must prove most disastrous.

The past two years have seen a number of failures of unusual magnitude the disclosures of which have presented such deplorable pictures of credit judgment that I have felt it my duty to bring to your attention with the greatest possible emphasis the fact that it is exclusively within your power to remedy these evils. Such incidents can only be obviated by a closer exchange of ledger experience, a readiness to co-operate with competitors and a fearless insistence upon all available information which only the credit-seeking debtor can give you. These are the means to protect your credits and I am sure that no better vehicle through which a methodical credit system can be established is offered than that presented by the Tobacco Products Credit Association, which is now making gratifying progress in securing subscriptions from representative houses throughout our trade.

In urging you to subscribe to this service I feel that in no other way can you obtain the information so necessary in the conduct of your business. I would especially stress the point that the efficiency of this credit association will be greatly increased as it gains in membership; hence you consult only your interest when you join with other members of the trade in giving it your support.

I do not hesitate to recommend the Tobacco Products Credit Association to your confidence. It is significant that its chief executive is a man possessing peculiar qualifications to operate a service of this character in the most efficient manner. The fact that his activities are limited to the tobacco trade is a guarantee that the work of the service will be concentrated upon our welfare without extraneous entanglements of any kind.

The Tobacco Merchants' Association

I am pleased to be able to state that the Tobacco Merchants' Association continues its vigilant attitude and aggressive opposition to the attacks of the "antibacs." While apparently the propaganda of these enemies of our trade has gained few converts in the past year

In my capacity as late president of the Leaf Tobacco Board of Trade of the City of New York, I recently called attention to the almost sublime indifference in which extensions of credit have been granted throughout our trade during the past year or two. The most essential

their activities are nevertheless reflected in measures frequently introduced in the various state legislatures throughout the country which seek to impose limitations on sales of cigars, cigarettes, and smoking tobacco, or to burden these articles with heavy taxation. These bills receive

the Tobacco Merchants' Association's closest attention and in numerous instances have been successfully opposed and defeated. The activities of the Tobacco Merchants' Association in this important field deserve the approval of our Association and our moral support.

Memorial

A resolution was passed at the meeting of the Directors which followed closely upon our last convention, requesting the Secretary to obtain the names of members whom death had called hence during the past twenty-five years for the purpose of recording same in a suitable book. A very earnest effort has been made by our painstaking secretary to carry out the purpose of this resolution, but notwithstanding his untiring efforts and the enlistment of the aid of the secretaries of the various local boards and the trade press, it has not been possible to obtain all the desired data. In many instances no records have been kept and the memory of associates has proven too unreliable to furnish a complete and accurate list.

There is thus presented to us a vivid illustration of the transitory character of man's career and of the speed with which he sinks into oblivion. In a short generation we lose sight of the traces of individual human endeavor, and only here and there where a man's service was exceptional or his personality particularly impressive, do we remember. This should inspire us to serve to the very best of our abilities, for thus only may we preserve a record in the memory of man.

With a deep sense of their loss I have made a record of those of our members who have passed away since our last convention. The grim reaper took heavy toll of our membership during the short twelve months. While paying a silent tribute to their memory I know I shall be pardoned for dwelling for a fleeting moment upon the loss of our good friend, Charles Fox. In many capacities, but especially as the able chairman of our Legislative Committee, he gave us unstinted, unselfish service. His counsel, his aid, and a hearty co-operation, reflecting his genial personality, were always at the command of his friends. His services to our organization have been of inestimable value and most deeply appreciated by all familiar with his work. We miss you, Charlie, and seek comfort in the thought that you are with us spiritually, taking part in our deliberations! During the reading of this all too long list of those who have passed on during the last year I will ask you to rise and stand for a moment in silent prayer:

Deaths

Henry Durlach, died February 7, 1922.
Walter E. Hecht, died April 25, 1922.
Abraham Bijur, died May 1, 1922.
William Taussig, died July 15, 1922.
Emanuel J. Weil, died August 10, 1922.
William S. Brill, died November 2, 1922.
Jacob Sutter, died November 6, 1922.
Leopold Schmid, died November 11, 1922.
Ismar S. Ellison, died November 12, 1922.
Charles Fox, died December 2, 1922.
Nathan Reiss, died March 5, 1923.
Siegfried Schluechterer, died March 13, 1923.
George Levy, died April 5, 1923.

Our Associate Membership has about held its own. We made a number of new members, but owing to a number of resignations we cannot report an increase over last year. This is to be very much regretted, and I would recommend that the retrospect of this report, showing the activities of our association, be printed in pamphlet form and through the medium of our members be distributed among manufacturers who are as yet outside of our fold. Let our efforts during the ensuing year be bent upon enlarging our Association, thus increasing its strength for co-operation and its consequent benefits. Joseph Mendelsohn, President, National Cigar Leaf Tobacco Association.

New York City, June 4, 1923.

Received Deserved Applause

The president's address was roundly applauded.

During his address a printed sign was displayed above the rostrum, which read as follows:

"Dark Wrappers Are Ripe Wrappers and Make Sweet Cigars—Try One and Be Convinced.—National Cigar Leaf Tobacco Association."

Following the president's address, William L. Crounse, the legal adviser of the association, read the legislative report, which was as follows:

Report of Wm. L. Crounse, Washington Representative

In rounding out the quarter century of the life of the National Cigar Leaf Tobacco Association it can truthfully be said that the past year has been marked by activities and achievements as important as those of any twelve-month in the long and successful career of this organization. These include a vigorous tariff campaign protracted beyond all precedent, the establishment of relations with the Government for the extension of our foreign trade, participation in a nation-wide effort to secure the establishment of free zones in the United States, co-operation with the Government in the standardization of cigar leaf tabocco, and the lending of our energetic assistance to the movement to bring about the legalization of price maintenance. They also embrace the operation of a bulletin service covering crop reports, census data, and other matters of value to our membership.

The Fordney-McCumber Tariff Bill

The past year has seen the enactment of an exceedingly comprehensive revision of the tariff law after a campaign in Congress of unprecedented length, begining in December, 1920, and ending with the effective date of the new law, September 22, 1922. Throughout this period our Association was called upon to maintain the utmost vigilance, to keep our representations constantly before both Houses of Congress, and to make demands upon our legislative committee and our individual members for continuous co-operation and unceasing effort. It is no exaggeration to say that never before in the quarter century of our existence has it been necessary to conduct a campaign of such importance, long duration, and unremitting effort.

The results achieved by us have proven most satisfactory. Our chief contention was against any important increase in the duties on the raw materials of the cigar industry, and in answer to our appeal Congress wisely decided to retain existing rates on filler and scrap tobacco and increased the wrapper duty but 25 cents per pound. As a further concession and in response to vigorous representations made by our Legislative Committee the so-called 15 per cent clause as applied to mixed bales of cigar leaf was amended by raising the limit on the wrapper content to 35 per cent, a change of great importance directly in line with efforts made by our Association in connection with every revision of the tariff in our organization.

While the outcome of our campaign was thus most gratifyingly successful we must not forget the obstacles encountered at various stages and the splendid efforts made by our members in co-operation with our Legislative Committee. When the hearings began in January, 192

soon became apparent that the Ways and Means Committee was strongly influenced by representations of the Secretary of the Treasury as to the need for additional revenue and that the rates on the entire tobacco schedule would probably be increased in the hope of obtaining a larger contribution in the way of customs duties from our industry. We left no stone unturned to prevent these increases. It was clear to us that the combined project of the Treasury Department and certain domestic interests raising the wrapper duty one dollar a pound, adding 10 cents to the rate on fillers and 20 cents to the scrap rate should be carried out the Government probably would obtain less rather than more revenue because of the demoralization that would be suffered by the entire cigar industry.

Our arguments respecting the wrapper rate received very serious attention at the hands of the Ways and Means Committee, and it was decided to increase the existing rate but 25 per cent per pound. With respect to the duties on filler and scrap, however, the committee refused to make no concession and these rates were kept at 45 cents and 55 cents, respectively, in the bill as reported to the House.

The experiences of our Legislative Committee after the tariff bill reached the Senate were calculated to test the philosophy of the most optimistic. The hearing before the Finance Committee was so curtailed by unforeseen events that it became necessary to present our arguments in detail and in person to individual Senators. Fortunately, however, the Senate committee employed an experienced staff of advisors, and with the cooperation of these well informed men we were able to make our representations so effectively that when the bill finally passed the Senate the rates of the existing law on fillers and scrap were restored and the House rate of $2.[illegible] wrappers—which the Finance Committee had at one stage raised to $2.35—was adopted. The 15 per cent clause as applied to mixed bales was fixed at 3[illegible] cent.

In the Conference Committee, to [illegible]

bill was referred after passage by the ate for the purpose of harmonizing the rse provisions of the House and Sen- drafts, the Senate provisions relating ller and scrap tobacco, were retained, as also the Senate 35 per cent clause. h wrapper rate of $2.10 having been pted by both Houses, did not come in the jurisdiction of the Conference mittee.

Throughout our campaign we had the te and influential co-operation of a ber of prominent Representatives and tors. In addition to what President delsohn has said in his report with d to the services of Senators Pepper Willis and Representative Griest, I to record my own feeling of grati- to these gentlemen for the courtesy antly shown me throughout a long trying campaign and the prompt as- ce they invariably gave me whenever l occasion to appeal to them. If our bers could but realize the tremendous ure brought to bear upon individual tors and Representatives in a tariff aign and the absolutely overwhelm- emands made upon their time by constitutents, I am sure that they d appreciate the splendid services of entlemen I have named who never ll to respond to our appeals.

Taxation Outlook

The tobacco industry has always lived had its being in the shadow of the atherer. It is therefore appropriate a few words should be said with d to the present outlook for tax ation. No one can foretell the fu- but certain important facts may be as a basis for logical deductions.

o not believe that the tobacco in- need fear an increase in the taxes products in the near future. The t year may show a substantial de- n the Federal Treasury, but I be- that the pruning knife will be so d upon the estimates for appro- ns to be made in the coming Con- that there will be no red-ink figures Federal ledgers at the end of the year 1924. The current deficit ore can safely be taken care of by suance of short time Treasury ob- ns to be liquidated with the aid of e tax and customs receipts which e calendar year 1923 promise to ex- riginal estimates by large margins, come tax by no less than $250,000,- d the customs by a sum almost as

ill be necessary, however, for us to se more than usual vigilance in fol- the financial legislation of the Congress as the Treasury De- nt has on foot comprehensive plans x readjustment. These include a ng of the higher brackets of the surtaxes which, in the opinion of cretary of the Treasury, will in- rather than reduce the revenue. ional reports to the contrary, I am nt that the projected effort to re- he excess profits tax will fail. The will be urged by the so-called ssive Bloc in Congress, but will osed by the powerful contingent up of administration leaders in Houses.

probable that the sales tax will come forward for discussion, but if ly urged it will be as a substitute er existing taxes. There is much aid on both sides of this interesting n, but I do not look for definite ion during the coming year.

the first time in many years, there- think we may look forward to at welve months free from the dis- ing uncertainties which usually ac- y campaigns to amend the tariff rnal Revenue laws.

ment to Stimulate Our Foreign Trade

paying little attention to the to- industry for many years—except e Federal Treasury has needed re- sing—our Government has now un- n to extend to us its most gen- o-operation in the development of ign trade, both export and im- t is not surprising that this most innovation should have been de- Secretary Herbert Hoover, the ished head of the Department of ce, who in many directions has rated the wonderful possibilities way of co-operation between the National Government and the industries of the country. The trade is also to be congratulated upon the fact that an experienced tobacco man, Mr. T. L. Hughes, who has spent the greater part of his life in the principal domestic and foreign tobacco markets, should have been appointed to supervise this work as the chief of the tobacco trade section of the Bureau of Foreign and Domestic Commerce.

Secretary Hoover's administration of the Department of Commerce has been signalized from the outset by a broad vision and a determination to make his department of the greatest possible value to the business men of the country. Former traditions which, limiting the scope of departmental work to the supervision of business operations and to the imposing of drastic restrictions upon individual enterprise, have gone to the scrap heap under Secretary Hoover's regime. His sane view is that the Government belongs to the people, and therefore that every official of the Federal administration should at all times stand ready to do everything in his power to advance American commerce and industry.

Upon this foundation Secretary Hoover has builded well. Many great industries are already the beneficiaries of the co-operative work of his department, and he has now thrown open to the tobacco trade all the facilities at his command. These include not only the staff of skilled experts in Washington whose duty it is to collect and disseminate valuable trade information from all sources, but also more than a thousand trained commercial agents who are now scouring the markets of the world in search of outlets for American products and sources of needed materials. Each of these foreign representatives is a specialist in business procedure, and many of them possess a remarkable amount of technical information concerning many of our most important industries. Each of them is in close touch with the Bureau of Foreign and Domestic Commerce by cable and by expedited mail in the official pouches of the United States Government.

This organization under Mr. Hughes' intelligent direction will gather all possible information of value to the American tobacco trade wherever it is to be found, and will forward it as speedily as possible to Washington where it will be promptly distributed to those directly interested. No longer will the best and freshest information be available only to big combinations of capital able to maintain large corps of independent representatives, but the most reliable data freshly gathered and promptly forwarded will be at the command of the most modest operator in any branch. As indicative of the comprehensive scope of the work which the Department of Commerce will do for us, I will call your attention to the following brief tentative synopsis of lines of activity already suggested by Mr. Hughes:

1. Production—by quality and type.
2. Imports and exports—indirect shipments.
3. Lists of foreign importers and manufacturers.
4. Internal revenue, tariff laws, and foreign tobacco monopolies.
5. Port and warehouse facilities—free zones.
6. Contracts, terms of payment, credits, and exchange.
7. Current information from leading markets.
8. Consumption.
9. Co-operation needed.

In order that our industry may at all times be in close touch with Mr. Hughes' organization, the Secretary of Commerce has appointed a contact committee, of which I have the honor to be chairman, whose chief function it will be to co-operate not only in the work of collecting and distributing information, but also in developing new lines in which the Government may be of assistance to us. Your president has pointed out the necessity for your hearty co-operation in this work, and on behalf of the contact committee I desire to assure you that we shall at all times welcome suggestions as to new fields of endeavor and more efficient methods by which you can be served.

The Campaign for Free Zones

The movement to authorize the establishment of free zones at or near the principal ports of the Atlantic and Pacific made notable progress during the past year and probably failed to complete success because of parliamentary complications incident to the consideration of the Fordney-McCumber tariff bill.

Early in the last Congress the Senate Commerce Committee gave careful consideration to a well balanced bill embodying the free zone policy and providing a measure of flexibility that would have permitted the location of these zones wherever they might be most seriously needed. During the consideration of this bill many witnesses were heard who emphasized the great benefits which the free zones—or free port system, as it is called abroad—have conferred upon commerce. Opponents of the bill appeared in the persons of a few ultra-protectionists, who urged that the principle underlying the bill would imperil the protective policy of the Federal Government.

These critics seem to have lost sight altogether of the great advantages that would accrue to American producers under the proposed plan, not only in the opportunity that would be afforded to clean and repack damaged foreign merchandise before bringing same into the United States, but also in providing an outlet for vast quantities of domestic raw material which, with or without the addition of foreign materials, might be manufactured into salable merchandise intended for exportation. The free ports of Europe have supplied such facilities for many years and have so fully justified their creation as to make it clear that the United States is lagging in the rear of its competitors in failing promptly to adopt this innovation.

In this connection Dr. Julius Klein, chief of the Bureau of Foreign and Domestic Commerce, in discussing recently the benefits of the free zone system, said:

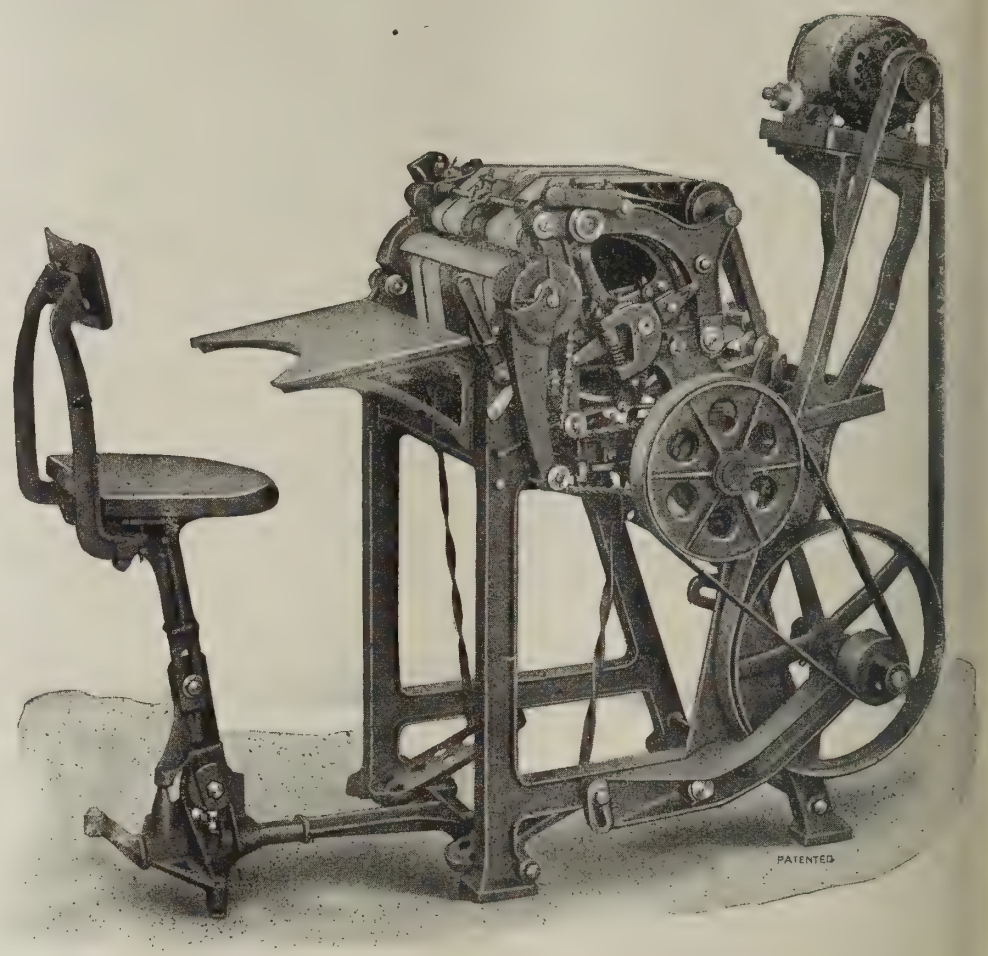
"The kind of products which are most likely to be imported into foreign trade zones for re-exportation are raw materials and certain types of bulk foodstuffs, for which, under favorable conditions, we might become distributors. Such products are very largely of a non-competitive nature, many of them being on the free list of our tariff. Furthermore, they are produced, to a large extent, by tropical countries not possessing any considerable merchant marines. It is evident, therefore, that the creation of foreign trade zones could not possibly injure American industry, while on the other hand, they are likely to benefit our shipping by enabling it to obtain return cargoes."

The bill of the Senate Commerce Committee was reported in the last Congress and its promoters planned to attach it as an amendment to the Fordney-McCumber tariff bill. Unfortunately, however, a parliamentary wrangle of considerable bitterness developed before the final agreement on the tariff bill was reached and the managers of the measure therefore were reluctant to embarrass its progress by attaching to it a rider of such importance as that authorizing free zones. The free zone project will be brought forward early in the new Congress, where an opportunity will be afforded for its consideration strictly on its own merits and without parliamentary complications. I believe you will consult your own interests if you will again indorse this measure and prepare to co-operate with its promoters in urging its attention on both Houses.

The Cuban Sales Tax

Importers of leaf tobacco from Cuba have recently been considerably embarrassed as the result of the enactment by the Cuban Government of a sales tax of one per cent which, under the construction given to the statute by the Secretary of the Treasury of Cuba, applies to all tobacco sold in the Island, even though destined for exportation, unless actually shipped by the original purchaser. The effect of this law, as construed, is to impose this tax upon a part of the tobacco exported to the Uunited States while the remainder is exempt, notwithstanding the fact that the sole difference between the two classes of transactions is the number of hands through which the tobacco passes prior to its exportation.

The theory of the Cuban law exempting exports from what amounts to an internal revenue tax is similar to that which underlies our own system of taxation, and it is difficult to understand the peculiar logic which permits the incidence of this tax to depend, not upon the actual exportation of the tobacco, but rather upon the number of parties who have handled it prior to its shipment to the United States. Our Association has taken an active part in the effort to obtain a more logical construction of this statute, and a movement is now on foot to secure an amendment of the law through the action of the House of Representatives and Senate of the Cuban Government. In the meantime, with a view to making the tax as light a burden as possible upon all parties, the warehousemen and the commission houses in the Island have mutually agreed that in the case of taxable transactions the buyer and seller will each contribute one-half the amount of the tax.



While the construction and enforcement of the Cuban sales tax law are within the exclusive jurisdiction of the

Wrapper Stripping

and

THE 1922 PLANETARY GEAR DRIVEN TYPE

Universal Tobacco Stripping and Booking Machine

You will be truly surprised at the *superior wrapper stripping results* produced on this new Planetary Gear Driven Type Machine.

All of the wrapper stripping objections voiced against the old Belt Driven Type Model M have been overcome in this new machine.

We now offer a machine that:

1. Will strip wrappers with a clean razor edge cut
2. No breaking or tearing in on the veins along the edge
3. Pads will be booked fluffy and loose—no packing of the stock
4. No wrapping of the stock around the brush or drive rolls

WE REBUILD OLD MODEL M MACHINES into our new 1922 Planetary Gear Driven Double End Stop Lever type, on a two weeks' working schedule, at $250 each. We guarantee rebuilt Model M's as to workmanship and materials for a period of one year, just the same as we do new machines.

Have your old Belt Driven Style Model M's rebuilt into the NEW PLANETARY GEAR DRIVEN TYPE during June and July, so that they will be ready when your Fall rush starts.

All Universal 1922 Planetary Gear Driven Type Tobacco Stripping and Booking Machines are also equipped with a Double End Stop Lever.

The 1922 Planetary Gear Drive Attachment offers the following advantages:

1. Books fluffily the evenly stripped stock in right and left pads.
2. Does not "tear in" on the veins.
3. Stock does not pack or slip on the booking drum.
4. Overcomes the wrapping of stock around the brush.
5. Maintains uniform speed of machine and production.
6. Prevents entirely all "stalling and slipping" of the booking drum.
7. Eliminates the necessity of taping drum and drive rolls.
8. On small stock it is possible to book four pads (instead of two) on the booking drum.
9. Reduces to a minimum the cost of upkeep.
10. By eliminating all belt strain and tension greatly lengthens the life of the machine.

Today's Prices are:

1922 Planetary Gear Driven type machine and folding chair	$475.00
Individual motor drive equipment including ¼ H.P. motor	95.00

posed upon American interests are overnment of the Island, the hardships ich as to justify the making of diplo- atic representations by our Government the proper authorities, and in the ent that the movement now on foot to cure the amendment of the law is not ccessful within a reasonable length of me, it is probable that the interest of e Department of State and possibly the Department of Commerce may be listed by this Association.

The Menace of the Manila Cigar

I deem it my duty to call your atten- tn to the inroads which the Manila car, which for more than a dozen years been brought into this country from Philippines free of duty, has made of in the domestic cigar industry. This npetition has been most keenly felt in 5-cent field, in which it has displaced recent years several hundred million nestic cigars annually. The producers these cigars in the Philippine Islands e the advantages of tropically grown acco, cheap and skillful labor, and free ission to the United States. Thus in of raw materials and labor the Ma- cigar, as laid down in our markets, ntains a marked advantage over our low-priced goods.

ur trade leaders have followed with t interest the efforts that have re- ly been made by our manufacturers roduce an acceptable 5-cent cigar, but e efforts have been rendered more or abortive because of the high cost of tobacco and the difficulty of procur- an acceptable wrapper at a reason- price. This wrapper problem has rendered more acute of late by the recedented prices obtained for Suma- tobacco in Holland and the increase uty imposed by the new tariff law.

ith these considerations in mind it be interesting to glance over the stics of the importation of Manila s from the Philippines since 1908, as n in the following table:

Exports of Manila Cigars from the Philippines

	To all countries				To the United States		
	Quantity	Value	Average price per thousand	Percentage of total exports	Quantity	Value	Percentage of total produced in Philippines
	Thousands				Thousands		
1908	115,881	$1,059,328	$9.14	3	1,182	$18,476	1.73
1909	151,457	1,754,529	11.58	5	37,076	737,396	42.03
1910	184,407	2,759,661	14.96	7	61,526	1,560,799	56.56
1911	134,830	1,901,863	14.10	4	38,112	902,378	47.44
1912	190,842	3,092,064	16.20	6	90,000	1,958,321	63.33
1913	191,762	3,012,234	15.71	6	71,513	1,642,888	54.54

will be seen from the figures pre- 1 above that importations of Manila at once rose to high figures upon moval of the duty and reached the in 1920 when more than 316,000,000 imported. There was a heavy in 1921, but this was followed by ided increase in 1922, and it is un- lly stated that the imports for the four months of 1923 have shown substantial gains. It is highly sig- t also that, whereas before the a cigar was made free of duty the l States took less than 2 per cent output of the Islands, the imports e United States from 1916 to 1920 ed nearly 80 per cent.

wholly within the power of Con- to regulate the free admission of ts into the United States from the ines. The executive departments o control over the matter, and it be deemed desirable to take any for the protection of our low- domestic cigar it would be neces- await the regular meeting of Con- ext December unless the President decide to call a special session at ier date.

enactment of the Fordney-Mc- r tariff law with its increase of 25 er pound in the duty on wrappers sulted in an important discrimina- favor of the producers of cigars Philippines which we have already teps to remove. Inasmuch as the ne Government maintains a tariff upon imports into the Islands in which the rate on unstemmed wrapper tobacco is fixed at $1.85 per pound, it follows that the manufacturer of Manila cigars may employ Sumatra wrappers on his product and ship it to this country with an advantage of about 50 cents per thousand cigars as compared with the producer in the Continental United States. Our Washington representative, at the instance of our Legislative Committee, has brought this situation to the attention of the Department of Commerce and negotiations are already on foot to bring uniformity in the duty on wrapper tobacco both in the Islands and in this country.

Standardization of Cigar Leaf Tobacco

The Bureau of Agricultural Economics (formerly the Bureau of Markets, etc.) has continued to prosecute during the past year the difficult and important task of providing standards for leaf tobacco. The work has been under the direction of Mr. Frank B. Wilkinson, whose interesting demonstration of the proposed system as applied to cigar leaf tobacco was a feature of our last convention, and who, I am pleased to announce, will address us briefly on this occasion.

More definite steps have been taken during the last year than ever before in the standardization work, but as yet standards have not officially been promulgated for any class of tobacco. The most definite progress has been made with regard to chewing, smoking, and cigarette types, and you will be interested to learn that tentative standards for seven important classes or types have been worked out by the department in cooperation with trade organizations. These classes which constitute about 63 per cent of the American production of leaf tobacco, are: Flue-cured, Sun-cured, Onesucker, Green River, Eastern Dark-fired, Western Dark-fired, and Henderson Dark-fired. The grades as worked out have been used extensively in these classes during the last year, and apparently have given satisfaction, as they are being accepted generally by the trade interested in these classes of tobacco.

In a communication recently made to me by Mr. Wilkinson, the general scope and plan of the department's project and the progress made are set forth in part as follows:

"This plan was tentatively determined upon by the department after several years of investigational work in all classes and types of tobacco. The plan is suitable for any class of tobacco, including the several classes of cigar leaf tobacco to which the plan is particularly applicable. Very briefly, the general frame work of the plan is to treat the grading of each particular class of tobacco strictly on its own merits with respect to four important and independent factors, namely, group, quality, color, and length.

"In establishing a set of grades for a particular class of tobacco under the plan, the first step to be taken is to divide the tobacco into groups (or families) of similar qualities as the particular class of tobacco may justify. For example, wrappers, binders, and fillers, may constitute three of the principal group divisions. Each of these groups is then divided according to quality, for example, in case of the wrapper group we may have wrappers, choice, good, medium, and

ommon, or binders, choice, good, medium, ad common, etc. The group and quality f tors considered together constitute the ncipal basis of each grade, but to this added the factors of color and length, pectively. For each of these last two tors will be established a uniform ndard applicable to all classes of to co. The proposed standard tobacco es which were indorsed last year by National Cigar Leaf Tobacco Associ on at Atlantic City, have met with the roval of the trade generally, and it sthe plan of the department to make se sizes the official standard sizes of United States, to be used as the rth factor in the grade system.

In order to avoid the use of rather y names in order to designate the dard grades when established, the rtment is contemplating the use of rs and numbers to represent the four ors. In each set of grades that has prepared, letters have been used to gnate the particular group to which rade belongs, numbers to designate quality factor, and letters to desig the color factor, while the length or has been designated by numbers lustrated at your convention in At c City by charts showing the numer designation of the sizes. To illus the simplicity of this system in nating a particular grade of tobacco, ose we assume that:

'he wrapper group will be desig l by the letter 'A,'
'he binder group will be designated ne letter 'B,' and
'he filler group will be designated by etter 'C.'

'he trade will very readily associate etters A, B, and C with wrappers, rs, and fillers, respectively. Then ose we designate the best or most e quality of each of these groups as he second quality as '2,' the third ty as '3,' and so on for as many ies as may be deemed necessary to for each group. The 'A-1' would to the trade the best quality of ber ;'B-1' the best quality of binder; C-1' the best quality of filler for a tular class of tobacco. Likewise B-2, and C-2 would indicate the l quality of wrappers, binders, and respectively, and A-3, B-3, and ould indicate the third quality, and for as many qualities as it may be d necessary for the particular class acco.

the group and quality factors have determined upon as illustrated, it nly be necessary to add the color ngth factors in order to complete ade. Now, in adopting the letters present the colors of a particular suppose, for example, 'L' was used signate a light color; 'D' a dark 'B' a brown color; 'R' a red color, on as the particular class of to may justify. Then a particular may be designated as A-1-L, which indicate a wrapper of the best in a light color, or grade A-1-D, would indicate a wrapper of the uality in a dark color. If we add the length factor, the first one of grades may read, for example, 17. We would then interpret this mark to represent a wrapper of t quality in a light color with the meeting the requirements of stand e 17."

bers of the Association will recall the time of our last annual con the department was installing a ory in Washington for making ex nts and preserving tobacco samples nection with the standardization I am glad to say that suitable r this laboratory was secured and lete atmospheric conditioning ap has been installed for the pur controlling the temperature and y of the storage rooms at all The bureau has also collected a mber of samples representing the classes and grades of tobacco d in the United States with the t that within a very short time a e of samples will be in place. very interesting experiments are ng conducted in this laboratory. these experiments is to determine t of different atmospheric condi on various types and qualities of and some exceedingly significant have already been obtained show marked differences in the reac tions of certain types when exposed to peculiar atmospheric conditions. In these tests valuable data have been obtained concerning the relative degrees of temperature and humidity that will protect tobacco from mold or damage.

The cigar leaf trade will be especially interested in a series of experiments conducted with a view to developing a method for preserving the color of leaf tobacco in connection with the bureau's plan to establish standards for tobacco color. You will readily appreciate the advantage it would be to the trade if a method could be discovered for preserving the color in tobacco so that the standards when established can be illustrated by samples.

The bureau hopes to give special attention to cigar leaf work during the coming year, and I bespeak for Mr. Wilkinson and his associates your hearty co-operation.

Attacks on Tobacco

It is perhaps significant that the professional assailants of tobacco—and these constitute the backbone of this misguided movement—have made absolutely no progress during the past year in imposing restrictions on the use of tobacco through Federal legislation. Not only have no antagonistic measures passed either House of Congress, but the crop of original bills directed against the use of tobacco, which at one time was large enough to cause considerable anxiety in the trade, has dwindled to a negligible point.

We should not, however, allow ourselves to relax in our vigilant watch upon the movements of these pseudo reformers. For many years a certain class of legislative agents have made a living by prosecuting these movements in Washington and in the several state capitals. They are sometimes temporarily discouraged by lack of success, but as soon as they are able to obtain sufficient funds from hysterical people whose prejudices are easily aroused they can be counted upon to return to the fray. This type of reformer, however, has become so well known at the National Capital that his influence is fast waning and can make but little headway in the face of the prestige of a commodity like tobacco, the production and manufacture of which furnish a livelihood to so many thousand people while the taxation of its products supplies the Federal Treasury with several hundred million dollars per annum.

Repeal of the Cantrill Law

Your association has for several years adopted resolutions urging Congress to repeal the so-called Cantrill Act under which quarterly reports of stocks of tobacco on hand are now compiled for the Census Bureau. The urgency of a heavy docket of post-war legislation has heretofore prevented any progress looking to repeal, but it is believed that an opportunity to take this matter up will be afforded at the coming season of Congress in connection with the movement now on foot to effect economies by various consolidations and through the elimination of duplication of work.

The records of the Internal Revenue Bureau now afford the basis for quarterly bulletins of stocks to tobacco on hand which would be far more accurate than the reports issued by the Census Bureau. The Internal Revenue figures are supplied by dealers and manufacturers and the quarterly reports rendered to the Census Bureau are merely inaccurate duplications of the data furnished the Internal Revenue Bureau through the leaf dealers' monthly returns. There would seem to be an excuse for maintaining this system of duplicate returns, while on the other hand the elimination of the reports to the Census Bureau would result in the issuance by the Commissioner of Internal Revenue of reports that would have genuine value to the trade for statistical purposes.

Legislation Legalizing Price Maintenance

For more than ten years manufacturers and merchants in many lines of enterprise have knocked at the doors of Congress in vain seeking legislation that would legalize the maintenance of resale prices. To-day, however, the outlook for the enactment of a well balanced law permitting agreements to be made be-

tween manufacturers and dealers for the maintenance of prices is exceedingly bright. Not only has Congress become aroused to the importance of this legislation, but some of the most influential members of the administration have joined in the crusade and are preparing to cooperate heartily with the business men of the country.

The outstanding fact in connection with this demand for legislation is the character and present extent of the abuse which is sought to be corrected. Never in the forty years in which I have closely observed the proceedings of Congress have I noted such evidences of the earnestness of business men, both great and small, in an effort to secure remedial legislation. Without regard to locality or class of products involved the price cutters appear to have been running amuck until legitimate merchants have become convinced that there is no help for the situation short of comprehensive legislation by the Federal Congress.

The court decisions rendered during the past eighteen months have clearly emphasized the necessity for legislative relief. In the earlier cases the United States Supreme Court repeatedly advanced the proposition that a manufacturer or merchant might refuse to sell his goods for any reason or for no reason, and these decisions were universally accepted as authority for the refusal to sell to price cutters. In later decisions, however, the court so modified its earlier opinions as to deprive manufacturers and merchants of all practical means of enforcing their abstract rights. Thus, while it now appears that a manufacturer may refuse to sell to a price cutter, yet if he maintains a system by which he can inform himself as to the particular dealers who cut prices, and if pursuant to information thus gathered he systematically refuses to sell, he is held to be guilty of restraint of trade. Obviously nothing but a legislative enactment by Congress can meet this situation.

There have within recent months been three important developments in the price maintenance campaign. First and foremost, Secretary Hoover, the energetic and efficient head of the Department of Commerce, has espoused the cause of price maintenance which he believes to be an essential item in an effective code of business ethics. Second, a new price maintenance bill has been introduced in the House of Representatives by Representative Schuyler Merritt, of Connecticut, an influential member of the House Committee on Interstate and Foreign Commerce, which has jurisdiction of this important question. This bill resembles the so-called Stephens-Kelly measure which has been pending for several years, but it does not contain the provision, objectionable in many quarters, which brings under the jurisdiction of the Federal Trade Commission all manufacturers who adopt a policy of maintaining their resale prices. Third, Representative M. Clyde Kelly, of Pennsylvania, the present sponsor of the Stephens-Kelly bill, has obtained from Chairman Winslow, of the House Committee on Interstate and Foreign Commerce, a definite pledge that the pending price maintenance measures will be called up in his committee soon after the meeting of the new Congress next December, and made the subject of early deliberation and prompt action.

I assume that at this convention you will again adopt resolutions favoring this legislation. I hope, however, that you will not attempt to differentiate between the pending bills, but will endorse the principle underlying them, leaving it to the wisdom of the House Committee to determine the exact form which the legislation shall take.

Washington Service

An earnest effort has been made during the past year to render the service of the Washington bureau of special value to members of the association. Every important step in the progress in Congress of the Fordney-McCumber tariff bill was promptly bulletined to our members and they were thus enabled to cooperate in a most timely and intelligent fashion with our Legislative Committee. Our specially prepared crop reports, Census bulletins, and other current matter have also been appreciated by our membership, judging by the letters of acknowledgement received at the Washington office during the year. Passpo have been procured for members de ing to go abroad and on several oc sions through the expediting of appli tions for passports members have b enabled to offset their own delayed tion and to sail by steamers which oth wise they would have missed. The p tion of our association in Washing has never been stronger than it is to-d

Conclusion

In bringing this report to a clos take occasion to express my deep ap ciation of the confidence reposed in and the co-operation extended to during the past year by all the officers the association, and especially by P ident Mendelsohn and Chairman Cull of our Legislative Committee. I wish to record my thanks to the rank file of our membership for the pro and vigorous assistance accorded me every occasion when it has been ne sary to call upon them for help. splendid response always given is best evidence that the National C Leaf Tobacco Association is a live ganization of efficient, broad-minded ever ready to give unstintingly of t time and means to advance the com welfare. It is therefore in a gen spirit of gratitude to you for your h fulness that I congratulate you upon celebration of our Silver Jubilee.—W LIAM L. CROUNSE, Washington Re sentative.

New York, June 4, 1923.

Vice-president A. W. Kaercher read, "A Backward Glance at Twe five Years' Work of the National C Leaf Tobacco Association," as follo

Quarter Century's Wor Reviewed

"By their fruits ye shall know the

What has the National Cigar Leaf bacco Association done for the indu it represents during the quarter tury of its active life? To answer question is to sketch the financial economic history of our Nation twenty-five years, so closely have activities of this Association been i woven with those of Congress and executive departments in the effort have made to protect and promote bacco growers, packers, distribu manufacturers, and dealers. The e chain, from the tiller of the soil t individual retailer, have been the ficiaries of the work done by this sociation which has not limited it forts to those matters of special to the leaf trade, but has gener co-operated with every movement the protection or betterment of th dustry at large.

The "Starvation Ruling"

The National Cigar Leaf Tobacc sociation was brought into being b important trade crisis. It sprang existence almost over night to pr an agency through which to res narrow and shortsighted decision o Commissioner of Internal Revenue k throughout the length and breadt the land as the "starvation ruling." decision forbade the sale of leaf to by dealers in other than original ages, deprived many leaf dealers of at that time was a very importan lucrative portion of their business had it been enforced, it would closed up thousands of small cigar tories. A delegation of veterans trade promptly went to Washi sought a hearing before the Co sioner of Internal Revenue, and by senting forceful arguments in vig fashion induced him to rescind th astrous ruling. Leaf dealers and manufacturers throughout the c expressed their appreciation of th vice thus rendered and the rapid g of our Association in membersh influence during the first years existence was largely due to the done in rescinding the "starvatio ing" which was followed by an i iton from the Commissioner of In Revenue to lay before him at any complaints or suggestions affectin welfare of our industry. Thus was established an era of cordial tions between our industry and the ernment which throughout the twenty-five years has existed unn

by a single rupture, although it has frequently been necessary for the representatives of our Association to protest rigorously against proposed official measures and to insist upon important changes in departmental policies.

Individual Warehouse Records

While still but a year old it became necessary for the Association to oppose a ruling of the International Revenue Bureau requiring registration as leaf dealers and the keeping of complete sets of books at every warehouse regardless of the number that might be maintained by an individual leaf-dealing concern. For several months the bureau resisted our appeals, but so energetic were the efforts made and so hearty the co-operation of our members in the movement that the order was finally rescinded and license fees, which had been paid in many instances, were returned to our members.

Notwithstanding the rescinding of this order which took place in September, 1899, a similar ruling was promulgated in 1907, but soon thereafter was withdrawn in deference to a vigorous protest voiced by our organization.

Throughout the first decade of the life of the Association its officers were almost continuously busy in conferences with officials of the Internal Revenue Bureau in perfecting the form of the Government books and rules relative thereto. There was much lack of uniformity and each Collector of Internal Revenue was a law unto himself, but through the efforts made by the Association the practice in all districts was speedily standardized and books of record were provided of so satisfactory a character that with slight amendments they have remained in use to the present day. These important reforms added greatly to the prestige of the Association throughout the leaf trade and brought a considerable accessions to our ranks.

Larger Appropriations for Department of Agriculture

In January, 1901 the Association obtained its first recognition in Congress when the House Committee on Appropriations granted a hearing to our officers in support of an urgent appeal for an increased appropriation for and the elevation of the Division of Soils to the dignity of a bureau. With the money thus obtained many valuable soil surveys and other projects in cooperation with our trade were undertaken to the substantial benefit of the cigar leaf industry and all dependent thereon.

This episode produced a strong impression upon both Congress and the Department of Agriculture and the policy of liberality in the treatment of those agencies of the Government working in cooperation with our industry was then adopted, which since has resulted in the establishment with Government assistance of the modern cigar leaf growing projects of Connecticut and Florida.

A Uniform Bankruptcy Law

Having thus made a place for itself among the great trade associations of the country our cooperation was sought in connection with several important financial and commercial matters pending in Congress, and we were largely instrumental in securing amendments to the Federal bankruptcy act which have been of benefit not only to all our members, but to the trade at large.

Free Trade with Cuba Opposed

One of the most important undertakings of this Association, the success of which prevented the annihilation of the American cigar industry, was the campaign which directly followed the Spanish-American War, in which we resisted the efforts of certain interests, substantially aided by our own Government, to force free trade with the Island of Cuba. It is needless to attempt to paint the disaster that would have overtaken our industry if Cuban tobacco and cigars had been admitted to the United States free of duty. Under our leadership the entire trade joined in a solid phalanx in opposition to the free-trade movement and later in resisting an attempt to cut the duties on tobacco and cigars 50 per cent of the existing rates. So stubborn was the opposition thus developed that the movement to reduce the duties on these commodities was abandoned for the time being, and it was not until our industry had had ample time to adjust itself to the proposed change that a compromise was finally reached on the basis of the 20 per cent reciprocity reduction which has since been in force.

In this connection the prediction made by our representatives at the hearing on this legislation that the proposed reciprocity arrangement would redound chiefly to the benefit of the Island of Cuba rather than to the people of this country has been fully justified. What the results would have been had the free trade or 50 per cent reduction plan been put into force can best be left to the imagination.

Protecting Integrity of Cuban Tobacco

Our Association has consistently favored laws and regulations to preserve the integrity of the Cuban tobacco crop. During the period immediately following the Spanish-American War, when the Island of Cuba was largely under the control of the United States, officials of our Association were largely instrumental in defeating a project which contemplated the shipment to Cuba of Porto Rican tobacco which undoubtedly would have been reexported either in the form of leaf or manufactured cigars as a Cuban product. Consumers of cigars the world over have recognized the obligation due to those who assisted in preserving the integrity of Cuban leaf tobacco.

Imports from the Philippines

Following the Spanish War problem of trade with the Philippines again forced us to face an issue of great importance to our industry. Again we were obliged to oppose a proposition to admit free of duty large quantities of tropically grown tobacco and cigars manufactured with cheap but skillful foreign labor. As the result of our opposition the importation of Philippine tobacco and cigars was restricted to narrow limits for nearly a decade. The growth of importations since free trade was finally established has justified our gravest apprehensions and we are today confronted with the necessity of reopening this important issue for the protection of the low priced cigar produced in the continental United States.

It will be noted that in both the Cuban and Philippine tariff campaigns our Association, although composed primarily of leaf dealers, waged a stubbornly contested battle in the interest of the cigar manufacturers and the cigar leaf growers of the entire United States.

The Cigar Import Stamp

A picturesque episode in which we championed the cause of the American-made cigar against the foreign article occurred when our Association was but seven years old. At that time the box containing imported cigars was rendered highly conspicuous in the retailers' showcase by a wide white stamp completely encircling it. Believing that our own Government ought not to place a "patent of excellence" on any piece of imported merchandise, we appealed to the Treasury Department to substitute a smaller and less conspicuous stamp that would not be so apt to mislead the uninformed smoker as to the quality of the goods offered him. The Treasury officials were decidedly reluctant to yield the point, whereupon President Bijur, accompanied by our Washington representative and a delegation of our members called upon President Roosevelt, who in characteristically vigorous fashion, cross-examined his callers sharply and at once issued an edict providing for the use of a small import stamp on the bottom of the box. This victory won for our Association thousands of expressions of approval from the entire cigar industry and added greatly to the prestige of the organization.

Increased Taxes on Cigars

A typical illustration of the influence exerted by this Association and an excellent example of its service to the trade may be cited in the case of an attempt made in July, 1909, when the House of Representatives at the instance of

the Ways and Means Committee, decided to increase the Internal Revenue tax on cigars from $3 to $3.60 per thousand. This action was taken late in the afternoon of July 3. The following day was a holiday, but the Finance Committee had decided to call up the bill on that day and act upon the cigar tax. With the use of the long distance telephone our Washington representative summoned a delegation of the most influential members of our industry, who promptly sacrificed their holiday, made a night journey to Washington during the peak of a heat wave, and presented so vigorous a protest to the Finance Committee that the 60-cent increase in tax was promptly abandoned. Few of our members would recall this incident unless reminded of its graphic details, and yet throughout the twenty-five years of its existence this Association has maintained a constant vigil at Washington and has been able in every emergency to summon to the Capital men of such ability and force of character that almost invariably signal victories have been won.

Lower Insurance Rates

In the three years from 1910 to 1913 an important committee of the Association under the leadership of the late Mr. Dolbeer, conducted a crusade for more favorable insurance rates. The tobacco trade had long been discriminated against by the underwriters and it became necessary to take this matter up in a broad and comprehensive way. Mr. Dolbeer proved indefatigable, and with the assistance of his strong committee was finally able to obtain for leaf dealers a schedule of rates that represented important savings to all our members. Our insurance committee thus earned the gratitude of our entire rank and file and that of many members of the trade who had not contributed to the support of our organization.

The Hybrid Tobacco Seed Menace

For several years prior to 1914 the agricultural experimental stations of the country, with the best intentions but without adequate technical knowledge, had sought to interest tobacco growing farmers in numerous varieties of tobacco seed to be grown for experimental purposes. The result of these activities was the production of considerable quantities of hybrid tobacco for which there was absolutely no market, the Government having overlooked the fact that cigar manufacturers can not be interested in small quantities of leaf tobacco of unknown quality and characteristics, but for their own protection must confine their purchases to standard types of which an adequate supply may always be counted upon. At our Atlantic City convention in 1914 we adopted a series of strong resolutions urging the Government to abandon this enterprise, and after a few conferences with the officials of the Department of Agriculture the wisdom of our contentions was conceded and no further efforts in the direction referred to were made. Throughout this episode the department met us in the same friendly spirit of cooperation it has always shown.

Important Tariff Campaigns

Since the formation of this association, Congress has enacted three tariff laws. The first, in 1909, known as the Payne-Aldrich law, which succeeded the Dingley tariff of 1897, the second in 1913, known as the Underwood-Simmons law, and the third, in 1922, still fresh in our minds, designated as the Fordney-McCumber act. Campaigns ranging in length from six months to two years preceded the final enactment of these laws. In all of them the National Cigar Leaf Tobacco Association has taken the initiative, has borne the brunt of battle, and has won sweeping victories. Ours has been the task of assembling facts and figures, preparing briefs, and providing witnesses to appear before the Ways and Means and Finance Committees and representatives to follow up our arguments with appropriate and timely reminders and to summon our Legislative Committee to Washington in the numerous crises that have arisen from time to time. As a result of these efforts during the past fourteen years we have maintained a tobacco schedule with comparatively few fluctuations; we have obtained a more logical definition of what constitutes a wrapper, and we have secured an important and most beneficial increase in the percentage limit as applied to mixed bales. More than a score of times during the three big tariff battles we have been called upon to fight when the outlook has become dark and discouraging with an almost certain prospect of defeat through the adoption of ruinous changes in rates, but in every instance the members of the association have rallied to the call of its officers and representations have been made in Washington so impressive that official plans spelling nothing short of disaster have been finally abandoned.

Creation of Tariff Commission

No trade is in greater danger of being made the victim of blundering legislation in connection with any revision of the tariff than that engaged in the handling of leaf tobacco. This consideration moved this association to give its unqualified support to the movement which resulted in the creation of a non-partisan tariff commission whose chief function is to gather reliable information to be used as the basis of any investigation of the tariff or customs laws that may be attempted. The legislation favored by us was enacted by Congress several years ago, and in connection with our successful efforts to obtain a satisfactory tobacco schedule in the Fordney-McCumber tariff law we had the cooperation and material assistance of this important agency. The assistance rendered by our association in supplying reliable data to the commission has been gratefully acknowledged by its officials.

Defeat of Ad Valorem Duty on Tobacco

A salient illustration of the value of the association is to be found in the successful campaign waged by us in 1919 to prevent the adoption of an additional customs duty on leaf tobacco of 10 per cent ad valorem. This was a part of the pending program of war emergency legislation and if enacted into law would have played havoc with the entire cigar industry. The imposition of an ad valorem surtax pyramided upon the specific taxes on leaf tobacco already in force not to mention the innovation of a graduated tax on cigars, but recently enacted would have spelled ruin. By unremitting efforts we were able to convince the officials of the tariff commission that the proposed legislation would work the gravest injury, and with their cooperation the Ways and Means and Finance Committees were induced to abandon the project.

Campaign for Free Zones

Realizing the great advantages that would accrue to the tobacco industry from the enactment of a law creating free zones at several of our most important ports, we have labored systematically in behalf of the measures presented in Congress for this purpose. During the last session of the Sixty-seventh Congress this movement resulted in a favorable report by the Senate Committee on Commerce upon a well balanced bill, and while this measure did not pass, the pressure in its behalf was very strong and will again be exercised in the new Congress. The entire tobacco industry has now become keenly alive to the benefitc it would derive from free zones in which foreign merchandise could be examined, cleaned, and repacked, and into which domestic raw materials could be sent to be used in conjunction with foreign materials in the manufacture of goods for export.

Revision of Special Taxes on Manufacturers

In 1917 the association rendered the trade great service in securing the revision of the schedule of special taxes levied upon manufacturers of cigars by the so-called emergency war revenue act. This schedule imposed a restriction upon the output of the industry amounting to a veritable restraint of trade, bore most inequitably upon manufacturers and unquestionably deprived the Government of a considerable amount of revenue. In response to our vigorous representations the leaders of the Ways and Means Committee recast the entire schedule

MILLIONS OF CIGAR PACKS

ROCHESTER, N. Y.

which resulted not only in the substitution of a logical scale for the arbitrary classification formerly in use, but also in an actual reduction in the average rate of tax paid by cigar manufacturers, who were thus saved a large sum annually, a notable achievement in view of the strenuous efforts which were then being made by Congress to secure more revenue.

Co-operation with Sumatra Importers

The influence of the association and its ability to carry through great projects for the benefit of the entire industry were graphically shown when the war first interrupted the free movement of Sumatra and Java tobacco from the islands of their production to Holland and thence to the United States. In attending the last inscription before the interruption caused by the war a large delegation of our members was obliged to rely wholly upon our active efforts in Washington to facilitate the handling of their cablegrams and letters, and even the movements of the ships upon which they took passage. In several important crises the intervention of our representative at Washington saved serious embarrassment and much loss of valuable time. The arrival of our members in time for the opening inscription was rendered possible solely as the result of action taken by the State Department at our request in bringing about the release of the steamer *Nieuw Amsterdam*, when detained at Falmouth by the British.

Direct Importations of Wrapper Tobacco

No member of our trade, and certainly no one engaged in the cigar industry, can ever forget the services rendered by our association in connection with the direct importation from Sumatra and Java of substantial quantities of wrapper leaf during the most critical period of the war. In a single season wrappers for two and one-quarter billion cigars were thus secured and the cigar industry was enabled to avert a serious crisis that threatened to force radical wrapper changes that would, no doubt, have been followed by the most disastrous consequences. To bring about these direct importations required the most difficult and delicate negotiations at Washington involving foreign exchange, the lifting of censorship on cablegrams, the use of the official diplomatic pouches for the transportation of letters, and finally, the procurement of cargo space through the intervention of the United States Shipping Board and the agency of the War Industries Board. While the greatest credit is due the enterprising men who conceived and financed this undertaking, it is certain that it never could have been carried through successfully without the assistance rendered by the association the co-operation of which gave the enterprise a national character that commanded the respect and confidence of our Government.

No Restriction on Tobacco Production

Throughout the war our association was ever on the alert to oppose any movement looking to the restriction of the production of tobacco. On many occasions such restriction was proposed in Congress and in the various agencies created to meet the war emergency. The essential character of our product, however, was constantly urged upon the authorities by our representative and soon came to be recognized as on a par with food itself. The great part played by tobacco in sustaining the morale of the Army during the most trying periods was finally recognized by Congress and the departments and thus ill-advised attempts to restrict the operations of growers, dealers, and manufacturers were effectively opposed and ultimately defeated.

Readjustment of War Taxation

In the readjustment of war taxation our association has borne an active part especially in the movement for the repeal of the excess profits tax. This tax had a peculiarly depressing effect upon our industry and justified the strenuous efforts made to bring about its elimination. In this campaign and in all other movements that have been undertaken by legitimate business interests to substitute scientific taxation for the hit-and-miss devices employed in the war emergency, our association has borne its full share.

Waging War on Coupon Evil

The Association took the lead in several campaigns in Congress to correct the coupon evil and in cooperation with the Independent Tobacco Manufacturers' Association succeeded in advancing important measures of a restrictive or prohibitive character. This movement was pushed vigorously by our officers until, as the result of a decision upon a statute of the State of Washington, it was made clear that the abuse could best be curbed by State rather than Federal legislation. Appeal having been taken from the courts of the State of Washington to the United States Supreme Court, this association made a substantial contribution to the defense of the statute, the integrity of which was finally affirmed by the highest legal tribunal in the land. Under existing law, therefore, it is competent for each State to restrict or forbid the use of coupons in accordance with the sentiment prevailing among its citizens.

Campaign for Price Maintenance

For the past eight years the association has taken a leading part in the campaign to curb the predatory price-cutter by federal legislation. In 1915 a well-considered bill was brought forward in Congress by Representative Stevens, of New Hampshire, a lawyer of ability, who afterwards served as counsel of the Federal Trade Commission. This bill granted to manufacturers of identified merchandise, including trade-marked, patented, or copyrighted goods, the right to fix the price at which their products should be sold at wholesale or retail. Public sentiment in favor of this bill grew rapidly from the day of its introduction, but for several years it encountered the opposition of the chairman of the House Committee on Interstate and Foreign Commerce, to which it was referred and its sponsors were unable to secure its consideration. The reorganization of the House of Representatives and its committees has recently provided an opportunity for taking the bill up under very favorable auspices and our association is again assuming an active part in the effort to secure the passage of this much needed legislation. If the association had done nothing but champion this great reform it would have earned the gratitude not only of every branch of the tobacco industry, but of all business men engaged in manufacturing or merchandising throughout the country.

Revision of Leaf Tobacco Regulations

No incident in the life of the association has more clearly illustrated the high standing of the organization in Washington than the recent comprehensive revision of the Internal Revenue regulations relating to leaf tobacco. In former times it was the practice of the bureau to formulate its regulations in secret and to promulgate them without consulting the industries affected. In the framing of this code for the handling of leaf tobacco, however, the bureau invited out officers and Washington representative to cooperate in the work and for nearly a year the various drafts of the regulations were the subject of numerous extended conferences, from which finally a highly satisfactory code was evolved. It may safely be said that the experience of the bureau officials in this connection has convinced them that it is to the interest of the Government, as well as that of the industry, that this policy should always be pursued under similar circumstances.

Movement for Lower Freight Rates

In no department of activity has the work of our association been more beneficial to the entire trade than in the matter of resisting proposed increases in freight rates on tobacco and of securing more advantageous classification or lower rates. In 1915 and 1916, and again in 1922, we won important victories which have resulted in substantial savings not only to our own members, but to the entire leaf tobacco trade. In 1916 especially we successfully opposed an advance in the rates on tobacco at a time when the railroads were being conceded a substantial increase on practically all commodities. A case before the Interstate Commerce Commission was prepared by Mr. Charles N. Kincaid, chair-

Wisconsin Deliveries Continue to Drag Along

Dot "Horizon Like Burrs on Dog's Tail"—Probably More Descriptive Than Elegant—Grading Backward Draws "Growls" from Growers—Black Rot in Southern Binders.

EDGERTON, Wis., June 2.—A few desultory deliveries from the pool still hang on to the horizon like burrs on a dog's tail. This may be more descriptive than elegant. The stemming deliveries were to be all cleaned up two or three weeks ago, supposedly, but those who refused to deliver, and others involved in the many technical and routine mistakes of the pool's main office, continue to furnish quite a number of scattered delivery dates for the big stemmers.

A considerable number of farmers are being found who signed up with the pool, and who have never heard from it since—their crops were not even sampled. Some few furtively tell how they sold it away from the pool as a consequence, after joyously coming to the conclusion that the records of their signing had become lost at pool headquarters, or in transit thereto. Most of them however, have patiently waited to the last for a delivery.

Regrading Backward

Also, about a million and a quarter pounds of grades D one and D two (16 and 13 cent), have been regraded back into stemming, and this has furnished several deliveries not looked for. The pool ordered in 25,000 pounds of stemming at one point last week, and over 80,000 pounds came in. Other pooled neighbors came in also, when they heard of a delivery, fearing they were among the forgotten ones. Also, all deliveries now are replete with telephone calls to pool headquarters on crops whose standings are unknown. The pool's policy is to "shoot" them in to the buyer regardless of grade, when the farmer brings in one of the lost crops, apparently.

Many crops delivered as stemming lately were previously weighed up by the co-op in the shed as D one and D two assorting grades, and the ethical advance paid the grower upon it according to those grades. Now it is being ordered in at 11 cents, and the stemmers are refusing to accede the pool's request to pay shed weights on it. The average shrinkage is about six per cent difference between shed weight and receiving weight. This is causing the usual amount of "growls."

Big Discrepancy Likely

From a high pool official, I have it that the shed weights on all the pools assorting will be the marked weights. As this was weighed up in the shed during March and April, and much of it will be assorted in July and perhaps August, it will be a delicate task to come out with anything but an enormous discrepancy between the marked and actual weights.

Also, that the table rags will "go in the shrinkage." The percentage of rags is apt to be very high because of the string warped and burised leaves on the outside of the bundle, particularly on the late assorting. Also, that the pool is bulking all their binders once. The bulks are not turned at all, but the idea is to allow them to heat up well in the one bulking and to let it go at that. This is to insure the pool against damage. It is the sensible thing for the co-op to emphasize precaution against any fermentation damage, even at the expense of the leaf's "finish," should that be necessary, as it is easy to imagine the embarrassment that any great amount of damage would cause the pool in their first packing. It shows the capable manner the pool officials are struggling against the big odds, the labor shortage, inadequate funds, and a woeful lack of warehousing facilities are putting them up against.

Seem to Doubt Wisdom of Suing Members

The co-op is making arrangements to mail its laws and articles of incorporation to all its members. The pool *Bulletin* states that although the pool members are in favor of suing its contract breakers, the pool officials are in doubt as to whether, or not, any action will be taken.

Rain is needed badly for the new crop. The weather is hot and dry. The heat was late in arriving, but it is hot enough for a salamander now. The plant beds are coming along nicely, but a rain is needed to keep them going.

Independents Getting Better Prices

Bekkedal and Jefferson are buying up independent assorting in the South. Lorillard and the other big stemmers are gobbling up the independent stemming at top prices. Eleven cents straight is the prevailing stemming price for independents. Perhaps three cents higher net than the co-op grower is getting.

Some black rot is showing up in the southern binders. The quantity of Wisconsin '22 binders is not going to be large. Not much southern has been put in cases, and the northern binders available will swamp no market.—BADGER.

Louis Hirsch Dies Suddenly

Louis Hirsch, of 265 Central Park West, who had been in the tobacco business in this city for twenty years, died suddenly in his office at 17 Battery place, Monday evening. He was 45 years of age. Although he had not been in robust health for some time, his death caused a great shock and surprise to his relatives and many friends. Besides the bereaved widow, he leaves two children, Charles 12, and Eleanor, 14 years of age. Funeral services, private, to be conducted today, Thursday.

A Three-Day Co-op Campaign

SHELBYVILLE, Tenn., June 2.—A three day series of meetings of tobacco growers, business men and bankers to hear the co-operative plan of marketing burley tobacco explained, ended here today with a meeting at the courthouse, J. Sherman Porter, of Lexington, Ky., editor of the *Burley Tobacco Grower,* being the principal speaker. Mr. Porter spoke at Gallatin Thursday and at Columbia Friday and was heard with interest by Tennessee growers and business men at all three points.

Told How to Handle Insect Pests

A. C. Morgan, entomologist of th United States department of agricultur told the growers how to handle inse pests which attack tobacco and at Colum bia, Assistant Commissioner of Agricu ture V. A. Bradley, who is himself grower of dark tobacco, gave the co-o erative plan of marketing unreserved a proval.

District Director W. Y. Allen, of Ga latin, who is president of the First an People's bank of that city, also spok briefly at each of the meetings, declarin that the participation receipts of the Bu ley co-operative were a first-class co lateral at his bank for loans and woul be received as such whether the growe happened to be a customer of his ban or a resident of his county or not.

Amsterdam Prices Agai Rule High

AMSTERDAM, Holland, June 2.—At ye terday's Sumatra inscription, America grades again ruled high. Nevertheles more than 3,000 bales were purchased f the United States market. The princip American buyers were:

H. Duys & Co., 1,400 bales, includin Senembah My/B K/2; S. & R./B/De /2; Deli Ba My/B/3; O K/ Deli/B/2 OK/Deli/D M/3; Senembah My/S/4 Deli My/Arnhemia/3; Deli My/S an various other marks. The House Duys has purchased to date 9,400 bal of the Sumatra crop.

General Cigar Co., 625 bales.

E. Rosenwald & Bro., 510 bales, em bracing Senembah My/S/ Langkat /2 4; Deli Ba My/T L/4 and Deli My/H/.

American Cigar Co., 204 bales.

Manus, Muller & Co., 143 bales.

American Malaya Trading Co., 7 bales of Deli Batavia My/ Tandem.

Joseph Holzman, 50 bales.

W. J. Schloss Killed by Lightning

Walter J. Schloss, formerly of th city, was struck by lightning and instan ly killed while playing golf at Mou Carmel, Pa., on Sunday. Mr. Schlo was 36 years old and was in the cig business in Mount Carmel. He was graduate of Harvard University, class 07, and a member of the Harvard Clu of New York.

Mapacuba Cigars Extend Greetings to Uncle Jo

Citizens from all over the United States, including many Senators and Representatives, were present at Danville, Ill., at the recent anniversary of Uncle Joe Cannon's 87th birthday. Danville is Uncle Joe's home town, and the great day was known as "Uncle Joe Cannon's Day," which was quite appropriate.

The accompanying photograph shows a typical Mapacuba window display in one of Leseure Bros.' retail stores, with the window painted, "Greetings, Uncle Joe, from Mapacuba Cigars." This windo was one of several hundred painte throughout the city the same way. L seure Bros. are the biggest cigar jobbe in Danville, and possess a number splendid retail stores in the city and su rounding territory.

The picture also shows Lou Leseur and Charles Steffen, the latter being th genial representative of Bayuk Bros., on of the biggest and best-known cigar cor cerns in the country.

On Investigating Tour

WASHINGTON, June 6.—T. L. Hughes, obacco expert of the Department of Commerce, will leave Washington on une 10 for Kentucky, where he will o into the Burley and Dark Fire-fired istricts to do some investigative work n connection with the tobacco survey hich the department is making. Fol-owing his work in Kentucky, Mr. lughes will go to Asheville, N. C., here he will attend the convention of ie Tobacco Association of the United tates on June 28, 29 and 30.—LAMM.

Cigarettes for Far East

Nine general cargo steamers last month aded tobacco at Norfolk, Va., for China, am and Japan. More than 500,000,000 garettes in 10,860 cases were loaded on ssels for China, while 800 cases went Siam. Figures do not include other nufactured tobacco products shipped m Norfolk during May.—*Wall Street ournal.*

Patterson Expansion

Patterson Brothers Tobacco Corpora-n has secured the assets, brands and chinery of the Fifth Avenue Tobacco . and has removed all the material to new factory at 667 First avenue, New rk, where it is to begin manufacturing mediately.

The Fifth Avenue Tobacco Co. will ng out the Regina Maria cigarettes, ginally manufactured exclusively for een Marie of Roumania, the Fifth enue Egyptian cigarettes, and Count valoff cigarettes of Russian type.

Obtains More Cigar Stands

Faber, Coe & Gregg, the enterprising orters and distributors of high-grade irs, of 36 W. 37th Street, New York, e recently secured concessions to op-e cigar stands at the William Penn Fort Pitt Hotels, Pitsburgh, and in Pittsburgh Chamber of Commerce.

Progressive Western Offices

Arthur Bornholdt & Co., Inc., import-of Sumatra tobacco, of Amsterdam, iscati, Nes., and 139 Front Street, w York, have established offices in m 416, 186 North La Salle Street, icago, for their Western representa-Alfred W. Penner. Mr. Penner has rge clientele in the Middle West, and ooking some big orders for his or-zation.

Asa Lemlein Joins Klorfein

Asa Lemlein favorably known for many years with the E. H. Gato Cigar Co., has joined Julius Klorfein as sales manager for his Garcia Grande cigars.

Off to Europe

Percival S. Hill, president of the American Tobacco Co., sailed for Southhampton on the White Star liner *Majestic* last Saturday.

To Review Cuban Conditions

Arthur J. Kraussman, leaf dealer, of 11 Cliff Street, New York, is scheduled to sail for Cuba next Saturday, to review conditions on the island.

From Pearl to Front

Pedro Costa, Porto Rican tobacco dealer and packer, is removing from 130 Pearl Street to 162 Front Street on July 1 next.

The Third T. M. A. Convention

Commenting on the Third T. M. A. convention, Charles Dushkind, managing director, says, in part:

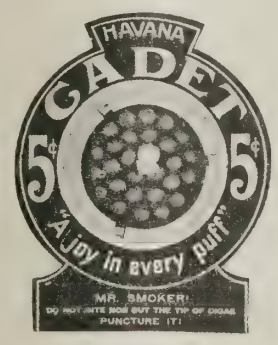
"The convention has very properly been pronounced all around as vastly exceeding in genuine importance any other convention ever held in the history of the tobacco industry. It was a revelation of the solidarity of our industry and the spirit of co-operation and mutual helpfulness was unmistakably manifested in all its proceedings and through all its sessions.

"As a social function the convention has concededly surpassed every other affair ever held by the tobacco industry, while as regards its business accomplishments, it has undoubtedly laid the ground work for the betterment and improvement of industrial conditions which must necessarily inure to the lasting benefit of every branch of our industry.

"To those who believe that any or all chronic, deep-rooted and long existing evils or ailments that any industry is suffering from can be readily eradicated by merely holding a trade meeting, this convention, as every other convention that ever was or ever will be held, must be disappointing.

"But to those who realize that the most that the best managed convention can ever accomplish is to create a spirit of co-operation and mutual helpfulness; to interchange divergent views and thoughts in respect to the problems of common interest, and to resolutely decide each for himself, and all of them together, to make real and whole-hearted efforts to eradicate or at least minimize the industrial ills or evils from which the industry is suffering, and to bring about such improvements as the best interest of the industry may require, this convention cannot but be regarded as a most successful and most promising event.

The Outstanding Problems



"The two most outstanding problems dealt with at the convention were the Cigar Problem and the Jobbing Problem.

"While the former is of particular interest to the cigar business and the cigar leaf tobacco trade, the latter is a problem that concerns every branch of the tobacco industry. For, obviously, the question of adequate distribution of the finished product, whether cigars, cigarettes, or tobacco, among the 500,000 or more retailers, is a question that necessarily concerns every branch of the industry.

"Both of these problems were most seriously considered at the respective Group Meetings of the Cigar Trade and the jobbing Trade, and conclusions have been reached which, if persistently carried out, as it is hoped they will be carried out, will undoubtedly lead to vast improvements in both branches of the industry.

"At the Cigar Meeting the consensus

A COMING EVENT

Annual convention of the Tobacco Association of the United States, at the Grove Park Inn, Asheville, N. C., June 28, 29 and 30.

PREPARE PROPERLY FOR PIPE WEEK

To a man, a pipe is a comforting and dependable companion. In the depths of adversity or at the peak of good fortune, a true smoker doesn't disregard his pipe. To many, pipes are indispensible. To no other fabricated articles do men become so fondly attached. On land or sea, wherever he may be, one is made happier, his contentment increases, he is better satisfied, if he has a pipe and a supply of desirable tobacco. Whether he is our President or an untutored Indian, a pipe smoker can obtain appeasement and joy denied to non-users of tobacco. Power to utilize thought, ability to plan, fortitude to defy pain, strength to endure, determination to conquer, may be developed by one whose pipe is lighted and drawing well. Utility of reflection is intensified by puffs from a favorite pipe. Fatigue is decreased, cares are less oppressive, disquietude is reduced, ills really don't seem to be so serious, distress is lightened, pain is alleviated, grief may be mitigated or trouble blown away when a smoker has his trusty pipe stem gripped between his teeth. It is easier to ward off disease or seek peace of mind, when fragrant tobacco burns in the bowl. On perpetual ice in the polar regions or in the sweltering heat of equatorial jungles, men retain the desire to smoke. Throughout all lands, in every clime, pipe smokers are found. Wherther white, red, yellow, brown or black, men of each race and nationality buy and appreciate pipes.

Here in America, pipe smoking goes back so far that no one can tell when the custom began. The existing evidence of the earliest civilization, the oldest known things made by human beings undoubtedly are the carved stone pipe bowls that show the ingenuity and artistic skill of the Mound Builders.

From whence came the mysterious people that preceded the Indians as inhabitants of the Ohio Valley? Whither they went, or why they vanished, who can say? Investigators have delved eagerly into the great mounds. Scientists have tried to trace the history of the departed race. But they had only the mounds on which to work. Whatever they found was contained in the mounds. Most beautiful and interesting of all the preserved achievements of the pre-historic tribes are the pipe bowls now displayed in numerous museums. Of the handiwork of man, in existence, nothing antedates the old pipe bowls. Of the antiquity of pipe smoking, the proof extends to most remote times.

To the popularity of pipe smoking, millions of people testify in the United States today.

From the White House at Washington to the sun-scorched camp of a weary prospector on the Mojave desert, nearly every place of abode has one or more pipe smokers. Pipes are prized by all sorts and conditions of men.

Tastes differ. Neither by his financiat standing, nor by his position in life, can be told exactly what kind of a pipe a man will prefer. A multi-millionaire may smoke a corncob or a schaum.

Though in other countries certain types and varieties of pipes are smoked to an extent that may make them distinctively national or peculiar to the locality, the United States is not restricted as to choice. Neither the shape, size, origin nor price will deter a buyer who has the money and happens to desire that particular pipe.

Whether manufactured in the United States, or imported, pipes in great profusion are offered to American smokers.

National Pipe Week, from June 23 to June 30, inclusive, will be an occasion for special pipe exhibits and sales all over the country. In many places, the displays of pipes will be associated with unusual benefit to the trade. For the profit of manufacturers and dealers, advantage should be taken of every opportunity to interest people in pipes.

As a preliminary to Pipe Week, each dealer should post himself concerning the pipes he sells. He should be in a position to speak informatively. To be most effective, salesmanship must have educational value. A salesman unable to explain just why this or that pipe is desirable, a clerk who can't tell what the prospective buyer wants to know about a pipe, will not be so successful as he might be during Pipe Week.

Not during Pipe Week only, but for 52 weeks each year, every man who attempts to sell pipes should manifest the enthusiasm that comes from knowledge.

The retail tobacconist should study pipes. About any good pipe there are many things to discover and admire. He who handles fine pipes is almost sure, rather soon, to develop a pronounced affection for them. To become well acquainted with pipe values, to be truly appreciative of what merit there is in a pipe, to be able to judge quality correctly, more than perfunctory application is required. It is a fascinating task to ascertain facts concerning pipes. It is desirable for retailers to know what most influences smokers in choosing pipes.

How many retailers really can speak authoritatively in discussing pipes?

Pertaining to pipes, there is a woeful lack of accurate information, although pipes are used so numerously and constantly.

Because most pipes are identified by brands or trade marks, because the reputations of the principal pipe manufacturers are strongly established, it is not possible for much deception to be practiced in selling pipes. Nor does the self-respecting retailer resort to unfair procedure in making pipe sales.

He may get his money's worth beyond question, yet usually the pipe buyer fails to receive all that might be given to him advantageously.

If he isn't told by the dealer, if he doesn't know the things that cause a pipe to be more appreciated, he is the loser because he doesn't obtain that which would induce him to regard his pipe more affectionately.

As a man's intimate companion, a pipe will be most beneficent and satisfactory if treated right.

Not every smoker knows how to get the greatest good out of a pipe. How to color a pipe, how a pipe should be seasoned, how to derive the most enjoyment from a pipe, a lot of smokers have yet to learn.

To cram the bowl full of tobacco, to light up and commence to puff, is not enough. Regarding pipe smoking, good counsel from the retailer would be accepted gratefully by the average pipe buyer. Manufacturers, by supplying dealers with adequate material for a pr pipe talk, might co-operate in giving inst tion.

Pipe quality isn't differentiated entirely price. Nor is one type or style of pipe equ appealing to all smokers.

Let Pipe Week be associated with the tribution of information and instructions.

Though pipes are made of precious and c mon metals, ivory, bone, shells, stone, m schaum, corn cobs, bamboo and woods too merous to mention, it may be said that making commercially is restricted chiefly three materials.

For pipe bowls, the three materials rega as best are clay, meerschaum and briar.

The preferred clay, both red and white, o desired quality, is found in only a few plac

Meerschaum is a foam light silicate of m nesia obtained mostly in Asia Minor.

Briar, so-called, comes from the roots species of white heather, known botanicall Erica Arborea.

The briar or bruyere grows in Sout France, in the Spanish Pyrennes, in Corsic Italy and Algeria.

Of the making of pipe bowls, either from meerschaum or briar, it would take a w book to tell all the details.

Amber, bakelite, redmanol and vulca principally are used in making mouthpiece pipes.

Amber is fossil rosin. It comes from resinous exudations of pine trees that gre the North German coast ages ago. By a vulsion of Nature the pine forests were merged in the Baltic Sea. The action of water, for centuries, causes the rosin to be hard and translucent. Raw amber is w more per ounce than pure silver.

Bakelite, sometimes known as synthetic ber, is named in honor of its inventor, D H. Baekland. Bakelite is defined as a cond tion product of phenols and formaldehy substance having high electrical and che resistance. Bakelite has the color and b of amber combined with greater strength.

Redmanol is a composition similar to t lite.

Vulcanite is rubber specially hardene vulcanized.

In the procuration of materials for pipe and mouthpieces, in the processes of man ture, in the making of pipes artistic by and ornamentation, the desire to excel is mount.

The success of the pipe maker depend the utility and excellence of his product.

The pipe manufacturer draws on th sources of science. To obtain results, he to use the best that experience and inge can suggest. He is engaged in constan search. Continually he tries to produce that will please and satisfy.

He would help himself, and pipe deale well, by telling the public more about Concerning pipes wonderfully interesting stories could be told.

During National Pipe Week, extended should be made to induce people to take g interest in pipes. By spreading inform attention may be concentrated. A great o tunity is presented. It is up to pipe man turers and dealers to utilize every adva now offered to them.

Feature pipe displays in the show wind every cigar store.

Put into good use every facility for incre trade.

Pipe up business.

IT WILL BEAR WATCHING

In this age of a general tendency to pr by legislative enactment the indulgence in thing and everything that contributes t pleasure of the individual, it would be f to predict the failure of any campaign, o is gotten under organized headway, direc

h suppression of any "evil" which self-consti-ed regulators of their neighbors' personal its deem inimical to their health and morals. rthis connection, the crusade to suppress the s of tobacco, which has found support in legis-on by some of the States, will bear watching. ven so, however, taking the country as a ble, it has not made much of a dent in the mand for "smokes." The increase in the out-of cigarettes by American manufacturers ing the first three months of 1923 was noth-short of phenomenal.

espite this showing, however, as to the wth of the habit, smokers would do well not ndulge the delusion that a check may not be upon such indulgence; the uplifters are ping on their trail.—*Richmond (Va.) Times-Dispatch.*

THE UNIVERSAL WEED

he tobacco price war which has been brought n the British market by the incorporation irginia tobacco grown in British Africa may he forerunner of sharp competition in other kets of the world between the tobacco pro-ng countries. A roster of these countries ld include nearly everyone on the face of globe; tobacco is cultivated as far north as bec and Stockholm and as far south as the e of Good Hope and Victoria. It is grown ountries widely differing in climate and soil, as Cuba and Germany, Sumatra and nce.

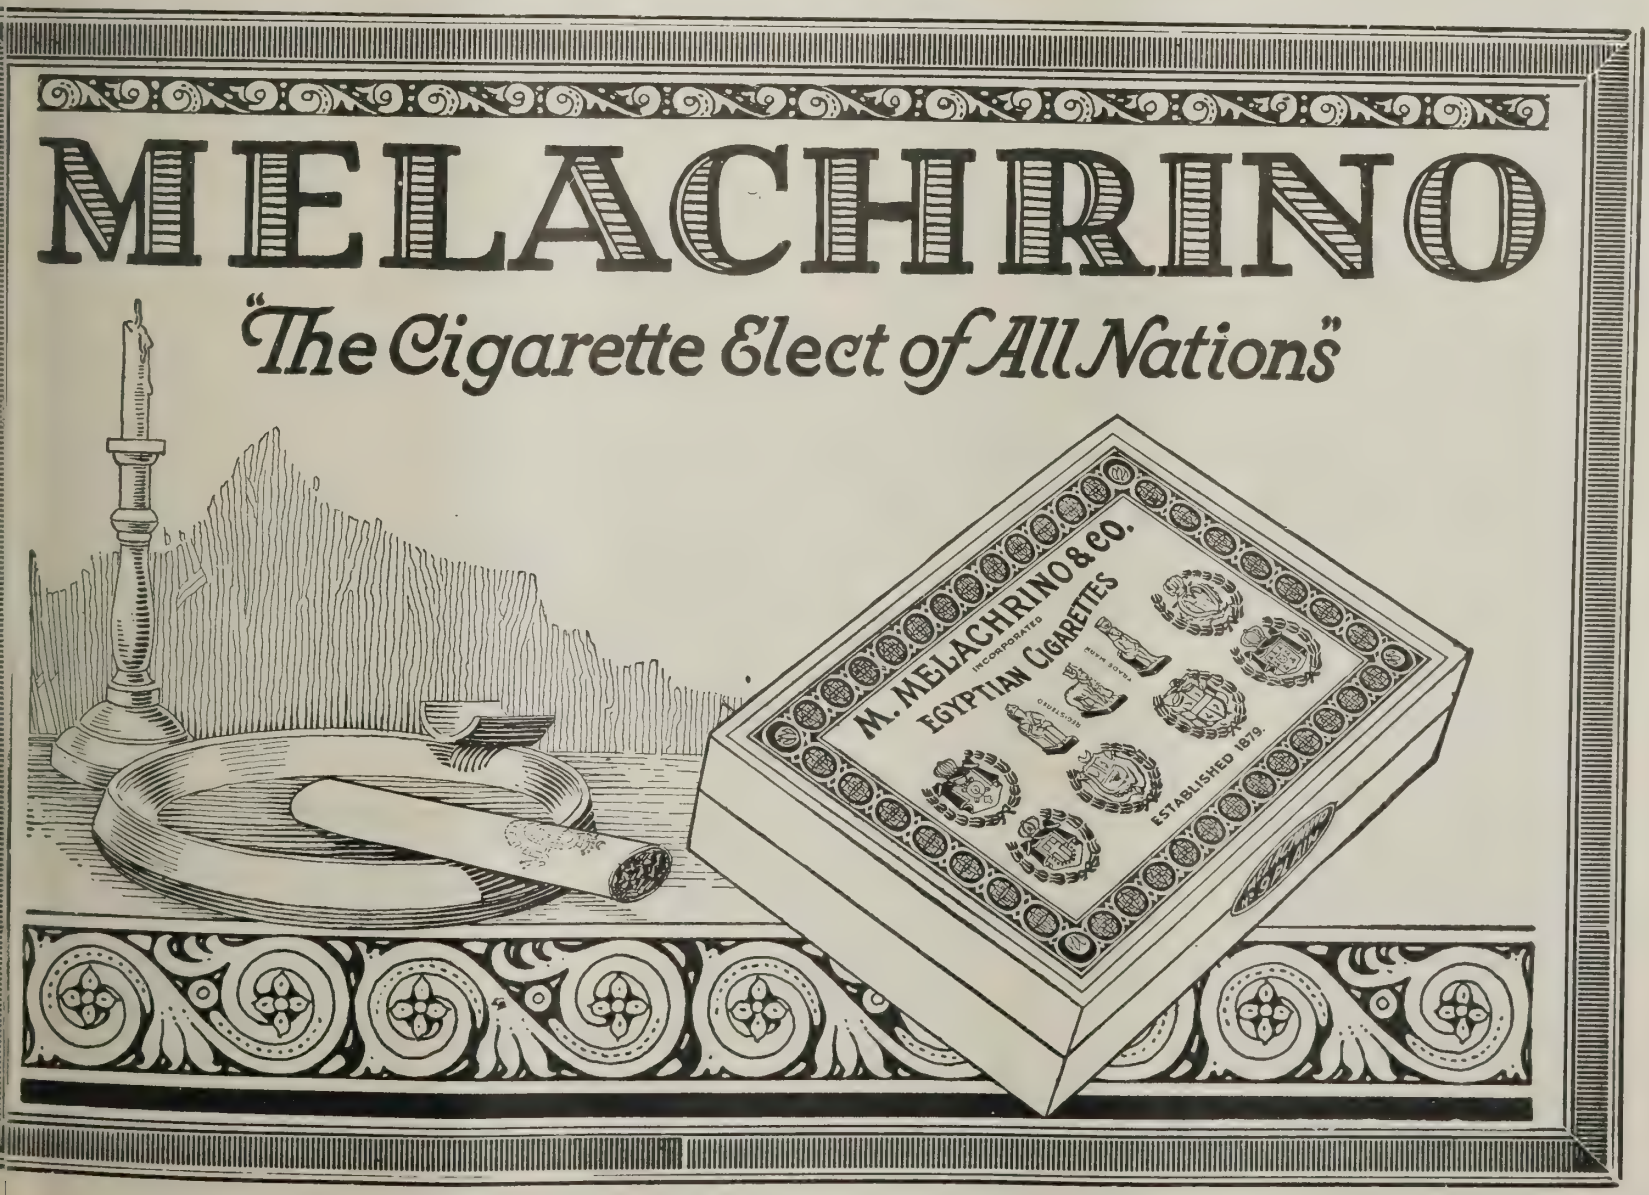
he adaptability of the tobacco plant, native is continent but transplanted in every other the sixteenth century, is likely to be the e of the competition for world markets. e tobacco can be produced than consumed, with a gradual increase in per capita con-tion in most countries. The tobacco grow-f this country found out that it was possible roduce too much tobacco in 1920 when they produced two hundred million pounds more than in 1919 and received two hundred million dollars less for their crop than the year before. The result of this was that the 1922 yield was almost half a billion pounds less than that of 1921, the money yield to the pound rising.

It remains true, of course, that certain regions still retain a natural monopoly of the soil and climate that produce the tobacco best fitted for particular purposes. Whatever the spread of tobacco cultivation, there is little likelihood of North Carolina losing its supremacy in the cultivation of cigarette tobacco or of Sumatra and Havana tobacco being less in demand by discriminating tobacco smokers.

The danger to those regions where good tobacco grows naturally is that in other parts of the world, where soil and climate are not quite so favorable but where labor is cheaper, resort to artificial flavors will be had and a disguised and rectified tobacco be thrown into the market at a price lower than can be met by other tobacco growers.—*New York Herald.*

THE TOBACCO CROP

Recently the Tobacco Merchants' Association held a convention at Washington, before which Secretary Hoover made an address on the importance of the crop. It is true that this crop does not receive the attention given wheat and cotton in the market reports, yet it is a crop of national and international interest.



It is of international importance because the smokers of the world look to the United States for no small part of their supply. There is no other country in the world that produces as much tobacco as the United States and its exports now amount to about $225,000,000 a year. The two leading nations of Europe take as much tobacco from the United States that we might feel that British and French affairs are in a measure influenced by this crop. How, for instance, could the new British premier shape the policies of the empire without his pipe filled with American tobacco.

Back of the smokers and manufacturers are the little considered producers. Tobacco is grown in 42 states, and one county in Connecticut leads all others in the value of its crop.

One of the officials of the association before referred to takes the stand that manufacturers should be more interested in seeing the planters organized for their benefit than in trying to get leaf tobacco as cheaply as possible. This is thinking of the business in terms of national economy and not private greed. Enlightened men are beginning to see that business is not a contest where one man struggles to get as much from the other for as little as possible. It is a hopeful augury for the tobacco producers when those in the manufacturing industry advocate such policies as this.—*Wall Street Journal.*

FOR THE PRESENT AT LEAST

The States of Kansas and Utah, where the anti-cigarette law flourishes, grow little or no tobacco. There may, or may not, be much connection between the two facts noted, but it is at least reasonably safe for Pennsylvanians addicted to the weed abjured by Little Robert Reed to comfort themselves with the thought that so long as the prosperous tobacco growers of Lancaster county continue to raise bumper crops the old Keystone State will be among the last to welcome the anti-smoke reformer. The Legislature has just voted that no prisoner in any of the State's penal institutions shall be deprived of his tobacco for a longer period than two weeks. Those of us who are on the outside of prison walls may take this as a guarantee that we may pursue our puffing of the pipe in peace, for the immediate present at least.—*Philadelphia Record.*

Some Official Changes in The Universal Leaf Co.

The Universal Leaf Tobacco Co., Inc., announces the election of W. A. Willingham as president effective at once, succeeding Thomas B. Yuille. Mr. Willingham joined the organization in 1909, and as vice-president has recently performed many of the functions that would ordinarily be discharged by the president. He has been widely known for many years as a successful leaf tobacco merchant. Mr. Yuille remains an active director and member of the Finance Committee of the Company.

Oscar C. Gregory, associated with the Company since 1916, succeeds Mr. Willingham as vice-president.

Dividends of 2 per cent on the Preferred and 3 per cent on the Common, were declared, payable to stockholders of record June 20, to be paid on or before July 2.

Foreign Exchange Rates

In the subjoined table the quotation on sterling represents dollars and decimals of a dollar; all others represent cents and decimals of a cent. Quotations preceded by the decimal mark indicate a price measured in fractions of a cent.

Parity of exchange is given as reported by the United States Mint, except in countries with a silver standard, where parity fluctuates with the price of silver.

The Convention

(*Continued from page* 15)

nof our Transportation Committee, he assistance of special counsel and -operation of our Washington rep- ative. After full consideration, the ission ordered the cancellation of oposed increase as applied to leaf o. At this writing the association osing increases not only in freight but in the rates of the parcel post .e express companies, and is render- e entire trade effective service.

Cuban Cigars by Parcel Post

mpt and vigorous action by the as- on has resulted more than once in moval of a menace that threatened ous consequences to the entire ci- ade and all allied interests. In nd on several subsequent occasions sure was brought forward in Con- permitting the importation of ci- y parcel post in any quantity up instead of in packages of not less .000 through the usual transporta- annels. This legislation was backed Havana cigar manufacturers, who to secure an entry into the mar- f the United States through the n of mail-order methods. The e also had the support of the Post- General of the United States, who ught to negotiate a parcel post and who desired to use this con- to the Cuban manufacturers as a ith which to obtain reciprocal ad- s in the treaty. The Secretary of asury also favored the legislation, ably because of representations y the Postmaster General con- the desirability of negotiating a ost treaty. Realizing the extent h such an arrangement would de- e the cigar market of the United this association vigorously op- his legislation and succeeded in ing its enactment.

Our Passport Service

ghout the period of the war an nt function of our Washington was the procurement of passports were necessary to enable our mem- visit foreign countries, including e Island of Cuba. On scores of s this service proved invaluable idual members. Because of the ous congestion of business in the bureau of the State Department, have been impossible through in- effort and without the prestige association to have obtained the of these passports in time to be of by our members. Our pass- port service has long constituted an important function of our activities at Washington and has been greatly appreciated by all our members.

Fighting for the Tobacco Industry

A large measure of credit is due the association for the failure of the organized campaigns against tobacco set on foot in recent years by so-called reformers, who, as a matter of fact, have found in this movement profitable employment because of the ease with which they have been able to secure financial support of hysterical people whose superficial minds render them easy victims to emotional appeals. Our association has been especially active at Washington in vigilantly following legislative developments to prevent the incorporation of restrictions upon the use of tobacco, and on several occasions during the war period was able to bring about the abandonment of projects hostile to our industry. We have also made substantial contributions to the financing of the protective movement in which the entire tobacco trade has co-operated, and it is a matter of general congratulation that the fanatical attacks upon tobacco have recently made little, if any, progress, and in some cases have suffered decided set-backs.

To Distribute Reports

It was moved and seconded that the reports should be printed and mailed to all members and cigar manufacturers.

In the absence of the chairman of the Credentials Committee, Secretary Waller read the report, which was adopted.

The Credit Situation

Leo Leventritt, chairman of the Resolutions Committee, delivered the following address on the vital subject of Credits:

It may seem somewhat presumptuous for me to attempt to talk to you on the credit situation, as I now see it, because of my very recent advent into our industry. The disadvantage under which I labor, however, may be somewhat tempered by certain advantages, namely: It is possible that I view this particular situation from a slightly different angle than those who have been in the industry all their lives, or at least for many years, giving me a perspective which is unhampered by tradition. I see certain salient faults which must be eradicated before a sound and uniform condition of prosperity can exist year in and year out. The keynotes of the unfortunate conditions as regards credits in the industry,

Havana Tobacco Market Remains in Quiet Sta

Hardly a Bale of Remedios or Vuelta Abajo to Be Had—V Few Stripping Plants Are Being Operated—Construct of New Warehouses Shows Progressive Spirit.

HAVANA, Cuba, May 31.—Our market continues quiet. In so far as Remedios and Vuelta Abajo tobaccos are concerned, there is hardly a bale or barrel of either for sale.

The stripping places are not working with the exception of Walter Sutter & Co., Hinsdale Smith, and a few others. Manuel A. Suarez & Co. have almost finished their new building in Figuras street. Probably they will also start stripping within a short time. Without any exaggeration this is the finest and most perfect tobacco warehouse on the Island. It is built of the very best material, and, in fact, there is absolutely nothing missing. Don Manuel and his very active brothers can be proud of it. The firm will also keep the old warehouse, which is almost opposite the new building, not only because they need it for their extensive business, but this being a dear old place to them, where all of them grew up and where they worked for so many years. Walter Sutter & Co. are working at their warehouses recently purchased, but owing to the immense space covered, it will be quite some time before they are completed.

No question about it, our tobacco people are getting the right start and show good judgment and the best intentions to modernize their business buildings.

New Company Formed

Don Ramon Alvarez, who had his warehouse formerly at Dragones street, has formed a new company with his two sons-in-law, Alfredo M. de Villa and Adá Bethencourt. It is called Compañia Tabacalera de Remedios, S. A., with headquarters at Remedios, Province of Santa Clara. The entire trade wishes Don Ramon and his partners good success, all of them being hard workers and agreeable people to deal with.

Some Packing Operations Started

Most of our almacenistas and packers are at present in the country, watching things closely. In Vuelta Abajo several packers have started operations, while most of them are waiting in order to give the tobacco enough "pile." The several lots of V. A. Hoja Semilla and Libra de Pie were disposed of right away at pretty fair prices. In the Remedios section several sales have been made at higher and higher prices, but so far only a few small lots have been received. It almost seemed that the packers, in order to buy or get some tobacco at all, made such enormously high offers with the intention to "defend" themselves later on when receiving the tobacco.

High Prices Surprise Everybody

The competition is so stiff, that not only people in the market, but the farmers themselves, were surprised, as they never dreamed of similar prices. When the driving of prices reached about the limit, some of the buyers refused to receive the tobacco immediately and after this many farmers when asked as to their pretensions, claimed that they were not ready to sell, as the tobacco needs pile still. No doubt the farmers have become suspicious themselves, doubting that they would ever get the price stipulated, and as the buyers are hol back lately, nothing can be said of or less "established prices" for bundles. Most of the packers reme the year 1920, and others 1907, an though there exists really a scarcit Havana tobacco, there is no reaso make things still harder for the expo and manufacturers, as they seem than likely to expose themselves to more than ever on goods now, if chased at such tremendous prices.

Remedios Show Fair Quality

As to the quality of the tobacco, Remedios crop shows a pretty good acter, with an abundance of heavy gr although not as developed as in no years. The packers calculate a pr tion of 40 per cent firsts and sec more or less; very few light grades more thirds, loose leaves and Botes large part of the loose leaves will be fit for stripping purposes. In V Abajo the crop shows about the character. A smaller proportion of and more Puntillas and Colas. Th bacco of both crops shows good qu and life.—GALLO.

Baltimore Market

Chicago's Wholesale Business Holds Up Well

Buying Has Been in Much Larger Volume Than at Corresponding Period Last Year—Retail Trade Lacking in Seasonable Weather—Now Have Better Prospects—More Cheer.

Chicago, June 2.—Wholesale trade olds up well, and buying has been in uch greater volume than at the correponding time last year; but retail busiess still lacks the stimulus of seasonble weather. May this year was the oldest on record. But now, prospects re much brighter. The larger dealers ontinue to buy liberally, but the smaller erchant has tightened up. Collections re running behind the early months of ie year, and wholesalers are watching redits very closely.

Cigar jobbing business is going well ith Faber, Coe & Gregg, Inc. This ouse features Muriel, Centrilla, New urrency, Stachelberg's Havana Straights nd Flor de Cuba, and has a large line f imported cigars. Chas. J. Killoran local representative.

Full page ads of Bull Durham smoking obacco are appearing almost every day the Chicago newspapers.

The Wm. J. Seidenberg Corp. has laced the S. V. P. Havana Blunts with ie Wickham Cigar Co., of Omaha.

Credit Men Meet

Over 30 members of the Chicago redit Men's Association "Cigar and Tobacco Division" attended the dinner meetng recently at the Hamilton Club. Sevral new faces were seen. Among them ping Ben Berger, of the Trans-Pacific rading Co.; Carl Sanders, of Sanders Watson Cigar Co.; Max Silverberg, Julius Fernbach & Co., and Dave rocker, of the Crocker-Asher Cigar Co. on Sebastian cigars were served rough the kindness of Grommes & lson.

Optimo Between

Ben Straus, showing some new sizes Optimo cigars, spent several days here. he very latest from the Santaella facry is the Optimo Between size, a classy tle short smoke packed in tins to retail 5 cents.

The new 10-cent cabinet size of lackstone cigars has been placed by ttlinger Bros.

E. P. Oakes is in Kansas City this eek for the E. H. Gato Cigar Co.

Lew Meyers, of the Nathan Fox Co., cleaning up with Popper's Eighteenters made by E. Popper & Co., Inc., New York.

Tells 'Em Why

The La Palina newspaper campaign es ahead stronger than ever. Sam uley, president of the Congress Cigar o., tells the smokers in the ads. this eek that he smokes 10 La Palinas a y because they "are rich in aroma, l-flavored and yet mild."

Fred Suss landed here on both feet. attended a "night out" with some of boys, but after a short rest-up, he busy and booked some good orders S. H. Furgatch & Co. Fred is on swing of the Middle West.

Seidenberg Activities

The Wm. J. Seidenberg Corp. reports following firms taking on Panchoango, made in bond cigars, this week: ntral Drug Co. and E. C. Kinsel, of troit; Morris Weis Cigar Co. and F. Melaragno, of Cleveland. J. P. Brill and Herbert Baer are in Milwaukee; D. R. Johnson, in Racine; Frank Weidling, in Cleveland; Rudy F. Vogt, in Louisville, and Geo. Grant and General Manager Harry L. Harris, in Chicago. Virginia Lee and Pancho Arango are both duplicating fast these days. The S. P. V., all Havana Seconds, recently placed on the market, has sold so fast that the Chicago branch is already behind over 300,000 S. P. V.'s on repeat orders.

A Pipe Line

M. Linkman & Co., local pipe manufacturers at Fullerton and Racine avenues, are placing with much success their new Alco, Redemanol pipe that has an unbreakable screw stem connection. Alco sells at $1 and up.

The Sanders & Watson Cigar Co. is not overlooking any spots with the El Javana cigar. The house has placed this Java-wrapped cigar all over the city.

Ed Young, of Lincoln, Neb., has closed with the Wm. J. Seidenberg Corp. to distribute the long-filled Frat cigar for that territory.

Efforts Crowned with Success

Jack Rosenberg, of the Edwardo Gonzales Co., Tampa, is back at his Chicago headquarters, after a trip to St. Paul, Minneapolis and Duluth. Jack always does well on his road tours. He makes private labels for the trade and has a large following. His Gonzales Brand is handled by many Chicago dealers.

Advertised on the elevated platforms, is White Owl, Robert Bacon cigars; Bunny and Mail Pouch tobacco.

Busy Booking Orders

"Hoo-Hoo" Meyers, of Cuesta Rey & Co., has been doing splendid work here on the Cuesta Rey line for Ruhstrat-Christian Co. On a recent canvass of part of the southside he placed Cuesta Rey cigars with 55 new customers. Meyers is first assistant to Herb V. Mesick, the factory representative.

Busy at Both Ends of Line

Walter Woolfson, sales manager for the Ryan & Raphael Cigar Co., is in New York and is to cover Washington and Baltimore before his return. John Ryan, Jr., general manager, is very busy filling the orders that come in for Lucius, Cressida and Jonathan cigars.

Featuring Estrella Cigars

Displays of La Estrella, Java-wrapped cigars, from the E. H. Gato Cigar Co., are now shown. The large center piece sign is very attractive.

Calling Up

Ed. Wodiska, who came in last week, is still here "cleaning up." Ed sells the brands made by Gonzalez-Mendez, Inc., of Tampa.

"Up and Coming"

On the corner of a block in the downtown section is a restaurant with a flaming sign: "Never Closed." On another corner, a drug store displays its motto, "Open All Night." Between the two Wm. Ting Lung has his modest laundry. Not to be "out-done" by the

Yankees, he has hung out an electric sign that can be read for a block or more and it reads: "Me Wakee Too."

Going Some

George Bennett, one of the big stars on the Grommes & Elson sales force, is devoting all his time to the John Noble, two-for-fifteen-cent cigar. In the past four months, due to his efforts, John Noble cigars have been placed in 10,000 Chicago stores.

In Full Operation Again

Edw. J. Rauch, president of the Rauch Cigar Co., of Indianapolis, writes in and says, they have fully recovered from their recent loss by fire and that both of their Indiana factories are again working full force, turning out Lincoln Highway and other brands. Their sales force, which has been off the road for the past three months, due to the fire, is again traveling. Lincoln Highway is truly a cigar and is known "from coast to coast."

The Bailey-Wilkin Co., wholesale dealers of Detroit, have become the distributors in that territory for the Pancho Arango cigar.

Much Pleased

José Diaz, president of the Preferred Havana Tobacco Co., has been visiting the Chicago trade. Mr. Diaz is highly pleased over the sale of the Shrine cigar, which he makes for Maney-Blanc & Co. After a conference with Wm. Waldman, his sales manager here, Mr. Diaz left for the East.

Wm. J. Seidenberg is due to arrive Monday. He is making a "hurry up" trip to the Chicago branch on very important business concerning a new connection the Wm. J. Seidenberg Corp. has in view.

Geo. Schuell, buyer for Barkalow Bros., of Omaha and Kansas City, is scheduled to be one of our guests next week.

Sam Mosow, head of the Sioux Tobacco Co., jobbers of Sioux City, Iowa, gets in tomorrow.—H. L. H.

Third T. M. A. Convention

(*Continued from page 17*)

of opinion seemed to be unmistakably in favor of taking all needful steps to eliminate existing evils, and of inaugurating a co-operative advertising campaign to stimulate consumption and increase the business. A strong committee has been appointed for that purpose, and it is safe to assume that this committee will make every effort to carry out the expressed wishes of the convention.

"As regards the jobbing situation, th chief ailment in that branch of the indus try is ruinous price-cutting. This, c course, is a most difficult problem to dea with, for there seems to be no practicabl way under the existing law to maintai resale prices. It has, however, been hel by unquestionable authorities that, whi price-maintenance is unlawful, selling sta ple commodities of standard values fo less than the manufacturer's price plu their proportionate part of operating ex penses is equally unlawful, for it const tutes unfair competition, which is pro hibited by the Federal Trade Act.

"Accordingly, the jobbers, having m under the auspices of the National Whol sale Tobacconists' Committee, their ow national organization, have passed appr priate resolutions against such unfa methods of competition, which resolution are to be submitted to the Federal Trad Commission for approval, and which, approved and carried out, will go a lon way towards improving the existing de moralized conditions in the jobbing trad for, as stated by President Bloch in h opening address:

"'This may not supply a wholly ad quate remedy, but if the practice of usin the leading brands of cigars or cigarette as bait to stimulate other sales should b stopped, if the dealer, whether tobac man, grocer, druggist, or any other me chant, should be obliged to add operatin expenses to every brand of cigars, c garettes, or tobacco before fixing the sel ing price, the jobber will make his fa profit at least on the non-slaughtere brands and realize, at least, his operatin expense and overhead on the fightin brand.'

"If the tackling of these two serio problems were the only accomplishmen of this convention it would have inde quite sufficiently justified itself. But th achievements of this conclave were by n means limited to the cigar question or th jobbing question. All of the vital pro lems of our industry were thoroughly an intelligently discussed, considered, an dealt with.

"The far-reaching and beneficial effec of the interchange of thoughts and ide at such an assemblage can hardly be ove estimated.

"The very atmosphere of co-operatio friendship and good-fellowship that pe meated the entire gathering of approx mately 450 leading and representative t bacco men from all branches of the indu try is in itself an achievement that mu lead to incalculable and enduring benefi

"The convention was planned to be great 'get-together' movement, and it i deed was a great 'get-together' mov ment."

Tampa Tidings

Cigar Production

TAMPA, Fla., June 2.—Cigar production during May showed a gain of 20 per cent. over May, 1922, according to figures issued by C. H. Moyer, stamp deputy in charge local office of the internal revenue department. Production jumped from 35,201,420 in May, 1922, to 42,156,890 in May, 1923.

The figures follow, showing class, cash and number of cigars:

May, 1923

Class.	Cash.	Cigars.
A.....	$ 47,454.88	11,863,720
B.....	15,457.13	2,862,850
C.....	199,183.53	22,131,500
D.....	60,184.74	5,015,390
E.....	4,251.47	283,430
Total	$336,198.68	42,156,890
Fail	315,318.15	

May, 1922

A.....	$ 36,067.40	9,016,840
B.....	20,737.64	3,456,280

E.....	3,310.98	220,730
Total	$265,449.78	35,201,420

Dies Suddenly

A telegram from Chicago yesterday said: "Mrs. Eugene V. Lillienfeld, wife of prominent cigar manufacturer died early at a tavern in Evanston during a dancing party at which she was hostess. She collapsed while dancing as the gaiety was at its height and never regained consciousness. Guests took her to an Evanston hospital, where it was said she died almost instantly. Her husband is in Tampa on business.

"An autopsy disclosed that Mrs. Lillienfeld died of heart disease."

Mr. Lillienfeld received a telegram, early yesterday morning, stating that his wife was seriously ill and left at noon for home, but had not been apprised of her death at the time of his departure.

Mr. president of Jose Escalante & Co., cigar manufacturers of Tampa, and had been here about two weeks on a visit to the plant. He has many friends here who will sympathize with him in his bereavement.

Opens Office

H. Smidley, local representative of the J. DuBrul & Peters Mfg. Co., manufacturers of the Durex Quality Production at No. 708 Hugh St., Tampa, is prepared to demonstrate their bunch-making machines and do general repair work. J. E. Hammer, popular cigar salesman, stopped at the Hillsboro hotel yesterday. He makes his headquarters in Chicago. Mr. Hammer represents Marcelino Perez cigars, featuring the celebrated Tuval and Marcelino Perez brands.

Mr. Zuckerman and son, H. G. Zuckerman of Chicago, are visiting Tampa in the interest of their process for treating tobacco. This process it is claimed removes the burn and corrects any "off" flavor, leaving no sign of its use either in flavor or appearance, assuring a good cigar out of otherwise defective tobacco. Mr. Zuckerman carries numerous letters from many of the most prominent growers, dealers in leaf and manufacturers, testifying to its value in renovating tobacco as well as improving and assuring regularity of burn through an entire cigar. Mr. Zuckerman proposes to establish a service station in Tampa, and will personally conduct the treatment of the tobacco.

Plenty of Good Smokes

Cigar manufacturers of this city have provided the delegation of Tampa Shriners, leaving tonight on a special train for Washington, D. C., to attend the imperial council session there June 5, 6 and 7, with 15,000 cigars to distribute promiscuously when they reach the convention. With each cigar goes a little blue book containing facts about Tampa.

As a sample of the brand of cigars made in this city, thirty-two of the most prominent manufacturers have contributed twenty cigars each made under their personal supervision of the finest tobacco available into special sizes, packed into a beautiful mahogany box, capped with a silver plate with the inscription, "To President Harding from the City of Tampa."

Made for the President

WASHINGTON, D. C., June 4.—A cigar cabinet, of solid mahogany and bound with silver, containing the most costly and choicest collection of cigars ever assembled, will be presented to President Harding this week by Harry B. Roberts, one of the delegates to the Shrine Convention, on behalf of Egypt temple, of Tampa, Fla.

The cigars will represent the product of 40 of the leading cigar factories of Tampa. All of the Coronas have been carefully selected from the best of Havana tobacco.

The presentation of the cigars is expected to take place on the steps of the White House. In addition to Mr. Roberts, several members of Egypt temple will participate in the ceremony.—LAMM.

Key West Key Notes

KEY WEST, Fla., June 2.—The situation in the local factories continues unchanged. They are all working the same force as for the past month. Several have the same number at work today as were employed at the reopening of the factories at the New Year. Among those reported working are Mi Favorita, Cortez, E. H. Gato Co., Havana American, R. Lopez Trujillo, the John Wardlow, The Consolidated, and Locoval.

To Market a Five Center

Believing the outlook bright for the manufacture of cigars, Paul Albury has decided to operate a factory under the name of El Premio. Mr. Albury announces that he will cater to those who wish the old time five cent cigar. Toward this end he will place on the market his Hava-Nugget which is promised to be the best five cent cigar on the market. Mr. Albury is no novice in the manufacture of cigars, having been closely associated with the business for several years.

Cigar Production

Cigars numbering 49,396,675 were manufactured here during the past year, according to the report of Cuban Consul Domingo I. Milord, in his report to the Cuban government. On these cigars, the Internal Revenue department collected $4,064,426.92 for stamps placed on these cigars. In his report, Consul Milord announces that $38,236,766 worth of merchandise passed through the port of Key West during the past year. This includes both imports and exports.

First Key West Cigar Factory

The first report of merchandise exported and imported in Key West was recorded by the Customs department in

1831. The amount credited at that period for imports is given at $96,371. The exports for the same year are given at $30,495. There are no statistics prior to 1831. It was about this same time that the first cigar factory was started here, for in 1831 William H. Wall started the industry here. The first factory was operated by Mr. Wall. He employed fifty workmen, and imported his tobacco from Cuba and is recognized as one of the pioneers of the cigar trade.

Naval Store Closed

The Naval Cigar store, which for many years catered to the men of the navy, has closed. The manager, F. Carbonell, has retired from the business. The closing of this place will be keenly by the navy men, who found it eas slip through the navy yard gate, cross the street, where they would the tobacco that suited their taste "the makings."

Takes On Cigar Line

Roberts' Book Store has placed an tractive line of R. & C. cigars on play. This brand is well known popular with smokers here. Mr. erts, manager of the store, was at time associated with the well known factory of W. J. Lightbourn. G recommended by Mr. Roberts can b lied upon.

New Orleans Puzzled Over Production Outlo

Scarcity and Cost of Havana Leaf Causing Much Concer The Keeping Up of Cigar Production at Present Pri Presents Perplexing Problem—Trade Topics.

NEW ORLEANS, LA., June 2.—Advices received by M. Trelles & Co., from their supply house in Cuba, cannot but fail to give concern to makers of high-grade process of packing the 1922 leaf tobtacco crop of the Island discloses that it will be even shorter than that of 1921. There is not a bale of that crop on the market today. The same causes which contributed to the paucity of the sugar crop have brought about a lessening in the yield of tobacco, in spite of the fact that the acreage planted in tobacco in 1922 was greater than that planted in 1921. The prolonged drouth stunted the growth of the plant and reduced the crop to a point below all estimates. The indications, therefore, are that prices for Havana leaf tobacco will be excessively high and how this can be met and still confine the finished product to present prices, is a problem which has yet to be solved, if the demand for Havana fillers continues as great as it is today.

Old-Time Attractions

The many sporting bloods who stroll along Canal street have been flattening their noses against the windows of the store of Max Guiraud, who has on display in his cigar store two large pictures of the participants and spectators of the Sullivan-Ryan fight, at Mississippi City, February 7, 1882, and the Sullivan-Kilrain fight at Richburg, Miss., July 8, 1899, with the shoes and other paraphernalia of the principals. The paraphernalia and photographs are the property of the Young Men's Gymnastic Club of this city, and on both occasions referred to, Joh Sullivan was their guest, before after the fights. The Sullivan-K fight was the last fought in the U under London Prize Ring Rules.

Pleased with Demonstration

H. L. Bush, representing the I man Manufacturing Co., Philade makers of cigar machinery and now in New Orleans, reports himse highly pleased with the results of onstration given the cigar manufact in attendance at the Falk & Babin tory, where he has just installed of the firm's bunch machines. Mr. intends to return between July 15 a to install a number of other mac The La Faba, a product of the F Babin factory, is making great hea here. The factory has taken on additional outside representatives.

Satisfactory Sales

C. B. McClamroch, manager o New Orleans branch of the G Cigar Co., has left for Shreveport, Louisiana, and the western Arkans ritory, after several weeks spent the Gulf Coast. Mr. McClamroc fore leaving, reported that satisf results are being obtained with Owl and Wm. Penn cigars.

Herman Leiser, president of the American Cigar Mfg. Co., is to b sent from the city for several wee a tour of the Middle West.

Distributing Bailey Product

U. Koen & Co. have taken o

All "CHARLES DENBY" and "LA FENDRICH" cigars, strictly han made, are manufactured in this ONE factory, under ONE management— under ONE supervision thus always insuring that ONE dependable quality

H. FENDRICH (Incorporated)

Evansville, Ind. **Established 185**

Carolina Royal cigarettes and are making a good display of them in their retail cigar and cigarette establishments around the city. They have also taken on the distribution of Bambino tobacco, for Louisiana and Mississippi.

Gratified with Progress

The Southern Cigar factory of New Orleans is making gratifying progress in the outstanding parishes of Louisiana and her sister states. Big shipments of the factory's products have recently been made to Baton Rouge, Alexandria, Mobile and Pensacola.

Mr. Estes, the proprietor, finds that over 50 per cent of the orders received are for the higher grade of goods. Mr. Cassina, the factory's outside representative, is said to be doing very effective work.

Surveying Situation

T. H. Harrison and Mr. Reggio, of the New York office of the American Tobacco Co., were in the city during the week, looking over the field. They were numbered among the callers upon Mr. DeBen, of the Crescent Cigar & Tobacco Co.

Providing for Expansion

The three-story brick building at 701-705 South Peters street, has been bought for factory purposes by M. Trelles & Co., cigar manufacturers. The Trelles people will have to remain at their present headquarters in Tchoupitoulas street until October, 1924, when present leases on the building expire. Their present quarters have been found wholly inadequate to their business ever since acquiring a lease on the building which adjoins their quarters.

New Cigar Co.

The Havanola Cigar Co., Inc., R. B. Rogers, vice-president, has been launched in this city and has started operations. The new company has taken over a lease on property at Natchez and Magazine streets, which has yet two years to run. The new company is now functioning temporarily in the old Hernsheim quarters in Camp street, but will move into their new factory July 1. Mr. Rogers was formerly secretary-treasurer of the Hernsheim Co., which has just gone into liquidation. The Havanola Co. has acquired the Jackson Square, La Belle Creole, Sazarac, Powhattan and other brands formerly owned by the Hernsheim Co. E. D. Marshall, of Los Angeles, Cal., Manilla cigar broker, has taken on all the brands of the Havanola Cigar Co.

The "Odds-On" Toy for Grown-Ups

Guy R. Maloney, superintendent of police of New Orleans has been temporarily enjoined by the Zipp Novelty Co., of New York, from interfering in any way with salesmen and users of the "odds-on" device, a race horse top, working on similar lines as the "put-and-take" top. A number of retail cigar stores in this city, have been stopped from selling the "Odds-On" device or using it in any way, and have been charged with operating a "gambling game."

Manila Cigar Shipment

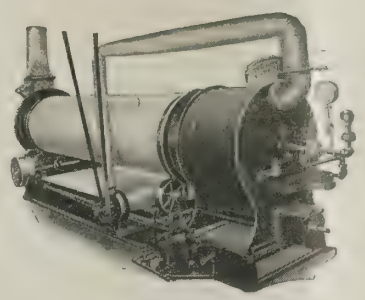
Five cases of cigars from the Philippine Islands were received in this city during the week via the Southern Pacific Railroad from San Francisco, consigned to W. J. Oberle, broker. They were valued at $1,500.—CRESCENT.

San Francisco Sees Things in More Normal Light

Tobacco Trade Emerging from Period of Magnifying Difficulties and Viewing Advantages Through Smoked Glasses —Business Growing Better with General Improvement.

SAN FRANCISCO, Cal., May 29.—There are times when, in every line of trade, the dealers seem to be inclined to look at all their difficulties through magnifying glasses, and all their advantages through glasses badly smoked; and the cigar and tobacco trade all around the San Francisco region seems to be emerging from such a period. Of course there is some reason for all these phases of feeling. Where there is so much smoke there must be some fire. Through the agricultural regions, the employment problem has been in large measure solved. Fine crops of hay and abundant crops of fruit with fair prices, are putting money again in circulation. Fresno, the center of the great raisin association, was feeling exceptionally blue at the prospects of the failure of the great association that had given the industry its life and the valley most of its wealth. But with the success of the reorganization, there are something like smiles coming up from the valley, and the smokes are again of the kind that make the cigar men happy.

Cigar Business Benefits by General Improvement



The Berkeley stands report that the trade seems to vary with employment conditions, and on the whole those conditions for the whole East-bay section have reached again very close to their maximum. Building records are continually boosting. The Doble steam automoblie factory has laid its cornerstone for a factory that is intended soon to represent a million-dollar investment. The Victor Phonograph Co. has also secured there the ground for its western record factory. These are a few of many. Visitors from the land of the Mormon report that the great steel trust of the West is going rapidly forward with the development of its ore beds and coal mines in the neighborhood of Provo, while in the outskirts of the city the great smelters are beginning to take shape. These smelters are to feed the steel mills of the bay region, of the Northwest and of Los Angeles. So with the back country again responding to the command of "forward march," and the San Francisco boosters' movement in full operation, it begins to appear as if the coming Summer is to be better than anticipated.

Favorable Reaction Reported

C. W. Montgomery, of the Golden State Leaf House, reports a favorable reaction in the Northwest. In many sections strike conditions are being overcome, and industrial conditions as well as crop conditions favor a speedy resumption of the progress of prosperity. So

Connecticut's 1923 Crop Getting Started on Way

Transplanting Machines Busy Everywhere—Fertilizer Companies Behind with Deliveries—A Few Stray Loads of 1922 Crop Going Into Warehouses—A Much Needed Rain Comes.

HARTFORD, June 4.—A drive through the country finds that growers have gotten well started with their work, and the plants in some of the fields show that they have taken root and are starting out on their 1923 "career." Tobacco transplanters were busy everywhere Saturday and hundreds of acres were set throughout the Valley.

Very little indications of new sheds being built this season, although it has been reported that in Glastonbury and Portland a few new sheds are to be built.

The work of hauling fertilizers is still progressing. Some manufacturers are behind on their orders yet, but are doing their very best to get the goods to the growers. One concern is now about 3,000 tons behind on deliveries. However, not many growers are anxious to get their tobacco out until later in the month, claiming that the best results are secured from tobacco set out after June 10, as usually, it does not ripen and have to be cut in "dog days," at which time the weather is very bad for pole sweat.

During the week a few stray loads of 1922 broadleaf were moved to the warehouse to be assorted and packed, and this work will continue a little while longer.

Workers on the farms are commanding high wages, and they are scarce at that. Everybody, even father, has to get out and hustle to get the work along. However, it is thought that the situation will be somewhat relieved when the schools and colleges close as many of the students will go out on the tobacco farms to work.

Within the last day or two several hundred colored students from Atlanta University, Clark University, and Moorehouse College of Atlanta, Ga., arrived in this city and have been transferred to various tobacco farms and plantations in this vicinity for work on the farms. Many of them, on arrival went direct to the Griffin Tobacco Co's plantation, Hartman's plantation and others. The arrival of these workers will relieve the labor shortage to some extent.

During the week there were several fires, the most serious one being the total destruction of the residence of Chas. Ward of Broad Brook, Conn., entailing a loss of about $20,000. The fire is supposed to have been caused by electric wires. When the firemen arrived, the house was so far gone that their efforts were turned to adjoining buildings which they succeeded in saving. Mr. Ward is a very successful Broadleaf grower and well known in tobacco circles, having been president of the tobacco growers association formed some years ago. The past season he was a chief supervisor for the assorting of Broadleaf in the northern districts of the Broadleaf belt. Mr. Ward is one of the best tobacco experts in this section and is a very successful grower. This summer he is to travel among the growers who figure to "fire" the 1923 crop and show them how to arrange their sheds for the "firing" to obtain the desired results.

Two bunk houses and a tobacco shed on Hatheway & Steane's plantation in West Suffield, Conn., was burned Monday, causing an estimated loss of $4,000, partly covered by insurance. The fire departments of West Suffield and Southwick used chemicals for two hours and succeeded in saving other nearby buildings.

A large tobacco shed belonging to the American Sumatra Tobacco Co., at its Weatogue plantation, was burned on Wednesday, causing a loss of about $5,000. The shed contained a large amount of tobacco. This fire is believed to have been caused from a grass fire started by a spark from a locomotive of the N. Y., N. H. & H. Railroad which spread to the building and was not discovered until it had gained too much headway to save the building.

More Craning of Necks

Decoration Day the people in the vicinity of this city were treated to a view of the "sky writing." The enterprising aviator went up in his machine to a great height, and by clever manipulations wrote in the sky "Lucky Strike." It is understood that each letter was about one mile in length.

It is too early to know accurately what the acreage of the 1923 crop will be, but from good estimates it appears now that there will be about 2,000 acres increase of shade this season and the acreage of Round Tip will practically be doubled, while the acreage of sun grown Broadleaf and Havana seed will not change very much, but it is thought that there will be a slight increase on Havana, the increase superseding Broadleaf.

The hail insurance proposition is now virtually assured, as practically all of the necessary acreage has been secured to

Tobacco Association of United States

RICHMOND, Va., June 2.—Announcement that the twenty-third annual convention of the Tobacco Association of the United States would be held at the Grove Park Inn, Asheville, N. C., June 28, 29 and 30, was officially made today by T. M. Carrington, president of the organization. Because of the numerous matters of importance scheduled to come before the meeting for consideration, President Carrington said the indications were that the convention would convene with the largest attendance in its history. The program is now being arranged and will include speakers prominent in the tobacco and business world, in addition to one or more tobacco specialists from the Bureau of Foreign and Domestic Commerce, Department of Commerce, Washington, D. C. Secretary of Commerce Hoover was forced to decline an invitation to address the convention because of his visit early this month to Alaska.

More General Representation

The representation at the convention this year will be more general than has been the case in years, delegations coming from all over the tobacco sections, including Kentucky and South Carolina. The Richmond delegation will entrain in a special car over the Southern Railway on the night of the 27th. Delegations from eastern North Carolina and the Danville, Va., sections are planning to proceed to the famous resort in motor cars.

Urges Early Hotel Reservations

Because of the probability that the Grove Park Inn will be well filled with tourist guests at the time, President Carrington urges that reservations for the convention be made without delay.

Membership, Officers and Governors

The membership of the Tobacco Association of the United States includes the representative men in the trade in the United States, and extends from New York to Georgia. Officers of the Association are: T. M. Carrington, Richmond, president; W. T. Reed, Richmond; W. T. Clark, Wilson, N. C.; E. J. O'Brien, Louisville, Ky., vice-presidents. Board of Governors, J. I. Miller, Richmond; G. O. Tuck, New York; E. B. Ficklen, Greenville, N. C.; E. V. Webb, Kinston, N. C.; W. G. Rogers, Warrenton, N. C.; J. M. Edmunds, Danville, Va.; C. W. Walters, South Boston, Va A. P. Thorpe, Rocky Mount, N. C.; V Z. Mitchell, Oxford, N. C.; H. Erskii Spillman, Huntington, West Va.; Jol L. Wingo, Richmond, Va.; E. C. Kirk patrick, Lexington, Ky.; L. H. Ree Richmond, Va.; W. L. McGill, Peter burg, Va.; S. W. Venable, Durham, C.; C. T. Patton, Darlington, S. C.; A. Clark, Bedford City, Va.; John Hodge, Henderson, Ky.; R. P. Watso Wilson, N. C.; A. B. Carrington, Da ville, Va.; Andrew Jamieson, Oxford, C.; G. S. Norfleet, Winston-Salem, C.; E. G. Currin, Richmond, and O. Gregory, Richmond.

North Carolina Crop Outloo

OXFORD, N. C., June 4.—We have report the following crop conditions:

There has been no rain within the pa two weeks, about 80 per cent of the cr is planted with a fair stand, some co plaint that plants are dying and the usu complaint regarding the cut worms. T northern part of Granville, bordering the Virginia line, has only about or half of the crop planted. Some are sorting to watering and planting to sa the plants, which are becoming ov grown in the beds. Rain is badly need throughout this entire section.

Next season Oxford will operate fo open warehouses. I. W. Mangum, f merly with the Co-operative Marketi Association, has leased the Mang warehouse for four years and will open for the sale of leaf tobacco at beginning of the season.—W. A. Ada Co.

Women's Auxiliaries

NEW CASTLE, Ky., June 4.—Miss Ve Elsinger, director of social service of Burley Tobacco Growers' Co-operat Association, spent several days the p week in this (Henry) county,, prepar for the organization of women's auxili ies of the Burley co-operative. Miss singer is being assisted in the work Director H. Kirby Bourne, leading law of this section of Kentucky and one the leaders in the organization of Burley co-operative.

Committees were appointed to arra for the organization of the auxiliaries various points in the county and a cou auxiliary will be formed after the p cints are organized. Another cour wide meeting will be held at the co house in New Castle June 17, at wh time it is expected the women will ready to form their county organizat

President Stone Reviews Burley Co-operative

Explains the New Marketing Situation from the Association Point of View to Tobacco Growers in the Buckeye State—Cautions Farmers Against Over Production.

GALLIPOLIS, Ohio, May 25.—Organization of the Burley tobacco growers of Ohio, Kentucky, Indiana, West Virginia and Tennessee has been responsible for adding between $45,000,000 and $50,000,000 to the amount that has been received by the farmers of these States within the past two years, James C. Stone, of Lexington, Ky., president of the Burley Tobacco Growers' Co-operative Association, said in an address here this afternoon.

Mr. Stone declared that the former fluctuating prices of Burley tobacco were due entirely to the system of marketing, by which, he said, the growers all rushed their tobacco to market at the same time in the year, without regard to market or financial conditions and with the inevitable result that, except during the years of the World War, the growers were compelled to accept whatever price was offered them for their product.

Speaking on the subject "The Truth About the Burley Tobacco Co-operative," Mr. Stone said that the co-operative marketing of Burley tobacco had wrought an almost miraculous transformation in most of the counties of the Burley district within the past two years. He contrasted present prosperous business conditions throughout the Burley belt with the situation of the farmers, merchants and bankers following the disastrous slump in the prices of the 1920 tobacco crop and asserted that the improvement in conditions was due almost entirely to the orderly marketing of the chief cash crop of the farmers of the Burley district.

Much to Be Told

"I am here," said Mr. Stone, "to tell you in detail what the Burley Tobacco Growers' Co-operative Association has accomplished in the first two years of its operation. There is so much to be told I may overlook something that some of you may be interested in, so when I have finished if any man or woman in this audience desires to ask any question about the operation I will answer it if I can, and if I cannot, I will say so frankly.

"Tobacco growers of Southern Ohio in 1921 raised a crop of approximately 8,000,000 pounds. The past year Southern Ohio produced close to 14,500,000 pounds of Burley tobacco, an increase of nearly 75 per cent. Gallia county, in 1921, produced 1,049,100 pounds and in 1922 increased that production to 1,330,000 pounds. This county and the adjoining counties, therefore, produce enough tobacco to become a factor in the Burley tobacco market situation of the district. Depending as you do upon a profitable return for your tobacco, you naturally will welcome any improvement in the marketing of your product which will assure to you that profitable return. You had no assurance of a profitable return under the old system, by which representatives of the manufacturers and speculators came to your farms and bought your tobacco, and your experiences over a period of twelve or fifteen years have conclusively proven that there was no stability about the loose leaf auction system of selling tobacco, although many growers believed the loose leaf auction system the best plan that had ever been devised for the selling of Burley tobacco, and I think myself it was the best plan until we had the opportunity to adopt the co-operative system of selling, which means simply the orderly marketing of our crops at prices based upon the cost of production and the law of supply and demand.

Selling Under Old System

"Under the old system, whether tobacco was sold in the loose leaf warehouse at auction, or in the barn to the buyers' representatives, it was sold at the buyers' prices and often without regard to what it cost the farmer to produce it. It was inevitable that under such conditions the growing of Burley tobacco should become unprofitable, and it is a fact that, except during the years of the World War, few farmers anywhere in the Burley district made money from their tobacco crops. A large farmer and banker of Madison county, Kentucky, told me that he had grown tobacco for forty years and that in all that time he had received prices that he regarded as profitable in but five years. Doubtless thousands of other tobacco growers have had the same experience.

"What you gentlemen are interested in, I take it, is the establishment of a system of marketing tobacco that will insure profitable prices year after year, not 6c a pound one year and 10c a pound the next, as in the old days, or 38½c a pound which was paid for the 1919 crop, and then 12c a pound which was paid for the 1920 crop, although it cost as much to grow the 1920 crop, if not more, than it did to grow that of 1919. What you want, I take it, and what all the farmers of the Burley district want, is a system by which you can have something to say about the price of your tobacco.

"The practice everywhere in this country, so far as I know, has been for the farmers to 'dump' their products upon the market as soon as harvested. This system applied not only to tobacco but to most of the farm products. I suppose that there are few persons in this room who have not observed how the price of wheat, for instance, would advance in the markets of the world within a few weeks after all of it was out of the farmer's hands. This happened regularly, year after year, and the consumer had to pay the cost of the increase

in the price of wheat, because the price of flour naturally followed that of the grain.

Marketing Under New System

"Under the co-operative system of marketing tobacco, or any other farm product, speculation is eliminated, or at least minimized. Individually the farmers of the country have never been able to finance their marketing. They could not hold their crops off a market which was not ready to receive them. Organized, and operating collectively, the farmers not only can finance their marketing but they can hold their crops until the markets are ready to receive them. Take, for instance, the case of the Kansas Wheat Growers. The past year they saved $2,000,000 in cash by holding their wheat for 60 days, and I think you will agree that that was a reward worth the effort. Working collectively, as an organization, the farmers were able to borrow money not only from the banks but from the Federal Reserve Bank and the War Finance Corporation to enable them to hold their crops until they could be marketed in an orderly and business-like manner.

"We had a similar experience soon after the organization of the Burley Tobacco Growers' Co-operative Association. We needed money to finance the handling of the 1921 crop. As the Association is a corporation not organized for profit and having no capital stock we had no money to begin business with, but the bankers of the Burley tobacco district, whose most profitable customers, after all, are the farmers, loaned us $4,500,000 to advance to our members when they delivered their tobacco. Judge Robert W. Bingham, the founder of our Association and the leader of this movement in the central states, loaned us a million dollars of his personal funds. Later, when we needed more money to assist in making the second payment to our growers, some of the local banks, together with the War Finance Corporation, loaned us what we needed. These loans enabled us to hold our tobaccos over the dull period and sell later at better prices when the market was ready to receive it.

"We carried over about 57,000 pounds of the 1921 crop, which had re-dried and stored in our own recei plants. In October of 1921, we sold 000,000 pounds of that tobacco at satisfactory prices and paid off the Finance Corporation loan and all o indebtedness and in December we the remaining 3,000,000 pounds at pr that had never been paid for tobacc the history of the Burley district ex during the World War."

Mr. Stone declared that the polic the Burley Tobacco Growers' Co-op tive Association was to cultivate frie relations with the manufacturers. said, after all, the manufacturers good business men and as such busi men they had merely bought their quirements in the way that was r advantageous to them.

"Men will not continue," he said, produce tobacco, or any other kind crop, unless they realize a profit fro and unless the tobacco growers do ceive profitable prices it is only a q tion of time until they cease produc For that reason I believe that the m facturers, who are keen business men, beginning to see the wisdom and ju of a business organization among growers. All that the growers are ing, and all that they are seeking bring about through the co-opera marketing of their crops, is a fair p for their tobacco, a reasonable retur the fruit of their labors in the tob fields. Certainly no one can ask the take less and if they will stand unit together it is a certainty that no one compel them to accept less, unless over-production they make good p impossible.

Partial Payments

"A number of objections have been vanced against the co-operative sy of selling tobacco. First of these is objection that the grower does not all his money at one time. To my this is not a valid objection, because system of payment has its advant Tobacco growers of the Burley dis remember very keenly that they did all their money at one time in 1920.

nine cases out of ten it was not ough money to pay for growing the p that year, and that was one of the sons why it was not difficult to con- ce the sensible farmers of the Burley tricts that they ought to join together find some other system of selling lir tobacco. Human nature is very ch alike, whether in Ohio, Kentucky, any other state, and there are very of us who receive money in consid- ble amounts who do not spend some it foolishly. Down in Kentucky ten- growers, under the old system, uld receive all their money when they their crops over the loose leaf ehouse floors. Within sixty days rwards, most of them were broke borrowing money from their land- s against the crop of the coming Under the co-operative system of ng the tobacco grower receives a suf- nt advance on the delivery of his cco to take care of his pressing ls, to pay his grocery and other bills. en he plants his crop along in the ng he again needs money, and the perative association, under ordinary litions, will have another payment y for him by that time, so he does ave to borrow money from his land- to pitch his crop. In the fall when uts his tobacco and houses it, he will n be in need of money and, under nal conditions, he will get that ey from his association. Under this he is going on his own resources, becoming a self-reliant, if not an endent, citizen and he is not put to umiliation of going to his landlord sking for money to buy the necessi- of life for his children and to pro- the crop of the coming season. We that the system works extremely down in Kentucky and a great many e growers of the 1921 crop declared hey got more money in the advance at crop when they delivered it than received for their entire 1920 crop, hat the second and third payments 'velvet.'

Salaries Paid to Officials

Objection is made also, on the part ose who are opposed to co-operative ting, to the 'high salaries' paid to -operative marketing officials. There e little doubt that under the old n the tobacco growers paid all sal- in connection with the marketing eir crop, but the names of these id not appear on their pay-roll and they had nothing to say as to the fixing of these salaries. Under our system of organization if there should ever creep into its operation any abuses of any kind the growers have it in their own power, through the election of their directors, to eliminate these abuses.

Objections to System

"The most earnest objection, however, to the co-operative system of marketing comes from those whose business is affected adversely by the new method of handling tobacco. No man can be blamed for fighting for his own interest, so long as he fights honestly and fairly, and this association does not blame any man for seeking by honorable methods to continue to share in the profits of the farmers. Chief among these objectors are loose leaf warehousemen, speculators, so-called 'pin-hookers' and others who under the auction system shared more or less liberally in the profits of the Burley tobacco farmers. The warehouseman, of course, performed a useful function. He offered the best system then devised for the grower to dispose of his tobacco and he was entitled to compensation to a reasonable degree for the services that he rendered. I think it can be truthfully said that the loose leaf warehousemen, as a general rule, were reasonable in their charges. The speculator, however, and the pin-hooker, performed no services for the farmer in any degree commensurate with the charge they rendered for that service. Many farmers brought their tobacco to market, placed it upon a floor of a loose leaf warehouse, and there sold that tobacco before it was offered for auction to a speculator at a price far below what it brought when put up for sale. Pin-hookers and speculators often made as high as $8,000, $10,000 or $15,000 a year off the labors of Burley tobacco growers, not only in Ohio but in Kentucky and all the other states of the Burley district. And the difference between the prices paid by these speculators to the farmers and the prices received by them for the tobacco when finally sold was no small factor in bringing about the success of the Burley Tobacco Growers' Co-operative Association. With the speculator and pin-hooker eliminated the farmer gets every cent of the profit derived from his crop, and with the loose leaf warehouse eliminated the incentive to 'dumping' is taken away and only the orderly co-operative method of marketing is left for the grower to follow.

Paducah Prospects

Paducah, Ky., June 2.—The movement ose tobacco has dropped off some last week. This is due largely to act that farmers are very busy with ing this year's crop and are not g time to make deliveries that they d have otherwise made. However, eries have kept up each day and the iation has been receiving and deliver- esides it is busy with packing unsold es, and market conditions are about ame as have ruled for some time

liveries will be lighter from now on he greater part of the crop should ut of the farmers' hands by June ut due to the unfavorable weather tions it may be later.

ere have been a few old lugs sold g the past week at prices ranging 4½ to 7 cents and some deals are ng for some rather large lots. There ll in this district about 1200 hogs- that we know of out of the 1919 920 crops, and the owners are very us to close them out, and no doubt larger sales will be consummated

Progress with Planting

weather during the past week has showery with some heavy rain in some localities. Still farmers have made wonderful progress with planting this year's crop of tobacco, and the indications are that the greater part of the crop will be planted during the present season. No doubt as much as 60 per cent of the crop has been planted. Plants are plentiful and are of splendid growth and with this damp weather are living finely. The ground is very moist and will hold sufficient moisture for planting after the land is prepared without another rainy spell, and I believe by the end of next week we will see practically all of the crop planted. It is hard to estimate what this year's planting will be, but it is certain that an average crop will be planted and possibly more. Labor conditions are very unfavorable or we would see the largest crop ever planted. As it is there is some danger of farmers over-cropping and making poor quality. Their lands are having to be prepared hurriedly and a great deal of the crop is being planted on ground that has not been well prepared.—W. B. Kennedy.

ssee and West Virginia will share in distribution of $15,000,000 by the Bur- Tobacco Growers' Co-operative As- iciation, checks totalling that amount ling mailed to members of the Associa- n this morning.

The total paid the growers on their 22 crop, Secretary and Treasurer H. e Earley said today, is $33,600,000, the yment being mailed today totalling out 80 per cent of the amount paid the mbers when their tobacco was deliver- at the association's receiving plants t winter and spring.

Besides the regular office force, Secre- y Earley was assisted by about 50 ex- clerks and accountants, employes of receiving plants of the association, making ready the second distribution. e work of preparing the checks and tements required two weeks of strenu- s work, a part of it night and day.

More than 128,000 checks were neces- y to make the distribution, more than 000 growers sharing in the dividend, ides others to whom many of the wers had assigned an interest in the tribution as a security for money ad- ced, almost every bank in the district ing advanced money on the second ment.

Small Auction Sales

HOPKINSVILLE, Ky., June 2.—Loose r sales of unpooled tobacco for the t week were only 40,045 pounds, mak- a total of 13,982,210 pounds for the son to date.

The average price for the week was .03, against $13.48 for the same week year. The average for the season $14.52 against $14.57 at the same time ear ago.

Prices for the week were unchanged, ging:

rash—$3 to $5.

ugs—Common, $5 to $7; medium, $7 $9; good, $9 to $12; fine, $12 to $16.

eaf—Low, $10 to $12; common, $12 $20; medium, $20 to $27.50. No good ine leaf offered.

The offerings for the week were not small, but the quality was not such would excite interest. It was all ll lots and mostly the leavings of s.

The season is about at an end, one or of the rehandling plants have already down, and all are rapidly winding so that they too will soon close for Summer.

ontinued wet weather has given the ners ample opportunity for complet- planting and probably all have fin- ished, so far as their land was prepared. Some had not prepared all the land they wanted to put into tobacco and the wet conditions have prevented their doing this. But a very large portion of the crop is on the hill now and it is looking well. Corn, too, is coming along fine.—M. E. BACON.

Making Drive for New Co-op. Members

HOPKINSVILLE, Ky., June 4.—The membership drive by the Dark Tobacco Growers' Co-operative Association of Kentucky and Tennessee, now under way in the One Sucker district, has brought in more than 300 signed contracts for something above 1,500 acres up to date. At Franklin the following resolution was adopted by the business and professional men:

"We, the business and professional men of Franklin, desire to go on record as being 100 per cent in favor of any movement that will be of financial aid to our community and our people. We believe this is to be the greatest forward step our people have ever taken and we stand ready to assist them. We urge growers to join with their neighbors and friends and make the association 100 per cent strong."

To Meet at Paducah

The June meeting of the board of directors will be held at Paducah Thursday of the present week. It promises to be one of the most enjoyable, as well as important meetings yet held, for the board will be given a dinner at the Country Club and Senator Leroy Percy, of Greenville, Miss., is announced for an address on co-operative marketing. This will be the first time the board of directors has ever met in Paducah.

In the Green River district the association received about 30,000,000 pounds and the loose floors sold 14,500,000 pounds, giving a total crop for that district of 44,500,000 pounds. Part of this tobacco is still unsold.

A new receiving house is to be built in Cadiz this Summer, to be completed in time for handling the new crop. New houses, it is said, will also be erected at Tompkinsville, Smith's Grove, Princeton, Kuttawa, Murray and other points.

Growing More Burley

Maury County, Tennessee, is showing an increasing interest in growing burley tobacco and it has been announced that the crop for this year will be sold through the Burley Growers' Co-operative Association.

Up until last year Maury County farmers had not attempted to grow tobacco. But a few farmers, after consulting soil specialists and being informed that the soil of Maury County was very similar to that of the Bluegrass and tobacco section around Lexington, Ky., decided to try a small planting. Less than 100 acres was put out but the crop demonstrated that it could be grown very successfully and this year the crop will be at least 500 to 600 acres. In addition, Giles County, Tennessee, has also taken an interest in tobacco growing and will probably put out 200 acres this year.—M. E. BACON.

Retrieves His Tobacco After Ten Years

Retrieving his tobacco in excellent condition after it had been cached for 10 years, is the experience of a Canadian trapper who makes the wilds of Northern Manitoba his hunting ground. In 1913 he made a cache at Copper Lake, which is 72 miles north of The Pas. In this cache he placed three pounds of tobacco in six half-pound tins. Returning to Copper Lake early in the present year he found that the cached tobacco was as good as ever, although it had been there about 10 years.

A NEW ERA

for

Porto Rican Tobacco

The day of prosperity for the Porto Rican Tobacco Industry has arrived.

The Phenomenal success of many of the advertised brands of "mild Havana Cigars" is largely due to the use of Porto Rican Tobacco either exclusively or blended with other Tobacco as a filler.

In the past it was not always possible to tell whether the Tobacco sold as Porto Rican was all grown on that Island or mixed with a Foreign Tobacco, but now

The Government Guarantees

the source of all Tobacco—either in the leaf, scraps, or in cigars—shipped from Porto Rico.

This is done by means of Stamps affixed to every barrel or bale of Tobacco and on all boxes of cigars or "little cigars."

The White Guarantee Stamp

on shipments of Tobacco guarantees that it is of pure Porto Rican growth; on boxes of cigars that the contents were manufactured from Tobacco grown on that Island.

St. Louis News Notes

St. Louis, Mo., June 2.—In spite of ich rain, it having rained nearly every y for the past few weeks, business con- ues to hold up remarkably well and e jobbers and retailers are quite opti- stic over business conditions.

After a long legal fight over the will the late Jacob Lambert, the million- e cigar manufacturer, which landed in State Supreme Court, after the defeat a group of nieces and nephews, who ught to break the will on the grounds t Lambert's sister, Mrs. Rosa Graff, o was made the chief beneficiary of his ate of $1,200,000 had "fraudulently sled and wrongfully influenced" the l making, that court has affirmed the ision of a St. Louis Circuit Court, ich upheld the will.

Lambert, a bachelor, lived with Mrs. Graff and her husband, Bernard Graff. s will cut off the nieces and nephews h nominal sums. The will was dated uary 21, 1921. The plaintiffs sued to ak the will on March 18. The Cir- t Court upheld the will and denied a rial. The contest was taken before Supreme Court, which decided inst the contestants.

Concessions on cigars, cigarettes and kers' articles, have recently been made the cigar department of the Grand der, and it has resulted in a big bus- s by that department.

). A. Immerhausen, for 33 years in the tobacco business, 26 years of which nanager of the St. Louis branch of the Hussy Leaf Tobacco Co., has retired n the business and has been succeeded Edward Linnemeyer and John A. te, both connected with the firm for ears. Mr. Immerhausen will be gen- manager of the Normandie Golf b.

Recent Visitors

Many visitors have been in St. Louis ntly. Among them have been: José das of José Pendas & Co.; Jack Ro- berg of Fernandez, Fernandez & Co.; W. Howe, of Bradley & Hubbard nufacturing Co.; R. E. Breder of Ar- les, Lopez & Bro.; Tom Monroe of tz Cigar Co.; Arthur Lenfesty of t-Dillon Co.; Jacob Mazer, presi- of the Mazer Cigar Manufacturing Ben Block, representative of Park Filford; E. R. Lincoln of Lincoln rs., and Louis P. Sutter of Louis P. ler & Bros.

Stanley Cigar Co.; Delhi, by Moss & Lowenhaupt; Preferencia, by William A. Stickney Cigar Co.; and Dutch Master by the Grand Leader cigar department.

Polish Match Production

Washington, D. C., June 5.—Consul General Keena, at Warsaw, has sent the following report to the Department of Commerce regarding the match factories of Poland:

"There are at present 16 match factories in Poland, one having been established recently in former Russian Poland. Of this number, 8 are former Austrian Poland, 3 in former German Poland, and the remaining 10 in former Russian Poland. Two of the largest factories are in the county of Warsaw and another important factory is located in the town of Czestochowa. Several factories are situated in the eastern and northeastern districts of Poland, where there is an abundance of wood which is especially suitable for the manufacture of matches.

Raw Materials Used for Polish Matches

"The matches manufactured in Poland are safety matches. About 50 per cent potassium chlorate is used in combination with antimony, sulphur, and other substances. The principal wood is aspen, but pine and poplar are used occasionally. At the beginning of 1923 the exportation of aspen was forbidden by the Polish government, to the satisfaction of the owners of match factories but to the great dissatisfaction of lumber dealers, who are thus obliged to sell their aspen in Poland at lower prices than they could get abroad. The wood is coated with paraffin obtainable in Poland.

Output and Exportation of Matches

"According to figures furnished by the Polish Ministry of Commerce, 84,706 cases, each case containing 5,000 boxes of 100 matches, were manufactured during the first eight months of 1922. Exact figures for the last four months of the year are not available, but it is estimated that more than 50,000 cases were manufactured.

"During the first four months of the year only 145 cases were exported, but during the following four months the amount increased to 8,117. Matches exported from Poland went principally to Great Britain, France and the Netherlands. The Polish Government hopes that matches manufactured during 1923 will total 245,000 cases and that 130,000 cases will be available for export.

"The consumption of matches in Poland, not counting a few carloads from a Danzig factory and a few small boxes from Czechoslovakia, is estimated for the whole year at 110,796 cases."

Plans European Trip

Jack Marqusee, of Julius Marqusee & Son., is planning to sail for Europe on June 16, on the steamer *Rotterdam*. He is to be accompanied by his younger brother Gerald, and they will probably attend some of the inscriptions.

Pennsylvania Tobacco Is Still Changing Hans

Lancaster Market Featured by Numerous Small Sales—Instrumental in Promoting General Feeling of Optimism Interests Share—Everybody at N. C. L. T. A. Conventi

LANCASTER, Pa., June 4.—The Lancaster market, though sapped of its activity by the sale of the greater part of its 1922 stock, is far from dormant at the present time, and during the past week resumed some of its former snap and bustle, though on a much smaller scale than the operations of several weeks ago. A steady undercurrent of activity may be detected in the numerous small sales which take place in the various packers' warehouses almost daily. This movement, while not extensive, is instrumental in promoting the general feeling of optimism which is shared alike by the packer, jobber and small manufacturer who look to a good summer and fall business.

The feeling of confidence in tobacco trade circles is further strengthened by the very general "boom" in practically all lines of industry in Lancaster and vicinity. While packers may look beyond Lancaster for omens of good business, it will be remembered that the larger proportion of the output from local manufacturers is consumed in this section and finds its market largely in Lancaster county. Building trades, nearly every line of commercial activity and all of the industrial plants are enjoying very brisk business and are operating to capacity. This fact finds an immediate reflection in the cigar business and as there is no indication of an era of depression, even in the "far sighted" vision of the pessimists, the jobber and the small manufacturer find every reason to be cheerful about the outlook for a season of prosperity. While the medium and higher priced cigar still enjoy the center of the stage, the makers of nickel goods report that their business is far from lagging and that a fair proportion of smokers prefer the cheaper product.

While it is generally conceded that a finer quality of Pennsylvania cigarleaf is being grown in Lancaster county at the present time than ever before, the growers are far from content with their product and have been, within the past several years, evidencing a genuine desire to raise the standard of Lancaster grown tobacco. The reason for this is probably two fold, and is of sufficient consequence to warrant the prediction that better and better Pennsylvania tobacco will be forthcoming from this section. In the first place, the tobacco farmer is distinctly "class conscious." He is proud of the fact that he is a tobacco grower and through his organizations such as the Lancaster County Tobacco Growers' Association and the Lancaster County Farm Bureau he puts this pride in his product into definite form by sponsoring many and various projects which react to the benefit of the tobacco growing industry. Secondly, the quality of Pennsylvania seedleaf has been raised tremendously by the aggressive propaganda for improved cultural methods and the eradication of disease which has been broadcast by the Farm Bureau and the Experimental tion at Ephrata. Most of the recomm dations, when endorsed by these two thorities, are unreservedly adopted have given the grower very profit returns both in increased yields and b quality.

The steam sterilization of the seed t the spraying of the young plants, fumigation of the seed bed to stamp insect pests which often destroy an e crop, and the application of special fertilizers were all, at one time, cla as dangerous "book farming," but now almost universally adopted by L caster county growers. It is entirely sible that the increased demand for P sylvania tobacco may be directly t to this work which has so greatly proved the quality, the mild, agree aroma and the free burning prope which are responsible for its favor.

The Plot Thickened—Then Cle

Old King Tut's tomb was a three circus compared to the several wareho which were visited today with a vie cornering some odd bit of informa for dissemination among the vassal His Majesty, TOBACCO. Absolute sil reigned within the pugently aromatic mains and only here and there coul occasional warehouse laborer be fo dreamily sorting out some stray cas seedleaf suspected of damage. Estab ment after establishment yielded not more and it was only when surprise turned to actual fear that the light d ed upon us,—today, why certainly, t was June 4, and June 4 was a date had long been marked on the caler of every member of the Lancaster Tobacco Board of Trade. And member of that "peptomistic" orga tion, it developed, had journeyed to York to attend the convention of the tional Cigar Leaf Tobacco Associa Our only hope is that they survive rigors that every convention is bou present and have sufficiently recover next week to lend a willing ear to inquiries.—KEYSTONE.

A Good Move

Isadore Cohen, Porto Rican to dealer and importer, has removed 118 Maiden Lane, to 147 Water S where he occupies the first floor. D the expansion of Mr. Cohen's busine was necessary to move to larger more convenient premises.

In New Quarters

William S. Brill & Son, are no stalled in their new quarters at Water Street, New York, where will be pleased to receive customer their famous Wisconsin and Pen vania tobaccos.

York County Activities

Cigar Stamp Sales Make Good Showing

York, Pa., June 4.—The receipts from the sale of cigar stamps at the York office of the International Revenue Collector, for the month of May, according to G. Frank Lindemuth, collector for the York-Adams division of the First U. S. Revenue District, at the close of business on May 31, amounted to $211,-991.85. These figures show the business of cigarmaking in this district to be as good as ever, and the dullness, which has been mentioned at different times, apparently confined to a few factories, some of which are accustomed during the Summer to quit business, which is resumed again in the Fall. The cigar stamp sales were better than for the month of April, when they reached $191,576.15. They surpassed May, 1922, with sales of $179,-997.23, and May, 1921, with sales of $184,527.40. The May stamp sales in the phenomenal year of 1920 totaled $292,-778.39, which established a record. The present month has surpassed the May sales of every year except 1920.

The amount of business done in the sale of tobacco stamps last month amounted to $8,856.72. This sum is less than the April receipts from this source, which amounted to $9,070.92. Nor does it equal May, 1922, when the receipts reached $9,779.85.

New Factories in May

Three cigar factories were opened in York County during the month of May. Their names, location and amount of bond furnished are: General Cigar Co., Manheastown, bond $10,000; Raymond F. Kunkel, 244 North George street, bond $500, and A. S. Frey & Co., Craley, bond $1,000.

Deputies in the collector's office began June 1 to classify the individuals, firms, partnerships and corporations paying federal taxes, which come under the Revenue Department and which include manufacturers of tobacco. The special liability is reckoned from July 1 of each year, or the first day of the month during which business is begun to the last day of June following. Where business is begun after the month of July, the tax to be paid is computed by multiplying the monthly rate by the number of months remaining in the fiscal year and if the amount involves a fraction the full cent must be included.

Included in the list of special-tax classes are the following: Manufacturers of tobacco—Annual sales not over 50,000 cigars; annual sales over 50,000 pounds, but over 100,000 pounds; annual sales over 100,000, but not over 200,000 pounds, and in respect to each 1,000 pounds or fraction thereof in excess of 200,000 pounds.

Manufacturers of cigars: Annual sales not over 50,000 cigars; annual sales over 50,000 but not over 100,000 cigars; annual sales over 100,000, but not over 400,000 cigars; annual sales over 400,000, and in respect to each 1,000 cigars, or fraction thereof in excess of 400,000 cigars.

Manufacturers of cigarettes: For each 10,000 cigarettes or fraction thereof. (This includes small cigars weighing not more than three pounds per 1,000.)

The cigar factory conducted by A. J. Olp, at 406 South George street, this city, resumed operations this morning, after being closed for a period of three weeks, because of a lack of orders.

A Trustee in Stoner Bankruptcy

Charles M. Strickler, York, was elected trustee at a meeting on May 29 of the creditors of E. B. Stoner, bankrupt Hallam tobacco manufacturer. The bond for the trustee was fixed at $25,000. Mr. Strickler was one of the receivers appointed by the local courts and is now trustee of the creditors under action taken in the United States District Court for the Middle District of Pennsylvania. The creditors' meeting was held in the office of William H. Kurtz, referee in bankruptcy. Appraisers of Stoner's assets are to be appointed.

The branch of the East Prospect Cigar Co. located in Wrightsville which had been closed for two weeks resumed full operations on May 29. Charles L. Dietz is manager of the factory.

U. L. Kline, cigar manufacturer of Yorkana, has returned from a business trip to New York City.

Co-operative Efforts

F. A. de Pilis, Vice-President of Patterson Bros. Tobacco Corporation of Richmond, Va., and New York, has received the following letter from T. L. Hughes, Tobacco Specialist of the Department of Commerce:

"Dear Mr. de Pilis:

"Your letter of May 24, enclosing a copy of a letter which you wrote to Mr. Dushkind, has been received.

"I am bringing this communication to the attention of Dr. Klein and am sure that he will read it with the same intensive interest as I found in its contents.

"It is gratifying indeed to note your good faith and hearty co-operation in the work that this Bureau is undertaking for the promotion of the tobacco industry, both from a domestic and foreign aspect, and I trust that we may be able to bring the importance of our work to the attention of many of the important factors in the industry, in such a manner that it will be fully comprehended.

"We are depending upon such enterprising firms as yours to make this Bureau of the greatest use possible and trust that we may have your valuable suggestions from time to time as to the manner in which we may best serve the industry."

Returns from Porto Rico

Jacob Rosenstadt, of Rosenstadt & Waller, leaf importers, of 162 Water Street, has returned from Porto Rico, where he recently purchased a good quantity of fine tobacco for his organization.

Philadelphia Trade Showing Greater Activity

Memorial Day Caused Brief Cessation—Selling Becomes More Brisk—Retailers Preparing for Greater Business—Consolidated Branch Forces Meet—Trade Notes.

PHILADELPHIA, June 5.—The great national holiday of the mid-week was the only cause for slow down of production in any of the large cigar factories which make Philadelphia the big center of production. The enforced idleness of the day with the inevitable consequences of slow down for the remainder of the week was enjoyed more by the operatives than it was by the manufacturers, for while the oversold condition which was the dominant feature of the situation early in the year, the market has opened up again quite actively because of the advent of the summer vacation period. Retailers certainly showed by their orders that they anticipated very lively sales to prospective travelers, who although the distribution of the leading brands almost is universal, prefer to take theirs with them rather than take chances on purchasing their favorites at the point of destination. Counter sales and transient business both were much better during the past week than they were at any time during May.

In Bankruptcy

The outstanding development of the week was the only one expected filing of voluntary petition in bankruptcy by Howard W. Little a retailer occupying the prominently located stand at Juniper and Sansom streets, in the very heart of the city's retail shopping district. Creditors have learned through the Philadelphia Association of Credit Men, whose secretary, David A. Longacre, was appointed receiver, that the books showing the Little accounts place the liabilities at about $6,000 and the assets at about $2,000. The books, of course, are being studied in order to determine what is the best proceeding to take, but no conclusion thus far has been reached. Little is widely known in the trade and is highly regarded. He was for many years in charge of the store when it was in the ownership of Pent Brothers taking it over when they retired. He was secretary of Pent Brothers and he opened the store on his own account in 1919.

Business Good and Growing Better

A roseate present and a still rosier future were portrayed by president Julius Lichtenstein, of the Consolidated Cigar Corporation, who, with vice- president Herbert Weil, came over from New York headquarters last week to preside at a rousing meeting of the sales organization of the 44 Cigar Sales Corporation, headed by Isaac Sager, which is the distributor for Philadelphia and Camden. The meeting was held at Greens' Hotel, where an elaborate luncheon was served. It was attended by all the sales organization, including the recent addition, H. C. Walsh, who will cover Chester, West Chester and Phoenixville, and Albert Goldberg who will look after the Frankford and Bridesburg District. President Lichtenstein said that the demand for Consolidated products exceeded the supply and that more Adlons and 44s now were being sold than at any time in the history of either and that while there was an extreme shortage of raw material the Consolidated was well prepared for what he was confident would be a record breaking summer and fall.

Effects of the Halpern Cigar Manufacturing Co., was disposed of today at auction at the plant and home of 50-50 and Edmund Halley, 37 North Second street. It is understood that Louis Halpern will enter the business of tobacco stripping for the trade.

Proprietor Louis Rosenfelt of the El Arco factory, 513 Dickinson st., announces that hereafter his product will be disposed of only through mail orders.

After a long seige of illness and recuperation Joe Carlisle of the Bayuk Bros. organization is again back on the street and is traveling through New York State.

C. Harry Meyer, Ohio representative of Allen R. Cressmans' Sons Co., spent some time at the factory during the week, preceding a trip to the seashore. The firm reports the city trade larger proportionately in gain than any other branch of its activities.

The Congress Cigar Co., is now hopeful after unexpected delays of being able to take occupancy of its mammoth factory at 3rd and Spruce streets, between June 20 and 25.

Passes Away at Advanced Age

Alfred Mellor, vice-president of the MacAndrews & Forbes Co., known throughout the entire tobacco industry died during the week at his home 15 West Walnut Lane, Germantown, in 83rd year. He retired from active association with the Company four years ago. He was a native Philadelphian and a graduate of Haverford College and the Philadelphia School of Pharmacy. In his early business life was a manufacturing chemist

Old Cigar Indian Awaits Jubilee Parade

John Kickapoo is at least 60 years old. Until 15 years ago his right hand clutched a large cigar. The cigar went one night when John Kickapoo was knocked down by some East Side lads who were celebrating a magnificent victory at the polls. Today John's nose is the stub of a clothes pin. One of his ears is missing and he's as blind as a butler.

For 20 years he's been standing in front of Mrs. John Barrett's cigar store at 396 Water street. For 4 years before that he stood in front of Mrs. Barrett's cigar store when it was located at 170 Cherry street. Mrs. Barrett bought him from a man who had a cigar store in Catharine street and the man inherited John from his father. All of which would seem to indicate that John was an experienced cigar store Indian 60 years ago.

That and the fact that John Kickapoo is the only real wooden Indian ever to have been a movie actor singled him out yesterday as a personage worth interviewing, says the New York *Herald*. Two years ago John shared a star honors with Kenneth Harlan in "The Barricade" and Mrs. Barrett has photographs showing John and Kenneth facing each other.

"The boss," said John Kickapoo, referring to Mrs. Barrett, "is going to give me a coat of paint and maybe I'll be in the parade during the silver jubilee. I haven't made up my mind about parading. I'm not as young as I was. The last parade I was in was back in 1873, when the boys elected Bill Havemeyer Mayor. Some night! I was standing over on Cherry street watching the boys go by when a few of them come along and grab me and take me along with them. Gosh, I don't know how many bars we leaned against that night. Didn't drink a drop, though.

"And now, I hear, they are going to have this silver jubilee to celebrate the twenty-fifth anniversary of the Great New York charter. I don't get around much and the neighborhood has changed. Used to be a great hangout here on Water and Catharine and I got all the news from the boys at night, but, as I say, times have changed.

"The first I hear of something going on is when a Street Cleaning Department wagon goes by with a sign on it saying 'Know Your City' and then the letters 'S. N. Y. S. J.' That has one stopper for a while. At first I dope it out as 'Show New York Some Jack.' Then I decide it means 'Shed Not Your Soiled Jumper' or polite request to the workingman not to strike awhile yet. But that don't seem right, so I lose a lot of sleep working it out as 'Salute New York's Sunshine John,' but I figure they wouldn't be kidding the mayor and department wagons, so I try again and get 'Sell Not Your Stone Jug,' thinking it may be a quiet tip that Al Smith is going to sign the Mullan-Gage repeal

(*Continued on page* 44)

The Convention

(*Continued from page 21*)

lin my opinion, are two: First, the laxity on the part of the leaf dealer in extending credit to the manufacturer, and to a lesser extent, the latter's laxity in extending credit to the jobber or dealer; and, second, I might term the nonchalant and irresponsible way that the average manufacturer regards a contractual obligation. This latter thought will perhaps bear a more careful analysis. The trade has unfortunately fallen into the dangerous custom of more or less gracefully accepting cancellations for no substantial and certainly no legal reason. The basis of this acquiescence is founded largely upon the fear of competition. It has become to be felt that if the cancellation of an order is not agreed to by the leaf dealer, that the customer's patronage would or might be alienated. This is a condition of affairs which cannot be permitted to continue, for from possible innocent beginnings the lengths to which this custom has grown, jeopardize the very foundations of the leaf tobacco industry. As an outgrowth of this evil, it is a common occurrence that in times of business dullness customers cancel tobacco bought many, many months previously, or they ask for unreasonable allowances on the fictitious plea that the parcel does not come up to sample. Practically every other trade has adopted this procedure with excellent results. Careful scrutiny has failed to reveal evidence of evil resulting from the liberal interchange of credit information in these other industries. A case within my purview will serve as an illuminating illustration of what a shrewd buyer can put over on a number of foolishly disassociated sellers.

A certain manufacturer, with a capital entitling him to an aggregate credit of $0,000, found himself one day with liabilities of over $150,000. This unusual accomplishment was made possible by so dividing his patronage that no one firm has ever asked for a line of more than about $10,000. Some street corner discussions concerning the account actually took place and one leaf dealer said in response to an inquiry: "Oh, I guess he's all right, he pays pretty promptly and I don't go beyond a certain limit with him." The manufacturer's ability to pay pretty promptly was accomplished by pledging with banks and loan companies tobaccos bought from other houses at later dates. This very laudable practice was carried on for several years until the crash came. Had an interchange of ledger experience of all the concerns with whom this account had done business been had at the outset, no such debacle could have occurred; and I know of no other method whereby the loss to the creditors could have been avoided. Numberless similar examples could be advanced, but I shall not burden you with their recital. Let me warn you all, however, that a continuation of the sublime and ostrich-like indifference of our trade to salient facts which govern the extension of credits in other lines, will work havoc with us to an even greater extent than we have heretofore experienced.

Sectional and individual petty jealousies must be laid aside for the welfare of the industry at large. Co-operation in the truest sense of the word should be our slogan. Nature in her bounty provides us impartially with the means of livelihood, therefore, let us emulate her by offering without prejudice such benefits as we gain by experience.

Also in many instances, contracts entered into in good faith on the part of the seller have been cancelled because a competitor may have offered the customer a similar lot of tobacco a few cents cheaper for the very purpose of causing the customer to cancel the first contract entered into. Perhaps, to a limited extent, the very nature of our business permits of such conditions, because there are no two lots of tobacco exactly alike, and no two leaf dealers take up their tobacco at exactly the same prices; but such competition in the long run will work to the sore detriment of all parties concerned. The leaf dealer benefiting in the one case by a sale may be the very one who will be the sufferer in the next instance by reason of the cancellation of his sale.

It is not my intention to decry the above-mentioned existing evils without at least suggesting a remedy. The first problem to be met is the possible cure for lax credit extension.

I note in one of the morning newspapers an advertisement of a leading trust company of New York headed, "Block Signals of Business." The first sentence reads: "Dependable credit information bears the same relation to business that the modern signal system bears to the railroad." Our industry never has had any dependable credit information, except perhaps in some isolated instances. In my humble opinion this can only be accomplished by complete co-operation between the leaf dealers in the exchange of ledger experiences and the dissemination of all relevant information concerning the financial and moral standing of manufacturers. I have repeatedly heard leaf dealers assert that they would not divulge to their competitors any of the details of their transactions with a particular manufacturer. Gentlemen, it may seem extreme to you for me to advocate this radical principle, but I unhesitatingly do advocate it because in the long run it will prove the salvation of the industry.

The second evil, the legal aspect of which particularly impressed me as ex-attorney, is the disregard of a contractual obligation on the part of the average manufacturer. I refer to the custom which has sprung up of wholesale cancellations. In reality the leaf dealer is responsible. In order to get business away from their fellow dealers and to ingratiate themselves with customers, certain leaf merchants introduced the custom which has necessarily been followed by all of extending unwarrantably long term credits and making sales on terms of fractional billing with its atendant temptation to ultimate cancellation. Fractional billing is an unsound economic method of doing business, and it offers an open sesame to the unmoral practice of the total disregard of the sanctity of a contract.

I bespeak the earnest efforts of this association to urge its members to discontinue this practice. Many of our friends in the industry have already expressed to me their realization of the insidious possibilities of a continuation of this method of doing business, and, therefore, it would seem that the psychological moment has come in which to stamp it out.

Please do not gather the impression that I am Mr. Lugubrious Blue and that I believe our industry is destined to founder on the rocks; on the contrary, I feel that a great era of prosperity is before us, but in order that we may all achieve the greatest gain from our efforts we must use heroic methods to eradicate and once and for all times blot out the two evils which at present prevent our deriving the full benefit from the advantages which we enjoy.

I feel that this has been a pretty "dry" speech, and, therefore, in order to assist you in assimilating it, we invite you all to rooms 327 and 328 at the Waldorf-Astoria any time this afternoon after two o'clock.

The Treasurer's Report

The report of the treasurer was then read, showing the association's highly satisfactory standing on June 1, 1923.

President Mendelsohn introduced Mr. Berman, manager of the Tobacco Products Credit Association, who, in a most interesting address, described the workings of the credit association.

The Resolutions Committee, consisting of Leo Leventritt, chairman; B. Haas, Fred Block, Milton Ranck, and A. W. Kaercher, was appointed by the chair.

EL PRODUCTO

for real enjoyment

MILD DIS-TINCTIVE BLEND

Bouquet 10c straight

Escepcionales 3 for 50c

There is a size and shape and color of El Producto to suit every smoker's preference.

Prices range from 10c to 30c. But between one El Producto and another there is never the slightest difference in mildness, quality or blend.

Here is another reason why the volume of El Producto's sales is increasing so rapidly.

H. H. Shelton, Winston-Salem, N. C., vice-president.
Wm. T. Reed, Richmond, Va., vice-president.
Wm. Best, Jr., New York, vice-president.
Asa Lemlein, New York, treasurer.
Chas. Dushkind, New York, Secretary.

The meeting was then adjourned until Tuesday morning.

The First Evening's Events

The Entertainment Committee had provided a theater party for the evening to see the Music Box Revue, which was very much enjoyed by all who attended.

Immediately after the performance large automobiles met the guests and transferred them to the famous Luchow's Restaurant, where an enjoyable lobster luncheon was served. The guests were recipients of special favors and the event lasted until the early hours of the following morning.

Tuesday's Session

The second day's session of the Convention was called to order on Tuesday morning by President Mendelsohn..

Secretary Waller read a Radiogram from Percival R. Lowe (now on his way to Europe), a cablegram from Jos. Cullman, Sr., from Amsterdam, and letters from Leo Tuska, Chicago, and I. N. Strasser, Albany, all sending greetings.

Committees Failing to Report

No reports were received from the chairmen of the following committees. Committee on Complaints (F. A. Bach, Chairman); Committee on Traffic (Chas. N. Kincaid, Chairman); Committee on Taxation in Various States (W. P. Haas, Chairman); Committee on Standardization; Trade Relations Committee (Fred Beach, Chairman) and Arbitration Committee (Jos. F. Cullman, Jr., Chairman).

President Mendelsohn introduced T. L. Hughes, of the Tobacco Division of the Bureau of Commerce, who spoke on the importance of co-operation between the Bureau and the tobacco industry.

Resolutions

Resolutions covering the following twenty-one important subjects were adopted:

1. Standardization of Cigar Leaf Tobacco.
2. Urging Larger Appropriation for Experimental Stations.
3. Sympathy for the family of Chas. Fox.
4. Freight, Express and Parcel Post Rates.
5. Government Co-operation, Especially Regarding Foreign Trade.
6. Manila Cigar Menace.
7. Legislation Referring to Price Maintenance.
8. Free Zones.
9. Repeal of the Cantrill Law.
10. Cuban Parcel Post.
11. Increase in Membership.
12. Cuban Sales Tax.
13. Thanks to New York Leaf Tobacco Board of Trade.
14. Thanks to T. L. Hughes and F. B. Wilkinson for Their Assistance.
15. Thanks to Merchants' Association of New York.
16. Thanks to the Press.
17. Attacks on Cigar Industry.
18. To Retain W. L. Crounse for 1924.
19. Slogan of N. C. L. T. A.; and, if Required, Spend $2,000 to Help the Campaign.
20. Endorsement of the Tobacco Products' Credit Association.
21. Favors Change in the Immigration Law.

The majority of these resolutions were passed unanimously, but interesting debates took place over the slogan and the credit resolutions,

F. B. Wilkinson, of the Tobacco Bureau in Washington, addressed the meeting, and explained the progress the Department had made in the Standardization of Tobacco since the meeting at Atlantic City last year.

Jos. Goldberg, on behalf of the Lancaster Tobacco Board of Trade, invited the National Association to hold their Convention in Lancaster next June. This invitation was immediately accepted amid much applause.

The Election of Officers

Then followed the election of officers for the ensuing year, all the retiring officers being re-elected unanimously, as follows:

Joseph Mendelsohn, New York, President.

A. W. Kaercher, Chicago, Vice-President.

W. S. Fuller, Hartford, Treasurer.

Jerome Waller, New York, Secretary.

The president announced the following appointments:

Directors, 1923-1924 Class

Benno Rosenwald, New York.
E. A. Calves, Philadelphia.
Chas. Emory Long, Lancaster.
T. W. Stewart, Hartford.
Henry Fisher, New York.
Geo. M. Berger, Cincinnati.

1924-1925 Class

Leo Leventritt, New York.
Fred Block, New York.
B. A. Kaiser, Boston.
Milton Ranck, Lancaster.
J. Major Newburgh, Hamilton, O.
Jos. Wedeles, Chicago.

The meeting adjourned until the first week of June at Lancaster, Pa.

The Banquet

The Banquet at the Waldorf-Astoria, Tuesday evening, winding up the program of the National Cigar Leaf Tobacco Association's Silver Jubilee Convention, was "the greatest and grandest ever." Nearly three hundred enjoyed the hospitality of the New York Leaf Tobacco Board of Trade in the Grand Ball Room of the famous Hotel.

The Entertainment Committee, John H. Duys, Chas. W. Dingnan and Harry S. Rothschild, deserve everlasting credit from all those who were fortunate enough to be present. As if the splendid banquet was not sufficient, they provided an excellent Keith Vaudeville entertainment, among the acts being the widely known Gus Edwards' Revue.

Each guest was presented with a silver cigar cutter as a souvenir of the occasion. The menu cards were heavily embossed with silver.

Tobacco Trade Good

INDIANAPOLIS, Ind., June 2.—Sales of sporting goods have increased, and are materially larger than a year ago. Prices are steady. Cosmetics and toilet articles have increased in volume, somewhat, but the business is not as large as a year ago because of bad weather. Sales of vacuum bottles are slower than usual.

Cigars, cigarettes and tobacco are in good demand, and, although there have been advances in only two brands of cigars, there is a stronger feeling in the market, local dealers say. The reason is that labor costs have advanced, both in the producing districts and in the mills. Pipes, and other such smoking equipment are out of season, and sales are slower.

The wholesale grocery business has been practically featureless for the week, except for a slight decline in sugar prices. Wholesale quotations have dropped about 1-7 cent a pound during the week. Some lines of canned goods are more active, but the general list is moving in a normal volume, according to dealers.

San Francisco

(*Continued from page 27*)

the cigar manufacturers there are very optimistic as to the future. While the five-cent cigars are the big sellers, they find a growing market for the two-for-fifteen. Astoria is rising bravely from its ashes, and Mr. Montgomery found three of the well-established dealers already in new stores and rejoicing in a prosperous business. And here's hoping that Astoria may find that the great fire, as in the case of San Francisco, was only an incident in its prosperity. One of the dealers complaining is a general jobber, and he lives in Oakland.

A Near Perfect Machine

H. Bercovich, the popular manager of the house of H. & S. C. Bercovich, says it is a little disconcerting to find of how little importance he is in his own business. Mr. Bercovich has recently been taking some considerable trips with his family for rest and enjoyment which he has long ago earned. But coming back between times he has found the business running right along just a little better than when he left. Charles the Great is just as great, San Felice is just as happy, and Palo is still just as good a pal. "In short," he says, 'it doesn't look as if they needed me." It has been said that while it takes a smart man to keep a business running well under his own direction, it takes a genius to organize a machine that will run by itself. So Mr. Bercovich really has no ground to feel sore at himself. It is simply the result of giving to an organization the friendly spirit that makes all concerned feel that it is in part their own institution.

Among our travelers to and fro, Manny Cohn, the H. L. Judell & Co. salesman, is having a prosperous trip in Nevada and northern California. He reports the election of E. E. Roberts, as mayor of Reno, a man of liberal policy and an open friend of the cigar dealers.

J. C. Chuck, for Frankel, Gerdts & Co., has been having an unusually successful trip through southern California.

Max Crow, the veteran salesman, has been having a splendid run of success with the Manila line of Henry W. Peabody & Co.

Harold Horn, of the Golden State Leaf House, found business opening up well in Humboldt and Mendocino counties. He found too much up and down and round and round to the roads to make machine driving a joyful occupation.

Michalitschke Bros. & Co. have placed the distribution of the Perfection Mais cigarette paper with the Southern Tobacco Co., of Los Angeles, Santa Barbara and San Diego. This company has also taken on the distribution of the Mark Hopkins eight-cent and two-for-fifteen, for Tegge & Co., of Detroit.

H. A. Jones, western sales manager for the General Cigar Co., reports wholesale and retail business both prospering. One particularly gratifying thing is that collections are exceptionally good.

Old Cigar Indian

(*Continued from page 42*)

and Congress was going to be openly wet next December.

"Well, I work over that for two or three days and don't get anywhere with it when an old timer comes along and tells me that it has something to do with the Silver Jubilee.

"'What Silver Jubilee?' I asks.

"'Greater New York's,' says he, 'twenty-fifth anniversary.'

"'What's biting you?' I hollered. Twenty-five? Why I've been standing here almost that long and I was twenty years in Catharine street.'

"'You don't understand,' says he. 'It means twenty-five years since we took over Brooklyn, Queens and Richmond.'

"'What is there about that to celebrate?' I asks. 'Richmond wants to secede and Queens don't pay any attention to the City Hall anyway, running things to suit herself. However, I'm glad to hear that somebody's celebrating something, and I may let the boss paint me and get in the parade myself. Probably march with the Old Guard—a fine body of men. I'm not so old that I couldn't do my work in the movies two years ago with Kenneth Harlan supporting me and Estelle something or other with her arm around my neck in the auction scene.'"

The reporter took leave of John Kickapoo after the old boy threatened to become maudlin.

"Well, so long, kid," said John. "I may see you in the parade. And, say, if you find out what S. N. Y. S. J. means let me know, will you?"

Connecticut

(*Continued from page 29*)

meet the requirements of the insurance companies, in order to give a reduced rate of premium.

There seems to be considerable complaint about "wildfire" in seed beds, and in some sections of the Valley many beds have been practically ruined by it. The vote for Directors of the Association is now on and the final vote is now being made. It must be completed before June 12. From the primary vote just closed, it seems that the old directors met with favor in all the distircts, as there is a contest in only two of ten. A few weeks ago there was considerable criticism by some growers about the assorting in warehouses, but at the present time this has quieted down, and now the growers have less to say against the management.

Edward A. Brear of Hatfield, Mass., who was formerly with S. Rossin & Sons, of New York City, leaf tobacco dealers, will now represent A. & S. Hartman Co., of this city, and will operate his warehouse for them. His house has a capacity of 3,500 cases.

Tobacco Best for Barter

The members of the Windsor Locks Gun Club are making up a shipment of Connecticut tobacco to send to Donald MacMillan, to take on his trip to the Arctic regions, where he soon goes for exploration purposes. Mr. MacMillan recently delivered a lecture at Windsor Locks and said that tobacco was one of the best things that he could carry with him on his trip, for barter with the natives of the regions that he was to explore and the Windsor Locks people are getting up a shipment to introduce a Connecticut product to the natives of the Arctic regions.

Attendants at N. C. L. T. A. Convention

Among the Hartford leaf dealers attending the National Cigar Leaf Tobacco Association convention in New York, are E. A. Hatheway, W. S. Fuller, B. L. Haas and S. A. Fassler.

The rain of Sunday afternoon was much welcomed by the growers as the ground was getting very dry on top and with the recently set plants the rain was a great benefit to start them off.—X. Y. Z.

Burley Locals

LEXINGTON, Ky., June 2.—Organization of locals was reported to the field service division of the Burley co-operative from Poplar Grove, Barren county, where A. V. Beatty was elected chairman, E. W. Simmons vice-chairman and J. D. Young secretary, and from Alexandria, Campbell county, where the growers elected Clyde Clark, of Alexandria, chairman, and William Kinney, of California, secretary.

Resolutions Against Outside Use of Name, Tampa

Cigar Manufacturers Association of Tampa Makes Strong Protest—Key West Cigar Manufacturers and Jacksonville Chamber of Commerce Join in the Denunciation.

The great progress made in the manufacture of cigars in Florida, and the high reputations many of the Tampa and Key West brands have earned, have apparently led certain "outsiders" to use the names of the Florida cities, and other misleading means, to secure business for themselves. These questionable methods, naturally, have aroused resentment on the part of the Florida manufacturers whose good reputations have been traded upon, and who may suffer loss as a result of the acts of designing persons in other parts of the country.

Pass Resolutions

The Cigar Manufacturers' Association of Tampa recently passed the following resolution:

"*Whereas,* certain manufacturers of cigars operating their factories outside of the State of Florida have, in recent years, made the practice of adopting brands, trademarks and tradenames indicating that their cigars are manufactured at Tampa, Key West or Jacksonville in the State of Florida, thereby seeking to obtain advantage of the reputation of those cities as centers of the manufacture of high grade cigars and deceiving the public into purchasing goods under the belief that they are manufactured either at Tampa, Key West or Jacksonville, and

"*Whereas* such practices are disreputable, unfair and unjust to the public, as well as to the manufacturers of cigars located at Tampa, Key West and Jacksonville, now, therefore, be it

"RESOLVED, by the Cigar Manufacturers' Association of Tampa, Florida, that all trade journals published in the interest of the tobacco industry be, and they hereby are earnestly requested to refuse to carry any advertisement for, or give any publicity to, any brands of cigars made by manufacturers under any such misleading labels, brands, names or trademarks."

The foregoing resolution was adopted by the Tampa Board of Trade, the Jacksonville Chamber of Commerce, and the following Key West cigar manufacturers:

E. H. Gato Cigar Co., by E. H. Gato, Jr., 2nd vice-president.

Mi Favorita Cigar Co., Inc., by A. W. Arnold, president.

American Cigar Co., Key West Branch, by D. Quintana, manager.

John Wardlaw, by John Wardlaw.

An Ancient Grievance

The problem the cigar manufacturers of Florida are facing is as old as commerce itself. When pioneers in business blaze a new and successful trail, there are always many less enterprising individuals ready to follow in their footsteps, with the view of sharing the rewards of the pioneers' labor, and even of seizing all the opportunities created by the originators.

The tradesmen in Europe during the Middle Ages were greatly perplexed by the losses caused them by the widespread imitation of their products, and in order to protect themselves they organized trade guilds, and subsequently, instituted the use and registration of trademarks.

Imitation is always regarded as the sincerest form of flattery and as a testimonial of excellence. But the dishonest imitation is no benefit to the imitated.

The deceptive trade practices which the Florida cigar manufacturers complain of assure the world that the cigars produced in Tampa, Key West and other Florida factories, are of such commercial value and importance that less reputable manufacturers and dealers elsewhere find it worth their while to imitate them, even in a crude way.

To be sure, there is very little consolation in this clumsy form of "flattery" for the manufacturers of the genuine Tampa, Key West, Jacksonville and other Florida-made cigars.

Their annoyance may be assuaged only by the vigilant exposure of all efforts at imitation, and the prosecution of all who are guilty of false and dishonest business practices.

Typhoon Ruins Manila Tobacco Crop

Tobacco growers in the Philippines have received a hard blow. Press dispatches, Sunday, told of a destructive typhoon in Northern Luzon. The storm was described as the worst that had happened in recent years. According to the earlier reports, practically the entire tobacco crop in the Cagayan Valley was destroyed. Later cables, containing more authoritative information, state that the Cagayan tobacco crop is not a total loss but the damage caused by the typhoon will exceed 50 per cent. The utter ruin of a great part of the crop in the biggest and best Philippine tobacco district means an immediate jump upward of the price of leaf and possibly a reduction of the Manila cigar output.

Schulte-Park & Tilford Negotiations

It has been known for some time that the Schulte Retail Stores Corp. has under consideration plans for the purchase of Park & Tilford, but the negotiations are of a purely preliminary character and have not advanced to a point where they permit of detailed discussion. Schulte has obtained an option for the purchase of the concern which runs for a period sufficient to permit examination of the assets and business of Park & Tilford.

Tobacco Salesmen End Season With Lively Session

The final meeting (before the summer recess) of the Tobacco Salesmen's Association was held last Friday at the Hotel Pennsylvania. President A. J. Silett was in the chair.

A big delegation from the Newark branch were present, including their initiation team, who, under the chairmanship of President Abe Brown, performed the initiation ceremonies on eight candidates. Several of the novitiates will remember for a long time to come what it means to become a member of the Salesmen's Association.

J. J. Ollendorf and Sydney Freeman paid their compliments to the T. M. A.'s convention at Washington. Mr. Ollendorf stated that the National Board expected to announce, within a few days, new branches at Washington, Baltimore, Buffalo and Philadelphia.

The National Board of Tobacco Salesmen have contracted for a booth at the forthcoming Tobacco Exposition, to be held at the 71st Armory, New York, next January. The association will hold their convention during show week and also a big banquet at one of the leading hotels.

National Pipe Week

In order to help further the movement for the observance of National Pipe Week, from June 23 to 30, the leading pipe manufacturers have jointly prepared an attractive announcement, which appears on the back cover of this issue of TOBACCO. Dealers and others in the trade who have convenient windows or other available spaces can help the good work along by placing this issue of TOBACCO in the most conspicuous place accessible, so that the announcement on the back cover may be seen and read by callers or passers-by.

Amsterdam Prices Rule Higher Than Ever

AMSTERDAM, Holland, June 9.—At yesterday's Sumatra inscription, American grades brought higher prices than ever. Upwards of 3,000 bales were bought, however, for the United States market. The principal American buyers were:

Cullman Bros., 1,055 bales, including Deli My/M; Deli My/Tkok; Deli My/A B; Deli My/P B; Deli My/Toewa.

Manus, Muller & Co., 530 bales, embracing 287 bales of Senembah My/P, and the balance in various other fancy marks.

H. Duys & Co., 450 bales, comprising Deli Ba My/A; Deli Ba My/J H; Senembah My/M, and various other fancy lots.

General Cigar Co., 312 bales of Deli My/E.

American Malaya Trading Co., 210 bales of Senembah My/Sennah; Deli My/E. and S. S. T. Co./B.

E. Rosenwald & Bro., 210 bales.

American Cigar Co., 177 bales.

L. Schmid & Co., 100 bales, including S. S. T. Co./B and various other fancy marks.

Herzog & Sarluy, 85 bales.

D. Dreux, Inc., 40 bales of Senembah My/Sennah, and Deli My/A B.

Bayuk Bros., Philadelphia, 40 bales.

Department of Commerce Interested in Tobacco

Tobacco Specialist in the Tobacco Division Urges Full Co-operation Between the Tobacco Industry and the Department—Clearly Indicates Benefits to Be Derived.

Hon T. L. Hughes, Tobacco Specialist in the Tobacco Division, Department of Commerce, delivered the following address at the Silver Anniversary Convention of the National Cigar Leaf Tobacco Association, in the Woolworth Building, New York, June 4:

Gentlemen of the Convention:

It is indeed quite a pleasure to attend the annual convention of this association, which has been such an important factor in the tobacco industry of the United States for a quarter of a century, and it is my pleasant privilege to be the bearer of a message of cordial greeting from Dr. Julius Klein, Director of the Bureau of Foreign and Domestic Commerce.

I am here to further evince to you the interest of the Department of Commerce in the tobacco industry, which has been expressed so admirably by the Secretary of Commerce, Mr. Hoover, and the Director of the Bureau of Foreign and Domestic Commerce, Dr. Klein, to other assemblages of factors in the industry.

Constructive Development

There has been a constructive development in the activities of the Department that has made the Bureau of Foreign and Domestic Commerce a great liaison between business and the Government, and it is the purpose to employ business methods in its administration as practiced in successful commercial enterprises, so that American business men may feel that their interests are fully comprehended in their relations with the Government.

Reorganization of the Bureau

Soon after he became Secretary of Commerce, Mr. Hoover conceived the idea of establishing in the Bureau of Foreign and Domestic Commerce, divisions devoted to the promotion of trade in their respective commodities. The result of Mr. Hoover's idea was the reorganization of the Bureau of Foreign and Domestic Commerce into divisions, to embrace the many great industrial groups, and such technical divisions as were considered essential to interpret current information regarding tariffs, commercial laws, transportation, etc., for the efficient administration of the commodity divisions.

Men in Charge Chosen from the Industry

The men in charge of these divisions have been chosen from the industries themselves, so that they may bring to the Department not only specialized knowledge and sympathetic understanding of these industrial groups, but in turn may interpret to our foreign staff the class of information most useful to the trade.

Tobacco Divisions Established

The importance of the tobacco industry in both domestic and foreign trade has been fully recognized by the Department in this respect. A division whose activities will be directed toward the promotion of the industry, is being established and with the full co-operation of the trade, a service will be rendered to tobacco growers, dealers, manufacturers and others comparable to that so efficiently

Manufacturers buying

Sumatra or Java Tobacco

without looking over our line, do themselves an injustice.

Our stock comprises such enormous quantities and of such varied selections, that we are bound to suit the most fastidious buyer.

Our purchases of the 1922 crop of Sumatra are upward of 10,000 bales.

eveloped for the trade in our other ıajor industries.

Co-operation with Industry

We want you to realize that the De-artment desires to continue to co-operate vith American business. You will prob-bly recall the manner in which Mr. Hoover handled the many big problems luring the war. When a problem arose ıe called together some of the best men n the particular industry which it most ffected and said—"Here is the problem, rely upon you to work it out." Men sually arise to a trust when fully trusted, nd there are few occasions or times when hey fail.

Commerce Relations Committee Selected

Today the same policy is being pur-ued. The first effort of the Department f Commerce, in treating with one of the reat industrial groups, under the reor-anization, is to get in touch with the reat trade associations and try to solve he commercial problems of the country vith their co-operation. As an example f this, representatives from all branches f the tobacco industry were recently in-ited to Washington to discuss with the Department the program of work to be ursued, and to advise us how we could est serve their industry with our organ-zation, consisting of the staff in Wash-ington and more than a thousand repre-entatives in all parts of the world.

As an outgrowth of this conference, a ommittee, composed of five representa-ives from various branches of the to-acco industry, was selected to co-operate vith the Department in the promotion of he tobacco industry, and to act in an ad-isory capacity on problems arising in the Department concerning the trade.

This committee, known as the Com-nerce Relations Committee, is composed f your esteemed representative in Wash-ington, W. L. Crounse, Chairman; B. G. Meyer of the General Cigar Company of New York City; Charles Dushkind, Man-aging Director of the Tobacco Merchants Association, of New York City; T. M. Carrington, President of the Tobacco As-sociation of the United States, at Rich-mond, Virginia, and James C. Stone, President and General Manager of the Burley Tobacco Growers Co-operative Association at Lexington, Kentucky.

Special Agricultural Inquiry

There is another matter which I desire o call to the attention of the members of his association, and that is the special agricultural inquiry that is being under-aken by the Department of Commerce, nder special authority granted by Con-gress during its last session. There have been many conflicting statements eman-ating from various sources regarding the economic condition of our principal agri-cultural products and the Department is undertaking a thorough study of the con-ditions affecting our international trade, in order to determine the true situation as it exists today. By virtue of its position in our international trade, ranking fourth in our export agricultural commodities, and constituting more than seven per cent of our total exports, tobacco has been in-cluded in this special survey that is to be made between now and October 1.

The general intention back of this work is to provide a fund of information and a basis of fact upon which a policy for marketing agricultural products may be predicated.

It is planned to make a thorough-going statistical analysis of trade in tobacco in each important consuming and producing country, the object of which is to com-pare the present trend of our own trade with that before the war and show the relation of our trade to that of other countries and to make a general analysis of the trends shown. The second phase of this study deals with the question of export facilities and methods. We plan to study the supply of credit, methods of financing followed by exporters and im-porters now as compared with those be-fore the war, as well as questions of transportation, storage, trade routes, free ports, and a large number of related sub-jects which have a bearing on the future of our tobacco industry.

Facts to be Developed on Sumatra, Cuban and Porto Rican Crop

It is probable that some pertinent facts can be developed on the tobacco crop of Cuba, Dutch East Indies and Porto Rico, in connection with this work that would be of paramount interest to the members of this association. The Department wel-comes any suggestions you may have to make in this respect.

In this work, the tobacco industry is in a position to have a real service rendered them, such as has not heretofore been offered. Therefore, I earnestly solicit the fullest co-operation of this association with the Department in this undertaking, and can assure you that if we can have the support of the members of this asso-ciation, as well as other important trade associations in the tobacco industry, some-thing will be accomplished of real value to the industry.

Federal Reserve Board on Tobacco Situation

WASHINGTON, D. C., June 13.—The Federal Reserve Board in its monthly statement has the following to say in connection with the tobacco situation:

"The season for the marketing of leaf tobacco practically drew to a close in April. Sales of all types of leaf tobacco by growers in Virginia were greater than in the preceding season, amounting to 161,245,000 pounds prior to May 1, compared with 95,218,000 pounds in 1921-22. Prices received by growers for both dark and bright tobacco were higher than in the previous season. The greatest increase was in the average price per hundred pounds for bright tobacco, which was about 45 per cent higher than in the preceding season.

"The average price for dark tobacco was $18.81 per hundred, compared with $18.66 in 1921-22. Increased production and higher prices during the season yielded the growers of Virginia approxi-mately $42,000,000, compared with $19,-000,000 in 1921-22. Producers' sales in North Carolina totaled 276,813,000 pounds, at an average price of $27.41 per hundred pounds, compared with 251,682,-000 pounds at an average price of $25 per hundred in 1921-22.

"Final returns for the North Carolina growers were approximately $76,000,000, an increase of $13,000,000 over the pre-ceding year. In the St. Louis district the growers are rapidly preparing their ground for planting and plant beds are generally in good condition. In the Richmond district, although plants were injured somewhat by cold weather, transplanting has begun in the southern counties. In the tobacco sections of the Atlanta district the late cold weather damaged the early planted tobacco and considerable replanting was necessary.

The Demand for Cigars

"The demand for cigars in the Phila-delphia district was fairly good during April, but buying in the early weeks of May was reported not to be up to ex-pectations. Many manufacturers are in-clined to believe that retailers are stocked up and deferring purchasing until their shelves become depleted. The demand for American cigarettes is good and production is estimated at above 85 per cent of capacity. Prices for cigars and cigarettes are generally firm and un-changed, and leaf tobacco prices are ex-ceedingly steady. Stocks of cigars are reported to be moderate."—LAMM.

Duys' New Crop Remidios in Good Condition

Jacob Labe, of H. Duys & Co., has returned from Cuba, where he inspected his company's big purchase of new crop Remidios, which will be packed at Ca-maguini, under the supervision of their buyer, Pedro Valledor. It is noteworthy that this section has produced the best tobacco of the 1923 Cuban crop, and H. Duys & Co. have been fortunate in secur-ing the highest quality of this famous product.

From the Wild West

Sam Friedman, of the Cuban Cigar Co., of Denver, Col., was a recent visitor to the local leaf market.

Wisconsin Growers Start Transplanting Crop

Shrinkage in 1923 Acreage Indicated—Practically All 1922 Tobacco Out of First Hands—Market Showed Strength Right Up to "Finish"—Pool Opens Two More Warehouses.

EDGERTON, Wis., June 9.—There is little news of interest the past week. The old crop is about gone out of first hands. The members of the trade are glad to see that happen, as weak holders are evidently impossible to find. As the last of the '22 crop goes out of first hands, the market absorbing it retained every earmark of strength to the very last.

As to the few cases of old tobacco remaining in the state, there is nothing to report. Inquiries are being quietly made for future reference, however, and the owners appear to be resting very easily.

Weather Man Becomes More Considerate

The growing crop is having fine weather for this season of the year. A few growers have started to transplant, and many acres will be in by the close of the coming week. Several fine rains were produced by the weather man the last week, and the ground is in excellent condition.

Decreased Acreage Indicated

The growers have had a difficult time to catch up with the season, owing to the late spring, and the '23 crop acreage has shrunk from seven to ten per cent, perhaps, as a consequence, from the acreage estimated to be planted for '23 a month or six weeks ago.

Making Some Headway with Assorting

The co-op is gradually adding to its assorting crew. In some cases, farmers have come in off their farms to work at the bench for the pool. In Stoughton, the pool is opening two more warehouses; in Sun Prairie, one warehouse, and they are going on much faster with the assorting than heretofore. Still, the managers have not yet the amount of help they really wish for, but they are in better shape for help than heretofore.

Nearing End of Packing Season

Ed. Haskins, the well known Janesville packer, has ceased his season's run at Janesville, after putting up a discriminating packing. Other warehouses are still running, but the end is in sight for most of them.

Nothing further has been heard of the Pool-Bekkedal suit. Whether it will come up at the fall term of the Supreme Court is often speculated upon.

Buying Chickens Before They Are "Hatched"

It is rumored that a few crops of 1923 have been bought in the north by Sweeney. This is somewhat startling news, but it will not become general, because there are only a few growers with whom the buyers would take such chances before the crop is even in the ground. The growers, also, are against the plan, and it is only a few who could be persuaded to do so.

Back from Gotham

W. Dickenson and Wm. McIntosh came back from the Cigar Leaf Tobacco Convention at New York, and were well pleased with their trip.

Tom Ellingson, Eisenlohr's state head, is slowly recovering from his long illness, and every one was overjoyed to hear he takes an hour or two outside, once or twice a week, nowadays. At present, he is taking treatment in Milwaukee for a few days.—BADGER.

Full Co-operation Urged By Committee

WASHINGTON, D. C., June 13.—The Commerce Relations Committee of the Tobacco Industry, which was appointed at the recent conference held here, is sending the following letter to the trade:

"Realizing that during the recent business depression the agricultural interests of this country suffered very severely, the Department of Commerce has undertaken to make a thorough study of the conditions affecting our export trade of the principal agricultural commodities. For this purpose Secretary Hoover has appointed a committee, comprising representatives of agricultural organizations, prominent exporters of the principal products, together with agricultural economists, representatives of financial institutions and of the United States Departments of Agriculture and Commerce. This committee recently met and outlined the plans for an exhaustive investigation into all the facts bearing upon the present situation and the outlook for our future export trade in these products.

To Make Thorough Analysis

"It is planned to make a thoroughgoing statistical analysis of trade in the principal farm products in each important consuming and producing country. The object is to compare the present trend in our own trade with that before the war, to show the relation of our own trade to that of other countries and to make a general analysis of the trends shown.

"In another phase of this study it will be the purpose of the Department to determine facts regarding our export facilities and methods; the supply of credit, and methods of financing now employed by exporters, as compared with those before the war; the quantity of our products entering into the re-export trade of the world; imports as they relate to our agricultural industry; as well as to study the question of transportation, storage, free ports, and a large number of related subjects which have a bearing on the future of our export trade.

"In view of the fact that tobacco is one of the most important export agricultural commodities, entering into our international trade in greater proportions than any other agricultural product, except cotton, the Department deems it expedient to develop some facts along the lines hereinbefore mentioned, for the promotion of the tobacco industry. To make this study it is planned to have representatives of the Department of Commerce call on various factors in the tobacco industry to discuss with them the situation as they find it in their business.

Should Furnish Helpful Suggestions

"As a committee recently selected to co-operate with the Department in its promotion of the tobacco industry, we respectfully and urgently request that you give the Department your full co-operation in this work and furnish the representatives of the Department with information and suggestions that will help to complete this study.

"In asking for your co-operation we desire to state that we are assured by the Department that the information which you may furnish will be incorporated with information furnished by others to form the background of this report. The practices of individual firms will not be disclosed.

"The object of this work is to be of constructive assistance to the tobacco industry, and we feel sure that a clear statement of the pertinent facts obtained from the information which we are asking you and others to furnish will do much to bring about such readjustments as are needed and will directly benefit the tobacco industry as a whole."

This was signed by the committee, which is composed of the following: W. L. Crounse, James C. Stone, Charles Dushkind, T. M. Carrington and B. G. Meyer.

To Visit Cuba

Ira Strouse, of Strouse & Holzman, 197 Water Street, plans to sail for Havana on June 16 to make a personal investigation of the new crop in Cuba.

How we feel about
JOHN RUSKIN
Best and Biggest

2 for 15¢
8 cents each

The dealers' success—and ours—depends upon permanent trade. We'd both go out of business if we depended upon the fellow who shops around from store to store, from cigar to cigar.

Our first consideration, therefore, has been to make the John Ruskin Cigar so good that it will make permanent customers for ourselves and our dealers.

The record for "repeats" that this cigar has made proves that we have moved in the right direction. It holds the trade of every smoker who is seeking the "Best and Biggest" cigar on the market, at its price.

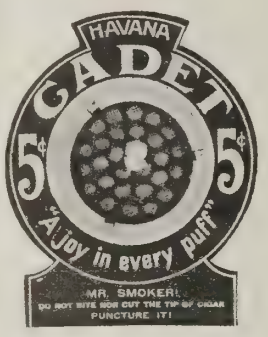
To Consider Change in Bankruptcy Law

Many lawyers, representatives of trade organizations, and merchants are to attend a hearing in the Federal Court Building at 10 o'clock on June 30 to consider changes in court rules governing the administration of bankruptcy. A suggestion made recently in a report by the Committee on Bankruptcy of the New York Credit Men's Association that a rule be adopted preventing receivers and trustees from retaining as counsel the attorneys for petitioning creditors in bankruptcy proceedings, will be considered at the meeting and other suggestions made by various interests for the betterment of bankruptcy practice will also be discussed.

Formal notice of the hearing, issued by Alexander Gilchrist, Jr., clerk of the Federal Court, contains an invitation to everybody to attend and present his views. Notices of the meeting are being forwarded to a number of commercial credit and legal organizations, including the following: The Merchants' Association of New York, American Bankers' Association, Tobacco Merchants' Association of the United States, Alphabet Association, Chamber of Commerce of the State of New York, New York Credit Men's Association, Wholesale Shoe League, New York Bar Association, New York County Lawyers' Association, Associated Dress Industries of America, Silk Association, Fifth Avenue Association, Merchants' Protective Association, American Association of Woolen and Worsted Manufacturers, National Association of Worsted and Woolen Spinners, American Clothing Manufacturers, Inc., National Association of Clothiers' Credit Bureau Association, Woolen and Dress Goods Merchants' Association, Wholesale Merchants' Association, Cotton Garment Manufacturers of New York, Wholesale Coal Trade Association, National Jewelers' Board of Trade, Paper Trade and Pulp Association, Paper Trade Association, Rubber Association of America, Toy Manufacturers of the United States, Fur Merchants' Credit Association, Associated Dress Industries of America and many more.



The Federal Judges, it is said, are greatly interested in the meeting and will assist in every way to solve problems incidental to the administration of bankruptcy, which has been so much criticised.

An Up-State Pilgrimage

W. P. Miller, of the American Sumatra Co., is visiting his Empire State clients this week.

Burley Pool May Buy Bernard Warehouses

GREENEVILLE, Tenn., June 8.—The deal f the purchase of the two large tobacco rehouses in this city owned, by the rnard's, while not definitely settled, in probability will be consummated within next few days. The proposition of . Bernard offering the two large houses the consideration of $200,000, and rying with it the expense of operation coming season, which they had obli ed themselves for and amounting to nething like $30,000 additional, has n submitted to the Kentucky officials ough their vice-president, Mr. Barker, o with his architect, had been in the y for several days trying to put over deal.

The passing of the two local houses o the hands of the pool does not mean t the co-operative plan of selling to co will be effective in Greeneville, but the contrary their efforts to bring ut such a situation has only had a dency to arouse both business men and mers generally to the importance of an anized fight against such a plan.

Such a movement is already on foot headed by the tobacco board of de, tobacco growers of the entire Bur tobacco belt will have it made plain them what object the Kentucky co eratives have for wanting to control s market, also the inadvisability of ir entering such a corporation or trust.

Previous Efforts Seen Fruitless

An effort has been made here for sev l years to organize the farmers of this nty into the pool, but absolutely no dway had been made. By taking over o local warehouses the association nat lly expect to receive the co-operation the warehouse owners in their efforts get the planters to sign up for a period five years selling their crops through ir channel.

Their efforts along this line will doubt s be disappointing in as much as John Bernard, Sr., and John S. Bernard, refuse to be associated with sale of the properties and are ting plans on foot already for the erec n of two additional warehouses here, be ready for sales when the season ns in November, which, with the er four sales floors, will be sufficient handle even the increased sales which anticipated.

Farmers generally, not to the least ent have looked favorably upon the operative plan of selling their tobacco. ey know that in sections where the ntucky association have been able to anize much dissatisfaction is said to vail.

Wide Price Difference Asserted

The farmers have been receiving upon average of $32 per hundred for their ps on the open market here, while the hest average to have been received on co-operative markets has been about . They realize immediately for their p when they sell it on the open floor, ting their cash in a lump sum within few hours after their tobacco reaches market.

Members of the pool cannot do this, entimes being required to wait many g months before they get what the ociation decides to sell their crop for, small advance possibly being made en the tobacco is placed in storage.

When it was announced yesterday that deal for the two warehouses was be considered, pandemonium reigned oughout the business district of the y until after the situation was ex ined. The passing of the two houses ounts to nothing as an organization the farmers is to be effected before houses can be utilized.

Looking Up in Hoosier State

INDIANAPOLIS, Ind., June 9.—Flying at eight of 10,000 feet above Indianapolis ently, in a small scout plane, Capt. rek Shepperson, an ex-officer in the itish flying corps, wrote the words icky Strike" in the sky, advertising the ne of a cigarette made by the Ameri Tobacco Co. Thousands of people nessed the wonderful performance.

Capt. Shepperson said that the charac istics of the aviator's individual hand iting also affect the writing in the sky, and that it came quite natural to him to follow the same quirks and curves which he would have made had he been writing on paper. The first word was printed. This, he said, was because the letters were more easily formed in the air in this way. The letters in the second word, however, lent themselves to script and were written.

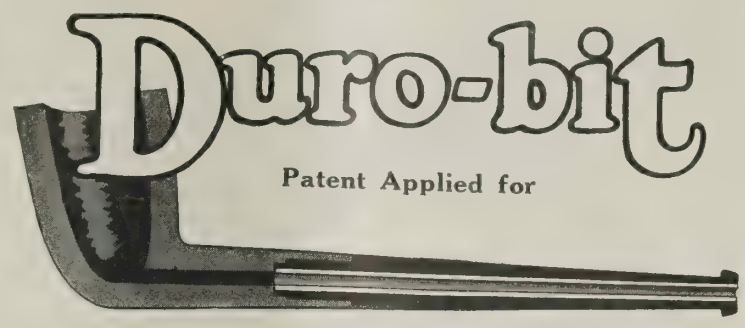
Market Comment

There has been more animation in the market here than for some time back, all grades of tobacco participating, Western Leaf and Strips with Semi-brights contributing the bulk of the sales.

The latest advices from the Bright districts are that a successful planting has been made, though the weather up to now has been against the necessary quick growth of the plants to make good tobacco.

The character of the 1922 crop Kentucky tobacco is proving more suitable for spinning than the two previous imports.



The Nyasa crop now being handled is smaller than usual, and is reported as deficient in quality, which is only what can be expected from the conditions prevailing whilst growing.

DURING NATIONAL PIPE WEEK

FEATURE

Duro-bit

Patent Applied for

Mouthpiece Reinforced with Aluminum Tube—

ABSOLUTELY UNBREAKABLE

PLEASING TO THE TONGUE

ALUMINUM IS MOLDED IN THE BIT

THE BIT CANNOT BREAK AT ANY POINT

The aluminum runs from tip to tip of the bit. Reinforcing bit throughout entire length.

With this Pipe Goes a Guarantee of Perfect Durability

The bowl is guaranteed against cracking or burning through. The bit is guaranteed against breaking.

The permanent aluminum lining prevents bent bits from straightening and straight bits from warping when exposed to sunlight or heat.

Made in all popular shapes to retail at 50c, 75c, and $1.00

Milano for the President for Every Day in Week

Handsome Set of Seven WDC Milano Pipes Presented to Noble Warren G. Harding, by Mecca Temple, Ancient Arabic Order of Nobles of the Mystic Shrine.

Recently a great deal of publicity was given to a statement made by President Harding, to the effect that when he is besieged by trouble makers in Congress he finds much consolation and comfort in smoking a pipe.

In selecting the gift they could think of no more appropriate token than a set of WDC Milano Pipes.

The presentation of this gift, was made by Arthur H. Diamant, Illustrious Potentate of Mecca Temple, and was one of the interesting events of the Shriner's Convention in Washington.

The set contains seven assorted Milano Pipes, inclosed in a handsome red plush lined, hard leather covered case, bearing a solid gold plate inscribed as follows

"Presented to Noble Warren G. Harding, President of the United States, by Mecca Temple, A. A. O. N. M. S. June, 1923.

This presentation is doubly interesting to the trade which at the present time is preparing for the observance of National Pipe Week, June 23 to June 30, inasmuch, as the Chief Executive of the Nation publicly announces his preference for the pipe, and that this is recognized to the extent of having an organization such as the Shriners select the pipe as a worthy gift for the President of the United States.

President Harding and the Seven Milano Pipes Presented to Him by Mecca Temple, A. A. O. N. M. S.

About the same time that this announcement appeared, Mecca Temple (New York City) of the A. A. O. N. M. S., decided to present a token of their esteem and good wishes to President Harding, a member of the Order, at the convention of the Imperial Council of the Ancient Arabic Order of Nobles of the Mystic Shrine held in Washington, D. C., on June 5, 6, and 7.

Second Tobacco Show

Jonas J. Ollendorff, president of the National Board of Tobacco Salesmen's Association, makes the following announcement:

"At a recent meeting of the Board of Governors of the National Board of Tobacco Salesmen's Associations, a resolution was adopted endorsing the Second Tobacco Show to be held January 28 to February 3, 1924, at the 71st Regiment Armory, New York City.

"In conjunction with this, I would like to state, in my official capacity as president of the National Board of Tobacco Salesmen's Associations, it has been with a great deal of pleasure that I have received so many favorable comments from manufacturers and jobbers of the prospect of gathering in New York next year to witness a *greater show* and meeting their old friends and business associates.

"It may also interest you to know that most of the salesmen in and around New York, as well as the manufacturers who exhibited, have expressed to me the opinion that they opened more new accounts and received more orders from a more widely scattered territory at the last Tobacco Show, naturally in less time than it would have taken to cover the territory whence these orders came.

"The National Board of Tobacco Salesmen's Associations is entering upon a very prosperous time and we shall, in a very short time, have some very interesting news for you regarding the organization of many new branches.

"We are for anything that is for the good of the Tobacco Industry."

ROCHESTER, N. Y.

Coupon Day

By LESLIE E. DUNKIN

One of the leading tobacco retailers a Western city, has solved a combina-on of problems by making use of "Cou-on Day" in his business. This has met ith such success that it has become a rmanent feature in his business.

Every smoker or tobacco-user or would-be tobacco-user in the city and e neighboring country knows that ch Wednesday is "Coupon Day" at is cigar store. All look forward to ch Wednesday, as most people do to aturday's specials in the business life of e city. From the point of view of the ore, "Coupon Day" is as big a day, if t bigger than Saturday, and it relieves a great extent the usual rush at the st of each week.

In the Tuesday evening and Wednes-y morning papers of each week, the tailer has a "Coupon Day" advertise-ent, that ranges from a small one to most half a page. This is a regular ature of his daily advertising. The lvertisement is divided into small cou-ns. Each coupon contains one item of erchandise with the regular price and e "Coupon Day" price. In the case of naller or group things, quite a number different items are placed on the one upon. The number of coupons in each dvertisement ranges from one on up, pending upon the size of the entire lvertisement.

Bargain Hunters Are A Factor

"Coupon Day" solved the sale prob-m. Bargain-Hunters may be the butt many jokes, but they are a factor in usiness that must be used. The store at can have the big slashing sales con-antly, will draw the largest amount of ade. No store can do this with a great nount of business safety. Also there is ie great expense of marking down all e articles of merchandise for the sale eriod. With the coupons, the retailer es not have to worry about sale prices, r no coupon bargain can be had un-ss the customer presents the coupon. his coupon contains the special price. In ch part of the store is hung the cou-n advertisement for that Wednesday as to avoid the presenting of coupons week old, thus getting the sales all ixed up and taking an unfair advantage f the retailer.

Tracing Advertising Benefits

The merchant knows that it pays to lvertise, but he wanted to have some definite way to determine how it pays. The use of the coupons has given him a determining this. Each clerk keeps all of the coupons, that are turned in on sales. At the end of each Coupon Day, these are gathered up and it is a question of a short time before they know the actual effect of the advertising. It is not necessary for them to take an invoice of the merchandise before and after the sale. With this record it is but a mere part of the results of that day's advertising, for other purchases are made by many of the people seeking the bargains.

Also he desired to know which of the two local newspapers has the greater number of buying readers. This can determine largely which should have the greater amount of the advertising, whenever there is any difference in the daily amounts. Some times he has the initial letter of the paper in the lower left-hand corner of each coupon. Other times it is distinguished by a slightly different arrangement of the words or the statement of the price in the coupons of the different papers. At the end of the day's work they can glance over the coupons and find out how many morning-paper readers were in the store and how many evening-paper ones.

Approved by Local Newspapers

This is made possible by the rule that a coupon must be presented with each purchase on coupon day. Where no coupon is presented, the regular price is charged for that merchandise. For the benefit of the careless ones, he has a pile of newspapers, that contain the coupon advertisement, on sale at the front counter. This stunt is very acceptable to the local newspapers, as it is a means of selling many papers, that would not have been sold otherwise. The store gets a commission on the papers, that are sold there.

The use of the coupons encourages the customers to buy their tobacco supplies in larger quantities, as a special price is offered where larger quantities are purchased at a time. This might seem to injure a steady business, but it has been found that when the tobacco-user buys in larger quantities, he consumes larger quantities and at a faster rate than previously.

Provides Means of Clearing Out Odds and Ends and Slow Sellers

The use of the coupons reduces the necessity of a clearing-out sale to a minimum. In the planning of each coupon day, an effort is made to get at least one item from each part of the store. It eliminates the necessity of having special sales for the purpose of making room for new or different stock. One application of the coupons or three at the most, will clean out all that is necessary.

The use of the coupons eliminates the necessity of having forced sales to obtain some money to pay off large bills, when they come due. There are but few stores that avoid such sales entirely. The coupon days bring in an abundance of ready cash each week.

The use of the coupons is an effective way to introduce a new line of tobacco. If it happens to be a line of merchandise, that might be a good repeater, if once introduced to the public, the coupon man places it in a coupon for the one time. Many people buy it because they want it. Others buy it because they might want it and it is a bargain. Either way, it gives them a taste of it and they come back for more of it at the regular prices.

Creates Sales for Regular Goods

The use of the coupons brings many sales for the regular merchandise that would not have been made otherwise. Since only one or possibly two items of one class of tobacco merchandise is on the coupons for the same week, and customers frequently prefer one certain kind of tobacco, customers often find that the special-priced tobacco is not quite what they want, but there is something similar to what they want at a regular price. Rather than go to the trouble of looking elsewhere, or waiting until later, a purchase is made for the regular-priced article. The total of this increased business from the coupons cannot be determined definitely each week, as with the bargains from the coupons.

Thus by the use of the coupon days, the retailer makes the one form of merchandising solve many different problems, that otherwise would be difficult to manage successfully, without a great deal more expense and trouble.

NEW YORK, THURSDAY, JUNE 14, 1923

A COMING EVENT

Annual convention of the Tobacco Association of the United States, at the Grove Park Inn, Asheville, N. C., June 28, 29 and 30.

HELPFUL PUBLICITY DEMANDED

Herbert Kaufman told the T. M. A. Convention the unpleasant truth when he said:

"A whole generation of smokers has grown up without being educated to cigars. What sort of effort is the trade making to replace the cigar smokers who die off by younger ones? The volume of business of the industry is about as large as it ever was, but unless it is proportionate to the increase in the population and wealth of the country, it is not as large as it ought to be."

If there is little or no enlargement of production, if the consumption of cigars doesn't keep pace with the increase of population, what should be done?

If the cigar industry means to be progressive, if it intends to live and grow, it must do more to commend itself?

If cigars are far outrun by cigarettes in the race for popularity, the manufacturers and others directly interested surely know why.

If to obtain larger trade it is necessary to introduce cigars constantly to new smokers numbering a million or more each year, should those who have most to gain, by hustling, be slow and negligent in taking advantage of opportunities?

Just to prove how conservative it is, does the cigar industry have to adhere to old time practices? If ancient methods of winning customers are less effective, if failure to advertise properly is associated with a lack of prosperity or a loss of business, does a suggestion to make some changes seem unwise or out of order?

Is the average cigar manufacturer content to become a "has been"? All because he is opposed to "new fangled ideas," will he let his production decrease, his prestige vanish, his brands deteriorate or his profits disappear?

Shall it be said of him that he hasn't the wit, the courage or the energy required to get out of a rut?

Unless the cigar industry enlists the support of new smokers, as they come on, what will the future of the cigar business be?

In advertisements, and otherwise, cigarette manufacturers appeal tremendously to smokers. They spend many millions of dollars annually to obtain desired publicity. Their advertising is successful, not only because of its vastness, cleverness and continuity but also because intelligent effort is made persistently to interest and convince the individual. If a cigarette is distinctive, different or possesses unusual merit, numerous advertisements say so, unmistakably. Most cigarette advertisements are intended to convince the consumer. Cigarette manufacturers appear to be mindful of the smoker, always. To please and satisfy the consumer is their announced purpose.

Cigarette advertising is so conspicuous, effective and compelling that all of the important brands of cigarettes are on sale practically everywhere, throughout the country. The continuous demands of consumers cause retailers necessarily to have advertised cigarettes for sale.

Of the cigar manufacturers, too many ever have been disposed to leave selling problems for the retailer to solve.

By some cigar manufacturers, the smoker was regarded as a "sucker." It was urged that the average cigar smoker was unable to tell values. Too often, an attempt was made to "put over something on the public." Long profits to be obtained through salesmanship, were supposed to be the arguments most convincing to dealers.

Though experience repeatedly has proven how disastrous long shotting can be to all concerned, the majority of cigar manufacturers seemingly had not learned yet how desirable it is to acquire the acquaintance and confidence of the consumer.

Place the cigar business entirely on a brand basis. Have each manufacturer endeavor to build up the reputation of his brands. Go to the smoker with proofs of the excellence and dependability of brands. Play up the cigar business properly. Talk enthusiastically to the public. Be convincing. Appeal, not only to the imagination but also to plain common sense. Convey to the multitude a true idea of the pleasure and joy that cigar smoking confers. Be explicit. In advertising, bring home to the consumer the significance of a favorite brand.

The better a product is, the more it pays to have it advertised right.

Cigars are deserving of more and better advertising than they ever received before.

Individually and collectively, the cigar manufacturers of the country owe it to themselves and the welfare of the industry to display their products before the public in the most favorable light.

Of the healthiness of the habit of cigar smoking, enough has not been said. Concerning the satisfaction to be derived from smoking good cigars, great piles of evidence could be produced.

However eager and willing a retailer may be to recommend cigars, he has neither the time nor the chance to speak informatively to all with whom he comes in contact. It is unfair and unbusinesslike for the manufacturer to shove on the retailer the important and difficult task of advertising cigars properly.

Maybe the retailer can't do it, or perhaps he is indisposed to perform work for which he does not receive full pay.

The manufacturer who depends on having his cigars advertised entirely by retailers either is content with little or he doesn't appreciate the desirability of advertising his product.

It is said that a satisfied customer is the best advertisement. But a buyer has to be obtained before he can be satisfied with his purchase.

To vivify and increase cigar business, advertising is necessary. Until cigar manufacturers generally make up their minds to do more and better advertising, cigar production will not develop as it should.

If through false economy, cigar manufacturers are induced not to advertise to any great extent, the cigar industry will make scant progress.

Publicity is a lever that uplifts. Without desirable publicity, how can the cigar industry be raised to a high state of prosperity?

AN EXCELLENT FERTILIZER

Tobacco stems in some localities can be obtained at reasonable prices. For fertilizing purposes, tobacco stems are about four times as valuable by weight as average manure. Tobacco stems in the soil have the tendency to keep some insects away, which is an additional benefit.

CHEAPER TOBACCO IS WAR CRY

The slogan of former Vice President Marshall, that what the nation most needs is a good five-cent cigar, has been adopted in toto by the Tobacco Merchants' Association, and it proposes to carry the war into Congress next winter to obtain a reduction of taxation on tobacco.

A staff correspondent of the Philadelphia *Public Ledger*, under a Washington date line, says the tobacco men are gaining great popularity in their battle to that end. They believe that the reported treasury surplus will enable the Congress to hit the high tariff a stiff lick all along the line.

How essential the five-cent cigar has been to the tobacco industry is demonstrated by the fact that before the war 60 per cent of the cigar sales were the nickel variety. Certainly the average man smoked one of the many brands that were sold at that price. During the war the old reliable prices disappeared, so that it sounded more or less like ancient history when Vice President Marshall spoke of what had been in the "good old days."

The cigar manufacturers say that following Mr. Marshall's appeal they attempted, at considerable sacrifice to themselves, to meet his requirements and that they have put the five-cent cigars back into stock "in quality not comparable with that of the pre-war cigar of equal cost." It almost appears as if the cigar men owed Mr. Marshall something, for they say themselves that 40 per cent of their sales are now from these new lines.

At any rate, it is never too late to take up a good cause, and we are hoping the five-cent campaign goes over the top as soon as a Congress which is credited with sound business sense can remedy matters next winter.—*Columbia (S. C.) Record.*

PAYMENTS TO PLANTERS

James C. Stone, president of the Burley Tobacco Growers' Co-operative Association, says in a letter to growers attending payment of $15,000,000 to planters in Kentucky, Ohio, Indiana, Tennessee and West Virginia:

"We are paying out in this distribution $15,000,000, which is over $5,500,000 more than was paid out at this time last year, and this money that is being paid out now added to the amount paid out in the first advance makes a total of $33,000,000 paid to the members to date on the 1922 crop. This is $14,000,000 more paid out this year than was paid out at this time last year on the 1921 crop.

"The large percentage of our medium and common grades have been sold, and the tobacco left on hand unsold consists principally of the better grades and we do not owe a dollar on it to anybody."

Mr. Stone said a few days ago, in a statement made at Lexington touching a few reported cases of lawlessness here and there growing out of friction between poolers and non-poolers:

"We want the tobacco grower who is not already a member to join with us in this great work for better prices for Burley tobacco, and thereby better homes, better schools, better roads, better living conditions, but we want to convince him that co-operative marketing methods are right and have him join voluntarily and not by coercion. . . . The whole fabric of our organization is based on right and justice, and on the law under which we all live, and as long as we stay on that solid foundation there will be no influence that will check our progress or forestall our success."

Good business principles, and the only principles that could constitute a rock foundation for the house of the poolers are expressed in Mr. Stone's statement. Upon such a foundation co-operative marketing is an assured success, not an experiment. Poolers in every county should be vigilant against any movement which would destroy the only foundation upon which co-operative marketing could stand permanently.—*Louisville Times.*

Cigarette Smoking in Foreign Lands and Less Remote Countries

Wherever One Goes Men and Women Are Found Drawing Solace from Favorite Cigarettes—Statistics Show That Cigarette Smoking is Becoming an Established Social Custom All Over the World—U. S. Figures Disclose Some Interesting Facts

By Dr. ARTHUR SELWYN BROWN

POPULARITY of cigarette smoking is universal. Travel wherever we may, we will find men and women smoking cigarettes. In Tunis and Algiers, in Madrid, Moscow and Melbourne we find cigarette smoking as popular as in New York, London, Cairo, Bombay, Hongkong or Pekin. Statistics tell us that more cigarettes are being smoked throughout the world than ever before and works of travel state that cigarette smoking is becoming an established social habit everywhere like tea and coffee drinking. The popularity and universality of the cigarette is such that the present might be happily termed the Cigarette Age.

Revealed by Statistics

An analysis of the statistics of American tobacco production and consumption shows how rapidly cigarettes are coming into public favor. In 1896, the percentage of American leaf production used in cigar-making was 25, in 1907, it was 30 and in 1918, 25. During the above periods more than fifty per cent of the tobacco crops were used in manufacturing smoking tobaccos and snuff. The balance, or about 23 per cent, was used in cigarettes. In 1905, the leaf consumed in cigarettes was only about 5 per cent. Now it nearly equals what is used in cigars. In 1918, it was 24 per cent. In foreign countries, the percentage used for cigarettes, is, in many cases, much larger than that in cigars.

The statistics for the production of cigarettes in the United States tell the story of the growth in the popularity of cigarette smoking in another way.

A False Sense of Smell

Spain, of course, continues to favor the cigarette as much as it did in the time of the discovery of the New World. Arthur Symons, in describing a bull-fight he witnessed at Valencia in 1898 refers to the large number of cigarettes smoked by the vast crowd. The smoke filled the arena. He said: "I sat there, in my box, from three until half-past five, when the eighth bull was killed in the half-darkness. Two men had been slightly wounded and ten horses killed. A total which, for eight bulls speaks well for the men. An odor of bad cigarette smoke, which my imagination insisted on accepting as the scent of blood came up into my nostrils, where it remained all night."

The men engaged in the bull-fighting industry smoke cigarettes almost exclusively. They are as fond of them as the stable boys in the racing stables in America.

Mrs. Gordon, a recent visitor to Spain refers to the smoking of men and women all over the country and paints this clever sketch of conditions there today: "We were taking a siesta in Lijona, when Jan, my husband, exclaimed:

"'That music sounds quite near.'

"He jumped up and looked out of the window. On a narrow ledge of flat rock at the foot of the wall, three men were sitting in the shadow of the house. Two had guitars, and all along the wall of the garden, a number of goats were lying down or browsing on the small weeds which sprouted between the rocks.

"We went out the garden door and joined the goatherds in their patch of shadow.

"'*Buenos dias,*' said Jan. 'I, too, love the guitar.'

"'Yes, Senor,' answered one of the men. 'Through the windows we have heard your playing.'

"One of the men who was there wore an enormous pagoda-like sombrero of straw; one was a boy of eighteen with a huge mustache, the third was an old man with large nose, the wrinkles on his face were drawn more deeply than I had ever before seen. Their guitars were poor instruments and the strings had often broken and been knotted together, in consequence of which little bits of stick were tied across the arm of the instrument to clamp the strings down on the fingerboard.

"Jan got his guitar and offered it to the men to play on but they said they preferred their old, well-tried instruments.

"Shortly the men said they had to go to their homes, but they invited the visitors to an evening concert they would arrange.

"Later in the evening we went to the concert. It was held in the street beneath a solitary electric lamp. There was the usual village crowd. The girls were all in their best dresses of pale-colored skirt and embroidered paisley patterned shawls. There was a long silence after our arrival because a famous guitarist had not arrived. He, however, sent another in his place. Three guitars and a guitarron formed the orchestra.

"Thrum, thrum, thrum, went the guitars, while across the deeper chords the little guitarron, with its strange tuning threaded a shrill pattern of monotonous *arpeggios*. The music of Spain has something fundamental in it. It has a hint of the heart-beat of the universe. It seems to speak of something ideally simple, to create an harmonious forgetfulness. A girl sitting amongst us threw back her head and sang. Her voice carried the sad minor cadences of the eternal East. It was pitched queerly in the throat and wailed across the still night like the voice of a passionate soul, saying:

"'When I am dead a hundred years,
And when the worms have eaten me,
The signs you find in my dead bones,
Will show that I have worshipped thee;
When I am dead a hundred years.'

"Then a man took up the singing and the guitars beat out the rhythm with great gusto. His stanza was:

"'The only love I ever loved,
Like black gunpowder reacted;
Light, fire, explosion; then after
Followed anger, silence, darkness,
The only love that I discovered.'

"When the duet was finished the crowd called out: 'Let's have a *Jota*. Come on, Perico, play something we can dance to.'

"The men who played the instruments, and snapping their fingers with the music, and their shadows, flung on the wall by the solitary electric lamp, caricatured their movements. The guitars beat on, creating an atmosphere of careless joy which seemed to bring us into more sensitive contact with the Spaniards than ever before. We wonder if civilization has anything to give these people. They live simple, straightforward and pleasant lives, tempered, it is true, by sickness, pain and privations; but it would be difficult to suggest gifts more valuable than they already have."

Pleasures in Abundance

Music a happy disposition and plenty of sunshine and cigarettes! Truly, who could wish for more?

Few books of travel in South and Central America fail to refer to the general habit of cigarette smoking in Latin America. Oswald, in his work on Mexico and Central America, speaking of Mexico says: "Hospitality is the virtue of sparsely-settled countries, and Don Pancho Garcia, of the Canas stock farm, received us with that hearty affability which mercenary politeness imitates in vain.

"'I knew there were strangers in the district,' he said; 'because, this afternoon, I heard a shot on the Rio Mountains that did not sound to me like a Mexican shooting iron. Well, I'm glad you found the old place, Capitano. My *squains* are all gone to a wedding. It's a good job for that boy of yours' (my assistant) 'that you did not meet them. They would have taken him along and danced him to death. But just wait. We shall have a war-dance, of our own if one of your men will help me get a cider-barrel out.'"

Tropical Enjoyments

A meal was quickly prepared and enjoyed and afterwards a guitar and mandolin were brought and copious supplies of cigarettes and cider. The night was then spent in social enjoyment. Pleasures like these, experienced everywhere in Latin America, caused the author of the above statements to ask whether living in northern latitudes was worth while when in the tropics people are able to get so much pleasure out of life. He was unable to solve this riddle; but there is abundant evidence in his writings showing how he enjoyed cigarette smoking parties in the company of the musicians and dancing girls in Central America.

Cigarette the Prime Favorite in Russia

Cigarette smoking in Russia is almost universal. Men, women and children smoke. The cigarette is far more popular than pipe or cigar. The Russian cigarette is made of local tobacco blended with the finest Turkish tobacco. It is distinguished from the cigarettes of other countries by having a long paste-board holder attached to it. Should we closely investigate the manner in which the cigarette is attached to the holder we will find a thin ring of cotton set like a washer at the point of contact. Few Russians notice these peculiarities and it would, perhaps, be useless to ask them why the whole nation likes to have its cigarettes made in that singular way. Here, however, is an experienced Russian tobacco broker. We will question him!

A Peculiar Cigarette Holder

He answers: "The cigarette holder attached to cigarettes is universal in Russia. I have sold immense numbers of cigarettes throughout Russia and I know definitely that all Russian cigarettes are made with holders. Once, when I was in business in Moscow, I tried to discover why it was so. The conclusion I came to was as Russians consume the finest of all the Turkish tobacco crops and have to pay dearly for that privilege in face of American and British competition, the holder is attached so that the small amount of tobacco actually in the cigarette can be hidden. A little tobacco is made to fill an apparently big cigarette.

"Your inquiry respecting the cotton ring is interesting. It is placed in all Russian cigarettes, but I have no idea of the cause."

We cannot accept this explanation fully. The amount of tobacco in Russian cigarettes is less than half what is put into American cigarettes; but the idea that dear tobacco is the cause is untenable. Russian cigarettes are not made of pure Turkish tobacco but of blends of Russian tobacco and Turkish. The price of cigarette

tobacco in Russia in normal times is much lower than in America.

Suggested Cigarette Holder

Our own explanation of these peculiarities is that the habit of supplying a cigarette-holder to every cigarette arose among the early Russian smokers who learned from the Turks or other Asiatic peoples, how to smoke, and as these latter have always shown a preference for light tobacco and cool smokes, they taught the Russians to smoke cool cigarettes. The water-pipe, or hubble-bubble is the means by which the Oriental smoker cools his smoke. This cannot readily be adapted to cigarette smoking so the idea of a cigarette-holder was suggested. The cotton ring is, undoubtedly, inserted as a charm to dispose of any nicotine which may escape volatilization at the burning end and stray down through the cigarette into the tube of the holder. We belive that these are the correct explanations of the two unique characteristics of Russian cigarettes.

The Russians are a very ceremonious people. There is always a great greeting when we visit friends in that vast country and an enormous amount of leave-taking when a short journey is begun. Kissing and handshaking accompanied by ceremonious bows and the removal of hats progress for a prolonged period. On entering a store, office or bank, hats are removed and this is quite obligatory when a lady is present. Naturally, on many of these occasions opportunities occur for having a short smoke and the cigarette is quickly lighted.

American Machine Made Cigarettes

There is a large trade done in the great market cities of Asiatic Russia with cigarettes brought by the caravans from China. These cigarettes are made in American machinery and resemble American cigarettes. They prove of great value to travellers, although, they are sold for remarkably low values in the remotest parts of the Orient. The French traveller Meignan, in a book describing a visit he made from Russia to China in the "eighties" shows how valuable smoking is to travellers in the vast deserts in a passage describing his experiences in a caravan trip across the desert of Gobi. He said: "The center of the desert of Gobi resembles the Sahara. It is a sea of sand, over the whole extent of which there is no object to arrest the eye. When we got well into it we found it wholly void of vegetation; but our camels did their work without nourishment and the horses died. We had striking proofs of the superiority of the camel over the horse in desert work.

"Our Mongol leader was a expert at his work. During the day he followed the trails of other caravans which were marked by skeletons of horses, camels and men. At night he was guided by some particular star which he picked out in the sky and followed.

"Four days after leaving Urga we were reminded that it was Easter and that the Orthodox must celebrate it faithfully. We decided to do so when we camped in the night. We collected cigarettes and a few bon-bons and a tureen of *foie gras* and celebrated. The Mongols in our party squalled at the tent entrance and a young Russian brought a guitar and played and sang for us a number of melancholy church airs.

"This group of five smoking wanderers, squalling around the fire, the sole lighted spot in the deep silence of the immensity of the desert, with a party of Mongols in their native costumes grouped around them, presented a picturesque tableau. The hour of the night, the loneliness of the place, our remoteness from civilization and the strangeness of our surroundings found us in no mood for protracted gaiety, but we did enjoy smoking. Under such circumstances a cigarette appears to take on new aspects and become a symbol of happiness, our sole link with civilization and a solace of all our troubles and hardships."

Most travellers in Asia tell similar interesting stories about the good influences of cigarettes and of the large trade done in them in the grand bazaars.

Cigarettes from China

The British Mount Everest Expedition of 1921 was permitted to enter Thibet and the members made interesting observations there. They were attracted by the general custom of cigarette smoking and the low prices for which cigarettes made in China were sold in the bazaars. They believed the low freights quoted by the caravans returning from China allowed the merchants of Thibet to import cigarettes and sell them for little more than the retail prices in Pekin or Hongkong.

The Thibetans were found to be very musical people and their music was studied, recorded and reproduced in London. The music is religious and secular, and is played on violins, English horns, trumpets, cymbals and drums and gongs. Native folk-songs, often with beautiful melodies, were sung by the people. Because devil dancing is such a strong feature in the temples, the Thibetan orchestras are strongly furnished with percussion instruments. The violin, however, is the principal instrument of the people. The mendicant fiddlers are found in every town and village. When they are not singing, they are smoking cigarettes. Smoking, singing, dancing, playing the violin and worshipping in the temples of the Lamas occupy much of the time of the people of Thibet. Their lives are colored by music, religion and contemplation. Their joys are promoted and prolonged by the smoke of cigarettes from China, which is far away.

The cigarette is popular throughout the world and in every country it brings solace, contentment and happiness to many. Its social values are thoroughly proved and popular approval is strikingly shown by the statistics which in every part of the universe show phenomenal growths of cigarette smoking.

Cigarette manufacturers sent buyers to the advertised tobacco markets in the Southern States or purchased from tobacco brokers.

The writer in *Harper's* gave this account of a sale of cigarette leaf he witnessed in Virginia:

"Every day an apparition appears upon a street corner—an ebony Gabriel armed with a tin horn longer by half than himself. He executes a fanfare which for unmitigated discordance is without a parallel in the history of acoustics. It is a signal for the breaks. The breaks being the auction, the name originating in the practice of breaking open and exposing the contents of the bales or hogsheads previous to the sale.

"The breaks take place in a shed of wide proportions, beneath which the tobacco wagons have been waiting, many of them all night, their occupants cooking their frugal breakfasts at small fires built among the vehicles, drawing their supplies from the tail box with which each is equipped.

"By nine o'clock, the street in front of the shed is alive with teams, the drivers impatient to unload. Each lot, as it is removed to the building, is weighed and given a separate space upon the floor, being ticketed with the weight and owner's name. Soon, buyers begin to come in, sampling here and there with practiced eye and scent. After these, comes the auctioneer. Then it is that Gabriel, clothed with brief authority, rends the morning air with notes of his terrible horn.

"Rapidly the auctioneer proceeds to 'knock down' the invoices of the weed. When all are sold, the farmers get their cash and depart!

Mind of Inventor at Work

The cigarettes at this time were principally made by hand, and their manufacturing conditions were as primitive as those so graphically described with regard to the making of "enriched" twisted plug, smoking and chewing tobacco. But the inventor was at work. He was thinking out plans for making good cigarette pa and for rolling cigarettes in millions in automatic machines.

Caused Considerable Commotion

The formation of the American Tobacco C caused much excitement in the American toba industries. Tobacco growers complained t tobacco prices were forced down to less th half the normal values. They organized numerous co-operative price-boosting associations su as the "Dark Tobacco Growers' Association Tennessee," and other states; the "Burley T bacco Growers' Association of Kentucky," a other states; the "Mutual Protective Assoc tion of Bright Tobacco Growers of Virgini and other states; and the "Maryland Toba Growers' Association." Many similar orga zations have since been formed for promot the general interests of local tobacco grower

Smaller Firms Started Price War

The smaller firms, not included in the origi American Tobacco Co., feared that the la capital of the company would enable it to t their trade away, and began to fight it by red ing the price of cigarettes. The largest of th independent companies was the National Cig ette & Tobacco Co., which manufactured "A miral" cigarettes. These were usually sold packages of 20 at 10 cents; but the price w reduced to 5 cents. The American Toba Co., then reduced the price of Sweet Capo cigarettes to 5 cents. This price war involv the whole cigarette trade of the country. T American Tobacco Co., reduced the prices every one of its cigarette brands to cost pr and all the independent manufacturers did same. American cigarette smokers then, about a year, enjoyed the rare luxury of cig ettes of all the finest brands at cost price. H one by one the independent companies su cumbed to the financial strains imposed by price conflicts and first the National, then the H. Hall Cigarette Co., the Consolidated Ci rette Co., and many others arranged to beco absorbed by the American Tobacco Co.

Billion a Year for Tobacco

When we are prosperous we not only des more luxuries than when times are dull, but really need more; in fact, luxuries become nec saries. And we are naturally lavish as a peo We are satisfied with what we have, but we not contented; we always co-ordinate our sa faction with our financial means.

A large quantity of our trade results fr extravagance, if expenditures for convenien may be so classed. We buy, not according our wants, but according to our purses. Mo perhaps, than any other people we live by pocketbook. Opinion differs as to what is travagance. Using tobacco is catalogued some persons as waste, but by others as a nec sity.

According to reliable statistics, we are spe ing more than $825,000,000 a year, nearly billion, for tobacco of all kinds. Compared w two years ago the increase is forty millions dollars. Smoking or chewing tobacco, or goi to picture shows, or imbibing soft drinks, eating candies and cakes, or buying phonogra records, or installing radio sets, are diversi which might be dispensed with, with the res that much money would be saved. But is a of them extravagance of itself? The quest is not so much what we need as what we c afford, and whether the outlay promotes hea or efficiency.

As long as we save a goodly part of our come, we are entitled to innocent enjoyment. fact, diversions which appear to be extravagan make us happier, and we may purchase them utilities.—*Flint (Mich.) Journal.*

Cleveland Trade Takes Real Turn for the Better

Weather Man Has Been Playing Pranks—Generously Consents to Provide a Few Bright, Cheerful Days—Business Felt Beneficial Effect—Buying is More Frequent.

CLEVELAND, Ohio, June 9.—There is always a silver lining to every cloud, so they say. They must be right too, for after that terrible spell, whereby the weather man dished us out various degrees of cold weather, winds and snow, he now has generously agreed to our enjoying a couple of weeks of good, solid and bright weather. As an immediate result, almost, business has taken a very nice and at the same time substantial turn for the better. Dealers are turning over their stock faster than ever before as a result and even though they are not buying in larger quantities, are buying more often. Collections, too, have ceased to be a bugbear to local dealers. These are coming along in very good shape and offer the dealer no room to complain. One will find cigarmen here a pretty happy and optimistic lot, and the best thing about it is that they have just reason to feel exactly that way.

From Deisel-Wemmer

Garry Salmon, one of the best liked cigar men on the road today, made his headquarters in Cleveland for the week. The Lima-made twin sellers, San Felice and El Verso, are just keeping up that fine and steady pace that they set some time ago, and that is about all anyone could possibly wish for. The Weideman Co. distributes the Deisel-Wemmer products through this territory.

An Arrival

Perry Bland, representing Vetterlein Bros., arrived in his Cleveland camp the other day and proceeded to go out and and many orders from the many accounts he sells here for his good Saboosa cigars. Harvey Johnson distributes his brand through this way.

From Cedar Point

Harry Burrows returned the other day from Cedar Point after getting a big order from the stand there for Herbert Tareytons and Johnny Walker. The Falk Tobacco Co. hustler is on the job all the time and was one of the first to get his order in from the famous Ohio resort.

Biting Hard

Tom McDonald, the "red-headed" booster of Detroit Hand Mades for the Mazer Cigar Co., got back the other day from a week-end fishing trip at Put-In-Bay. Tom caught lots of fish up there, among the lot being a beautiful six-pounder. Of course this might be a "fish story" but the picture, unless Tom visited some nearby fish stand tells the story more plainly than words. When we say that Detroit Hand Mades are enjoying one of their best years in history facts bear us out that this, at least, is clearly no "fish story."

A Trade Caller

The trade was very happy to receive this week the call of Ing Chamberlain, who came here for Lincoln Bros., in the interests of First Consul and Monte Cristo cigars. Every good account in the city is lined up on his selling list.

Going Nicely

The P. G. Vincent Co., which only recently took on the R. G. Dun cigar for distribution in local territory, has placed this cigar in every desirable spot in this neighborhood. H. C. Ecclestone, factory representative, has been working hard in conjunction with the P. G. Vincent force and the result has shown itself in some very fine and attractive window displays that have done more than a little to help boost things along for this fast selling brand.

A Visitor

Ben Strauss, our old friend from A. Santaella & Co., was a visitor in Fifth City circles this week. With Ben came Optimos and a message of cheer for every dealer who handles this brand, and there are surely many of these. The P. G. Vincent Co. has this brand on its list of fine selling cigars, and when this house wants a brand that is sure to bring satisfaction and with it repeat orders it surely picks out the Optimo.

Joe Gets Back

Joe Klein is back "in our midst" once more, after a rather extensive business tour of southern Ohio and Kentucky. Joe landed Bill Doyle, a well known tobacco man from southern portions of the state to take charge of affairs through Columbus way, and Joe says he has already noted a big improvement in the way Edgeworth orders are coming in from there. All over his territory Joe is finding the way smooth to easy sailing on the good ship Edgeworth.

Al Spellman Comes In

Al Spellman, genial old Al, spent a few days with us this week. News along the battlefront of the San Telmo Cigar Co. carries with it the message that dealers everywhere have nothing but praise for the way smokers are taking to Joan of Arc, La Resta and the rest of the San Telmo list of fast selling brands.

For Rameses

It's always good news when I can say that Harry Kozier was in town. It's always good luck for Harry when he gets to town, too. "Kosher" is always on the job and the dealers who do not give him a great, big order for Rameses cigarettes when he calls on them, are few and far between.—HERB.

An Hawaiian Visitor

C. A. Scott, head of the tobacco department of American Factors, Ltd., at Honolulu, Hawaii, is in New York on a two weeks' visit. He is staying at the Hotel Pennsylvania and making his headquarters at the organization's local office at 140 Front street.

Buys Sumatra Wrappers

Sam Grabosky, of the G. H. P. Cigar Co., of Philadelphia, makers of the renowned El Producto cigar, has been a discriminate purchaser of new Sumatra leaf in the New York market recently.

Detroit Business Good

Harry Lloyd, the genial representative of D. Dreux, Inc., is booking some good orders in Detroit this week. Just at present the motor city is one of the bright spots of the business world.

Studies Local Conditions

Thad Llewellyn, distributor of the Don Julian cigar for Winston-Salem, N. C., has been studying conditions in the New York market for several days.

Patterson Progress

The New York offices of Patterson Bros. Tobacco Corporation announces that the rapidly growing popularity of Matoaka Blue Ribbon smoking tobacco and Matoaka cigarettes has made it possible to make arrangements whereby the Metropolitan Tobacco Co. will distribute the goods hereafter not only with all dealers connected with the Metropolitan Tobacco Co. in greater New York, but also in New Jersey, Long Island, parts of Pennsylvania and Connecticut, wherever the Metropolitan Tobacco Co. has dealers supplied by them.

The D. A. Schulte Co. is carrying Matoaka Blue Ribbon smoking tobacco and Matoaka cigarettes in all of its 243 stores. Arrangements have been made with all the Liggett Drug Stores, which will carry a display of the Matoaka products in all the Liggett stores. Similar arrangements have been made with 1730 news stands of the Union News Co. and 3,500 independent dealers in Greater New York.

A great many of the United Cigar Stores are carrying the Matoaka Blue Ribbon smoking tobacco and Matoaka cigarettes, and accept orders everywhere where there is a demand for the goods. It is expected that within a reasonable time the products will be introduced in all the New York stores, clubs and hotels.

United Retail Dissolution

Stockholders of the United Retail Stores Corporation at a special meeting last Thursday approved dissolution of the organization. The directors will distribute assets to stockholders on a pro rata basis.

Dissolution of this company, a holding corporation, had been contemplated since control was taken over by the Tobacco Products Corporation. Under the new management, existence of the company was considered unnecessary, as affairs of the combination are handled directly by Tobacco Products. The United Retail Stores controls many subsidiary companies, chief among which is the United Cigar Stores Company of America. Having control in Retail Stores, Tobacco Products will receive an amount of sto in the various subsidiaries sufficient continue control.

Universal Leaf Dividends

The regular quarterly dividend of per cent on the preferred stock, and dividend of 3 per cent on the comm stock of the Universal Leaf Tobacco C Inc., have been declared, both payat July 2, 1923, to stockholders of reco June 20, 1923.

American Can Dividend

A quarterly dividend of 1¾ per ce has been declared on the preferred sto of the American Can Co., payable Ju 2, 1923, to stockholders of record at t close of business June 13, 1923. Tran fer books will remain open.

General Cigar Co. Dividend

A quarterly dividend of one doll and seventy-five cents ($1.75) per sha will be paid on the debenture preferr stock of the General Cigar Co. on Ju 2, 1923, to stockholders of record on Ju 25, 1923, at 3 p. m.

Tobacco Products' Dividen

Tobacco Products Corp. has declar the regular quarterly preferred divide of $1.75, payable July 2 to stock of reco June 18.

Hannaher & O'Neil, Inc.

Chicago Retail Business Shows Improvement

Sales Were Better Last Week Than for Many Weeks Past—Jobbers Report Collections Below Normal—Orders from City and Country Regarded as Healthy—Situation Better.

CHICAGO, June 9.—Retail business in the "Windy City" shows improvement. Sales have been better this week than for many weeks past. Jobbers report collections below normal but orders from both their city and country customers are regarded as being very healthy, and are for larger amounts than heretofore. Taken as a whole, the situation shows improvement and more cigars are being sold. Pipes for the summer tourist and camping-out smoker, are in good demand. Everywhere pipes are having a very good sale.

On account of the widening of Grand Boulevard at 35th street, The Smoke Shop at 360 East 35th street, which was one of the best cigar locations on the South Side, has been forced to vacate.

Seeing Chicago atop one of our motor buses, one can readily see the vast amount of money that is being spent here to feature cigars and cigarettes. A ride over the boulevards one sees emblazoned El Verso. John Noble, Popper's Ace, Corina, Harvester, La Palina, Shrine, Cyro, Henry the Fourth and El Salero cigars; Chesterfield, Helmar and Camel cigarettes; Wrigley's, Beechnut and Yucatan gum. The billboards are simply loaded with these brands, and hundreds of thousands of dollars are being spent to gain greater popularity.

The United Stores are featuring Ricoro cigars. This is the 21st birthday of the Ricoro brand and large signs on the United windows are calling the public's attention to this fine smoke.

An extensive Herbert Tareyton cigarette advertising campaign has again been started in the local newspapers.

William McDonald of F. Garcia & Bro., has again reached here. His business on F. Garcia, made in bond cigars, shows big increases in St. Louis, Kansas City, Denver and Omaha.

A Good Repeater

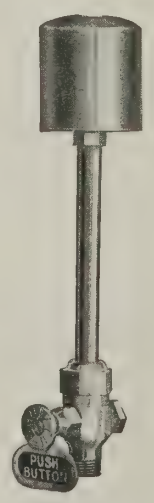
Johnnie Walker cigarettes at 20 for 25 cents repeat with all the dealers. The Falk Tobacco Co. has a live one in this package.

Featuring Girard

Several fine Girard displays are seen around the city. Irvan Ries & Co., 104 North Wells street, are putting special efforts behind the Girard brand.

The withdrawal of the 10 cent Robert Burns staple size from the market has increased the sale of the 10 cent panatela size.

Tom Gray Back in Game



The trade is glad to hear that Tom Gray is again back in the game. Tom has represented some of the finest houses in his time and is known to everybody here. In his new connection with Louis Ash & Co., he will surely get some orders here as Gretchen cigars are stocked by several dealers.

Two Good Moves

The Ruhstrat-Christian Co. reports a heavy sale on the new 10 cent La Fendrich, leader size. Cuesta-Rey, the firm's clear Havana leader, is being placed in new spots daily by the sales force.

"Gay Lights Out at 1 A. M."

Chicago's night life now suspends at 1 A. M. the first time in eight years. A police order has darkened the city's "gay white way," and proprietors of the midnight cabarets, coffee shops and soft-drink parlors turn the keys in their locks at 1 A. M. sharp. This reshaping of the city's midnight maneuvers resulted

om an order sent out to the district lice captains by the new chief of police.

Good News in Store

Sam Hyman, of Julius Fernbach & ., reports from St. Joseph, Mich., at he will shortly have some very in- resting news items to send in. Sam is his way to Detroit to meet Ed Stief, d this pair of "go-geters" are going to an up the Motor City with Cyrilla, mpa made, clear Havana cigars.

Booking Orders for Millionaires

Millionaire cigars are to be featured re. Joe Landfield, of Joseph Berran Co., paid his first visit a short time ck and landed some good accounts for e Millionaire brand.

How They Advertise

Heineman Bros. of Baltimore, through illiam A. Vorhauer & Co., say that rd Baltimore is the cigar with a world friends and the semi-foil wrapped ckages prevents breakage, besides be- g a light, mild smoke and a masterly nd of tobaccos.

The large Cinco ad says, "Don't drift om one cigar to another. Stick to nco for your steady smoke. Try a ir today and note the quality. For le at all good stores. E. Hoffman Co., stributors."

Humo, mild and sweet; always clean! ways fresh! says Sanders & Watson gar Co., who place this 2 for 15 cent gar, made by the Mazer Cigar Co. of etroit. Every Humo is individually rapped in a sanitary foil and tissue rapper. Humo is all quality and truly generous value at 2 for 15 cents.

"Dutch Masters—nothing quite like it, sweet, so mild," says the Consolidated gar Corp. for Clarence Hirschhorn ., its distributors. An ocean scene ows a boat coming from the tropical es with tobacco for this popular ller.

El Producto, "mild, yet blended with a stinctive character that never varies, d made in a size, shape and color to it every smoker's preference" is shown the G. H. P. Cigar Co. Surely the hicago smokers are being educated by ese ads, and this issue reminded the trade at large of one of our trade weeklies.

Getting Good Start

The William J. Seidenberg Corp. is now placing in this territory the Pan-Aran, Club-Special and Virginia Lee, Tampa made, mild Havanas in a new 10 cent Boston size, packed 5 in foil to sell for 50 cents. While only on sale since Monday, several retail stores already show this new size in their cases.

Bering cigars from Coral-Wodiska, continue to increase in sale with Anderson-Thorson Co. in control of the sale for Chicago. New customers are added to the list weekly.

Mark C. Tyler, a cigar dealer at 922 East 47th street, has entered bankruptcy.

Verse in Yellow Ends "Fags"

A dash of vivid yellow, four lines of "poetry," and Lucy Page Gaston, foe of cigarettes, have blown the smoke away, out at Hyde Park High School. It was less than two weeks ago that Miss Gaston turned poet and made herself responsible for the following anti-nicotine quatrain:

"Since cigarettes seem less provoking
Unto the ones who do the smoking,
Oh, won't some power please compel 'em
To smell themselves as others smell 'em!"

Miss Mildred Moore, Spanish teacher at Hyde Park High School, copied the lines on the blackboard. She used bright yellow chalk, because as Miss Gaston advised "Color psychologists declare that orange-yellow acts as a mental stimulant, especially on the imagination."

A few days ago the class entertained Miss Gaston in honor of their 100 per cent victory over the fag.

Many Chicago churches observed June 3 as anti-cigarette day.

The burial of Mrs. Eugene Lilienfeld, who passed away late last week, was held Monday. Many well-known members of the trade attended the services. Burial took place at Rosehill.—H. L. H.

Up-State Heat Brings Hydrophobia of Cut-Prices

What Was Bad Before, Now Muchly Worser—That Broadway Broadcast!—To an Oasis Came El Arabe—Stop Throwin' Pop Bottles at Schenectady, Schufeldt!—Almost a Dollar Offik Offers for Orders!—What! You Have Nu Bananas? —Neither Has Doyle Got It a Fatima Flivver Now!—Who Stopped Jordan's Camel Caravan?

New York State Capitol District,
Razor-Slash-Week, 1923.

"Who started this price panic, anyway, Sam?" demanded Jim Stubb, looking over the eleven A. M. schedule just posted on the windows of Stubb & Ash, Inc., dealers to the common peep-pul. "Why, your rates here are 'way below the manufacturers' dope sheet in many cases!"

"Many cases is right!" yelped Sam Ash, busy with paint and brush on the twelve o'clock posters. "An' many cases of them there cigarets should be sold, also-as-well, when this next edition o' prices gits on the glass, y'unnerstan?"

"Yes, yes," agreed Jim Stubb, digging up another ten-thousand Camel case to sit on while the Hot Chair Club committees prepared their daily reports. "But what good does all that do us? Is there any jack in the pot? If not, what's the big idear?"

They Meet, They Eat, They Treat!

"Huh! Yuh should ask the Dearstynes!" advised Sam Ash, dipping the camel's hair in a fresh jar o' deep red gore for the new cut on Camels. "Wasn't it only last Saturday, y'unnerstan, that Will Dearstyne should call his clans together for a meetin'?"

"So I heard, Sam, so I heard," nodded Jim Stubb, drawing his throne nearer to the whispered word, "and I believe they took all day to it. First, the roll-call. Then the call to rolls. Next, the rolling of much wow-and-pow-wow."

"Sure, after that there Keeler banquet, unnerstan' me," filled in Sam Ash, dashing off two more slashes on Lucky Strikes and Fatimas, "the Dearstyne salesmen all went back to Broadway and Steuben for the irenics. These, unnerstan' me, were about which should be done—take it to the world-court, or to that there police-court!"

"But I understand Will Dearstyne told 'em they'd take this price cutting idea before the Committee on Surgery," put in Jim Stubb, settling down for a good long talk. "Anyway, they decided to take an extraordinary inventory this week then open up with a few remarks on jobbing prices a little later."

"Uh—huh! They did so," sighed Sam Ash, cutting more paper for more cuts. "Then Will told the men in congress assembled that the $300 cash prizes for the best work on pipes would be continued this next quarter, y'unnerstand. Also the other $300 prize-money for the leads on Blackstone cigars. After which the meetin' adjourned sine die, or whatever that is, to come again some other Saturday mornin' when the men wouldn't be so busy with the flies an' heat, unnerstan.'

El Arabe Crosses the Dessert

"Gosh, it is that warm," allowed Maurice Robinson, he of the warm smile and the warm handshake, which introduces Benito Rovira y Ca. "So much so that I really am led to believe I just crossed the Dessert with this sample selection of El Arabe cigars!

"Jobbers in this section, though, are as scarce as oases in the great sands. I am speaking, of course, for the cigar distributors. There seems to be many of the general tobacco and cigaret jobbers. But I cannot understand why more cigar wholesalers are not visible here in Albany, Troy, and Schenectady."

Strike One for Schenectady!

"Well, we're still in Schenectady," advised M. A. Schufeldt, trying to conceal his La Palina signs on the nearest show case where the House o' L. W. Killeen should and would derive some sales benefit. "And I mean what I say. For 'still in Schenectady' refers particularly to the street-car strike we've had quite recently making things a trifle quiet.

"Down here, however, La Palinas are

Webster Cigars

STANDARD FOR OVER FIFTY YEARS

SIZES 2 FOR 25c TO 25c STRAIGHT

A rare bit of nature's greatest effort, producing a fine, mild, aromatic cigar. Manufactured and aged by the most scientific methods. Not a secret blend, but a combination of the highest priced tobaccos that the finest plantations grow.

Webster Cigar Co.

5545 GRANDY AVENUE DETROIT, MICH.

immense demand. Our newspaper advtising continues, and the dealers are ck to respond. Smokers evidently nt the goods, and I believe we can sup a reasonable quantity for any retail oler. Factory shipments are now arrivi fairly well, though certain large sizes a oversold."

Offik Makes an Offering

'And we'll surely be oversold if these ds continue on Melachrinos, Tareyt s, and Naturals," added W. J. Offik, moving his splitstraw to wipe away s eral beads o' moisture gathered during h day's work for the Tobacco Products Crporation. "Because this recent jobb-to-retailer offering of seventy-five c ts discount on each combination carton othose cigarets, plus the Prettiest brand, h certainly started a pile o' buying.

Many merchants want to know how ny they can have, and when we tell e the Kansas blue sky law isn't operati in this State, they go to it for a ck-load! And all these brands are sl wing satisfactory consumer-demand h e in the Capitol District, so why shuldn't everyone buy liberally?"

Yes, We Have No Bananas!

Buy liberally?" shouted Sam Ash, cutt g off seven more yards o' white paper f another edition o' cut prices, 'hadyemean buy liberally? Ain't we a eady got it about all we should do to s'l these here cigarets at cost prices w hout havin' the smokers find out we shuld mebbe buy 'em seventy-five cents c aper, y' unnerstan?"

'No one will ever find it out unless you sout it all over town!" warned Jim Sibb, biting off the wrong end of a Crona in his perturbation. "And no one w l ever find Pat Doyle's new coupé, I g ss, unless you help him!

'For you know Pat had his bran-spica l-span town car at the curb in front o' t l Bruce Macdonald's new store on Nuiden Lane the last night of the Elks' c nvention. And when he got back from h job with the Elk-herd, making Fatias more widely known, lo! where was t l car?

'No one has seen it since. Not even t l State police. For, of course, the local tn constables were too busy singing, "s, We Have No More Bananas!' to hp hunt for a lost link in Ford's chain! Eyway, after Pat's coupé had twinkled i he twilight for only a short time, some gt who had failed to pick a pocket in t l rush o' the crowd evidently decided t pick Pat's lock and carry his bananas away in the car rather than lug 'em off on his back!"

Does Cecil Know This?

"N'u more luggin' Camels off in dropshipments," sighed Sam Ash, dashing off his last poster with a rare combination of green and red paint. "For I should hear it that the R. J. Reynolds Tobacco Company, Winston-Salem and way stations, has cancelled all drops.

"If Cecil Jordan ain't heard of this, who should? Because neither Jordan nor any of his Prince-Alberted crew has been around to warn dealers that the stunt was goin' to be pulled off, y' unnerstan. An' now no one should have it anney bananas nor Prince Albert, either, comin' in dropshipments anneymore!"—THE SMOKER.

New Porto Rican Crop Arouses Wide Interest

News of the splendid Porto Rico crop has traveled far, and W. L. Dannahower, the indefatigable agent of the Government of Porto Rico in New York, and his able staff are being swamped with inquiries from every section of the country. Needless to say, they are all having a strenuous time in providing the information desired and are delighted at having the opportunity to further the interests of the great Porto Rican industry.

Manila News Notes

Emil Judell, on his recent trip East, accomplished something that had never been done before in the Manila cigar business. He induced B. Wasserman Co. of New York to become distributors of cigars from the Philippines. B. Wasserman Co. will handle three sizes of the Alhambra brand, excellentes, superbs and especiales, all in Class C.

The Alhambra brand, of which H. L. Judell & Co., of San Francisco, are the United States representatives, is a quality product worthy of being handled by a house so particular and reliable as B. Wasserman Co.

Mr. Judell also placed the Alhambra line with the J. P. Manning Co. of Boston, Dusel-Goodloe & Co. of Philadelphia, F. A. Davis & Sons of Baltimore, and Wm. Deiches & Co. of Washington. All these big well known houses will feature Alhambras and extensive business in good Manilas is well assured.

San Francisco's Jobbing Trade Fairly Pleasing

Some Retailers Complain of Quiet Business—May Brought Pretty General Satisfaction to Jobbers—Judells Get Shipment from Manila—New Cigarette Factory Working.

SAN FRANCISCO, Cal., June 4.—In spite of the complaint of quiet business on the part of some of the retailers, the jobbers of the city pretty generally are pleased with the business of the past month and the beginning made during the present month.

S. Bachman & Co. report excellent progress in the general jobbing lines they recently undertook.

H. L. Judell & Co. have just received 750,000 Alhambras from the Philippines by the steamer *President Lincoln*. And they need them, for while Emil Judel is now in New York, doing his part in the great Shrine procession eastward from California, he went in time to take a side shoot to Boston, where he loaded the jobbers with the Alhambras they have been wanting. H. L. Judell says they are getting in and shipping out Chancellors about as fast as they can well handle them. For it seems as if their new, light, clean home, with their new attractive stock had given a new inspiration to business. Norwoods also are moving nicely. They are experiencing good receipts on all lines except the Watts, on which they have oversold their supply.

Going Forward

The Rinaldo Co. is still having a fine run on Charles the Great and the Van Camp, and is securing window placements for the advertising campaign of the San Felice. Little Pal is also taking hold well.

Ehrman Bros., Horn & Co. are having a fine run of orders. Philadelphia Hand Made, Optimos, and Roi Tans are all keeping just as popular as ever.

Healy & Donaldson, at 41 Market street, have taken over the distribution for F. Garcia & Bro. They report that it is proving an excellent seller.

Making California Cigarettes

The new cigarette factory of Ehrman Bros., Horn & Co. is now in operation turning out California cigarettes at an increasingly rapid rate. They are putting them on the market at $7.58, to retail in packages of 20 for 20 cents. They are a strictly high-grade Turkish cigarette. They now have a portion of their Jamul ranch under crop, where they are to grow the Turkish type of tobacco without irrigation.

Dave Rinaldo has put in a good year's work, and is now enjoying a rest and vacation among the resorts.

Owing to the seeming unpopularity of soft drink parlors, a number of vacant fronts announce the disappearance of several of the smaller cigar stands.

This same cause, rather, a complete sweep of the soft-drink section of Oakland by the prohibition squad, and the closing up of a good many fronts has seriously affected a number of stands. While some of them think that business will revive as soon as they are filled up with other lines, the opinion of most is that the closing of the drinking places is a permanent injury to the cigar business, as the spenders were more reckless of their money after having a few "drinks." When one goes into other parts of the city, however, there is some evidence that perhaps those who sought amusement in the drinking resorts are seeking entertainment somewhere else.

Speaking of Manila cigars, H. L. Judell says they find that the demand for Alhambras in the East is considerably heavier than in the West. This he attributes partly to the fact that they were formerly better known there.

The Joseph Rinaldo Co. reports that it is finding excellent call for the Platina which the house is jobbing, and that it does not seem in any way to take the place of other brands.

Roy Huff of Ehrman Bros., Horn & Co. states that they have for a long time had a very excellent trade on the Isabella.

George Roessler, of the lobby stand in the Associated Oil Buildings, is indulging in the luxury of a two weeks' vacation.

Chick Elam has temporarily abandoned his stand in the Call Building to spend some little time in the East.

The Samuels Cigar stores of Oakland have opened a new branch on Broadway a little above Fourteenth street. It is a semi-basement place, under the Central Savings Bank. It has a beautifully tiled floor and very attractive fixtures.

The William Bercovich stand in Oakland, in one of the most attractive rooms in Oakland, with wide open front, and a barber shop in the rear that would do credit to any city, is building trade rapidly. They are preparing to push the inside counter out to the street, to catch more nickels from the casual passer-by.

The Open Front Idea

A wide-open front seems to be the attractive idea. The Ash store, at the corner of Eleventh street and Broadway is tearing out the larger part of one side so as to give a fine view of the whole interior and stock from all nearby points on the street.

S. Cerenich, proprietor of the Merrit Cigar Store, at the corner of Eighth and Franklin streets, in Oakland, is a little out of the business rush, but he has cut a wide doorway across the corner, and made his place look like a true smokers' parlor, and he is getting his money back in the shape of doubled business.

Tampa Tidings

Record Stamp Sales

TAMPA, Fla., June 9.—All records for stamp sales in a single day were broken Wednesday at the United States Internal Revenue Office here when Stamp Deputy Charles H. Moyer recorded total sales of $50,067.41. With the exception of $3.41 for documentary stamps, all of the sales were for tobacco stamps. The former record was a total of $40,000 sold on October 31 of last year.

Wednesday's record of $50,067.41 means that a total of 45,738,355 cigars left Tampa factories for consumers here and throughout the world. The total number of cigars were proportioned as follows among the various classes, which are from class A, low price, to class E, high price: Class A, 1,279,710; class B, 2,043,775; class C, 36,104,430; class D, 8,300,000, and class E, 27,840.

The establishment of Wednesday's new record is definite proof of the activity in the local cigar industry despite the fact that ordinarily there is a slight falling off in the manufacture of cigars at this time of the year, according to local officials.

Trade Notes

Fred Brooks, one of the best-known cigar men in the state, with headquarters in Jacksonville, arrived in Tampa this week for a few days' sojourn. He is the proprietor of one of the largest retail stores in Jacksonville, and also is heavily interested in the wholesale cigar and tobacco business.

J. D. Winn & Co. of Montgomery, Ala., has taken on the Sol Perfecto, a new size of the Ruy Lopez and Presidente Gottsegen of Gradiaz, Annis & Co. are pushing them moving lively.

Manuel Garcia of Perfecto Garcia & Bros. is in Havana selecting leaf.

Morris Scadron of the Nordac Cigar Co. is back from New York.

J. M. Knight, Chicago representative of the Havatampa Cigar Co., is visiting Tampa.

José Escalante is due back from Cuba on the morrow.

A. Guerra Diaz & Co. have placed La Flor as with W. T. Hicks of Birmingham, Ala., for the southern states territory.

Eddie Martin, representing V. Guerra Diaz & Co., in the Middle West, is keeping La Megas on the move.

Hill Bros.' Business Sold

MIAMI, Fla., June 9.—The wholesale cigar business of C. W. Hill at 104 W. Flagler street, known as Hill Bros. cigar store, has been sold to Monsalvatge & Cia., tobacco jobbers of Key West. The same organization and policy will obtain in the future, Mr. Hill said.

Mr. Hill has been in the tobacco and general merchandise brokerage business in Miami for 15 years. He said that he is undecided as to his plans for the future. Mr. Hill will retain his retail tobacco and confectionery store at the corner of First avenue and Flagler street.

Miami Maid Cigar Co., Inc.

MIAMI, Fla., June 9.—The Miami Maid Cigar Co. has been incorporated. Principal place of business, Miami. Capital stock, $10,000; limit of indebtedness, $25,000. General nature of business: the manufacture and sale of cigars, cigarettes, tobacco and all accessories and appurtenances, and everything pertaining to the cigar business, etc. Officers and directors: W. C. Neal, president and treasurer; A. W. Neal, vice-president; and A. A. Aurelio Torres, secretary.

Key West Key Notes

KEY WEST, Fla., June 9.—According to the report of the stamp deputy collector of Internal Revenue, the sale of stamps for the cigar business during the month of May amounted to $32,935.01. This is very good, considering that May is rather an off month in the trade.

The manufacturers are all optimistic over the prospects for a favorable summer. Orders are already beginning to increase, and it is expected that within a month or six weeks the cigar business will be back to its average output.

The industry has received several setbacks recently. High-class workmen are scarce. Many have gone to visit in Tampa, and although not a cigar city, Miami is appealing to many of our best workers, and they have removed there, and are employed in the factories in that city.

Then there is the general complaint of the tobacco not being up to the usual quality. This gives a great deal of extra work. This refers to the tobacco grown in this country. Then there is the high price on Cuban-grown tobacco, which, taken all in all, like the old gray mule, the tobacco business ain't what it used to be.

If the run on claro is not abated, there will be a general shortage of this grade of tobacco. The trade journals are calling attention to the impending shortage if the propaganda for claro keeps up. It is about the same as if every one who eats beef called for the same cuts. The cuts called for would assuredly increase in price, to overcome the loss occasioned by the non-use of other portions of beef. The price of claro will increase. Because of a light shade the smokers are of the opinion that the cigars are light. The manufacturers explain that there are other grades of tobacco, although not light in shade, that are really mild tobaccos. Thus the war for and against claro goes merrily on.

During the month of May there were 1,952,207 cigars manufactured here. Of this number there were 850,925 of class A, 250,466 of class B, 478,866 of class C, 357,000 of class D, and 14,950 of class E.

Taking in the Sights

Thomas Holzman, tobacco broker, of Lancaster, Pa., accompanied by his wife, is taking in the sights of Gotham this week, and, incidentally looking up old friends in the leaf market.

Connecticut Growers Had Unusually Wet Week

Tobacco Transplanting Hindered by Excessive Rains—Another "Cold Wave" Retards Growth of Plants—Progress of Crop Compares Favorably With Past Performances.

HARTFORD, June 9.—The past week has been decidedly wet and heavy rains have hindered setting out to a certain extent, as the heavier land was beaten down too hard to work without ripping up. Most of the transplanting was done on the lighter soils. The temperature became much colder and plants did not grow during the last part of the week.

On Wednesday afternoon a miniature hurricane hit a section of South Windsor and blew down a five-acre tobacco shed belonging to J. E. Shepard, on his Rye Street plantation. Trees were also uprooted and heavy rains fell. Although Spring has been backward, the farmers have succeeded in getting their plants to grow, and the work of transplanting compares favorably with the average amount set out at this date in other years.

Plants are plentiful with most growers, and they have to work hard to keep up with them. Some sections have a bad start of wildfire in the beds. Many growers are spraying their seed beds, which is minimizing the spread. It is noticed that most of the beds that show trouble are those which were not sprayed early in the season. Havana seed seems to show the wildfire more than broadleaf, and broadleaf more than shade.

During the coming week, with favorable weather conditions, the bulk of the acreage of the valley will be set out, and the growers will have launched their 1923 crop with the expectation that it will be the best crop grown for many years. Labor is scarce, commands high wages, and wages from $3 to $5 per day. Fertilizers are up. Stable manure is hard to secure and growers are afraid that the 1923 crop is going to be an expensive one all the way through.

Work on the 1922 crop has practically been completed and sampling is being done on the tobacco which is ready. It is reported that the tobacco is coming out fine the sweat very fine. Several parcels of broadleaf that are ready and sampled have been sold by the Connecticut Valley Association.

The placing of hail insurance by the association is now being done and over $5,000 has been placed at the reduced rate, which is $24 per acre instead of $50, formerly. This reduced rate, however, is only for members of the association.

The second primary election of a Board of Directors for the Connecticut Valley Association shows that the growers were very well satisfied with the old board, as in each district the old officials were again nominated. Under the by-laws, the three candidates receiving the highest number of votes in each district are the nominees in that district.

The primary ballot for the various districts resulted as follows:

1. A. E. Bidwell, Eugene House and Wm. Gildersleeve.
2. W. H. Meyers, W. G. Phelps and L. Tiker.
3. F. M. Hills, F. H. Ensign and Ed. Hadel.
4. L. P. Hickey, W. F. Driscoll and R. Devit.
5. W. N. Pinney, L. L. Grant and M. E. Thompson.
6. Donald Grant, E. A. Buckland and Chas. Maag.
7. Leslie Newberry, O. F. King and G. O. Case.
8. M. McGrath, George Bancroft and Dwight Newberry.
9. F. J. Miskill, R. M. Lasbury and H. A. Middleton.
10. Andrew Steele, A. D. Ellsworth and A. E. Pascoe.
11. M. M. Smith, M. G. Mullen and H. F. Fletcher.
12. J. W. Alsop, W. D. Wagner and J. C. Thompson.
13. C. P. Viets, N. E. Kendall and W. K. Rice.
14. S. F. Brown, C. D. Cannon and W. H. Drake.
15. G. A. Peckham, Robert Gregg and J. B. Cannon.
16. J. E. Phelps, H. N. Fuller and H. A. Henshaw.
17. J. W. Root, H. D. Haskins and E. S. Duda.
18. J. C. Field, J. F. Kokoski and M. P. Nelligan.
19. M. L. Proulx, C. W. Wade and G. M. Billings.
20. L. A. Crafts, Thomas Coffey and W. D. Cowan.
21. T. L. Warner, F. L. Whitmore and W. L. Hubbard.

The official ballot has been sent out and must be returned on or before noon, June 12. The new Board of Directors will hold their first meeting on June 19, at which time they will organize and elect a president, two vice-presidents, secretary and treasurer.

It was expected that there would be many changes in the Board of Directors, but indications are that the majority of the old board will be re-elected. The past year has been a hard one for them, as not only did they have the work of handling 85 per cent of all the stalk-grown tobacco in the valley, but they had to organize and secure warehouses. All this work had to be done in seven months.

Practically all the Havana seed has been sold, and a good portion of the low grades of broadleaf has not only been sold but has been shipped. There is a strong demand for shade-grown, and the acreage is being increased by at least 2,000 acres this year. Primed Havana is also in demand.

There is a better demand for dark grade than heretofore, and the manufacturer is beginning to recognize the fact that dark tobacco has more quality than some of the lighter grades, and blends well with fillers. Some local packers are going to grow their own tobacco. Among them is Max Newfield, who will put out over 100 acres of broadleaf.

Meyer & Mendelsohn and the American Sumatra Tobacco Co. have made arrangements with several different planters to grow broadleaf. Given favorable weather conditions next week, the larger portion of the 1923 crop will be set out and started, and it should begin favorably as the ground is full of moisture from last week's rains.—X. Reasons for Existence of the Tobacco Association

The question, "Why and wherefore and the reason for the existence of the Tobacco Association of the United States?" has frequently been asked, and it might be well in the first issue of this bulletin to attempt an answer thereto.

(1) Every trade of importance in the country has an organization to promote and safeguard its interest in a general way.

(2) Duly authorized representatives of organizations can present matters and get the ear of "the powers that be" where the efforts of those representing personal interests would be accorded scant consideration.

(3) Bringing together people engaged in the same line of business to consider matters of general interest has a direct bearing in developing better personal and business relations, the breaking up of petty jealousies and having every tendency to place business on a high plane of unselfish co-operation, thus establishing relations of business friendships and mutual confidence that are so necessary in conducting business successfully and without friction.

(4) Committees appointed to represent the trade on particular objects to be promoted, or some subject to be defeated, can be selected for their peculiar ability, and thus the best results can be obtained, the effect of which can be most far-reaching for the good of the trade.

Examples of what can be done have on more than one occasion been brought out most effectively in the Tobacco Association of the United States. The leading successful result of committee work in the Association was accomplished as far back as 1904. In that year the British government imposed, without notice, an advanced differential duty on strips, which would have injured the value of strips then in Great Britain and entailed a loss of many thousands of dollars upon the owners of these strips. The matter was at once taken up by the Tobacco Association with the Secretary of State, with the result that the unfairness of the retroactive feature of the duty was brought to the attention of the officials of the British government. Within a few weeks the matter was rectified and the advance duty made to apply only to strips that were exported after the new duty was announced.

Possibly of next importance in the way of results accomplished by the Association was in defeating the efforts of the railroads to do away with the any-quantity classification on leaf tobacco and make the minimum carload rate so high that a very large percentage of tobacco would take the less than carload rate. Had the carriers been successful in this matter the result would have been most disastrous to the tobacco trade.

The Tobacco Association has also been successful in this matter the result would have been most disastrous to the tobacco trade.

The Tobacco Association has also be successful in arranging with the railroa to put into effect special rates on ste and to haul tobacco in loose condition rates satisfactory to the trade. In fa in dealing with the railroads, the As ciation has never experienced great di culty in obtaining satisfactory resu where it could deal with persons in a thority and who would listen to the fa in a practical way before taking a po tion.

The adjustment of the Internal R enue laws about two years ago was complished through a committee fr the Tobacco Association. The regu tions adopted, without conference w tobacco people, were absolutely unint ligible and impractical in every way. T Tobacco Association, after working the matter for several months, employi counsel, etc., succeeded in having the r ulations so changed as to be worka and fairly satisfactory.

The Association has, from time to ti endeavored to advise farmers as to size of the crop that should be plant when in its opinion the acreage intend was too large to maintain a satisfact price. On occasions, however, the far ers were told that this was a selfish mo and it has been only among the m intelligent farmers that much has b accomplished in this respect.

This year the Association has been tive in the matter of exterminating bug and weevil, which has been preval to an alarming extent in several secti of the tobacco producing areas, and lieves that it has accomplished a trem dous good in this direction.

The Association has always stood good and uniform packing and has complished much good in this resp But there still remains much to be d along this line.

The setting forth of these accompli ments by the Association should be the earnest of the service it can ren with a larger and more active memb ship. With the employment of an time secretary and treasurer the Asso tion is in a better position than ever fore to immediately take action to p mote anything for the general interest the trade, or to combat any adverse l islation, or any action against the inter of the tobacco business.

What is set forth above will, it hoped, fully answer the question if tobacconist should wish to know whet it is worth while to become a member the Association.—*Bulletin of the Toba Association of the U. S.*

's' Co-operative Association will be ought directly into touch with the vast howledge and experimental skill of the ricultural colleges of those three ates if an educational division planned Clifton Rodes, manager of the Field rvice Department, is allowed to delop.

Working in conjunction with Dean homas E. Cooper, of the University of entucky, Mr. Rodes has devised a mplete system of extension work in the ark District. Two months ago he perted the initial part of his program by ganizing the first local units in the rk counties. The number of these all groups has grown rapidly until now ere are more than 300 functioning in counties covered by the association.

Weekly news letters are sent to these cals," and definite reports are received om them after each meeting in regard crop conditions in the territory. In s way the headquarters' officials keep direct touch with the members. The greatest possibilities of these units can-t be brought out, however, until the ucational division is functioning.

Scientific information about every ase of farming will be dispensed to the mbers of the association through these oup meetings. The value of crop diersification will be shown, and experts om the various colleges will assist the rmers in planning their crop rotation. he underlying purpose of this work will to make the farm return more profit its owner.

In speaking of the great possibilities of blic service along this line, R. E. Coo-r, Director of Warehouses, said:

"The function of the Dark Tobacco Growers' Co-operative Association is primarily to help the people in the territory it covers. Its specific duty is to market tobacco intelligently. If we can assist our members, however, along general agricultural lines, I think that is just as much our duty as it is to stabilize the market for tobacco. I believe it is very important that we have an agricultural division under Mr. Rodes.

'Every farm should be regarded as a factory that produces so much material for the use of the world. If the factory is operated efficiently and with good business judgment it will return a good profit to its owner. If, on the other hand, there is waste in its operations and lack of business foresight, there will be no profit. What we want to do is to improve our farms by using efficiency methods."

President Stone Reviews Burley Co-operative

(Continued from last week's issue)

The Higher Amounts Paid to Growers

"We believe that the organization of the Burley Tobacco Growers' Co-operative Association was the sole and only reason for the tobacco growers of the Burley district receiving $11,400,000 more for their 1921 crop than they were paid for their 1920 crop, although the 1921 crop was 40,000,000 pounds short of that of the previous year and of much commoner quality. We believe that the organization of the Burley Tobacco Growers' Co-operative enabled the growers in and outside of the Association to collect for their crops such prices as have practically added $37,500,000 to their return for the 1922 crop although that crop probably is 100,000,000 pounds larger than the crop of 1921. While it is true that the law of supply and demand is always a factor in prices, it is equally true that if that law is applied at the point of consumption and if the crop concerned is marketed in an orderly and business-like way prices are bound to be favorably affected. If there is a glut in the supply of potatoes in Chicago, they may sell for 30c a bushel while at the same time there may be a dearth of potatoes in New York and they may be worth $2.00 a bushel there. When you sign up your tobacco with the Burley Tobacco Co-operative you take it off the dumping market. It is not for sale in competition with the tobacco of your neighbors when the loose leaf markets open. It is for sale only when there is a demand for it and after your representatives have fixed a fair and profitable price upon it. If, by the operation of such a system, we have been enabled to add to the actual money paid the farmers in two years between $45,000,000 and $50,000,000 do you not regard any such system as that as being decidedly worth while? Do you not think that a system of marketing by which every man gets a fair price for his product and no man, however wealthy or influential he may be, gets any higher price for his product than the poorest farmer in the membership, is a fair and honest system of selling? Do you not believe that the institution of such a system means a better feeling among the poorer farmers, a feeling that their more prosperous neighbors have an interest in their welfare and in the welfare of their wives and children and because they are getting a fair deal and a fair price for their product they will have a better chance to become home-owners and they will be better and more loyal citizens of their state and of their nation.

Financial Backing

"The fact is that it is pretty generally known that but for our organization we would have been in the same helpless position in 1921 that we were in in 1920, when we had to take whatever we were offered for our crop, because we had no facilities for holding it until the market improved. Now, however, that situation is changed. We not only have the facilities for holding the tobacco, in the shape of 135 receiving plants all over the Burley district, but we have the financial backing of practically every bank in the burley district, of the Federal Reserve banks and of the Government itself through the War Finance Corporation. Individually, of course, we could not have these facilities. Two years ago no financial institution would have loaned us a dollar to buy warehouses, with tobacco

at the prevailing price. Unorganized, we could not hope for the backing financially of the Government or of the Federal Reserve Banks; united, we not only have the support of those banks but of the Federal Government. We have the buildings in which to hold the tobacco for which the market may not be ready and we have assurances of the financial aid, authorized by law, to enable us to hold any tobacco which the market cannot absorb."

Mr. Stone gave the growers warning that if an excessive crop was raised it would be impossible to hold up prices, "because a drop in prices invariably followed," he said, "over-production of any crop. In other words if you raise more than a normal crop, you are bound to pay the penalty in a low price for what you sell and in being further compelled to hold all the surplus produced until there is a demand for it."

Concerning the Grading

Mr. Stone said there had been some complaint of the grading at a number of points in the Burley district, that the association was endeavoring to train its own graders and that considerable progress had been made in that direction. He declared that, "in any event, the grading is ten times fairer and more intelligent than at any time under the old system in the Burley district, and that in most cases, complaints were made only in regard to a few baskets from each crop."

"These men are your own employees," said President Stone, "Quite naturally they want to please you, but they are instructed to grade every man's tobacco grade for grade as near alike as possible. The aim of our Association in the matter of grading is to give every grower equal and exact treatment in the handling of his tobacco. If any grower is not satisfied with his grade he has the right to tell the warehouseman to set his tobacco aside until the district grader can see it and, if he is not satisfied with the grade put on it by the district grader, he can then appeal to Ralph M. Barker, head of the grading department, who will send some one else to look at the tobacco and see that he gets fair treatment. If the grader is right in his grading, he will be upheld; if he is wrong, his mistakes will be corrected, but I would not have you forget that under the old system your tobacco was graded by the purchaser at whatever grade he chose to put on it and you had to accept it. Of course, you had the right to reject the offer but in few cases did it ever do you any good, as far as obtaining a better price for your tobacco was concerned.

"Under the co-operative system of marketing, your tobacco is graded by your grader. The price asked is based upon the cost of production and the visible demand. It includes labor, interest, taxes, every legitimate item of expense that goes into the raising of a crop. In fact, that is the only intelligent way of selling tobacco. You simply merchandi it like the hardware or dry goods deal or the grocer, who bases the price of goods on what they cost him to put the on his shelf. So long as you receive fair profit on your tobacco that is you can ask, all you could ask, all th we do ask, and no fair-minded ma whether he be tobacco buyer or man facturer or anyone else, could ask us take less than that as the return for o toil.

"Out of our tribulations of 1920 h come this great organization of ou with nearly 85,000 members, in five gre states. Our organization is formed exactly the same plan as other succes ful corporations in this country. T United States Steel Corporation does n call in its thousands of stockholders a direct them to go out and sell its finish products. The tobacco manufacturers not call in their stockholders and se them out into the tobacco district to b their requirements. If they did busine in that way we would not need any ass ciation.

"The stockholders elect a board of rectors, the best men they can find f that work, and this board of directo elects an executive head. They wo not think of themselves going out to s steel rails, or to buy tobacco, nor wo they even send their executive officia but they select the very best man they get, the best-posted, the man of wid experience, to organize a sales depa ment for them, and it is that policy t we are trying to carry out in the Bur association.

"The reason the manufacturer co get tobacco absolutely at his own pr was the method you used in selling y crops to him. The buyer did not n to take a single crop in Gallia county, he did not want to do so. He could into Lawrence, Scioto, Adams or Bro or any other county, and buy there your Gallia growers were not ready sell at his price. We all dumped our bacco at one season of the year, ev grower being a competitor of every ot grower. Inasmuch as you all wanted sell at once, eighty thousand men cli ing over each other to dispose of t crops, it was inevitable that the pri should be forced down. Under the n system, with only one man selling, stead of eighty thousand, you have a better chance to get a just and fair pri and you have gotten it the past t years."

Mr. Stone read the prices received the 1922 crop to the growers and w greeted with applause as he said:

"This tobacco has all been sold at y price and at your grade, according to samples shown the manufacturers' rep sentative. And in that matter, too, have done as any honest business conc would do. We have not attempted deliver to the manufacturers gra which they have not bought. We not meet our side of a contract to deli

ery Possible Aid Assured By Secretary Wallace

a letter under date of June 6, to F. e Pilis, vice-president of Patterson ., 565 Fifth avenue, New York, Hon. ey Wallace, Secretary of the De-rnent of Agriculture, wrote as fol-w:

have your letter of May 24, en-ng copy of the communication you dressed to Mr. Charles Dushkind, Gen-Counselor of the Tobacco Merchants' sociation, and requesting my opinion oints you discuss therein pertaining e tobacco industry. While some of matters touched upon in your letter ot come within the purview of this e.rtment, I may say that there can o doubt as to the soundness of your rks regarding the importance of the co crop in the agriculture of cer-states, and the urgent need for fuller eciation on the part of all concerned e important problems which confront armers in growing and marketing to-o under such conditions as will in-a fair margin of profit. In particu-r, there is great need of developing o stabilizing influences and condi-which will serve to more nearly tilize production on the farm and requirements.

n the past tobacco growers as a e have not had adequate informa-as to immediate and prospective rnercial demands for the various es and types of leaf tobacco, and e has been serious lack of facilities rderly marketing, especially in the er of warehouse storage under con-ns which would insure necessary ncial assistance in times of surplus uction, or when for any other reason enarketing situation was unfavorable.

s suggested in your letter to Mr. ukind, wisely directed efforts of co-erative associations of tobacco growers e solution of these problems, which e growers individually are manifestly le to cope with, merit the co-opera-of all branches of the industry, for apparent that accomplishment of the d in view will benefit manufacturers distributors as well as the farmers elves. This Department stands at all times to do everything with-power to improve the condition of obacco growers and to aid them in ing commercial requirements for leaf co."

Jungbluth Indorses Suggestions

Karl Jungbluth, president of Mac-ews & Forbes Co., under date of 4, wrote to Mr. de Pilis, as follows: wish to thank you for your favor e 28th ulto. covering copy of your of the 22nd idem to Mr. Chas. ukind, which I have read with in-ed attention.

"I think that letter deserves general commendation, especially the paragraph on page 2 under 'Tobacco Planting: I am in favor and have been for many years of organizing the tobacco planting' etc., likewise that on page 4: 'Unwise abuse of a situation in whatever direction it may be, forces reaction,' which may be considered an axiom. Further under the paragraph on page 5, 'Tobacco Industry: I believe that the main body of consumers in the United States fully realize that *price cutting cannot be carried on without a reduction in the quality*' etc. Also an axiom, and very true. Again under the paragraph on page 8, 'Distributing Organizations: Of course in every situation, I believe that a friendly understanding is preferable to any use of power or influence, and I am a great advocate of bringing tobacco growers, manufacturers and distributing organizations together around one table to discuss and defend their mutual interests.' It seems to me in that connection the manufacturers have not participated to any extent commensurate with their own particular and important interests."

Clarksville Average, $14.09

CLARKSVILLE, Tenn., June 9.—Auction sales on the Loose Leaf Tobacco Market here this week totaled 51,370 pounds. Sales for the season, 8,916,285 pounds. Sales to equal date last season, 12,486,135 pounds. Average price this week, $14.09. Average at same period last season, $15.83.— J. F. SMITH, Supervisor.

Hopkinsville Average, $10.65

HOPKINSVILLE, Ky., June 9.—Total sales for the week, 53,685 pounds; average price per 100 pounds, $10.65. Sold to date of 1922 crop, 14,035,895 pounds; average price per 100 pounds, $14.51. Sold to same time last year, 20,064,845 pounds; average price per pound, $14.57. —J. W. HANCOCK, President Hopkinsville Tobacco Board of Trade.

Nitrogen Necessary in Growing Tobacco

Annual applications of nitrogen in some fertilizer carrier are necessary on the 1,000,000 acres of land devoted to the production of flue-cured or bright tobacco in the United States and Canada.

For direct application or supply of this most important plant food the use of legumes and barnyard manure is very limited on account of their detrimental effect on the color of the cured leaf.

During the past five years field experiments have been conducted by the writer on the various sands, gravels and sandy loam soils on which bright tobacco is grown in order to test various sources of nitrogen for the production of this crop.

The color and maturity of the tobacco from all plots using organic sources of nitrogen compared well with the color and maturity of the tobacco from the nitrate of soda and sulphate of ammonia plots.

The tobacco from all tests made a crop average of about 48 cents per pound.

Paducah Prospects

PADUCAH, Ky., June 9.—The deliveries of loose tobacco have been light again this week which is due to the fact that farmers have been busy with planting this year's tobacco crop and doing other farm work, with which they were very much behind. There have been some deliveries though each day, and the association has been receiving and making deliveries on contract; also busy with prizing the unsold stock.

The Co-operative association officials from over the dark district met in Paducah Thursday and decided to make June 15 the closing date of their receiving houses. However, they will continue to accept tobacco from farmers until the crop is all delivered, but in order to make the second payment to farmers who have delivered, it is necessary to have a stopping point. They have announced that they will make the second payment about July 15 to all farmers that have made deliveries. Those deliveries later than June 15 can get the regular 40 per cent advance and a full settlement when all stocks have been sold. The meeting was composed of association officials and bankers from over the district and from all reports was very satisfactory. Arrangements were completed for financing through banks instead of through the Government loan system. No doubt when the second payment has been made an intensive campaign will put on for the purpose of getting oth members, also looking toward further d velopment in the way of instructi growers with reference to improving th methods of producing and handling th tobacco.

Practically all the old lugs in Mayfie were sold this week, there being abo 530 hogsheads in the lot. No doubt t greater part of them are for expo There are other lots amounting to 500 700 hogsheads in the hands of dealers th are for sale, but stocks are fast diminis ing.

The weather during the past week h been rather wet for farmers. Howev they have made wonderful progress in t planting of the tobacco crop. We es mate that fully 80 per cent of an avera crop has been planted and is looking we A great deal of the ground has be poorly prepared, but with proper cultiv tion and attention we see no reasons w we should not have a good crop of t bacco, and with favorable weather con tions during the next ten days a f average sized crop will be planted.—W B. KENNEDY.

Receipts Dwindle

HOPKINSVILLE, Ky., June 11.—Tobac receipts were very small on this mark last week. The loose floors sold 53,6

ands, while the Dark Tobacco Growers' Co-operative Association received at this ot about 75,000 pounds. As yet the ose floors have not decided upon a final long date for the season, and with the s ciation everything possible is being o to get the receiving houses closed by u 15, if it can be done. The rehan-dlig houses are all about through for h present season and are closing as fast s ey can, some of them having already l ed. The activity from now on for h next few weeks until sales end will b very little.

n the loose floor sales for the past ve, the average was $10.65. There was o ing to excite the buyers in the way f quality or quantity of offerings and r s were draggy.

ices for the week showed little vari-ti from previous reports, ranging: Tr h, $3 to $5. Lugs—Common, $5 to 7 medium, $7 to $9; good, $9 to $12; n $12 to $16. Leaf—Low, $10 to $12; o mon, $12 to $20; medium, $20 to $25. V good or fine leaf offered.

he weather continues wet, and if all o cco, for which land was ready, has o been set out, it is not because of lack f pportunity. In many sections rains a been so frequent that it has inter-er l with needed working of the crop, s ell as other crops, and otherwise in-er red with farm work.—M. E. Bacon.

Owensboro Outlook

Owensboro, Ky., June 2.—With fav-rable damp weather for re-planting to-ac this has progressed rather freely ing the week and a fair start has been ma on the crop. Planting should pro-ce very rapidly and by end of next week th-fourths of the crop should be on the ill and while this is somewhat later in last season it is not especially late lating.

Owensboro, Ky., June 9.—The weather ing the week has been fairly favor-bl for continued planting, and I would ace fully 80 per cent of the tobacco cr is planted at this time. Cultivation f the earlier planting has also been ne ed. Thus far, conditions along this m are fairly good.—J. S. Phelon, To-ac Broker.

Dark Tobacco Growers to Get Second Payment

Hopkinsville, Ky., June 11.—Members f the Dark Tobacco Growers' Co-opera-ve Association in the Stemming and Dark Fired Districts were delighted wh the announcement was made, fol-lowing the meeting of the board of di-rectors at Paducah on Thursday, that a second distribution would be made in bo two districts.

In both districts the second payment will be approximately 70 per cent of the first advance which averages about 40 per cent of the graded value of the crop. It was at first advocated that the second payment should equal the first, making a total of about 80 per cent, as was paid in the One Sucker district. But when it was learned that to do this would force the association to borrow more than 50 per cent of the loan value on all tobacco, this recommendation was altered.

"We are ready to lend the association any amount it desires," C. W. Bailey, banker of Clarksville, Tenn., said, "but we must keep this business on a firm financial foundation, and I am convinced that the payment of 70 per cent will be better." It was then definitely voted to make it on that basis.

The members in the Stemming district will receive their checks shortly after June 15. In the Dark Fired district the disbursement will be made between July 15 and August 1. It is estimated that more than 45,000 checks will be sent out in these two payments.

No crops delivered after June 15 will participate in the second distribution, it was announced. This does not mean that deliveries will be absolutely stopped at that time, but that crops delivered after June 15 will be too late to participate in the second payment, and will have to wait for the third and last distribution to come in the fall after the entire holdings have been sold, when they would get the balance due them in a lump sum. After June 15 only a few receiving houses will be continued, these located at the chief towns, as follows: Hopkinsville, Fulton, Clarksville, Paducah, Martin, Springfield, Mayfield, Paris and Russellville.

Growers in the Stemming district will receive about $660 000. Figures of the Dark Fired district were not given.

No time was set for a second distribution to the growers in the Green River district. A report submitted to the directors showed that $2,031,965.91 had already been advanced to members in that district, while only 11,634,927 pounds of the tobacco received had been sold for a total of $915,736.40, leaving the district indebted to the association to the amount of $1,116,229.51. John J. Hanratty, general manager of the association, explained that the reason that the Green River district tobacco has not sold fast is due to an overproduction of 50 per cent and that there is only one market for that type of tobacco and that market does not open in full until about September.

The meeting was attended by a number of bankers, who took a prominent part in the discussions, especially of finances. All of them expressed complete satisfaction with the financial condition of the association and confidence in its officials and their willingness to make further loans to

Why do they use Porto Rican?

Most successful manufacturers of the so-called "Mild Havana" cigars are those who have succeeded in making a cigar that has satisfied the largest percentage of smokers.

Realizing that the clear Havana was primarily a rich heavy cigar the leading concerns have vied with each other in trying to produce a blend that would suit the taste of the average smoker.

Practically all of the popular brands of mild cigars contain Porto Rican Tobacco either as the filler or expertly blended with Havana. That this makes the most satisfying "all-day smoke" is now universally conceded.

All barrels and bales of Pure Porto Rican Tobacco display a White Guarantee Stamp.

Porto Rico to the Front

If Porto Rican Tobacco is not eventually used in every good mild cigar made in this country, it certainly will not be the fault of Wm. L. Dannahower, the Agent in this Country of the Government of Porto Rico Tobacco Guarantee Agency.
